1.1.3 Total number of courses having focus on employability/ entrepreneurship / skill development offered during the year (2023)

Sl. No.	Name of the Course	Course Code	Name of the Programme	Activities with direct bearing on Employability/ Entrepreneurship/ Skill development	Year of Introduction
960	Medical Imaging Techniques-II	BME2416	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
961	Artificial Neural Network	BME2418	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
962	Artificial Neural Network Lab	BME2419	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
963	Microprocessor Systems	BME2501	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
964	Medical Image Processing	BME2513	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
965	Machine Learning	BME2514	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
966	Microprocessor Systems Lab	BME2504	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
967	Machine Learning Lab	BME2515	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
968	Medical Image Processing Lab	BME2516	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
969	Summer Internship Evaluation-I	BME2535	Bachelor of Technology (Biomedical Engineering)	Report Writing, Presentation, Viva-Voce	2011
970	Control Systems	BME2503	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
971	Control Systems Lab	BME2512	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
972	Digital Circuits and Systems	BME2507	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
973	Digital Circuits and Systems Lab	BME2509	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
974	Data Structure with C++	BME2517	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
975	Data Structure with C++ Lab	BME2518	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
976	Fuzzy Logic and Genetic Algorithm	BME2519	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
977	Microcontroller and its Biomedical Applications	BME2601	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
978	Biomechanics	BME2651	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
979	Clinical Need Assessment and Mini Project	BME2609	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Project writing, Lab Records	2011
980	Medical Imaging and Reconstruction Algorithms Lab	BME2610	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Practical, Lab Records	2011
981	Hospital Management System	BME2607	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
982	Therapeutic and Surgical Equipment	BME2611	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
983	Data Mining	BME2612	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011
984	Embedded System with Recent Technology	BME2710	Bachelor of Technology (Biomedical Engineering)	Quiz, Viva-Voce, Presentation, Case-Discussion, Simulation	2011

1.1.3 Total number of courses having focus on employability/ entrepreneurship / skill development offered during the year (2023)

Sl. No.	Name of the Course	Course Code	Name of the Programme	Activities with direct bearing on Employability/ Entrepreneurship/ Skill development	Year of Introduction
1976	Genetics	DBLS2707	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2014
1977	Basics of Research Methodology, Ethics and Research Communication	DBLS2739	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2014
1978	SIP/Internship/ Project/ Dissertation/Field Visit	NBLS2737	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Project writing, Presentation, Viva-Voce	2014
1979	Methods in Biology	DBLS2803	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2014
1980	Genetic Engineering	DBLS2804	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2014
1981	Genetics Engineering Lab	DBLS2805	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Practical, Lab Visit, Lab Record, Class Performance	2014
1982	Environmental Biotechnology	DBLS2807	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2014
1983	SIP/Internship/ Project/ Dissertation/Field Visit	NBLS2837	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Project writing, Presentation, Viva-Voce	2014
1984	Data Analysis & Visualisation using Software	DBLS2839	Bachelor of Science (Honors/ Honors with Research) in Biological Science	Written Test, Presentation, Viva-Voce	2014
1985	Introduction to Computers & Programming in 'C'	BTE2104	Bachelor of Technology (Biotechnology)	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2010
1986	Electrical Science	BTE2106	Bachelor of Technology (Biotechnology)	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2010
1987	Programming in C Lab	BTE2108	Bachelor of Technology (Biotechnology)	Practical, Lab Visit, Lab Record, Class Performance	2010
1988	Electrical Science Lab	BTE2110	Bachelor of Technology (Biotechnology)	Practical, Lab Visit, Lab Record, Class Performance	2010
1989	Engineering Chemistry Lab	BTE2113	Bachelor of Technology (Biotechnology)	Practical, Lab Visit, Lab Record, Class Performance	2010
1990	Object Oriented Programming in C++	BTE2203	Bachelor of Technology (Biotechnology)	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2010
1991	Object Oriented Programming in C++ Lab	BTE2205	Bachelor of Technology (Biotechnology)	Practical, Lab Visit, Lab Record, Class Performance	2010
1992	Engineering Graphics Lab	BTE2206	Bachelor of Technology (Biotechnology)	Practical, Lab Visit, Lab Record, Class Performance	2010
1993	Life Sciences	BTE2210	Bachelor of Technology (Biotechnology)	Quiz, Group Discussion, Presentation, Class Performance, Report Writing	2010

1.1.3 Total number of courses having focus on employability/ entrepreneurship / skill development offered during the year (2023)

Sl. No.	Name of the Course	Course Code	Name of the Programme	Activities with direct bearing on Employability/ Entrepreneurship/ Skill development	Year of Introduction
3459	Essentials of Healthcare System	DMHA2251	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3460	Basic Epidemiology	DMHA2351	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3461	Introduction to Healthcare Economics	DMHA2451	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3462	Basics of Quality Management	DMHA2551	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3463	Introduction to Medical & Health Laws	DMHA2501	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3464	Basics of Hospital Management Information System	DMHA2651	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3465	Introduction to Health Insurance and Medical Tourism	DMHA2601	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3466	Basics of Disaster Management	DMHA2602	Hospital Administration (OE)	Quiz, Presentation, Group Discussion, Class Performance	2023
3467	Communicative English	ENGL101	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3468	Applied Anatomy and Applied Physiology	ANAT105 & PHYS110	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3469	Applied Sociology and Applied Psychology	SOCI115 & PSYC120	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3470	Nursing Foundation-I including First Aid module	N-NF(I) 125	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3471	Self-study/ Co-curricular including First Aid module	SSCC(I) 130	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3472	Applied Biochemistry and Applied Nutrition & Dietetics	BIOC135 & NUTR140	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3473	Nursing Foundation-(I&II) including Health Assessment module	N-NF(II) 125	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3474	Nursing Foundation-(I&II) Practical	N-NF(II)P 125	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3475	Health/ Nursing Informatics & Technology	HNIT145	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3476	Self-study/ Co-curricular	SSCC(II) 130	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011
3477	Applied Microbiology and Infection Control including Safety	MICR201	Bachelor of Science (Nursing)	Quiz, Presentation, Practical, Nursing Lab, Report writing, Class performance	2011

DMGT2151	MANAGEMENT FOUNDATIONS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Management Foundation is an introductory course on management process from managers' perspective. The course seeks to help students acquire the requisite knowledge, skills and abilities needed to successfully manage the organization.

The course examines the logic and working of organizations and outlines the major functions of management. It details the different functions of management such as planning, organizing, staffing, directing, and controlling. The course also emphasizes on identification of critical issues and framing of strategies and scenarios required to execute management functions. The aim of the course is to orient the students in theories and practices of Management so as to apply the acquired knowledge in actual business practices.

Course Objectives

The objective of this course is to:

Provide a **gateway to the real world of management** and decision-making.
Help the **students gain understanding of the functions and responsibilities of managers**.
Impart **tools and techniques** to be used in the performance of the managerial job.
Enable students to analyse and understand the **environment** of the organization.
Help the students to develop cognizance of the **importance of management principles**

Course Outcomes

On completion of this course, the students will be able to:

CO1: Discuss the concepts related to management of business.
CO2: Demonstrate the roles, skills and functions of management.
CO3: Analyse effective application of MF knowledge to diagnose and solve organizational problems and develop optimal managerial decisions.
CO4: Recognise the complexities associated with management of human resources in the organizations and integrate the learning in handling these complexities.

Modules	Blooms level*	Number of hours
MODULE I- Introduction Concept, Nature, Scope and Functions of Management, Levels of Management, Evolution and Foundations of Management Theories - Classical and Neo - Classical Theories, Systems Approach to organization, Modern Organization Theory.	L1, L2	5
MODULE 2: Management Planning Process Planning objectives and characteristics, Hierarchies of planning, the concept and techniques of forecasting, Decision making – concepts & process, MBO, concept and relevance.	L1, L2, L3	5

DMGT2101	FINANCIAL & CORPORATE ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description

This course intends to introduce basic accounting principles and practices, train students on ledger posting, preparation of trial balance, and final accounts of sole trading business. It also focuses on accounting for shares/debentures issues and redemption apart from the valuation of goodwill and shares. This course would be useful for all those who are desirous of having an understanding and application of the financial dynamics of the business

Course Objectives

The aim of this course is to

1. Provide an understanding of the application of various principles and practices of Accounting.
2. Estimate annual financial statements of sole trading concerns and joint stock companies
3. Do the accounting for the issue and redemption of shares and debentures
4. Find the value of goodwill and calculate the share value

Course Outcomes:

On successful completion of the course, the students should be able to:

CO1: Understand and apply the principles of accounting and accounting standards followed in India and globally.

CO2: Able to prepare subsidiary books and final accounts of sole trading enterprises

CO3: Understand and do the accounting of issue and redemption of shares and debentures.

CO4: Analyse goodwill value under different methods of estimate and valuation of shares

Modules	Blooms level*	Number of hours
Module 1: **Introduction to Accounting** Meaning, need for accounting, users of accounting information, limitations of accounting, accounting concepts and conventions, Generally Accepted Accounting Principles, accounting standards, Indian GAAP vs US GAAP	L1,L2, L3	8
Module 2: **Accounting Process & Subsidiary Books** Double entry system-Rules for debit and credit, preparation of journal- ledger-trial balance. Introduction to subsidiary books-preparation of cash book-single column, double column, and three-columnar cash book	L1, L2, L3	12
Module 3:**Preparation of financial statements(sole trading concerns)** Preparation of trading account, profit and loss account, and balance sheet along with adjustments	L1, L3	10
Module 4: **Accounting for the Issue of shares and Debentures** Special features of joint stock companies, features of Companies Act, 2013, kinds of shares and debentures, accounting for issue and redemption of shares, accounting for issue and redemption of debentures, share buyback, underwriting	L1, L3,L4	7
Module 5:Valuation of goodwill and shares Good will – Meaning, Definition, Elements, Types and Methods of Valuation	L1,L2 L3,L4	8

SEMESTER-II

DMGT2251	MARKETING MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course, the basic concept related to marketing, marketing mix, marketing philosophies, consumer behaviour, segmentation & targeting, positioning strategies, marketing environment analysis are discussed in detail. Various strategies based on marketing mix such as product, price, place and promotion are also discussed in detail. New emerging marketing paradigms are discussed to give students an overview of current marketing situation. The main aim of this course is to give students an elementary knowledge of the fundamentals in the field of marketing.

Course Objectives

The objective of this course is to

1. Develop and help the students imbibe basic marketing principles and establishing an appreciation of contemporary realities.
2. Formulate a marketing plan including marketing objectives, marketing mix, strategies, budgetary considerations, and evaluation criteria.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain various definitions and concepts of marketing.
CO2: Analyse various models of marketing research.
CO3: Identify consumer behaviour and apply the understanding to real life business cases.
CO4: Discuss various steps of product development and pricing approaches.
CO5: Explain and discuss the distribution and logistics decisions in business.
CO6: Aware about changing paradigms and development in marketing concepts and theories.

Modules	Blooms level*	Number of hours
MODULE I- Introduction to Marketing Core concepts of marketing - the production concept, the product concept, selling concept and the marketing concept, societal marketing, relationship marketing.	L1, L2, L3	4
MODULE 2: Marketing Mix- Product & Price Meaning, Elements of Marketing Mix (Four P's); Product-Product Mix, Product Line, Product Lifecycle, New Product Development, Branding, Packing and Packaging, Labeling, Pricing – Objectives, Factors influencing Pricing Policy, Methods of Pricing	L1, L2, L3, L5	8
MODULE 3: Marketing Mix- Place & Promotion Physical Distribution–Meaning, Factors affecting Channel Selection, Types of Marketing Channels. Promotion – Meaning and Significance of Promotion, Personal Selling and Advertising, Public Relations, Publicity, Sales Promotion	L1,	7
MODULE 4: Analysing Market Environment **Market Environment**- Microenvironment – The company, suppliers, marketing intermediaries' competitors, public and customers. Macro Environment- Demographic, Economic, Natural, Technological, Political, Legal, Socio-Cultural Environment.	L1, L2, L3	10

DMGT2201	COST & MANAGEMENT ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course aims to give an understanding of how management accountants provide information to facilitate decision-making in an organization. It will acquaint students with various concepts of costing and highlight the decision making and control focus of managerial accounting. **Cost Accounting** is concerned with the computation and assessment of costs and expenses incurred in the acquisition or production of anything. It is about calculating the cost per unit using various costing approaches. Its primary goal is to assist managers in making decisions. **Management accounting** is concerned with the provision of relevant information to support decision-making, planning, cost control, and performance evaluation. Management accounting converts data into information, knowledge, and wisdom regarding the activities of a company entity. This is a step beyond cost accounting.

Course Objectives

The objective of this course is to

1. Understand and explain the conceptual framework of Cost Accounting and processes used to determine total and per unit cost.
2. To make known to the students to assess material, labour, and overhead cost
3. To enrich the knowledge of the learners in knowing in applying tools like cash flow statement for analysis of financial statements
4. To make the students in understanding how marginal costing is used in profit planning and management decision-making under different situations.

Course Outcomes to

On completion of this course, the students will be able to

CO1: Identify the principles of cost and management accounting and apply the same for the preparation of cost sheets and quotations

CO2:Assess material, labour and overhead cost of manufacturing firms

CO3: Analyse financial statements using appropriate techniques

CO4: Prepare budgets for business firms.

CO5: Evaluate business options and take informed decisions using marginal costing

Modules	Blooms level*	Number of hours
Module I: Cost Accounting Introduction – Classification of cost, Cost Accounting-Objectives and functions, Comparison of Cost Accounting with Financial Accounting and Management Accounting, Designing and installation of costing system, Uses of Management Accounting, Preparation of cost sheet and quotation	L1,L2,L3	10

Prof. (Dr.) Anil Kumar

SEMESTER-III

DMGT2351	ORGANIZATIONAL BEHAVIOR AND HUMAN RESOURCE MANAGEMENT	L	T	P	C
Version 1.1	For Approval	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course is constructed with an objective to create a deep and nuanced understanding of the behavioural patterns of individual in an organisational setting. Having understood the role of these assumptions, beliefs, values, would enable a leader to be effective and rational decisionmaker. The course is designed to make students interpret the impact of personality and environmental influences on the working of the individual with an organisational setting and equally harness the potentials of human capital with respect to various facets of job and develop his competencies to achieve individual and organisational goals. The focus of the course would be making students understand the motivation, individual differences, group culture and its impact of various functions of HR viz staffing, training & development, career development and appraisals. Thus, this course takes a practical approach that integrates contributions of behavioral sciences with the technical aspects of implementing the HR function in the real world.

Course Objectives

The objectives of this course are to:

1. Appreciate the impact of behavioral sciences on HR management functions.
2. Understand the implications of individual differences on work performance and their group behavior.
3. Understand the dynamics of organizational culture and structure.
4. Get familiarized with various elements of the HR function (e.g. – recruitment, selection, training, and development, etc.)
5. Relate and apply the principles and techniques of human resource management to the real life discussion of critical personnel issues.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Understand the significance of individual attributes in work settings.
CO2: Demonstrate a basic understanding of organizational dynamics, conflicts, and structure.
CO3: Interpret and relate the relationship between various HR functions and personnel growth.
CO4: Understand, analyze, the concepts of basic HR functions and their application in global context.
CO5: Understand the recent advancement in the context of OB and HRM

DMGT2301	ANALYTICAL DECISION MAKING	L	T	P	C
Version	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
To develop in students skills of analytical and logical reasoning this will be a great asset for them in their future careers. The course covers an array of topics and its content is split across two sections: Arithmetic Ability and Data Interpretation.

Course Objective:
The objective of this course is to
1. Develop in students skills of analytical and logical reasoning this will be a great asset for them in their future careers.

Course Outcomes
On completion of this course, the students will be able to
CO1: Demonstrate his knowledge for competitive exams and job interviews.
CO2: Apply the numerical ability and accuracy in mathematical calculations.
CO3: Explain and Interpret the data in graphical presentation
CO4: Apply logical reasoning to solve problems.
CO5: Apply Communication and writing skills in managerial reporting.
CO6: Demonstrate general knowledge and IQ for a good leader.

Modules	Blooms level*	Number of hours
Module I: Quantitative Reasoning I Number System & Number, Percentage method, Profit & Loss	L3	7
Module II: Quantitative Reasoning II Speed, Time & Distance, Ratio, Proportion, Mixtures & Allegations, Mensuration	L3	8
Module III: Data Interpretation Bar Graph/ Line Graph/ Pie Chart/ Table/ Caselets.	L2, L6	7
Module IV: Data Sufficiency & Logical reasoning Mathematical / reasoning based. Data Decoding: Analytical: Assumption, Courses of Action, Argument, Weak / Strong, Pictorial Analysis	L3	8
Module V: Verbal Ability Vocabulary based questions, English Usage, Grammar Types of statements and their relationship / Reversibility of idea, Re-arranging sentences of a paragraph, Paraphrasing, Fact, Inference, Judgment & deductions. Four types of Passages: The social science passage, The Science passage, the business passage & the entertainment passage.	L3	7

SEMESTER-IV

DMGT2451	FINANCIAL MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course focuses on a firm's financial goals and decisions to maximize shareholders' wealth. It examines financial concepts and analytical techniques, financial performance, time value of money, measurement of risk and return, capital budgeting, capital structure, short-term financial planning, working capital management, and international finance.

Course Objectives

The course aims to:

1. Familiar students to take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision.
2. An understanding and a feel for Financial decision making.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the theoretical models of financial management in the context of business development.

CO2: Describe and analyse financial decisions made by company managements using accounting and other financial information.

CO3: Analyse and consider time value of money while taking investment decisions.

CO4: Explain theoretical understanding to real life problems, in order to develop possible solutions.

CO5: Identify and apply best investment options estimating future cash flows

CO6: Identify the need of working capital requirement along with inventory management.

CO7: Define the dividend policies and apply theories to practical decisions for dividends.

Modules	Blooms level*	Number of hours
Module I: Introduction to Financial Management Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm	L1, L2	7
Module II: Financial Statement Analysis Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (no numerical)	L1, L2, L4	8
Module III: Valuation Concepts Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis	L2,L3	8
Module IV: Financing Decision Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.	L2	6

DMGT2401	LEGAL ASPECTS OF BUSINESS	2	0	0	2
Version 1.1	Latest Approved				
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course introduces the student to the legal and ethical framework of business. Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, and companies act. Upon completion the student should be able to identify legal and ethical issues that arise in business decisions and the laws that apply to them.

Course Objectives:

The objective of the course is to:

1. Understand introduces the student to the legal and ethical framework of business
2. Understand Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, and companies act.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the importance of law and legal environment of business.
CO2: Explain Indian Contract Act, 1872 and its main provisions.
CO3:Explain Indian Sale of Goods Act, 1930 and its main provisions.
CO4: Explain Negotiable Instruments Act, 1881 and its main provisions.
CO5: Explain Elements of Company Law and its main provisions.
CO6: Explain Consumer Protection Act 1986 and its main provisions

Modules	Blooms level*	Number of hours
Module I: Legal Environment of Business Importance of Law, Legal environment of business, Sources of law, Function of law**.**	L1, L2	7
Module II: Indian Contract Act, 1872 Nature and kinds of Contracts, Concepts related to offer, Acceptance and Consideration, Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Basic Elements of Law Relating to Agency, Guarantee and Pledge	L1, L2	7
Module III: Indian Sale of Goods Act, 1930 Sale and Agreement to Sell, Hire Purchase, Pledge, Mortgage, Hypothecation Lease, Goods, Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.	L1, L2	8
Module IV: Negotiable Instruments Act, 1881 Meaning of Negotiability and Definition of Negotiable Instruments, Features, Cheques, Bill of Exchange and Promissory Note, Holder in Due Course, Crossing of Cheques, Endorsement and Dishonour of Cheques	L1,L2	8

DMGT2402	MANAGERIAL ECONOMICS	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

Catalog Description

In this course the students are introduced with various basic concepts of managerial economics to make them familiarize with undergraduate level working knowledge. To begin with, introductory concepts of economics, consumer behavior and utility theory are discussed. Thereafter concepts related to demand analysis, demand forecasting, supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Following that various macroeconomic concepts and business phases along with their implications are analyzed in detail. Finally, various concepts related to market structure are discussed in detail. The overall aim of this course is to make the students familiar with working knowledge of the fundamentals of managerial economics as part of rational choice decision science.

Course Objectives:

The objective of this course is to:

1. Make students aware of theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision process.
2. Provide students with extensive exposure about the micro and macro level variables that influence business and managerial strategies of the firm and business cycles under which they operate.

Course Outcomes:

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, utility theory, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism.

CO2: Analyze the relevant production and cost concepts along with revenue in managerial decision process.

CO3: Describe the various forms of market structure and their implications in economy.

CO4: Discuss holistically the various macroeconomic aspects of business decision process along with complexities of business phases.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Managerial Economics Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.	L1, L2, L4	7
MODULE 2: Consumer Behaviour and Demand Analysis Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.	L1, L2, L4, L5	12

SEMESTER-V

DMGT2551	OPERATIONS AND SUPPLY CHAIN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
Operations and Supply chain are an integral contributor to an organisation's top and bottom line success. This course is based on a foundation in the theories and practice of management in businesses where operations and supply chain management are critical to success. These include product and process design, choosing appropriate technology, adopting efficient work methods, planning (including location and facilities layout), streamlining the flow of people and materials, and continuously improving the quality of the final product, in order to create internal and external customer value.

Course Objectives:
The objectives of this course are to:
1. Provide and practice of management in businesses.
2. Make them aware regarding planning.
3. Know product and process design, appropriate technology, adopting efficient work methods

Course Outcomes
On completion of this course, the students will be able to:
CO1: Demonstrate ability to systematically analyse operational and supply chain strategies in the light of the emerging supply chain frameworks and business models;
CO2: Develop business, operations and supply chain management strategies using strategic alignment model;
CO3: Effectively apply the alignment model and assess the strategic needs of business and supply chain networks;
CO4: Evaluate emerging operations initiatives for supply chain collaboration and their strategic implication;
CO5: Integrate organisational changes related to supply chain strategy implementation

Modules	Blooms level*	Number of hours
Module I: Introduction, Significance of POM in business, POM model and its elements, Scope of POM, History of POM.	L1, L2	2
Module II: **Competitive Advantage through operations management** Competitive Advantage through POM, Critical factors for gaining competitive advantage,Operations models, Operations strategy Case discussion	L1, L2, L3	3
Module III: **Product** Product – levels, types, categories Product design and development Commercial production and launch Support and up-gradation	L1, L2, L3	5

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

Manesar Gurgaon-122413

Module IV:Processes and Technology Types of productive systems Types of production processes Comparison of production processes Case discussion	L1,L2	5
Module V: Forecasting Significance of forecasting for operations management Forecasting techniques Mathematical models and their practical applications Forecasting errors. Laws of forecasting and how they affect operations	L1, L2	5
Module VI: Planning and Scheduling Operations Planning and Scheduling Long range and aggregate output planning Master production schedules Functional planning and production control Operations scheduling Case discussion **Module VII: Quality Management** Quality management SQT, AS, SQC, SPC and practical applications Case discussion	L1,L3,L6	5
Module VIII: Performance improvement in operations Latest techniques in operations management Just-In-Time technique Ergonomics and work study Case discussion **Module IX: Operations Management in the Indian context** Implementation of operations management techniques by Indian companies Case discussion	L1, l2	5
Module X: Supply Chain Management Operations capacity Capacity measures Capacity planning process Evaluation of alternatives for capacity expansion	L1, L2, L6	5
Module XI: Site Location and Layout Planning Factors affecting site location decisions Evaluation of site location options Objectives of layout planning Types of layouts Designing of layouts	L1, l2	5
Module XII: Supply Chain Management Basic Concepts Characteristics of business partners of a supply chain. Elements of supply chain management systems Demand management, customer service management Procurement, Outsourcing, supplier relationship management Physical distribution management, returns management	L1, l2	5

DMGT2501	STATISTICS IN RESEARCH	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
The course teaches students the basics of descriptive statistics. It sets a necessary foundation for the study of inferential statistics in the programme.

Course Objective:
1. This course will deal with all fundamental statistical methods of tools that the students have to use in economic analysis and decision-making problems.
2. The student will understand the concepts in descriptive statistics and be familiar with some commonly used statistical techniques like correlation, regression, index numbers and time series analysis.

Course Outcome:
Upon successful completion of the course, a student will be able to:
CO1: Define statistical methods and provide an insight into their uses in economics
CO2: Demonstrate the application of a range of statistical techniques to economic problems
CO3: Apply Skills in describing, analysing and interpreting statistical data
CO4: Comprehend the principles and assumptions on which these procedures are based
CO5: Apply the ability to analyse statistical data using MS Excel
CO6: Apply the ability to relate statistical methodology to economic enquiry

Modules	Blooms level*	Number of hours
Module I : Introduction: Basic concepts: Population, Sample, Parameter, Statistic, Frequency distribution, Cumulative frequency distribution; Graphic and diagrammatic representation of data; Techniques of data collection. Sampling vs. Population, primary and secondary data.	L1, L2, L3, L4, L5, L6	15
Module II: Central Tendency and Dispersion: Measures of Central Tendency: Mean, Median, Mode, Geometric mean, Harmonic mean; Measures of Dispersion; Range, Quartile deviation Mean deviation, Standard deviation; Skewness and Kurtosis, Moments.	L1, L2, L3, L4, L5, L6	12
Module III: Correlation and Regression: Correlation: Simple; Coefficient of correlation; Karl Pearson and Rank correlation; Partial and Multiple Correlation analysis; Regression analysis – Estimation of a regression line in a bivariate distribution, Least squares method; Interpretation of correlation and regression coefficients; Coefficient of determination.	L1, L2, L3, L4, L5, L6	12
Module IV: Time Series: Time Series Analysis - concept and components, determination of trend (Linear, Quadratic and Exponential) and seasonal indices	L1, L2, L3, L4, L5, L6	12

DMKT2502	INTERNATIONAL MARKETING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In today's dynamic global scenario people who succeed will have to learn the art of managing functions across domestic borders. Thus the course aims at exposing the students to the international business activities. The course would develop a general perspective about managing international business both in operational as well as strategic context.

Course Objectives

The objective of this course is to

1. Provide an overview of International Marketing Environment and marketing strategies for entering into international markets and managing overseas operations.
2. Explore all aspects of marketing from a global perspective to better respond to international opportunities and competitive situations.
3. Comprehend the International Marketing Decisions, based upon the combination of pricing, branding, promotion, and distribution elements.

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply basic international marketing concept, theories and understand the business environment.
CO2: Appraise strategic business analysis in order to develop appropriate international marketing objectives and strategies.
CO3: Identify, analyze, and evaluate data, information and evidence related to international business opportunities and threats relevant in the current world.
CO4: Develop a marketing mix suitable to a variety of international markets.
CO5: Prepare an international marketing plan.

DFIN2501	PRINCIPLES OF INVESTMENT MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Investment management is all about investment decisions and asset allocation. This means coming up with investment strategies and directing funds to property, equities, or debt securities on behalf of clients. Investment bankers, by contrast, are deal-makers. They work as high-level consultants and analysts for large companies to help with capital raising strategies.

Course Objectives

The aim of the course is to

1. Quip students with financial tools, which help in making decisions for investment in financial securities.
2. Impart a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

Course Outcomes:

On successful completion of this module a student should be able to:

CO1: Name different financial market structures, players including their roles and respective stakeholders

CO2: Develop a basic knowledge of key financial markets, major product types, and the scope for misconduct, agency failures and moral hazard

CO3: Identify the aims, role and structures to provide financial markets supervision including their limitations and recent criticisms

CO4: Identify the key theories for corporate governance and risk governance practices for financial institutions, and how governance mechanism may interact to impact performance or risk-taking

CO5: Examine the potential for ethical behaviour and improved conduct to fill the void where law and regulations fail to succeed

Modules	Blooms level*	Number of hours
Module I: Introduction to Investments Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a Good Investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.	L1,L2, L3	10
Module II: The Stock Markets in India Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, Brokerage Business	L1, L2, L3	10
Module III: Valuation of Securities Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation	L1, L3,L4	10

DMKT2601	CONSUMER BEHAVIOR	L	T	P	C
Course Version	Latest Approved	2	1	2	4
Pre-requisites/Exposure	Basic Marketing concept				
Co-requisites	NA				

Catalog Description:

The field of consumer behavior attempts to explain and predict the ways in which consumers think and behave in given situations. It answers questions like how does consumer interpret any piece of information, why does anyone buy, how can marketers predict consumer behaviours from their attitudes. For it, consumer behavior takes support from areas like psychology, economics, sociology and anthropology. This course emphasizes the on the understanding, application, and generalization of the elements of behaviour that influence the thoughts of a consumer, how he evaluates and how he acts.

Course Objectives :

The objectives of this course are to-

1: Make the student understand the concepts/theories pertaining to consumer behaviour and reveal its importance in the context of marketing.

2: Make the student well versed with the various factors that influence consumer behaviour.

3: Enable the student to examine the consumer decision-making process.

4: Provide with knowledge to the student so that he may describe the target market and determine the positioning strategy according to consumer characteristics and behaviour.

Course Outcomes (CO):

On completion of this course, the students will be able to-

CO1: Classify the dynamics related to human behavior and the elementary factors those influence the consumer's decision making process.

CO2: Identify and explain factors which influence consumer behaviour inclusive of society and culture.

CO3: Memorize the various concepts and discuss the rationale for studying consumer behaviour.

CO4: Demonstrate how concepts may be applied in formulating the marketing strategies.

Modules	Blooms level*	Number of hours
Module I: Introduction Consumer Behaviour: Definition and significance, Understanding consumer and market, Difference in individual buyer behaviour and organizational buyer behaviour, Market segmentation: lifestyle and demographic segmentation, usage segmentation, benefit segmentation, Product positioning.	L1, L2 ,L3	7
Module II: Environmental influences Culture: Meaning and Characteristics, Cross Cultural understanding of Consumer Behaviour, Subculture, Social Groups: Meaning and formation of a group, Reference groups, Influence of reference groups on consumer behaviour, Family: Lifecycle and it's significance on consumer behaviour, Family purchase decision process.	L1, L2,L3,	10

DMKT2602	RETAIL MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved:	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course, the concept related to retail management process, retail theories, consumer behaviour in retail, Merchandise management are discussed in detail. Various relevant concepts such as store management, visual merchandising are also discussed in detail. An overview of rural retailing is also given to students to make them understand rural markets. The main aim of this course is to familiarize students with the basics of retail industry and give them an overview about rural marketing practices.

Course Objectives

The objective of this course is to

1. Provide the student with a comprehensive view of retailing, an analysis of the retail environment and exposure to issues and developments in the industry.
2. Familiarize students with the decisions involved in running a retail firm and the concepts and principles for making those decisions.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the central role of retail in industrialised societies, and the impact of key market/retail trends upon this sector in the local and global contexts.

CO2: Identify the key stakeholders and the roles/responsibilities of retail towards these stakeholders

CO3: Apply appropriate frameworks to develop high level retail marketing strategy, and identify the role of marketing strategies in the building of brand equity and shareholder value in the retail industry

CO4: Evaluate the implementation of marketing strategy through the retail mix – including product and merchandise mix, pricing, location and store- design, promotions, and store management - to improve the total customer experience and retailer market competitiveness.

CO5: Interpret retail problems and be capable of critically evaluating and applying appropriate retail management models and theories to generate strategic and tactical solutions

Modules	Blooms level*	Number of hours
MODULE I- Introduction Nature, Scope and Importance of retailing, Retail competition theories, Retail management process, Influence of changing environment on retailing viz demographic changes, lifestyle changes, technology changes (e-business), Retail Environment.	L1, L2 ,L3,L4	6
MODULE 2: Consumer Behavior in Retailing Consumer Behavior in retailing, Buying decision process in retailing, Types of buying decision, Market segmentation for retailing, Generational cohorts	L1, L2,L3 L4	6
MODULE 3: Retail Marketing Strategy& Customer Service Types of retailers, Multichannel retailing, Retail strategy concept & its elements, Strategic retail planning process, Retail Pricing, Retail Promotion tool, Customer Loyalty Programme, Global retailing growth strategies & international market entry strategies, Advantages through customer service, Customer evaluation of service quality, GAP model for improving service. DMKT2603	DISTRIBUTION AND LOGISTICS MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Distribution and logistics management is a critical company function. Professionals in this field play a key role in fulfilling customer demands, ordering and managing inventory, controlling inbound and outbound shipments, reducing costs, saving time, and meeting company objectives. This course will show you how to create and operate a logistics function along with how to achieve success through a combination of strategies and tactics.

This course will cover physical distribution, warehouse selection, material handling, packaging, order fulfillment, customer service, inventory management, receiving, production stores, and returned goods. The course will also address key technology issues such as enterprise resource planning (ERP), bar coding, electronic data interchange (EDI), electronic commerce (e-commerce), and distribution resource planning (DRP).

Course Objective

The objectives of this course are to:

1. Provide detailed knowledge and understanding of logistics and distribution management.
2. Gain knowledge about channel management issues and helps the students in understanding the company's route to markets and the downstream part of value chain.
3. Explain the overall skill set and understanding to contribute to better and seamless logistics and distribution management within the organisation, thereby demonstrating talent and potential and increasing opportunities for growth and progression
4. Helps to integrate the channel flows into the channel design.
5. Explains the process of designing a customer-oriented marketing channel and develop the levels of service outputs to be delivered by a marketing channel.
6. Describe the logistics planning and strategy.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Outline the knowledge about roles and functions of distribution system.
CO2: Design and implement distribution channel strategy.
CO3: Describe the nature and degree of channel conflicts.
CO4: Describe the nature of logistics, review its history, and examine how it's currently used.
CO5: Explain how to set and manage an inventory budget system.

Modules	Blooms Level*	Number of hours
Module I: Introduction to Distribution Distribution System- Role, Scope, Functions & Structure, Types of channels, Levels of channels, Cost, Control and Customer service, Selection of Channels, partners, Motivation of channels, Factors affecting channel design. Channel Design and Implementation – segmenting, targeting, gap analysis, establishment of new channels or refining existing channels, Recent developments in information technology.	L1, L2	8

DHRM2602	COMPENSATION AND REWARD MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course examines the full range of compensation topics with emphasis on how compensation systems will likely impact productivity, equity, and the firm's ability to recruit and keep highly skilled and motivated employees. Topics include: job descriptiO4:on, analysis and evaluation systems; equity issues and requirements; design and use of wage and salary surveys; performance, merit and incentive pay systems; statutory and no- statutory employee benefit packages and systems; and administration of compensation systems.

Course Objectives

The objective of this course is to

1. Make you learn basic compensation concepts and the context of compensation practice
2. Familiarize students with the dynamics of wage and salary administration and current trends in India.
3. Highlights the importance of maintaining the capable education qualification, the value of developing their skills, and the significance of providing the appropriate atmosphere for them.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define and design compensation system.

CO2: Report on knowledge on Economic and Behavioural Dimensions of Compensation Management

CO3: Develop competitive compensation programs

CO4: Apply appropriate compensable factors to determine rates of pay.

DHRM2603	HR ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description: This course gives a detailed overview of HR Analytics and its applications. This course will enable the learners to bring improvements in the human resource functions in an organization using HR tools and analytics and create value in the business scenario.

Course Objectives:

1. Learn the basics of HR data and analytics in measuring HR's impact on driving business results.
2. Identify the right HR metrics (what to measure, types of measurements etc.,) aligning HR and business goals.
3. Turn metrics into analytics through the development of reports and dashboards, using statistical models and predictive analysis models for effective management decisions.
4. Use data in your day-to-day work and remain relevant in the ever-changing HR landscape.

Course Outcomes: On successful completion of this course students shall be able to:

CO1: Acquire knowledge about HR analytics and its usage and impact on business outcomes and the evolving role of HR as a business partner.
CO2: Learn to use HR data, reports, and metrics to make your day-to-day work more effective and impactful.
CO3: Apply appropriate internal and external HR metrics and indicators for better decision making.
CO4: Develop critical data-driven HR skills and HR Analytics related capabilities.
CO5: Understand the basics of HR analytics and how HR adds value through analytics.
CO6: Convert soft factors in a people management context into measurable variables across various domains.

Course Contents:

Module-I

Data Analytics and its advantages for business, Applications of analytics in HR operations, Introduction to HR Analytics, People Analytics & Workforce Analytics, Importance of HR Analytics, Key objectives of HR Analytics, an eight-step approach to HR analytics, Understanding the characteristics of HR Analytics, Strategic focus for HR Analytics, Critical stages of Talent life cycle, Stages in HR \Analytics - Descriptive, Diagnostic, Predictive and Prescriptive Analytics, Future of HR Analytics Problems faced by HR Analytics.

Module-II

Tools for HR analytics, components of HR analytics, sources of data, common data challenges and solutions, tidying the data, HR analytics modelling, HR analytics practices, HR Maturity Framework: From level 1 to level 5, HR Analytics Frameworks: (a) LAMP framework; (b) HCM: 21 Framework and (c) Talentship Framework, 5 overarching components of an effective Analytics framework.

Module-III

HR Metrics – Meaning , Objectives of HR Metrics , Historical evolution of HR Metrics., Advantages of using HR Metrics , The difference between Metrics and KPIs , HR process Metrics vs. HR outcome Metrics, Types of HR Metrics - Staffing Metrics, Training and Development Metrics, Compensation & Benefits Metrics ,Performance metrics, Employee Relations & Retention Metrics other important HR Metrics, Aligning HR Metrics with organizational Strategies, Goals and Objectives, Journey from HR

DFIN2601	CORPORATE TAX PLANNING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is designed to make the students aware of the corporate tax laws of India. Understanding the corporate tax laws and use it for tax planning is the basic objective of the course. The course is designed so that the students are aware of what business income is and when it gets taxed. The course also provides students with knowledge the difference between tax avoidance and tax planning and tax evasion.

Course Objectives

The objective of this course is to

1. Outline the corporate tax laws.
2. State the use of deductions of expenses to reduce the taxable income.
3. Apply the relevant sections of the Income Tax Act to compute taxable income and tax payable for a corporation

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify and explain the concept of tax planning, tax evasion and tax avoidance and describe how the provisions in the corporate tax laws can be used for tax planning.
CO2: Determine the residential status of companies and taxable income under business and profession.
CO3: Explain different types of incomes and their taxability and expenses and their deductibility.
CO4: Interpret the foreign financial transactions for taxation purpose.
CO5: Apply the indirect taxation laws and principles.
CO6: Relate the tax planning decisions with financial management decisions.

Modules	Blooms level*	Number of hours
Module I: Introduction to Tax Management Concept of tax planning, Tax avoidance and tax evasions, Corporate taxation.	L1,L2	5
Module II: Income from Business Residential Status of companies, Taxable income under Business and Profession, Computation of Profit and Gains from business profession, Deemed business profits, Assessment of Retail Business, Deemed incomes (cash credit, unexplained investments, un explained money and other assets, unexplained expenditures, investments and valuable articles not fully disclosed in books of accounts).	L1, L2,L3	10
Module III: Deductions Allowed Under Business and Profession Deduction Expressly allowed section 30-35, Depreciation deduction calculation, Setoff and carry forward of unabsorbed depreciation section 32(2). Determining Actual Cost43(1), Set-off and Carry Forward Losses, Bonus or commission to employees section, Interest on borrowed capital, Insurance premium 36(1(i)), Employees contribution to provident fund, Bad debts 36, Revenue expenditure incurred by statutory corporation, Banking transaction tax, Security transaction tax, Commodity transaction tax, provision for adminisibility of general deduction 37(1)	L1, L2	7

DFIN2602	ADVANCE CORPORATE FINANCE	L	T	P	C
Version 1.1	Latest approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The basic objective of this course is to acquaint the students with the latest developments in the field of corporate finance. This course aims at helping the studentsto learn advanced topics related to behavioral finance, corporate restructuring & corporate governance.

Course Objectives

The objective of this course is to

1. Understand the functions of corporate finance.
2. Gain insight into advancements in the corporate finance field.
3. Learn and integrate the various aspects for the financial decision-making.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify the key themes in corporate finance.
CO2: Identify and apply the valuation concepts and measures of financial performance.
CO3: Identify and explain the various aspects of Mergers and Acquisitions such as theories, Costs and benefits, Financial synergies and Tax planning.
CO4: Explain and analyse the interrelationship between finance,governance and ethics.
CO5: Apply the main concepts, research tools and methodologies of behavioural finance.
CO6: Analyse the relationship between strategic decision making and corporate financing decisions

Modules	Blooms level*	Number of hours
Module I: Introduction Objectives of Corporate finance,Shareholder wealth maximization, Agency Problems, Management Compensation & measurement of Performance.	L1,L2	8
Module II: Valuation Concepts **Valuation Models**, **Application of Valuation Model**, EVA/MVA, Balanced scorecard and other methods/measures of financial performance.	L1, L2, L3	7
Module III: Corporate restructuring Differential Efficiency & Financial Synergy: Theory of Mergers, Operating Synergy & Pure Diversification: Theory of mergers, Costs and Benefits of Merger, Evaluation of Merger as a Capital Budgeting Decision, Poison Pills, Turnaround Strategies, Tax Planning relating to mergers and Amalgamation	L1, L2	7
Module IV: Corporate Governance& Business Ethics **Implementation of Corporate Governance**, Ethics and finance, Ethical practices in market place, Corporate Responsibility, Social Audit and Ethical Investing	L1, L2, L4	8
Module V: Behavioural Finance Introduction and Expected Utility, Non-Expected Utility Preferences, A review of classical probability theory, Beliefs, Biases and Heuristics, Preferences and Anomalies in the Financial markets.	L1, L2, L3	7

DFIN2603	CORPORATE FINANCIAL REPORTING & ANALYSIS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board (IASB) are gaining recognition as Global Reporting Standards. While appreciating the emerging diversities and complexities in the world of accounting and the need for knowledge of IFRS in relation to the convergence of the Indian Accounting Standards.

Course Objectives

1. To enhance the knowledge of IFRS issued by IASB as well as to provide practical framework to the student in the globalization scenario.
2. To Acquaint with Indian Accounting Standard and different accounting standards at international level

Course Outcomes

On completion of this course, the students will be able to

CO1: Define bookkeeping and accounting.

CO2: Explain the general purposes and functions of accounting and the differences between management and financial accounting.

CO3: Analyze the main elements of financial accounting information – assets, liabilities, revenue and expenses

CO4: Identify the main financial statements and their purposes.

Modules	Blooms level*	Number of hours
Module 1: Brief overview of Indian Accounting Standard and different accounting standards at international level.Rational of Accounting Standards. IFRS Framework, Features of IFRS, Genesis of IFRS, Journey of IAS to IFRS, Advantage of adopting. IFRS.Challenges in Adopting IFRS.Difference between Indian GAAP and IFRS.	L1, L3,L4,	10
Module 2: Concept of Fair Value Accounting Concept of Adoption and convergence. Significant Difference between Ind AS and IFRS. Problem of Carve Out. Timeline for Adoption for Ind- As, Concept of Fair Value Accounting Presentation of Financial Statement as per Ind-AS1, Statement of Change in Equity, Cash Flow Statement and Ind AS 7.	L1, L3,L5	10
Module 3: Treatment of Inventories as per Ind AS 2-; Property plant and equipment- Ind AS 16, recognition, measurement, cost model, revaluation model, depreciation and impairment of assets and related disclosures, Revenue recognition Ind AS 18- scope, revenue from sales of goods, Services, interest royalties and dividends and disclosures, Financial Instruments: Presentation, Recognition and Measurement (Ind AS 32 and 39), Ind AS 33 Earnings per Share .	L1, L3,L6	15
MODULE 4: First time adoption of accounting standard: Recognition and measurement, Presentation and Disclosure	L1, L3	10

SEMESTER-VII

DMGT2701	DISRUPTIVE MANAGEMENT PRACTICES	L	T	P	C
Version 1.1		2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:
Disruptive management practice has upended traditional profitability models of industry after industry. Executives, focused on fine-tuning their current business models, often haven't seen the threats before their business landscapes are suddenly and permanently changed. Data and the increased development of technology have accelerated the rate of these massive changes. No industry is immune from competitors looking to grab market share through disruptive innovation.

Course Objectives:
This course will prepare leaders to harness the power of disruptive innovation before their competitors do. Students will gain a deeper understanding of what disruptive innovation is and will learn how to spot potential threats and opportunities in their own business. The coursework will focus on planning for disruption, using concrete steps to identify potential disruptions in the industry, and building the right culture to implement change. Students will be trained to view their business through a "jobs to be done" framework and use customer-centric problem-solving to discover new ideas and justify business changes.

Course Outcomes:
- Understand the forces of disruption that could impact their business and see how to spot them early
- Uncover a new approach for customer centricity to spot and shape new opportunities by applying the jobs to be done framework
- Learn, through practical examples, how to leverage new business models and potential application for their companies

Modules	Blooms level*	Number of hours
Module 1 - Imperative and Fundamental Concepts- Disruptive Innovation- Complementary Thoughts on Christensen's Theory of Disruptive Innovation, Theory of Disruption Waves or the Modulation of Disruption, Benefit of a Unified View on Disruption, Relativity of Disruption, and Typical Warning Signals for Disruptive Threats. Form Follows Function - Concept and Architecture.	L1, L2, L4	10
Module 2 - Market Understanding - Understanding Your Market, Market Segmentation for Multiple Segmentation Criteria, Identifying a Customers' "Job to Be Done", Differentiating Market Segmentation from Design Thinking, Creating Customer Value Through Design Thinking- Design Thinking, When to Use Design Thinking?, Defining Understanding, The Different Levels of Understanding, Phases of Design Thinking, Empathy for Individuals, Empathy in the B2B Context, Ideation, Prototyping and Testing, Scaling.	L1, L2,L4,L5	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana

Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3 - Design to Value (DTV) - Defining Value in Product Development, Lifecycle Cost, the Framework and measuring value. Modularization: A Strategic Lever for Innovation, Platform- Core Platform versus Inclusive Platform, Implementing a Modular Platform- Organizational Aspects and Strategic Aspects, Agile – agile project management, frameworks.	L1, L2, L4, L5	10
Module 4 - Requirement Focus - Kano Model, Pair-wise Comparison, Requirements Management, Tree Diagram, Empathy Map, Concept Focus- Functional Modelling, Morphological Matrix/Morphological Box, Modular Function Deployment, Onion Peel Model, Design for Variety, Customer Focus Group, Osborne Checklist. Cost Focus - Target Costing, Measurement Sheet, Lifecycle Cost model, Complexity Cost Calculation for Product Families, Business Plan.	L1, L2,L3, L4	10
Module 5 - General Description of Disruption Management- Approaches to Uncertainties, General Guidance of Disruption Management, Understanding your business needs, Identify data roles in the organization. Challenges: Identify hurdles to becoming a data-driven organization, Disruption vs. Optimization, Disruptive Business Applications.	L1, L2, L3, L4	10
Module 6 - Enterprise Agile- Common Approach to Enterprise Agile Adoption, Building Blocks of Your Lean-Agile Culture Transformation, Base line assessment, Waterfall Training Development, sponsor Agile, Agility in a World of Change and Complexity, Traditional Organization v/s Agile Organizations and challenges in agile.	L1, L2, L4	10

DMGT2702	ARTIFICIAL INTELLIGENCE IN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:

This course introduces to the exciting world of Artificial Intelligence (AI) and its transformative impact on business. We will explore the core concepts of AI, delve into the power of Machine Learning and Deep Learning, and discover how AI is revolutionizing various business functions. Through real-world case studies, hands-on activities, and discussions with industry leaders, you will gain the knowledge and skills to leverage AI for strategic decision-making, optimize operations, and gain a competitive edge in the job market.

Course Objectives:

- Understand the fundamentals of Artificial Intelligence and its applications in business.
- Master the key concepts of Machine Learning, including supervised and unsupervised learning algorithms.
- Gain practical experience through case studies, hands-on exercises, and guest lectures.
- Prepare for a successful career in the AI-powered future of business.

Course Outcome

CO-1: Explore the potential of Deep Learning and its impact on various industries.
CO-2: Analyze the ethical considerations and challenges surrounding AI implementation.
CO-3: Develop critical thinking skills to evaluate the business value of AI solutions.
CO-4: Develop a model for decision making for business decision.

Modules	Blooms level*	Number of hours
Module 1: Introduction to AI What is AI?, A brief history of AI, Different types of AI, Applications of AI in business, The impact of AI on jobs and the workforce	L1, L2	9
Module 2: Machine Learning What is machine learning?, Supervised vs. unsupervised learning, Common machine learning algorithms, Applications of machine learning in business, Case studies of companies using machine learning	L1, L2	9
Module 3: Deep Learning What is deep learning?, Neural networks, Convolutional neural networks (CNNs), Recurrent neural networks (RNNs), Applications of deep learning in business, Case studies of companies using deep learning	L1, L2	9
Module 4: AI for Decision Making How can AI be used to improve decision making?, AI-powered analytics and reporting, Predictive modeling and forecasting Optimization and simulation, AI-driven marketing and customer relationship management	L1, L2,L3	9
Module 5: The Future of AI in Management The ethical implications of AI, The challenges of implementing AI The future of work in an AI-powered world,How to prepare for the AI revolution	L1,L2,L5	9
P - Project; This would be the field project related to the subject where the student need to work outside the class collect the data and make report .	L3 , L4	15

DMGT2703	SUSTAINABILITY MANAGEMENT	L	T	P	C
Version 1.1	Latest Updated	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description: This cross-disciplinary graduate course provides a holistic overview of the environmental, social, economic and governance (ESEG) aspects of sustainability management and how to address them strategically to maximize business and product performance to meet changing stakeholder expectations. You will have the opportunity to learn about a variety of sustainability challenges faced by a variety of industry sectors, such as: mitigation and adaptation to climate change; energy, water, materials and resource management; minimizing supply chain risks that can derail business continuity. Internationally recognized frameworks, best practices, methodologies, tools and standards will be introduced as vehicles to tie the concepts together for practical application of solutions that support leadership in sustainability performance improvement.

Course Objectives: This course is for aspiring sustainability change agents who wish to gain a broader and deeper understanding of business and product strategic sustainability management from multiple stakeholder perspectives that make up the business-to-business value chain. This course is for you--- if you believe that businesses can and should be a thriving force for good in the world with products that do not harm the environment or social wellbeing. As a student, you seek to understand, facilitate and influence how stakeholders can collaborate to lead the development and implementation of transformative management systems and programs for a sustainably prosperous world for all.

Course Outcomes: At the end of this course, you will be able to:

• Identify the drivers, risks, challenges and opportunities associated with addressing sustainability management challenges.

• Apply the guiding principles and values that are a foundation for a holistic mind-set that guides an effective sustainability vision, strategy and implementation plans.

• Identify the factors in developing a credible business case for common sustainability management approaches that deliver actual improvements and breakthrough sustainability performance.

• Navigate common and conflicting needs, perspectives and interests of multiple stakeholder groups, cross-sector, cross-disciplinary, cross-functional and industry-specific perspectives.

• Promote strategic benefits of integrating and engaging the business value chain from suppliers through to end customers for achieving and communicating breakthrough sustainability outcomes.

• Link systems thinking and life cycle thinking to core business strategy and decision-making using product life cycle assessment based on international ISO standards.

Modules	Blooms level*	Number of hours
Module 1- Introduction – Global Challenges (Climate Change, Biodiversity Loss, Rising Inequality, and Resource Depletion), Sustainability- Global Sustainability Initiatives, Sustainable Approaches, SDGs and how are they linked ESG, Requirement of ESG, Value Creation Opportunities and Benefits From ESG, Setting up an ESG Strategy, Sustainable Supply Chain and its Decarbonisation, Sustainable Procurement.	L1, L2, L4	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 2 Introduction to Decarbonisation- Key terms, Decarbonisation Strategies, Challenges of Decarbonisation, Solutions and Initiatives, Role of Technology in Decarbonisation, Economic Impacts, Societal and Cultural Aspects, Measurement policies, Future prospects. Renewable Energy- Environmental Significance & its role in combating climate change, Sustainability & Resource renewal, Types of Renewable Energy, Importance of Renewable Energy, Challenges and Considerations, Future prospects -The role of Renewable Energy in a sustainable future, Call to action.	L1, L2,L4,L5	10
Module 3 Introduction - green hydrogen, Advantages & Disadvantages, The Impact of Green hydrogen, The Indian scenario, Uses of Green hydrogen. Introduction & history EV- Types of Electric vehicles, Advantages & Challenges, key components, Market trends, Indian Scenario, Future of EVs, Introduction & Types of Sustainable fuels, Advantages & Challenges, Indian Scenario.	L1, L2, L4, L5	10
Module 4 Introduction to Carbon Credits- Definition of Carbon Credits, Purpose and Significance, Historical Background, Types of Carbon Credits, Regulatory Framework, Carbon Credit Standards, Carbon Accounting and Measurement, Project Types Eligible for Carbon Credits, Carbon Credit Certification Process. Carbon Credit Market- Carbon Credit Pricing, Carbon Credit Trading Platforms, Voluntary vs. Compliance Markets, Challenges and Controversies, Benefits of Carbon Credits, Indian Energy Scenario and future outlook.	L1, L2,L3, L4	10
Module 5 ESG reporting- companies' Non- Financial Information report, use ESG reporting, improve your ESG sustainability reporting and score, Benefits of reporting, ESG reports includes, ESG score or rating, ESG regulations, Aligning with NGRBC Principles. BRSR- Nine Principles of BRSR, Key Concepts in BRSR, Frameworks and Guidelines for BRSR, The pillars of BRSR, Alignment of BRSR principles with the SDGs, Implementation and Benefits, Challenges.	L1, L2, L3, L4	10
Module 6 SEBI Circulars related to BRSR- Introduction to Cost of Capital and ESG- the Relationship between Cost of Capital and ESG, Factors Affecting Cost of Capital and ESG Integration, Measurement and Assessment, ESG Risk Management, Challenges and Trade-offs, Future Trends. Green Bonds- Market Growth, Types of Green Bonds, ESG Data Collection- Investor's Perspective on ESG- ESG Risk and Opportunity, GRI-Introduction, Structure, Benefits and Limitations of GRI, TCFD and its mission, Benefits of TCFD, Scenario Analysis, ISSB standards, GHG Emissions and Net Zero.	L1, L2, L4	10

CO2: Assess & adapt the traditional and contemporary techniques for forecasting HR Demand & Supply and understand the basics of job analysis with all its components.

CO3: Apply various methods of valuation of HR & as a diagnostic tool to gauge the current status of human capital in an organization.

CO4: Critically evaluate the strategic dynamics behind Merger &Acquisition and the crucial HR issues involved in it

Modules	Blooms level*	Number of hours
HRP & Corporate Strategies Introduction of HRP, process(macro,micro) involved in HR planning, SHRP model, Business plan and factors influencing requirements of Human Resources, Linking HR planning to strategic planning, Aligning HR Strategy to Business Strategy, Productivity of people, Work study.	L1.L2	09
Manpower Forecasting, Demand & Supply Manpower profiling and competency profiling, Forecasting HR needs, Forecasting models and applications, Determining HR demand, Ascertaining HR supply: Replacement Analysis, Markov Models, vacancy model, Advanced Manpower Planning - Use and Applicability of Statistical and Mathematical Models in Manpower Planning namely Cohort Analysis & Census Analysis.	L1.L2	12

DHRM2703	RECENT TRENDS IN HUMAN RESOURCE MANAGEMENT	L	T	P	C
Version 1.1	Latest Updated	2	1	2	4
Pre requisites exposure					
Co-prerequisites					

Catalogues Description:
In this course, the concept and theoretical perspectives, approaches and structure of industrial relations are discussed. The issues related to industrial disputes, trade unions, collective bargaining, discipline, grievance handling, industrial democracy, ILO, and labour policy and administration are discussed.

Course objectives: The objective of this course is to
CO-1: Understand and accommodate the recent trends in managing Human Resources.
CO-2: Analyze the developments in the field of Organizational Behaviour and its application at the workplace.
CO -3: Evaluate the concept of Sustainable Human Resources and its practices.
CO-4: Apply the knowledge of HR Analytics in HRM functioning.
Course Outcomes:
At the end of the course, the research scholar will be able to implement his/her aims and objectives of the research to be carried out

Modules	Blooms level	Number of arts
Module -1 Talent Management, Employer Branding, Change Management. Multigenerational Workforce, Employee Engagement, Contingent Workforce, Workforce Diversity, Work-life Balance, Trend in Compensation strategy, Glass Ceiling, Performance Evaluation, Knowledge Management, Succession Planning, Social Media in HRM functions.	L1,L2	9
Module -2 Inclusive Leadership, Pro-Environmental Behaviour, Psychological Contract, Spirituality at Workplace, Organizational Citizenship Behaviour, Resilience and Coping at Work, Psychological Contract, Mindfulness, Happiness and Subjective Well-being, Emotional Intelligence, Humanism at Work, Altruism. **Module -3** Green HRM, Pro-Environmental Behavior, Environmental Leadership, Triple Bottom Line HRM, Equality and Social Sustainability, Competencies required for sustainable HR roles, Sustainable leadership.	L1,L2	9
Module -4 Hybrid Work Model, Future of Work, Inclusive OB (Individual, Group and Technology), Application of HR Analytics and IOT at Workplace, Gamification Techniques, Virtual Training, Digital Culture.	L1,L2	9
Module -5 Layoff, Ergonomics Wellness, Moonlighting, Quiet hiring, great resignation, blind hiring, quiet quitting, loud quitting, AI in recruitment, Millennials and Generation Z, Mobile-friendly recruitment and Soft skills.	L1,L2	9
Tutorial: **Flip Classroom-** C - Case Discussion/ Presentation; HA - Home Assignment; S - Seminar; V - Viva; Q – Quiz	L3 , L4	15

DFIN2701	FINANCIAL ENGINEERING	L	T	P	C
Version 1.1		2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Finance has evolved as an exciting discipline in terms of innovations it has witnessed in recent past. This aspect known as Financial Engineering starts where financial analysis ends. The objective of the course is to enable the students to think in terms of innovative solutions to financial problems with particular emphasis on understanding new risks, which the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks

Course Objectives

1. To provide the necessary tools for participants who want to learn about managing corporate's financial risk and trading risk. The main focus will be on effective hedging using derivatives.
2. To gain knowledge on the workings of options, futures, and other derivatives and some structured products.

Course Outcomes

On the successful completion of this course the student will be able to:

CO1: Identify in terms of innovative solutions to financial problems with particular emphasis on understanding new risks,

CO2: Assess the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks

Modules	Blooms level*	Number of hours
Module I: Introduction Changing Environment and Increasing Price Risks, Financial Engineering as a response to Increased Risks, Types of Risks and Risk Management, Tools of Risk Management, Conceptual and Physical Tools of Financial Engineering, Effect of Speculation and Arbitrage on Market Efficiency, Derivative Market in India	L1,L2, L3	8
Module II: Futures and Forwards The Futures Markets, Buying and Selling Futures, Devising a Hedging Strategy Using Futures, Stock Index Futures, Value at Risk, Short Term and Long Term Interest Rate Futures, Foreign Currency Futures and Commodity Futures	L1, L3,L4	7
Module III: Swaps Structure of a Swap, Interest Rate Swaps, Currency of Swaps, Commodity Swaps, Other Swaps, Credit Risk, Role of a Swap Dealer.	L1, L3,L4	5

DFIN2702	FINANCIAL MODELING USING MS-EXCEL	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The MS-Excel being the basic tool for developing financial models particularly in the areas of derivatives, valuation, project financing and portfolio management; is covered in detail for achieving expertise skill in financial modeling.

Course Objectives

The course aims to:

1. Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like.
2. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel.
3. There are many features of model building that are common irrespective of the final model that one intends to build.
4. The course will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

Course Outcomes

On completion of this course, the students will be able to,

CO1: An integrated and application based knowledge of basic features of MS-Excel as is applicable for developing financial models based on financial functions of excel; are developed

CO2: The knowledge and learning of techniques of Simulation methods, number system required for developing Finance Models; are attained

CO3: Development of technique and skill for developing Financial Models for capital budgeting, portfolio construction and Risk Management and to attain command over problem solving through MS-Excel applications.

CO4: Attainment of skills and technique of developing advance Financial models using VBA technique of MS-Excel.

Modules	Blooms level*	Number of hours
Module I: Understanding the Basic Features of Excel : Introduction to Modeling, Introduction to Excel, Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models	L1, L2,L3, L5, L5, L6.	13
Module 2:Simulation using Excel : Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation	L1, L2,L3, L5, L5, L6.	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana

DFIN2703	FINANCIAL RISK MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course aims at helping the students to understand and apply a range of knowledge and skills necessary to function effectively as a risk manager. It will cover tools such as duration, portfolio beta, factor sensitivities, portfolio distribution analysis, and value at risk (VAR). It will also discuss how risk measurement tools can be used for active management of the risk/return profile of financial institutions.

Course Objectives

The objective of this course is to

- Provide an in-depth knowledge of the most recent risk identification, measurement and management techniques.
- Gain insights into risk management, trading, hedge funds, treasury management, financial corporate strategy, as well as regulatory supervision of financial institutions.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe different views on risk and explain how risk relates to expected return.
CO2: Apply financial risk management to create firm value.
CO3: Estimate and manage risks using different models.
CO4: Apply integrated risk management across firms and financial institutions.

Modules	Blooms level*	Number of hours
Module I : Foundations of Risk Management Basic risk types, measurement and management tools, Creating value with risk management; The role of risk management in corporate governance; Enterprise Risk Management (ERM); Financial disasters and risk management failures; The Capital Asset Pricing Model (CAPM); Risk-adjusted performance measurement; Multifactor models; Data aggregation and risk reporting; Ethics and the GARP Code of Conduct.	L1, L2,L3	7
Module II: Financial Markets and Products Structures and functions of financial institutions, Structure and mechanics of OTC and exchange markets Structure, mechanics, and valuation of forwards, futures, swaps, and options ; Hedging with derivatives; Interest rates and measures of interest rate sensitivity; Foreign exchange risk; Corporate bonds; Mortgage-backed securities	L1, L2,L3	8
Module III : Valuation and Risk Models Value-at-Risk (VaR)- VaR mapping • Expected shortfall (ES), Stress testing and scenario analysis • Option valuation • Fixed income valuation • Hedging • Country and sovereign risk models and management • External and internal credit ratings • Expected and unexpected losses • Operational risk	L1, L2,L3	7

DMGT2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATIONS	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description
This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives
The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes
On completion of this course, the students will be able to
CO1. Define criteria of good research, steps in research process, and data collection.
CO2. Identify different types of sampling and its purpose.
CO3. Conduct hypothesis testing for different types of samples and interpret the results.
CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DMGT2801	STRATEGIC LEADERSHIP	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
This course introduces the concept of Strategic Leadership. Strategic leadership is a practice in which executives, using different styles of **management**, develop a vision for their organization that enables it to adapt to or remain **competitive** in a changing economic and technological climate. Strategic leaders can use this vision to motivate employees and departments, fostering among them a sense of unity and direction to implement change within their organization. The main objectives of this course is to understand that how strategic leaders streamline processes, boost strategic productivity, promote innovation and cultivate an environment that encourages employees to be productive, independent and to push forward their own ideas and how to manage the make use of reward or incentive programs to encourage employees and help them reach their goals.

Course Objectives
The objective of this course is to:
1. Introduce students to the key concepts, tools and principles of Strategy and leadership and strategic Leadership.
2. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.

DMGT2802	BUSINESS ANALYTICS	L	T	P	C
Version 1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations. The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

C**ourse Objective:**

1. To investigate data to establish new relationships and patterns
2. To analyze the correlation between different variables for the predictive analytic and predictive modelling
3. To analyze the possibility of default and generate customer records
4. To understand and explore problems in business
5. To make the use of tools such as Excel and open source to interpret data
6. To use analytics to solve business problems

Course Outcomes

On successful completion of these programs, students will be able to:

CO1. Understand, integrate, and apply relevant knowledge and skills in a global context
CO2. Identify and describe complex business problems in terms of analytical models
CO3. Apply appropriate analytical methods to find solutions to business problems that achieve stated objectives
CO4. Translate results of business analytic projects into effective courses of action
CO5. Communicate technical information to both technical and non-technical audiences in speech, in writing, and graphically

Modules	Blooms level*	Number of hours
Module I: Introduction to Business Analytics Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis-Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel	L1, L2, L3	8
Module II: Data Mining Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.	L1, L2, L3, L5	8

Prof. (Dr.) Anil Kumar

Manesar Gurgaon-122413

Module III: Decision Making & Optimization Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis; Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.	L1, L2, L3, L4, L5, L6	9
Module IV: Big Data and Introduction to R Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns. Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression. Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning. Introduction to R Programing	L1, L2, L3, L4, L5, L6	10
Module V: Simulation using R and Excel Hands on Regression using R; Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)	L1, L2, L3, L4, L5, L6	10
Capstone Project.		15

DMKT2801	MARKETING RESEARCH	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

To facilitate the understanding and learning of fundamental concepts in the area of marketing research. To provide the students with research tools and techniques to conduct research and make effective analysis for effective decision making.

Course Objectives

The objective of this course is to

1. Develop understanding of marketing research and its value in analyzing consumers, markets, and the environment.
2. Familiarize students with basic of research and the research process and enable them in conducting research work, formulating research synopsis and report.
3. Familiarize students with Statistical packages such as SPSS/EXCEL and impart knowledge for enabling students to develop data analytics skills and meaningful interpretation to the data sets so as to solve the business/Research problem.

Course Outcomes

On completion of this course, the students will be able to

CO1: Plan and undertake qualitative or quantitative Market Research and demonstrate the ability to appropriately analyze data to resolve marketing issues.

CO2: Develop a market research design; including Identifying appropriate research approaches, preparing measurement instruments and designing a sampling approach and sampling frame

CO3: Create and conduct a small survey, applying a wide range of survey, scale, and questionnaire techniques.

CO4: Use contemporary statistical packages to calculate and report descriptive statistics from quantitative data and Interpret data analysis in the context of the identified business problem

CO5: Write the research results in written report and oral presentation formats

Modules	Blooms level*	Number of hours
Module- I: Introduction and Early Phases of Marketing Research **Introduction to Marketing Research**: Definition of Marketing Research; Classification of Marketing Research; Marketing Research Process; **Early Phases of Marketing Research-** Defining the Marketing Research Problem; Developing an Approach; Importance of Defining the Problem; Components of the Approach. DMKT2803	BUSINESS AT BOTTOM OF PYRAMID	L	T	P	C
Course Version	Latest Approved	2	1	2	4
Pre-requisites/Exposure	Basic Marketing concepts				
Co-requisites	NA				

Catalog Description:
The main aim of the course is to develop a deeper understanding of BOP markets among the students. This course will expose the students to the theoretical concepts and frameworks to better understand opportunities and challenges at the BOP markets. They will be in a position after the course to appreciate various complexities involved in doing business at the BOP

Course Objectives :
The objectives of this course are to-
1: Make the student understand the concepts/theories pertaining to marginalised customers living at the bottom of economy.
2: Make the student well versed with the various challenges that an organisation faces while serving BOP customer.
3: Enable the student to comprehend the process of branding.
4: Provide with knowledge to the student so that he may describe the target market and determine the product development strategy suitable to BOP customer.

Course Outcomes (CO):
On completion of this course, the students will be able to-
CO1: Memorize the cases along with various concepts related to BOP.
CO2: Identify and explain factors which influence organisation decision to enter BOP market.
CO3: Create suitable strategies to succeed in BOP market.

Modules	Blooms level*	Number of hours
Module-1: Introduction The Market at the Bottom of the Pyramid, The Power of Dominant Logic, The Nature of the BOP Market, Potential of BOP market in India ,Challenges offered by Indian BOP market.	L1, L2	9
Module-2: The Fortune at the Bottom of the Pyramid There Is Money at the BOP, Access to BOP Markets, The BOP Markets Are Brand Conscious, The BOP Market Is Connected, BOP Consumers Accept Advanced Technology Readily ;The Market Development Imperative :Create the Capacity to Consume ,The Need for New Goods and Services ,Trust Is a pre-prerequisite ;Benefits to the Private Sector , Developing Products and Services for the BOP, Twelve Principles of Innovation for BOP Markets. DFIN2804	BEHAVIOURAL FINANCE	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Behavioural Finance aims to: introduce students to behavioural theories of finance and financial decision making. ... extend students' knowledge of finance by demonstrating how "real" investors and markets do not always correspond to the rational agents and outcomes described in standard finance courses.

.

Course Objectives

1. To account for this behaviour, and covers the rationality or otherwise of people making **financial** investment decisions.
2. Understanding **Behavioural Finance** helps us to avoid emotion-driven speculation leading to losses, and thus devise an appropriate wealth management strategy
3. **Behavioural Finance** is a relatively new but growing field of **study** that applies **behavioral** psychology to economic decisions to help understand why rational people can often make irrational decisions when it comes to money and investing.
4. It seeks to explain this difference by examining investor behavior.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify persistent or systematic behavioural factors that influence investment behaviour

CO2: Understand and critically discuss the differences between a behavioural finance perspective and a traditional finance perspective

CO3: Understand and critically discuss the cognitive biases and errors of judgment that affect financial decisions

CO4: Critically evaluate behavioural influences involving individuals investment decisions

CO5:Critically evaluate behavioural influences involving corporate (executive) financial decisions

CO6:Critically discuss important developments in this new area and the associated practical insights they provide

Modules	Blooms level*	Number of hours
Module I: Psychology & Finance: Behavioral Finance an overview, Traditional vs behavioral finance, Morals & Ethics: why they matter in the business world.	L1,L2,	9
Module II:. Behavioral Corporate Finance: Corporate Governance, Loyalty issues, corporate ethics issues, agency conflicts**,** Behavioral portfolio management.	L1, L2,	9
Module III: Behavioral Biases in Finance: Definition of average investor; Behavioral Biases & corporate decision (valuation, capital budgeting, capital structure, dividend policy and Mergers & Acquisition), Belief biases: Biases of average investor, Forecasting Biases, overconfidence, self control, Limited attention and categorization.	L1, L2,	9
Module IV: Investors Decision: Perceived risk on financial product, Social interactions and positional concerns. The role of advisors, advertising, Emotion & Investment Decision, Investment decision cycle: judgment under uncertainty, group behavior: Conformism, herding, fatal attraction.	L1, L2, L4, L6	9

DMGT2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

SEMESTER-I

DMGT2151	MANAGEMENT FOUNDATIONS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Management Foundation is an introductory course on management process from managers' perspective. The course seeks to help students acquire the requisite knowledge, skills and abilities needed to successfully manage the organization.

The course examines the logic and working of organizations and outlines the major functions of management. It details the different functions of management such as planning, organizing, staffing, directing, and controlling. The course also emphasizes on identification of critical issues and framing of strategies and scenarios required to execute management functions. The aim of the course is to orient the students in theories and practices of Management so as to apply the acquired knowledge in actual business practices.

Course Objectives

The objective of this course is to:

Provide a **gateway to the real world of management** and decision-making.

Help the **students gain understanding of the functions and responsibilities of managers**.

Impart **tools and techniques** to be used in the performance of the managerial job.

Enable students to analyse and understand the **environment** of the organization.

Help the students to develop cognizance of the **importance of management principles**

Course Outcomes

On completion of this course, the students will be able to:

CO1: Discuss the concepts related to management of business.

CO2: Demonstrate the roles, skills and functions of management.

CO3: Analyse effective application of MF knowledge to diagnose and solve organizational problems and develop optimal managerial decisions.

CO4: Recognise the complexities associated with management of human resources in the organizations and integrate the learning in handling these complexities.

Modules	Blooms level*	Number of hours
MODULE I- Introduction Concept, Nature, Scope and Functions of Management, Levels of Management, Evolution and Foundations of Management Theories - Classical and Neo - Classical Theories, Systems Approach to organization, Modern Organization Theory.	L1, L2	5

DMGT2101	FINANCIAL & CORPORATE ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description

This course intends to introduce basic accounting principles and practices, train students on ledger posting, preparation of trial balance, and final accounts of sole trading business. It also focuses on accounting for shares/debentures issues and redemption apart from the valuation of goodwill and shares. This course would be useful for all those who are desirous of having an understanding and application of the financial dynamics of the business

Course Objectives

The aim of this course is to

1. Provide an understanding of the application of various principles and practices of Accounting.
2. Estimate annual financial statements of sole trading concerns and joint stock companies
3. Do the accounting for the issue and redemption of shares and debentures
4. Find the value of goodwill and calculate the share value

Course Outcomes:

On successful completion of the course, the students should be able to:

CO1: Understand and apply the principles of accounting and accounting standards followed in India and globally.

CO2: Able to prepare subsidiary books and final accounts of sole trading enterprises

CO3: Understand and do the accounting of issue and redemption of shares and debentures.

CO4: Analyse goodwill value under different methods of estimate and valuation of shares

Modules	Blooms level*	Number of hours
Module 1: **Introduction to Accounting** Meaning, need for accounting, users of accounting information, limitations of accounting, accounting concepts and conventions, Generally Accepted Accounting Principles, accounting standards, Indian GAAP vs US GAAP	L1,L2, L3	8
Module 2: **Accounting Process & Subsidiary Books** Double entry system-Rules for debit and credit, preparation of journal- ledger-trial balance. Introduction to subsidiary books-preparation of cash book-single column, double column, and three-columnar cash book	L1, L2, L3	12
Module 3:**Preparation of financial statements(sole trading concerns)** Preparation of trading account, profit and loss account, and balance sheet along with adjustments	L1, L3	10
Module 4: **Accounting for the Issue of shares and Debentures** Special features of joint stock companies, features of Companies Act, 2013, kinds of shares and debentures, accounting for issue and redemption of shares, accounting for issue and redemption of debentures, share buyback, underwriting	L1, L3,L4	7

DMGT2201	COST & MANAGEMENT ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course aims to give an understanding of how management accountants provide information to facilitate decision-making in an organization. It will acquaint students with various concepts of costing and highlight the decision making and control focus of managerial accounting. **Cost Accounting** is concerned with the computation and assessment of costs and expenses incurred in the acquisition or production of anything. It is about calculating the cost per unit using various costing approaches. Its primary goal is to assist managers in making decisions. **Management accounting** is concerned with the provision of relevant information to support decision-making, planning, cost control, and performance evaluation. Management accounting converts data into information, knowledge, and wisdom regarding the activities of a company entity. This is a step beyond cost accounting.

Course Objectives

The objective of this course is to

- Understand and explain the conceptual framework of Cost Accounting and processes used to determine total and per unit cost.
- To make known to the students to assess material, labour, and overhead cost
- To enrich the knowledge of the learners in knowing in applying tools like cash flow statement for analysis of financial statements
- To make the students in understanding how marginal costing is used in profit planning and management decision-making under different situations.

Course Outcomes to

On completion of this course, the students will be able to

CO1: Identify the principles of cost and management accounting and apply the same for the preparation of cost sheets and quotations

CO2:Assess material, labour and overhead cost of manufacturing firms

CO3: Analyse financial statements using appropriate techniques

CO4: Prepare budgets for business firms.

CO5: Evaluate business options and take informed decisions using marginal costing

Modules	Blooms level*	Number of hours
Module I: Cost Accounting Introduction – Classification of cost, Cost Accounting-Objectives and functions, Comparison of Cost Accounting with Financial Accounting and Management Accounting, Designing and installation of costing system, Uses of Management Accounting, Preparation of cost sheet and quotation	L1,L2,L3	10

Prof. (Dr.) Anil Kumar

DMBF2201	RETAIL BANKING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The basic objectives of the course are to acquaint the students with the concept of Retail Banking and the various products of Retail Banking. It will also develop our understanding about recent developments in digital banking, its products, issues and challenges.

Course Objectives

The objective of this course is to

1. Enhance the conceptual knowledge related to functional activities performed in Retail Banking
2. Develop capabilities to comprehensively understand the changing dynamics in retail environment and e-banking.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understand the concept of retail banking and its applicability

CO2: Explain the features of retail products(loans), procedures and issues including credit or debit cards

CO3: Analyse the changing dynamics of the retail environment with digital banking and its payment systems

CO4: Evaluate the recent developments like reverse mortgages, wealth management services, various Acts and their application in case of loan defaults etc.

Modules	Blooms level*	Number of hours
Module I: Introduction History & and definition of Retail Banking, the role of retail banking within the bank operations, the Applicability of various retailing concepts, the distinction between Retail and Wholesale and Corporate Banking	L2, L5,L6	8
Module II: Retail Products **Loans**: Eligibility, Purpose, Margin requirements, Amounts of Security, Disbursement, Moratorium, Prepayment issues, Collection or Repayments in case of Home Loans, Auto or Vehicle Loans, Personal Loans and Educational Loans**Credit or Debit Cards – Credit Cards vs** Debit Cards, Eligibility for having Cards, Purpose, Amounts, Margin, Security, the process of using the cards, Billing Cycle, Credit or Reward Points etc.	L4,L5,L6	13
Module III: Digital Banking: Various Digital Banking Products such as Cards, EMV technology, ATMs, Cash Deposit Machines, Internet Banking, Mobile Banking, Cash Re-Cyclers, POS terminals, Branchless Banking, Payment Systems, marketing of Digital Banking Products, New Developments in Digital Banking	L1,L3,L6	12

SEMESTER-III

DMGT2351	ORGANIZATIONAL BEHAVIOR AND HUMAN RESOURCE MANAGEMENT	L	T	P	C
Version 1.1	For Approval	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course is constructed with an objective to create a deep and nuanced understanding of the behavioural patterns of individual in an organisational setting. Having understood the role of these assumptions, beliefs, values, would enable a leader to be effective and rational decisionmaker. The course is designed to make students interpret the impact of personality and environmental influences on the working of the individual with an organisational setting and equally harness the potentials of human capital with respect to various facets of job and develop his competencies to achieve individual and organisational goals. The focus of the course would be making students understand the motivation, individual differences, group culture and its impact of various functions of HR viz staffing, training & development, career development and appraisals. Thus, this course takes a practical approach that integrates contributions of behavioral sciences with the technical aspects of implementing the HR function in the real world.

Course Objectives

The objectives of this course are to:

1. Appreciate the impact of behavioral sciences on HR management functions.
2. Understand the implications of individual differences on work performance and their group behavior.
3. Understand the dynamics of organizational culture and structure.
4. Get familiarized with various elements of the HR function (e.g. – recruitment, selection, training, and development, etc.)
5. Relate and apply the principles and techniques of human resource management to the real life discussion of critical personnel issues.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Understand the significance of individual attributes in work settings.
CO2: Demonstrate a basic understanding of organizational dynamics, conflicts, and structure.
CO3: Interpret and relate the relationship between various HR functions and personnel growth.
CO4: Understand, analyze, the concepts of basic HR functions and their application in global context.
CO5: Understand the recent advancement in the context of OB and HRM

DMGT2401	LEGAL ASPECTS OF BUSINESS	2	0	0	2
Version 1.1	Latest Approved				
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
This course introduces the student to the legal and ethical framework of business. Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, and companies act. Upon completion the student should be able to identify legal and ethical issues that arise in business decisions and the laws that apply to them.

Course Objectives:
The objective of the course is to:
1.Understand introduces the student to the legal and ethical framework of business

2.Understand Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, and companies act.

Course Outcomes
On completion of this course, the students will be able to
CO1: Describe the importance of law and legal environment of business.
CO2: Explain Indian Contract Act, 1872 and its main provisions.
CO3:Explain Indian Sale of Goods Act, 1930 and its main provisions.
CO4: Explain Negotiable Instruments Act, 1881 and its main provisions.
CO5: Explain Elements of Company Law and its main provisions.
CO6: Explain Consumer Protection Act 1986 and its main provisions

Modules	Blooms level*	Number of hours
Module I: Legal Environment of Business Importance of Law, Legal environment of business, Sources of law, Function of law**.**	L1, L2	7
Module II: Indian Contract Act, 1872 Nature and kinds of Contracts, Concepts related to offer, Acceptance and Consideration, Principles Governing Capacity of Parties and Free Consent, Legality of Objects, Performance and Discharge of Contract, Breach of Contract and its Remedies, Basic Elements of Law Relating to Agency, Guarantee and Pledge	L1, L2	7
Module III: Indian Sale of Goods Act, 1930 Sale and Agreement to Sell, Hire Purchase, Pledge, Mortgage, Hypothecation Lease, Goods, Different types of Goods, Passing of Property in Goods, Conditions and Warranties, Doctrine of Caveat emptor, Rights of an unpaid Seller.	L1, L2	8
Module IV: Negotiable Instruments Act, 1881 Meaning of Negotiability and Definition of Negotiable Instruments, Features, Cheques, Bill of Exchange and Promissory Note, Holder in Due Course, Crossing of Cheques, Endorsement and Dishonour of Cheques	L1,L2	8

DMGT2402	MANAGERIAL ECONOMICS	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

Catalog Description

In this course the students are introduced with various basic concepts of managerial economics to make them familiarize with undergraduate level working knowledge. To begin with, introductory concepts of economics, consumer behavior and utility theory are discussed. Thereafter concepts related to demand analysis, demand forecasting, supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Following that various macroeconomic concepts and business phases along with their implications are analyzed in detail. Finally, various concepts related to market structure are discussed in detail. The overall aim of this course is to make the students familiar with working knowledge of the fundamentals of managerial economics as part of rational choice decision science.

Course Objectives:

The objective of this course is to:

1. Make students aware of theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision process.
2. Provide students with extensive exposure about the micro and macro level variables that influence business and managerial strategies of the firm and business cycles under which they operate.

Course Outcomes:

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, utility theory, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism.

CO2: Analyze the relevant production and cost concepts along with revenue in managerial decision process.

CO3: Describe the various forms of market structure and their implications in economy.

CO4: Discuss holistically the various macroeconomic aspects of business decision process along with complexities of business phases.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Managerial Economics Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.	L1, L2, L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Consumer Behaviour and Demand Analysis Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.	L1, L2, L4, L5	12
MODULE 3: Theory of Production, Cost and Firm's Behaviour Meaning and concept of Production, Factors of Production and Production Function, Fixed and Variable Factors, Law of Variable Proportion (Short Run Production Analysis), Law of Returns to a Scale (Long Analysis), Concept of Cost, Cost Function, Short Run Cost, Long Run Cost, Economics and Diseconomies of Scale, Explicit cost and Implicit Cost, Private and Social Cost	L1, L2, L4, L5	9
MODULE 4: Macro Economics and Business Decisions Phases of Business cycle - Evil effects of cyclical fluctuations on business firms - Minimizing effects of Business cycles, Economic and Business forecasting - uses of economic forecasts - Methods of economic forecasting - selecting a forecast - evaluating forecasts.	L1, L2, L4	9
MODULE 5: Price and Output Decisions under Different Market Structures Price and Output Decisions under Perfect Competition, Monopoly and Monopolistic Competition - Pricing under Oligopoly - Kinked Demand Curve - Price Leadership - Pricing under Collusion.	L1, L2, L4	8
Field work	L1,L2,L3,L4,L5	15

SEMESTER-V

DMGT2551	**OPERATIONS AND SUPPLY CHAIN MANAGEMENT**	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Operations and Supply chain are an integral contributor to an organisation's top and bottom line success. This course is based on a foundation in the theories and practice of management in businesses where operations and supply chain management are critical to success. These include product and process design, choosing appropriate technology, adopting efficient work methods, planning (including location and facilities layout), streamlining the flow of people and materials, and continuously improving the quality of the final product, in order to create internal and external customer value.

Course Objectives:

The objectives of this course are to:

1. Provide and practice of management in businesses.
2. Make them aware regarding planning.
3. Know product and process design, appropriate technology, adopting efficient work methods

Course Outcomes

On completion of this course, the students will be able to:

CO1: Demonstrate ability to systematically analyse operational and supply chain strategies in the light of the emerging supply chain frameworks and business models;

CO2: Develop business, operations and supply chain management strategies using strategic alignment model;

CO3: Effectively apply the alignment model and assess the strategic needs of business and supply chain networks;

CO4: Evaluate emerging operations initiatives for supply chain collaboration and their strategic implication;

CO5: Integrate organisational changes related to supply chain strategy implementation

Modules	**Blooms level***	**Number of hours**
Module I: Introduction, Significance of POM in business, POM model and its elements, Scope of POM, History of POM.	L1, L2	2

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: **Competitive Advantage through operations management** Competitive Advantage through POM, Critical factors for gaining competitive advantage, Operations models, Operations strategy Case discussion	L1, L2, L3	3
Module III: **Product** Product – levels, types, categories Product design and development Commercial production and launch Support and up-gradation	L1, L2, L3	5
Module IV: Processes and Technology Types of productive systems Types of production processes Comparison of production processes Case discussion	L1,L2	5
Module V: Forecasting Significance of forecasting for operations management Forecasting techniques Mathematical models and their practical applications Forecasting errors. Laws of forecasting and how they affect operations	L1, L2	5
Module VI: Planning and Scheduling Operations Planning and Scheduling Long range and aggregate output planning Master production schedules Functional planning and production control Operations scheduling Case discussion **Module VII: Quality Management** Quality management SQT, AS, SQC, SPC and practical applications Case discussion	L1,L3,L6	5
Module VIII: Performance improvement in operations Latest techniques in operations management Just-In-Time technique Ergonomics and work study Case discussion **Module IX: Operations Management in the Indian context** Implementation of operations management techniques by Indian companies Case discussion	L1, l2	5
Module X: Supply Chain Management Operations capacity Capacity measures Capacity planning process Evaluation of alternatives for capacity expansion	L1, L2, L6	5

DMGT2501	STATISTICS IN RESEARCH	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
The course teaches students the basics of descriptive statistics. It sets a necessary foundation for the study of inferential statistics in the programme.

Course Objective:

1. This course will deal with all fundamental statistical methods of tools that the students have to use in economic analysis and decision-making problems.
2. The student will understand the concepts in descriptive statistics and be familiar with some commonly used statistical techniques like correlation, regression, index numbers and time series analysis.

Course Outcome:
Upon successful completion of the course, a student will be able to:
CO1: Define statistical methods and provide an insight into their uses in economics
CO2: Demonstrate the application of a range of statistical techniques to economic problems
CO3: Apply Skills in describing, analysing and interpreting statistical data
CO4: Comprehend the principles and assumptions on which these procedures are based
CO5: Apply the ability to analyse statistical data using MS Excel
CO6: Apply the ability to relate statistical methodology to economic enquiry

Modules	Blooms level*	Number of hours
Module I : Introduction: Basic concepts: Population, Sample, Parameter, Statistic, Frequency distribution, Cumulative frequency distribution; Graphic and diagrammatic representation of data; Techniques of data collection. Sampling vs. Population, primary and secondary data.	L1, L2, L3, L4, L5, L6	15
Module II: Central Tendency and Dispersion: Measures of Central Tendency: Mean, Median, Mode, Geometric mean, Harmonic mean; Measures of Dispersion; Range, Quartile deviation Mean deviation, Standard deviation; Skewness and Kurtosis, Moments.	L1, L2, L3, L4, L5, L6	12
Module III: Correlation and Regression: Correlation: Simple; Coefficient of correlation; Karl Pearson and Rank correlation; Partial and Multiple Correlation analysis; Regression analysis – Estimation of a regression line in a bivariate distribution, Least squares method; Interpretation of correlation and regression coefficients; Coefficient of determination.	L1, L2, L3, L4, L5, L6	12
Module IV: Time Series: Time Series Analysis - concept and components, determination of trend (Linear, Quadratic and Exponential) and seasonal indices	L1, L2, L3, L4, L5, L6	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

DMBF2501	PRINCIPLES OF INVESTMENT MANAGEMENT	L	T	P	C
Version 1.1		2	1	2	4
Pre-requisites/ Exposure					
Co-requisites					

Catalogue Description
Investment management is all about investment decisions and asset allocation. This course aims at helping the students to understand the investment strategies and directing funds to property, equities, or debt securities on behalf of clients. Investment bankers, by contrast, are deal-makers. They work as high-level consultants and analysts for large companies to help with capital raising strategies.

Course Objectives
The objective of this course is to:

1. Equip the undergraduate students with financial tools, which help in making decisions for investment in financial securities.
2. Impart a basic understanding of the influence of changing economic scenario on the decisions and important theories and models, techniques and regulations underlying these decisions.

Learning Outcomes:
On successful completion of this module a student should be able to:
CO1: Explain different financial market structures, players including their roles and respective stakeholders
CO2: Demonstrate the basic knowledge of key financial markets, major product types, and the scope for misconduct, agency failures and moral hazard
CO3: Identify and explain the aims, role and structures to provide financial markets supervision including their limitations and recent criticisms & the key theories for corporate governance and risk governance practices for financial institutions, and how governance mechanism may interact to impact performance or risk-taking
CO4: Analyse the potential for ethical behaviour and improved conduct to fill the void where law and regulations fail to succeed

Modules	Blooms level*	Number of hours
Module I: Introduction to Investments Investments: Introduction, Avenues for Investment including introduction to derivatives, Investments and Speculation, Features of a Good Investment programme, Process of Investment Decision Making, Risks involved in Investments including the concept of beta, Principle of Dominance.	L1, L2	6
Module II: The Stock Markets in India Nature and Functions of the Stock Market, OTCEI & BSE, NSE & Role of Depositories, Market Indices, Brokerage Business	L1, L2, L3	7
Module III: Valuation of Securities Bond Valuation and Analysis, Preference share Valuation and Analysis, Equity Share Valuation	L1, L2	8

SEMESTER-VI

DMGT2651	BUSINESS POLICY AND STRATEGIC MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
This course introduce to the students theories and practices of Strategic Management acquired knowledge in formulation and implementation of strategies for better decision-making.

Course Objectives
The objective of this course is to
1.Orient the students in theories and practices of Strategic Management.
2. Apply the acquired knowledge in formulation and implementation of strategies for better decision-making.

Course Outcomes
On completion of this course, the students will be able to:
CO1: Define the basic concepts and principles of strategic management and define the internal and external environment of business.
CO2: Recognize organizational strategies that will be effective for the current business environment.
CO3: Illustrate strategic approaches to managing a business successfully in a global context.
CO4: Analyze and evaluate critically real life company situations and develop creative solutions, using a strategic management perspective.

Modules	Blooms level*	Number of hours
Module I: Introduction Planning, Evolution of strategic management, Concept of Corporate Strategy: Intended & Emergent, Patterns of Strategy Development, Levels of strategy	L1, L2	8
Module II: Mission & Vision Concept of Strategic Intent, Vision and Mission, Formulation of Vision and Mission Statements, Different Perspectives on Vision and Mission, Business Definition and concept of a Business Model**.**	L1, L2	7
Module III: Strategic Analysis Industry Analysis, Competitor Analysis using Porter's 5-Forces model, Market Analysis, Environmental Threat and Opportunity Profile (ETOP), Internal Analysis: Building Organization Capability Profile and Strategic Advantage Profile (SAP), Building competencies using Value chain Analysis, Environmental Analysis and dealing with uncertainty, Scenario Analysis, SWOT Analysis	L1, L2	8
Module IV: Strategic Choice Strategic alternatives at corporate level: Expansion, Stability, Retrenchment and Combination, Strategic choice models for dominant single- Business companies- Strickland's Grand Strategy Selection Matrix, Model of Grand Strategy Clusters, Strategic choice models for multi-business companies- BCG, GE Nine Cell Matrix, Hofer's Model, Coevolving, Patching, Strategy as simple rules, Strategic alternatives at business level: Michael Porter's Generic competitive strategies, Building Sustainable Competitive Advantage	L1,L2	7
Module V: Strategic Implementation Operationalizing strategy and Institutionalizing strategy- Developing short-term	L1, L2	10

DMBF2601	E-BANKING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

Course Objectives

The objective of this course is to enable students to:

1. Understand the role of information and technology in banking.
2. Grasp the skill related to IT implementation in banking industry.
3. Make them aware about the various security measures and laws related.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the terminology related to E-Banking and Cyber threat and security issues.
CO2: Outline the cyber security threats and issues facing the Banking sector
CO3: Identify the basic elements of electronic payment systems.
CO4: Assess and review the legal issues and provisions of IT Act 2000.

Modules	Blooms level*	Number of hours
Module I: Introduction Concept, Definition & Origin of E-Banking, Scope and Type of E-Banking – Internet Banking, Mobile Banking etc., Issues and Challenges in E-Banking, Advantages and Limitations of E-Banking, Future of E-Banking in India.	L1, L3	8
Module II: Electronic Payment System Concept of Electronic Payment, Basic elements of electronic payment system, Types of Electronic Payment Systems – Electronic Cash, Electronic Cheque, EFT, RTGS, Credit Card, Smart Card, Concept of Payment Gateway and Paypal, Concept & Working of ATM.	L1, L2	7
Module III: Cyber Security and Legal Issues Cyber Crimes & Security, Cyber Attacks – Trojan, Virus, Worm, Spam, Hacking – Phishing, IP Spoofing, Safety Measures – Firewalls, Intrusion Detection, Systems, Secure Sockets Layer, Authentication & Assurance of Data Integrity, Cryptography, Digital Signatures, Overview of Information Technology Act – 2000	L1, L2, L6	6

DMBF2602	ADVANCED CORPORATE FINANCE	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

The basic objective of this course is to acquaint the students with the latest developments in the field of corporate finance. This course aims at helping the students to learn advanced topics related to behavioral finance, corporate restructuring & corporate governance.

Course Objectives

The objective of this course is to

- Understand the functions of corporate finance.
- Gain insight into advancements in the corporate finance field.
- Learn and integrate the various aspects for the financial decision-making.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify the key themes in corporate finance.
CO2: Identify and apply the valuation concepts and measures of financial performance.
CO3: Identify and explain the various aspects of Mergers and Acquisitions such as theories, Costs and benefits, financial synergies and Tax planning.
CO4: Explain and analyse the interrelationship between finance, governance and ethics.
CO5: Apply the main concepts, research tools and methodologies of behavioural finance.
CO6: Analyse the relationship between strategic decision making and corporate financing decisions

Modules	Blooms level*	Number of hours
Module I: Introduction Objectives of Corporate finance, Shareholder wealth maximization, Agency Problems, Management Compensation & measurement of Performance.	L1, L2	6
Module II: Valuation Concepts **Valuation Models**, **Application of Valuation Model**, EVA/MVA, Balanced scorecard and other methods/measures of financial performance.	L1, L2, L3	8
Module III: Corporate restructuring Differential Efficiency & Financial Synergy: Theory of Mergers, Operating Synergy & Pure Diversification: Theory of mergers, Costs and Benefits of Merger, Evaluation of Merger as a Capital Budgeting Decision, Poison Pills, **Turnaround Strategies**, Tax Planning relating to mergers and Amalgamation	L1, L2	10
Module IV: Corporate Governance& Business Ethics **Implementation of Corporate Governance**, Ethics and finance, Ethical practices in market place, Corporate Responsibility, Social Audit and Ethical Investing	L1, L2, L4	6
Module V: Behavioural Finance Introduction and Expected Utility, Non-Expected Utility Preferences, A review of classical probability theory, Beliefs, Biases and Heuristics, Preferences and Anomalies in the Financial markets.	L1, L2, L3	8

SEMESTER-VII

DMGT2701	DISRUPTIVE MANAGEMENT PRACTICES	L	T	P	C
Version 1.1		2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:
Disruptive management practice has upended traditional profitability models of industry after industry. Executives, focused on fine-tuning their current business models, often haven't seen the threats before their business landscapes are suddenly and permanently changed. Data and the increased development of technology have accelerated the rate of these massive changes. No industry is immune from competitors looking to grab market share through disruptive innovation.

Course Objectives:
This course will prepare leaders to harness the power of disruptive innovation before their competitors do. Students will gain a deeper understanding of what disruptive innovation is and will learn how to spot potential threats and opportunities in their own business. The coursework will focus on planning for disruption, using concrete steps to identify potential disruptions in the industry, and building the right culture to implement change. Students will be trained to view their business through a "jobs to be done" framework and use customer-centric problem-solving to discover new ideas and justify business changes.

Course Outcomes:

- Understand the forces of disruption that could impact their business and see how to spot them early
- Uncover a new approach for customer centricity to spot and shape new opportunities by applying the jobs to be done framework
- Learn, through practical examples, how to leverage new business models and potential application for their companies

Modules	Blooms level*	Number of hours
Module 1 - Imperative and Fundamental Concepts- Disruptive Innovation- Complementary Thoughts on Christensen's Theory of Disruptive Innovation, Theory of Disruption Waves or the Modulation of Disruption, Benefit of a Unified View on Disruption, Relativity of Disruption, and Typical Warning Signals for Disruptive Threats. Form Follows Function - Concept and Architecture.	L1, L2, L4	10
Module 2 - Market Understanding - Understanding Your Market, Market Segmentation for Multiple Segmentation Criteria, Identifying a Customers' "Job to Be Done", Differentiating Market Segmentation from Design Thinking, Creating Customer Value Through Design Thinking- Design Thinking, When to Use Design Thinking?, Defining Understanding, The Different Levels of Understanding, Phases of Design Thinking, Empathy for Individuals, Empathy in the B2B Context, Ideation, Prototyping and Testing, Scaling.	L1, L2,L4,L5	10

Prof. (Dr.) Anil Kumar

Module 3 - Design to Value (DTV) - Defining Value in Product Development, Lifecycle Cost, the Framework and measuring value. Modularization: A Strategic Lever for Innovation, Platform- Core Platform versus Inclusive Platform, Implementing a Modular Platform- Organizational Aspects and Strategic Aspects, Agile – agile project management, frameworks.	L1, L2, L4, L5	10
Module 4 - Requirement Focus - Kano Model, Pair-wise Comparison, Requirements Management, Tree Diagram, Empathy Map, Concept Focus- Functional Modelling, Morphological Matrix/Morphological Box, Modular Function Deployment, Onion Peel Model, Design for Variety, Customer Focus Group, Osborne Checklist. Cost Focus - Target Costing, Measurement Sheet, Lifecycle Cost model, Complexity Cost Calculation for Product Families, Business Plan.	L1, L2,L3, L4	10
Module 5 - General Description of Disruption Management- Approaches to Uncertainties, General Guidance of Disruption Management, Understanding your business needs, Identify data roles in the organization. Challenges: Identify hurdles to becoming a data-driven organization, Disruption vs. Optimization, Disruptive Business Applications.	L1, L2, L3, L4	10
Module 6 - Enterprise Agile- Common Approach to Enterprise Agile Adoption, Building Blocks of Your Lean-Agile Culture Transformation, Base line assessment, Waterfall Training Development, sponsor Agile, Agility in a World of Change and Complexity, Traditional Organization v/s Agile Organizations and challenges in agile.	L1, L2, L4	10

DMGT2702	ARTIFICIAL INTELLIGENCE IN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:
This course introduces to the exciting world of Artificial Intelligence (AI) and its transformative impact on business. We will explore the core concepts of AI, delve into the power of Machine Learning and Deep Learning, and discover how AI is revolutionizing various business functions. Through real-world case studies, hands-on activities, and discussions with industry leaders, you will gain the knowledge and skills to leverage AI for strategic decision-making, optimize operations, and gain a competitive edge in the job market.

Course Objectives:
- Understand the fundamentals of Artificial Intelligence and its applications in business.
- Master the key concepts of Machine Learning, including supervised and unsupervised learning algorithms.
- Gain practical experience through case studies, hands-on exercises, and guest lectures.
- Prepare for a successful career in the AI-powered future of business.

Course Outcome
CO-1: Explore the potential of Deep Learning and its impact on various industries.
CO-2: Analyze the ethical considerations and challenges surrounding AI implementation.
CO-3: Develop critical thinking skills to evaluate the business value of AI solutions.
CO-4: Develop a model for decision making for business decision.

Modules	Blooms level*	Number of hours
Module 1: Introduction to AI What is AI?, A brief history of AI, Different types of AI, Applications of AI in business, The impact of AI on jobs and the workforce	L1, L2	9
Module 2: Machine Learning What is machine learning?, Supervised vs. unsupervised learning, Common machine learning algorithms, Applications of machine learning in business, Case studies of companies using machine learning	L1, L2	9
Module 3: Deep Learning What is deep learning?, Neural networks, Convolutional neural networks (CNNs), Recurrent neural networks (RNNs), Applications of deep learning in business, Case studies of companies using deep learning	L1, L2	9
Module 4: AI for Decision Making How can AI be used to improve decision making?, AI-powered analytics and reporting, Predictive modeling and forecasting Optimization and simulation, AI-driven marketing and customer relationship management	L1, L2,L3	9

DMGT2703	SUSTAINABILITY MANAGEMENT	L	T	P	C
Version 1.1	Latest Updated	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description: This cross-disciplinary graduate course provides a holistic overview of the environmental, social, economic and governance (ESEG) aspects of sustainability management and how to address them strategically to maximize business and product performance to meet changing stakeholder expectations. You will have the opportunity to learn about a variety of sustainability challenges faced by a variety of industry sectors, such as: mitigation and adaptation to climate change; energy, water, materials and resource management; minimizing supply chain risks that can derail business continuity. Internationally recognized frameworks, best practices, methodologies, tools and standards will be introduced as vehicles to tie the concepts together for practical application of solutions that support leadership in sustainability performance improvement.

Course Objectives: This course is for aspiring sustainability change agents who wish to gain a broader and deeper understanding of business and product strategic sustainability management from multiple stakeholder perspectives that make up the business-to-business value chain. This course is for you--- if you believe that businesses can and should be a thriving force for good in the world with products that do not harm the environment or social wellbeing. As a student, you seek to understand, facilitate and influence how stakeholders can collaborate to lead the development and implementation of transformative management systems and programs for a sustainably prosperous world for all.

Course Outcomes: At the end of this course, you will be able to:

• Identify the drivers, risks, challenges and opportunities associated with addressing sustainability management challenges.

• Apply the guiding principles and values that are a foundation for a holistic mind-set that guides an effective sustainability vision, strategy and implementation plans.

• Identify the factors in developing a credible business case for common sustainability management approaches that deliver actual improvements and breakthrough sustainability performance.

• Navigate common and conflicting needs, perspectives and interests of multiple stakeholder groups, cross-sector, cross-disciplinary, cross-functional and industry-specific perspectives.

• Promote strategic benefits of integrating and engaging the business value chain from suppliers through to end customers for achieving and communicating breakthrough sustainability outcomes.

• Link systems thinking and life cycle thinking to core business strategy and decision-making using product life cycle assessment based on international ISO standards.

Modules	Blooms level*	Number of hours
Module 1- Introduction – Global Challenges (Climate Change, Biodiversity Loss, Rising Inequality, and Resource Depletion), Sustainability- Global Sustainability Initiatives, Sustainable Approaches, SDGs and how are they linked ESG, Requirement of ESG, Value Creation Opportunities and Benefits From ESG, Setting up an ESG Strategy, Sustainable Supply Chain and its Decarbonisation, Sustainable Procurement.	L1, L2, L4	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 2 Introduction to Decarbonisation- Key terms, Decarbonisation Strategies, Challenges of Decarbonisation, Solutions and Initiatives, Role of Technology in Decarbonisation, Economic Impacts, Societal and Cultural Aspects, Measurement policies, Future prospects. Renewable Energy- Environmental Significance & its role in combating climate change, Sustainability & Resource renewal, Types of Renewable Energy, Importance of Renewable Energy, Challenges and Considerations, Future prospects -The role of Renewable Energy in a sustainable future, Call to action.	L1, L2,L4,L5	10
Module 3 Introduction - green hydrogen, Advantages & Disadvantages, The Impact of Green hydrogen, The Indian scenario, Uses of Green hydrogen. Introduction & history EV- Types of Electric vehicles, Advantages & Challenges, key components, Market trends, Indian Scenario, Future of EVs, Introduction & Types of Sustainable fuels, Advantages & Challenges, Indian Scenario.	L1, L2, L4, L5	10
Module 4 Introduction to Carbon Credits- Definition of Carbon Credits, Purpose and Significance, Historical Background, Types of Carbon Credits, Regulatory Framework, Carbon Credit Standards, Carbon Accounting and Measurement, Project Types Eligible for Carbon Credits, Carbon Credit Certification Process. Carbon Credit Market- Carbon Credit Pricing, Carbon Credit Trading Platforms, Voluntary vs. Compliance Markets, Challenges and Controversies, Benefits of Carbon Credits, Indian Energy Scenario and future outlook.	L1, L2,L3, L4	10
Module 5 ESG reporting- companies' Non- Financial Information report, use ESG reporting, improve your ESG sustainability reporting and score, Benefits of reporting, ESG reports includes, ESG score or rating, ESG regulations, Aligning with NGRBC Principles. BRSR- Nine Principles of BRSR, Key Concepts in BRSR, Frameworks and Guidelines for BRSR, The pillars of BRSR, Alignment of BRSR principles with the SDGs, Implementation and Benefits, Challenges.	L1, L2, L3, L4	10
Module 6 SEBI Circulars related to BRSR- Introduction to Cost of Capital and ESG- the Relationship between Cost of Capital and ESG, Factors Affecting Cost of Capital and ESG Integration, Measurement and Assessment, ESG Risk Management, Challenges and Trade-offs, Future Trends. Green Bonds- Market Growth, Types of Green Bonds, ESG Data Collection- Investor's Perspective on ESG- ESG Risk and Opportunity, GRI-Introduction, Structure, Benefits and Limitations of GRI, TCFD and its mission, Benefits of TCFD, Scenario Analysis, ISSB standards, GHG Emissions and Net Zero.	L1, L2, L4	10

DMBF2701	FINANCIAL ENGINEERING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Finance has evolved as an exciting discipline in terms of innovations it has witnessed in recent past. This aspect known as Financial Engineering starts where financial analysis ends. The objective of the course is to enable the students to think in terms of innovative solutions to financial problems with particular emphasis on understanding new risks, which the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks

Course Objectives

1. To provide the necessary tools for participants who want to learn about managing corporate's financial risk and trading risk. The main focus will be on effective hedging using derivatives.
2. To gain knowledge on the workings of options, futures, and other derivatives and some structured products.

Course Outcomes

On the successful completion of this course the student will be able to:

CO1: Identify in terms of innovative solutions to financial problems with particular emphasis on understanding new risks,

CO2: Assess the changing scenario of finance is creating for individuals and firms and equip them with innovative tools of financial engineering called derivatives and skills to use them in forming effective strategies to cope with the changing environment and hedge against the financial risks

Modules	Blooms level*	Number of hours
Module 1: Introduction Changing Environment and Increasing Price Risks, Financial Engineering as a response to Increased Risks, Types of Risks and Risk Management, Tools of Risk Management, Conceptual and Physical Tools of Financial Engineering, Effect of Speculation and Arbitrage on Market Efficiency, Derivative Market in India	L1,L2, L3	8
Module 2: Futures and Forwards The Futures Markets, Buying and Selling Futures, Devising a Hedging Strategy Using Futures, Stock Index Futures, Value at Risk, Short Term and Long Term Interest Rate Futures, Foreign Currency Futures and Commodity Futures	L1, L3,L4	8
Module 3: Swaps Structure of a Swap, Interest Rate Swaps, Currency of Swaps, Commodity Swaps, Other Swaps, Credit Risk, Role of a Swap Dealer.	L1, L3,L4	7

DMBF2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DMGT2801	STRATEGIC LEADERSHIP	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
This course introduces the concept of Strategic Leadership. Strategic leadership is a practice in which executives, using different styles of **management**, develop a vision for their organization that enables it to adapt to or remain **competitive** in a changing economic and technological climate. Strategic leaders can use this vision to motivate employees and departments, fostering among them a sense of unity and direction to implement change within their organization. The main objectives of this course is to understand that how strategic leaders streamline processes, boost strategic productivity, promote innovation and cultivate an environment that encourages employees to be productive, independent and to push forward their own ideas and how to manage the make use of reward or incentive programs to encourage employees and help them reach their goals.

Course Objectives
The objective of this course is to:
1. Introduce students to the key concepts, tools and principles of Strategy and leadership and strategic Leadership.
2. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.
3. Develop an understanding of the concept of leadership and different styles of leadership and models.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how Leadership can be instrumental of achieving these objectives.

Course Outcomes
On completion of this course, the students will be able to
CO1: Identify and determine the concept of strategy, Mission, Vision and Strategic Management Process.
CO2: Analyze and understand the concept Leadership its theories, Styles and Models and Strategic Leadership
CO3: Analyze the concept of how Leadership can be instrumental in Strategic formulation and implementation
CO4: Analyze the concept of Strategic Leadership and Change Management and Agile Leadership and Counseling

DMGT2802	BUSINESS ANALYTICS	L	T	P	C
Version 1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations. The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

C**ourse Objective:**

1. To investigate data to establish new relationships and patterns
2. To analyze the correlation between different variables for the predictive analytic and predictive modelling
3. To analyze the possibility of default and generate customer records
4. To understand and explore problems in business
5. To make the use of tools such as Excel and open source to interpret data
6. To use analytics to solve business problems

Course Outcomes

On successful completion of these programs, students will be able to:

CO1. Understand, integrate, and apply relevant knowledge and skills in a global context
CO2. Identify and describe complex business problems in terms of analytical models
CO3. Apply appropriate analytical methods to find solutions to business problems that achieve stated objectives
CO4. Translate results of business analytic projects into effective courses of action
CO5. Communicate technical information to both technical and non-technical audiences in speech, in writing, and graphically

Modules	Blooms level*	Number of hours
Module I: Introduction to Business Analytics Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis-Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel	L1, L2, L3	8
Module II: Data Mining Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.	L1, L2, L3, L5	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Manesar Gurgaon-122413

Module III: Decision Making & Optimization Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis; Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.	L1, L2, L3, L4, L5, L6	9
Module IV: Big Data and Introduction to R Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns. Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression. Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning. Introduction to R Programing	L1, L2, L3, L4, L5, L6	10
Module V: Simulation using R and Excel Hands on Regression using R; Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)	L1, L2, L3, L4, L5, L6	10
Capstone Project.		15

DMBF2801	FINANCIAL MARKET & INSTITUTIONS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

A financial market is a **market** in which people **trade** financial **securities** and derivatives at low **transaction costs**. Securities include **stocks** and **bonds**, and precious metals. A financial institution (FI) is a company engaged in the business of dealing with financial and monetary transactions such as deposits, loans, investments, and currency exchange. ... Virtually everyone living in a developed economy has an ongoing or at least periodic need for the services of financial institutions. This course deals with the financial markets and institutions together.

Course Objectives

The objective of this course is to

1. To provide students with an introduction to the theory and practice of financial markets and institutions.
2. To helps students to gain a thorough understanding of the workings of financial markets and of financial instruments
3. To introduce the students to the management of financial markets, services and institutions in Indian context.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Outline the Indian Financial systems with various financial instruments.

CO2: Comparing the various investment avenues with risk and return trade off.

CO3: Recognize various instruments traded in capital markets, merchant & Investment Banking and apply stock trading techniques.

CO4. Review the process of leasing, hire purchase and consumer credit.

CO5: Gain a thorough understanding of the workings of financial markets , financial instruments and financial services.

. Modules	Blooms level*	Number of hours
Module I: Introduction to the Financial System Introduction to Indian Financial System, Assets and liabilities, portfolio, financial instruments, stocks and flows, lending, borrowing, and wealth, weakness of Indian Financial System	L1,	7
Module 2: Money Market Call money market, Treasury bills market, Commercial bills market, Commercial papers and certificates of deposits, Discount and Finance House of India, Government Securities Market, Recent developments.	L1, L2, L3	7
Module 3: Capital Market Impact of monetary policy, Industrial securities market, Primary market and Secondary market. Nature and role of financial system: Financial system and markets, Efficiency and stability, Technology, Government intervention in the financial system, SEBI, Discount market, 'parallel' markets, capital markets, stock markets, bonds, equities, mutual fund, hedge funds, private equity, financial crisis, custodial services, stock exchanges, depository services: NSDL, CDSL. DMBF2802	GENERAL BANKING OPERATIONS	L	T	P	C
Version 1	Latest Version	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description

The banking profession, today, is a nice career for all students from the commerce, economics, and accounts domain. For beginners, it's the first step to understand the global economy, discover marketplace challenges, and identify themselves with a rewarding career which provides them tremendous opportunities, both nationally and internationally. The objective of the general banking operations course is to build a pool of competent banking professionals, who can sustain the growing momentum of the banking sector and help to breach new standards of profit margins and customer responsiveness. The course also enhances the skills of existing professionals via a continued learning process. It goes on to create first-day-first-hour industry ready banking professionals

Course Objectives

The objective of this course is to:

1. describe the main trends in banking with regards to how the products and services are offered to customers, with a special focus on Indian banking system.
2. equip students on the basis of: a) customers needs, b) competition, c) technological developments influence the development of distribution channels.
3. identify the need and the development of electronic form of distribution and transforming products and services into electronic form benefits both the customer and the bank.

Course Outcome:

On completion of this course, the students will be able to:

CO1: provide an insight into the properties and the role of money and other financial assets within a modern monetary economy.

CO2: analyze banking products and services in relation to the bank customer's needs and describe the distribution channels.

CO3: identify suspicious activities and transactions and take appropriate measures according to the bank rules and procedures.

CO4: critically evaluate the functions and operations of modern central banks and international financial institutions.

Modules	Blooms Level	Number of Hours
Module 1: An Overview of Banking Definition of Banking; Roles of Banks: Intermediation, Payment System, Financial Services; Banking Services and Products: Payment and Remittance Services, Collection Services, Foreign Exchange, Deposit Services, Loan or Credit Services, Distribution, Collection of Taxes and Bills, Demand Accounts, Safe Keeping, Advisory Service; Banking Channels, Various Facilities.	L1, L2, L5	8

DMBF2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

SEMESTER-I

DMGT2151	MANAGEMENT FOUNDATIONS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Management Foundation is an introductory course on management process from managers' perspective. The course seeks to help students acquire the requisite knowledge, skills and abilities needed to successfully manage the organization.

The course examines the logic and working of organizations and outlines the major functions of management. It details the different functions of management such as planning, organizing, staffing, directing, and controlling. The course also emphasizes on identification of critical issues and framing of strategies and scenarios required to execute management functions. The aim of the course is to orient the students in theories and practices of Management so as to apply the acquired knowledge in actual business practices.

Course Objectives

The objective of this course is to:

Provide a **gateway to the real world of management** and decision-making.
Help the **students gain understanding of the functions and responsibilities of managers**.
Impart **tools and techniques** to be used in the performance of the managerial job.
Enable students to analyse and understand the **environment** of the organization.
Help the students to develop cognizance of the **importance of management principles**

Course Outcomes

On completion of this course, the students will be able to:

CO1: Discuss the concepts related to management of business.
CO2: Demonstrate the roles, skills and functions of management.
CO3: Analyse effective application of MF knowledge to diagnose and solve organizational problems and develop optimal managerial decisions.
CO4: Recognise the complexities associated with management of human resources in the organizations and integrate the learning in handling these complexities.

Modules	Blooms level*	Number of hours
MODULE I- Introduction Concept, Nature, Scope and Functions of Management, Levels of Management, Evolution and Foundations of Management Theories - Classical and Neo - Classical Theories, Systems Approach to organization, Modern Organization Theory.	L1, L2	5
MODULE 2: Management Planning Process Planning objectives and characteristics, Hierarchies of planning, the concept and techniques of forecasting, Decision making – concepts & process, MBO, concept and relevance.	L1, L2, L3	5

DMGT2101	FINANCIAL & CORPORATE ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description

This course intends to introduce basic accounting principles and practices, train students on ledger posting, preparation of trial balance, and final accounts of sole trading business. It also focuses on accounting for shares/debentures issues and redemption apart from the valuation of goodwill and shares. This course would be useful for all those who are desirous of having an understanding and application of the financial dynamics of the business

Course Objectives

The aim of this course is to

1. Provide an understanding of the application of various principles and practices of Accounting.
2. Estimate annual financial statements of sole trading concerns and joint stock companies
3. Do the accounting for the issue and redemption of shares and debentures
4. Find the value of goodwill and calculate the share value

Course Outcomes:

On successful completion of the course, the students should be able to:

CO1: Understand and apply the principles of accounting and accounting standards followed in India and globally.

CO2: Able to prepare subsidiary books and final accounts of sole trading enterprises

CO3: Understand and do the accounting of issue and redemption of shares and debentures.

CO4: Analyse goodwill value under different methods of estimate and valuation of shares

Modules	Blooms level*	Number of hours
Module 1: **Introduction to Accounting** Meaning, need for accounting, users of accounting information, limitations of accounting, accounting concepts and conventions, Generally Accepted Accounting Principles, accounting standards, Indian GAAP vs US GAAP	L1,L2, L3	8
Module 2: **Accounting Process & Subsidiary Books** Double entry system-Rules for debit and credit, preparation of journal- ledger-trial balance. Introduction to subsidiary books-preparation of cash book-single column, double column, and three-columnar cash book	L1, L2, L3	12
Module 3:**Preparation of financial statements(sole trading concerns)** Preparation of trading account, profit and loss account, and balance sheet along with adjustments	L1, L3	10
Module 4: **Accounting for the Issue of shares and Debentures** Special features of joint stock companies, features of Companies Act, 2013, kinds of shares and debentures, accounting for issue and redemption of shares, accounting for issue and redemption of debentures, share buyback, underwriting	L1, L3,L4	7
Module 5:Valuation of goodwill and shares Good will – Meaning, Definition, Elements, Types and Methods of Valuation of Goodwill, Methods of share valuation (Equity & preference shares)	L1,L2 L3,L4	8

DBUA2101	INTRODUCTION TO BUSINESS ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	0	0	4	2
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description:
Businesses are increasingly turning to data analytics to evaluate and improve business decisions. The ability to collect, analyze, and use data to inform important decisions is a critical skill for modern business students. This course will introduce students to the growing role of big data and the quantitative strategies to answer businesses questions. Students will know business cases in which data have helped businesses make better decisions, exposing them to real world applications of analytics to solve problems in accounting, economics, finance, hospitality, management, and marketing. The course will also introduce students to some basic technologies used in business analytics.

Course Objectives:

1. To understand the big picture of data analytics as a transformative force in the world of modern business
2. Explain the differences between predictive, prescriptive, and descriptive analytics, and the business questions that can be answered with each approach.
3. Identify opportunities to use analytics to address unstructured business problems.
4. To understand how these technologies are endangering the organization or industry in which we operate.

Course Outcomes:
Upon completion of this course, students will be able to:
CO1. Gain an understanding of how managers use data to formulate and solve business problems and to support managerial decision making.
CO2. Describe and interpret the basic concepts of business analytics. Evaluate business problems and determine suitable analytical methods.
CO3. Prepare raw data for business analytics, including partitioning data and attributing missing values.
CO4. Understand various descriptive and predictive business analytics techniques.
CO5. Explain about data mining, data modelling, DLM and disruption.

Modules	Blooms level*	Number of hours
MODULE 1: Overview of Business Analytics: Introduction to Analytics, Data Analytics, Data science & Business Analytics. Descriptive Analytics, Diagnostic Analytics, Predictive Analytics, Prescriptive Analytics, **Business Analytics-** Financial Analytics, Human Resource (HR) Analytics, Marketing Analytics, Health Care Analytics, Supply Chain Analytics, Analytics for Government and Non-profits, Sports Analytics, Web Analytics.	L1, L2, L4	10
MODULE 2: BUSINESS INTELLIGENCE: Overview of Using Data: Definitions and Goals-Types of Data, concepts of business intelligence and its role in decision making, types of decision making, tools for business intelligence, application of business intelligence. Cleansing of data, Data flows and introduction to data modelling.	L1, L2,L4,L5	11

DBUA2102	ANALYTICAL TECHNIQUES FOR DECISION MAKING	L	T	P	C
Version 1.1	Latest Approved	0	0	4	2
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

Analytical Technique are used for better decision making. This course will provide the better understanding of data and various techniques using excel. The ability to collect, analyze, and use data to inform important decisions is a critical skill for modern business students. Students will know business cases in which data have helped businesses make better decisions, exposing them to real world applications of analytics to solve problems in business.

Course Objectives

The objective of this course is to

This course provides students the fundamental concepts and knowledge needed to understand the emerging role of business analytics in organizations and enable students how to apply essential tools in a spreadsheet environment. Emphasis is on business applications, concept development and effective interpretation of models and results, rather than theory and calculations. Students use a computer software package for data analysis.

Course Outcomes

On completion of this course, the students will be able to

CO1: To understand the overview of business analytics

CO2: To create models for summarizing, visualizing, and understanding useful information from historical data.

CO3: To understand the decision analysis approaches for incorporating a decision maker's view about risk into decision making.

CO4: To analyse the data and use the dashboard for solving the problem

CO5: To formulate the regression model for better decision.

Modules	Blooms level*	Number of hours
MODULE I: Introduction Decision making, Business analytics defined, a cauterization of analytical methods and models: Descriptive analysis, predictive analysis, prescriptive analysis, big data. Business analytics in practice: Financial analytics, Human resource analytics, marketing analytics, supply chain analytics.	L1, L2, L3	8
Module 2: Getting Started with Excel Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells:Using autofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells, Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area. Adding hyperlinks to cells, inserting images, objects, equations and symbols.	L1, L2, L3	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3: Descriptive statistics Overview of using data: definitions and goals, types of data, modifying data in excel, modifying data in excel, creating distributions from data, measures of location, measures of variability, analyzing distributions, measures of association between two variables.	L1, L2, L3, L4, L5,L6	8
Module 4: Charts & Formulas in Excel Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators. **Data Visualisation:** Overview of data visualization, tables, charts, advanced data visualization, data dashboards.	L1, L2, L3, L4, L5, L6	11
Module:5 Functions in Excel Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions.Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.	L1, L2, L3	8
Field work	L1, L2, L3L4, L5	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

SEMESTER-II

DMGT2251	MARKETING MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course, the basic concept related to marketing, marketing mix, marketing philosophies, consumer behaviour, segmentation & targeting, positioning strategies, marketing environment analysis are discussed in detail. Various strategies based on marketing mix such as product, price, place and promotion are also discussed in detail. New emerging marketing paradigms are discussed to give students an overview of current marketing situation. The main aim of this course is to give students an elementary knowledge of the fundamentals in the field of marketing.

Course Objectives

The objective of this course is to

1. Develop and help the students imbibe basic marketing principles and establishing an appreciation of contemporary realities.
2. Formulate a marketing plan including marketing objectives, marketing mix, strategies, budgetary considerations, and evaluation criteria.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain various definitions and concepts of marketing.
CO2: Analyse various models of marketing research.
CO3: Identify consumer behaviour and apply the understanding to real life business cases.
CO4: Discuss various steps of product development and pricing approaches.
CO5: Explain and discuss the distribution and logistics decisions in business.
CO6: Aware about changing paradigms and development in marketing concepts and theories.

Modules	Blooms level*	Number of hours
MODULE I- Introduction to Marketing Core concepts of marketing - the production concept, the product concept, selling concept and the marketing concept, societal marketing, relationship marketing.	L1, L2, L3	4
MODULE 2: Marketing Mix- Product & Price Meaning, Elements of Marketing Mix (Four P's); Product-Product Mix, Product Line, Product Lifecycle, New Product Development, Branding, Packing and Packaging, Labeling, Pricing – Objectives, Factors influencing Pricing Policy, Methods of Pricing	L1, L2, L3, L5	8
MODULE 3: Marketing Mix- Place & Promotion Physical Distribution–Meaning, Factors affecting Channel Selection, Types of Marketing Channels. Promotion – Meaning and Significance of Promotion, Personal Selling and Advertising, Public Relations, Publicity, Sales Promotion	L1,	7
MODULE 4: Analysing Market Environment **Market Environment**- Microenvironment – The company, suppliers, marketing intermediaries' competitors, public and customers. Macro Environment- Demographic, Economic, Natural, Technological, Political, Legal, Socio-Cultural Environment.	L1, L2, L3	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 5: Strategic Planning, Market Segmentation and Consumer Behaviour **Market Segmentation**- Bases of Market Segmentation, Targeting and Positioning approaches, **Consumer Behaviour**- Model of Consumer Behavior; Understanding the consumer decision making process & Buying Situations, Factors affecting Buying Behaviour **Strategic Planning in Marketing**- Business Portfolio, BCG matrix, GE 9 cell model; Marketing Research.	L1, L2, L3, L4, L5, L6	8
MODULE 6: Service Marketing Meaning and definition of services, features of services, Seven P's of services marketing, differentiation between goods and services.	L1, L2, L3	4
MODULE 7: Emerging Marketing Paradigms Overview of E-marketing, Global marketing, Mobile marketing, Kiosk marketing, Green marketing, Tele marketing, Multi-level marketing & Rural marketing.	L1, L2. L3	4
Tutorial: **Flip Classroom**- C - Case Discussion/ Presentation; HA - Home Assignment; S - Seminar; V - Viva; Q – Quiz	L3, L4	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

DMGT2201	COST & MANAGEMENT ACCOUNTING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course aims to give an understanding of how management accountants provide information to facilitate decision-making in an organization. It will acquaint students with various concepts of costing and highlight the decision making and control focus of managerial accounting. **Cost Accounting** is concerned with the computation and assessment of costs and expenses incurred in the acquisition or production of anything. It is about calculating the cost per unit using various costing approaches. Its primary goal is to assist managers in making decisions. **Management accounting** is concerned with the provision of relevant information to support decision-making, planning, cost control, and performance evaluation. Management accounting converts data into information, knowledge, and wisdom regarding the activities of a company entity. This is a step beyond cost accounting.

Course Objectives

The objective of this course is to

1. Understand and explain the conceptual framework of Cost Accounting and processes used to determine total and per unit cost.
2. To make known to the students to assess material, labour, and overhead cost
3. To enrich the knowledge of the learners in knowing in applying tools like cash flow statement for analysis of financial statements
4. To make the students in understanding how marginal costing is used in profit planning and management decision-making under different situations.

Course Outcomes to

On completion of this course, the students will be able to

CO1: Identify the principles of cost and management accounting and apply the same for the preparation of cost sheets and quotations

CO2:Assess material, labour and overhead cost of manufacturing firms

CO3: Analyse financial statements using appropriate techniques

CO4: Prepare budgets for business firms.

CO5: Evaluate business options and take informed decisions using marginal costing

Modules	Blooms level*	Number of hours
Module I: Cost Accounting Introduction – Classification of cost, Cost Accounting-Objectives and functions, Comparison of Cost Accounting with Financial Accounting and Management Accounting, Designing and installation of costing system, Uses of Management Accounting, Preparation of cost sheet and quotation	L1,L2,L3	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Material, Labour &Overheads **Material cost**: Direct and Indirect material cost, Techniques of inventory control-stock levels and EOQ, Pricing of material issues-FIFO and LIFO **Labour cost:** Causes of effects of labour turnovers, Methods of wage payment-Halsey and Rowan plans, Taylor's piece rate system **Overheads**: Classification, Allocation and Apportionment, Primary and Secondary distribution(Repeated distribution method and Simultaneous equation method)	L1, L2,L3	12
Module III: Marginal Costing Marginal costing-Meaning and importance-Applications of marginal costing, Cost-volume-profit analysis, Break-even chart, uses and limitations of Break-even analysis, Decision-making areas- product mix, make/ buy, pricing decision.	L1, L2,L3,L6	8
Module IV: Budgetary Control Budget, budgeting and budgetary control-Meaning and objectives of budgetary control, Classification of budgets, Preparation of cash budget and flexible budget	L1,L2,L3	7
Module V: Cash Flow Statement Cashflow and profit, Cash flow statement-uses and limitations- Preparation of cash flow statement (AS 3-Indirect method) .	L1, L2,L4	8
Module VI: Ratios		
Tutorial: **Flip Classroom**- C - Case Discussion/ Presentation; HA - Home Assignment; S - Seminar; V - Viva; Q – Quiz	L3,L4,L6	15

**Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Theory & Problems weightage: 40 % Theory & 60% problems

DBUA2201	STATISTICAL TECHNIQUES IN RESEARCH	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

This course will introduce you to business statistics, or the application of statistics in the workplace. Statistics is how we gather, analyze, and interpret data. It emphasizes how to apply various statistical techniques in the support of managerial decisions in the various functional areas of business and business research.

Course Objectives

The objective of this course is to

1. Familiarize the students with various statistical tools which can help them in analysis and interpretation of business data and research.
2. Provide students with hands-on experience to promote the use of statistical thinking and techniques to apply them to make educated decisions whenever there is variation in business data and research.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define and apply basic statistical concepts to various field of management.

CO2: Apply statistical methods such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data, measures of central tendency, dispersion.

CO3: Demonstrate the knowledge of correlation and regression analysis to research related problems.

CO4: Apply knowledge to solve tasks using time series analysis

CO5: Independently calculate statistical probability and probability distribution for the solutions.

CO6: Interpret technique to analyze, interpret and conclude research findings and provide relevant recommendations.

Module 1: Introduction to Statistics Definitions, Functions of Statistics, Statistics and Computers, Limitation of Statistics, Application of Statistics. Nature and scope of marketing research, Marketing research as input in decision making process, Marketing research and marketing information system. Applications of marketing research, Planning a research project, Problem identification and formulation of Research Design, introduction to Research Design, Market research on the Internet.	L1, L2	12
Module 2: Data collection methods Attitudes measurement and scaling techniques, Ratio, Interval, Ordinal and Nominal scales, Likert's scale, Thurstone scale, Semantic differentiation method, Observation methods and questionnaire method, Questionnaire design, Steps in constructing a questionnaire, Types of questions, introduction to Projective techniques and perceptual mapping. Methods of Data Collection, Primary and Secondary Data, Graphic Representation of Data, Measures of Dispersion-Range, Quartile Deviation, Mean Deviation, Standard Deviation, Coefficient of Variation.(Absolute & Relative Measure of Dispersion), Skewness-Karl-Pearson's Coefficient of Skewness, Bowley's Coefficient of Skewness, Kurtosis.	L1, L2	13

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3: Sampling Sampling decisions, Sampling frame, Sample selection methods - Probability and non probability, Sample size, sampling error, Application of sampling methods to marketing problems.	L1,L2	5
Module 4: Correlation Analysis and Regression Analysis Introduction-Importance of Correlation, Types of Correlation, Scatter Diagram Method, Karl Pearson's coefficient of Correlation (Grouped and Ungrouped). Spearman's Coefficient of Rank Correlation, Rank Correlation for Tied Ranks, Regression Analysis- Concepts of Regression, Difference b/w Correlation and Regression, Regression Lines.	L2,L3	10
Module 5: Probability Introduction, Terminology used in Probability, Definitions of Probability, Mathematical, Statistical and Axiomatic Approach to Probability, Probability Rules-Addition Rule, Multiplication Rule of Probability, Conditional Probability- Bayes Theorem, Problems on Bayes Theorem.	L4	5
Field work	L1, L2, L3,L4,L5	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

SEMESTER-III

DMGT2351	ORGANIZATIONAL BEHAVIOR AND HUMAN RESOURCE MANAGEMENT	L	T	P	C
Version 1.1	For Approval	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course is constructed with an objective to create a deep and nuanced understanding of the behavioural patterns of individual in an organisational setting. Having understood the role of these assumptions, beliefs, values, would enable a leader to be effective and rational decisionmaker. The course is designed to make students interpret the impact of personality and environmental influences on the working of the individual with an organisational setting and equally harness the potentials of human capital with respect to various facets of job and develop his competencies to achieve individual and organisational goals. The focus of the course would be making students understand the motivation, individual differences, group culture and its impact of various functions of HR viz staffing, training & development, career development and appraisals. Thus, this course takes a practical approach that integrates contributions of behavioral sciences with the technical aspects of implementing the HR function in the real world.

Course Objectives

The objectives of this course are to:

1. Appreciate the impact of behavioral sciences on HR management functions.
2. Understand the implications of individual differences on work performance and their group behavior.
3. Understand the dynamics of organizational culture and structure.
4. Get familiarized with various elements of the HR function (e.g. – recruitment, selection, training, and development, etc.)
5. Relate and apply the principles and techniques of human resource management to the real life discussion of critical personnel issues.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Understand the significance of individual attributes in work settings.
CO2: Demonstrate a basic understanding of organizational dynamics, conflicts, and structure.
CO3: Interpret and relate the relationship between various HR functions and personnel growth.
CO4: Understand, analyze, the concepts of basic HR functions and their application in global context.
CO5: Understand the recent advancement in the context of OB and HRM

Modules	Blooms Level*	Number of hours
Module I: Introduction to OB Introduction to Organizational Behavior – Concept, Definitions, Evolution of OB. Importance of Organizational Behavior – Cross-cultural Dynamics, Creating Ethical Organizational Culture and Climate. Individual and Group Behavior – OB Models and SOBC in Context with Indian OB. Human Relations and Organizational Behaviour.	L1, L2	7
Module II: Foundations of Individual Differences Managing Communication, Perception, Attitude, Personality, Learning, Time Management Strategies. Group: Team Structure and effectiveness, Learning Organization and Organizational Design. Organizational Culture and Change, – Conflict Management Techniques,	L1, L2, L3, L4	14
Module III: Concepts of HRM HRM – Meaning Objectives, Scope, and Functions, HRP – Definition, Objectives, Importance, Factors Affecting HRP, Process of HRP, Strategies of HRM and Global HR Strategies, HRD – Concept, Meaning, Objectives and HRD Functions.	L1, L2,	10
Module IV: Onboarding the talent Recruitment and Selection- factors, methods and process. Induction, Training & Development, Performance & Potential Appraisal – Concept, Process, Methods and Problems, Key Result Area(s)	L1, L2, L3, L4	10
Module V : Wage concepts and Career Planning Compensation – Concept, Components of Pay Structure, Wage and Salary Administration, Incentives and Employee Benefits. Career Planning – Concept of Career Planning, Career Stages and Career Anchors, Succession Planning.	L1, L2, L3, L4, L5	10
Module VI: HRM Trends Rewards and Punishments – Termination, Layoffs, Attrition, Retrenchment, Separation and Downsizing. Industrial Relations, Overview of International and Global HRM, Recent Trends in OB & HRM.	L1, L4, L5,L6	9
Field work	L4, L5,L6	15

DBUA2301	ADVANCED STATISTICAL TECHNIQUES	L	T	P	C
Version 1.1	Latest Approved	0	0	4	2
Pre-requisites/ Exposure					
Co-requisites					

Course Description
This course offers the understanding on identification of data, analysis and interpretation of data using basic quantitative tools & techniques. In this course, students can apply the quantitative techniques in the analysis of statistical and economic/business problems. Basic understanding of statistical concepts helps in deciding on the suitable technique for data analysis and also to interpret results.

Course Objectives
The objectives of this course are to
1. Familiarize the students with basic quantitative tools & techniques for data analysis.
2. Equip the students with the concept of probability, hypothesis testing, data identification, and data analysis.
3. Facilitate hands on experience to various statistical problems using various statistical software such as STATA, R, SPSS, Eview.

Modules	Blooms level*	Number of hours
MODULE 1: Basic Statistics Measures of central tendencies, measures of dispersion, skewness, kurtosis, correlation, and regression.	L1, L2,L3	10
MODULE 2: Probability Theory and Distributions Elements of Probability Theory, The addition rule, Multiplication Rule, conditional probability, random variables; probability distributions.	L1, L2,L3	10
MODULE 3: Regression and Estimation Methods of sampling; sampling distribution; distribution of the sample mean; sampling error and standard error; Point and interval estimation; properties of an estimator; linear regression, hypothesis testing; z-test, t-test, ANOVA	L1, L2,L3,L4	10
MODULE 4: Advanced Statistics CLRM assumptions, stationarity, autocorrelation, heteroscedasticity, multicollinearity.	L1, L2,L3	15
Field work	L1, L2, L3,L4,L5	15

DBUA2302	DATA PRIVACY AND DATA SECURITY LAWS	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/ Exposure					
Co-requisites					

Course Description
This course is designed to familiarize the students with the basic concepts of data privacy issues and security laws including current and proposed laws and regulations that govern data security and privacy.

Course Objectives
The objective of this course is to:
1. Provide the foundational knowledge based on data security investigation and data policy questions concerning the value of data security and data privacy regulations.
2. Emphasize on the real world effects of data breaches on individuals and businesses.
3. Provide an understanding on how to secure data and balancing of interests among individuals, government, and enterprises from the technical and legal perspective.

Course Outcomes
On completion of this course, the students will be able to:
CO1: Explain the fundamental concepts of data security and security laws.
CO2: Explain the business needs for data privacy and security investigation.
CO3: Assess the risk for data security.
CO4: Identify the legal, professional and ethical issues related to data.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Data Security History of data security, Meaning of data Security and data privacy, Critical Characteristics and components of Data security, Need for Security, Business Needs, Threats, Attacks, Meaning of term personal data, data processing, data protection, NSTISSC Data Security Model, Balancing Security and Access to data, The SDLC model, The Security SDLC	L1, L2	12
MODULE 2: Introduction to Data Security Laws Introduction of the General Data Protection Regulation (GDPR), rationale for the introduction of the GDPR , primary objectives of the General Data Protection Regulation, scope of data processing activities covered by the GDPR, territorial scope of the GDPR regarding the location of personal data processing and data subjects, GDPR impact on Indian Companies, Data protection Laws in India	L1, L2	12
MODULE 3: Data Privacy: Legal Issues and Landscape Development of Privacy Laws (historical and legal context), Fair Information Principles, The Statutory Landscape in the US, Indian IT Act, Adjudication under Indian IT ACT, IT Service Management Concept, IT Audit standards, ISO/IEC 27000 Series, COBIT, HIPPA, SOX, System audit, Information security audit, ISMS, SoA (Statement of Applicability), BCP (Business Continuity Plan), DR (Disaster Recovery), RA (Risk Analysis/Assessment)	L1, L2	11

SEMESTER-IV

DMGT2451	FINANCIAL MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course focuses on a firm's financial goals and decisions to maximize shareholders' wealth. It examines financial concepts and analytical techniques, financial performance, time value of money, measurement of risk and return, capital budgeting, capital structure, short-term financial planning, working capital management, and international finance.

Course Objectives

The course aims to:

1. Familiar students to take decisions which are effective, a manager in any of the functional areas be it Marketing, HR or IT requires a thorough cost and benefit analysis and a feel for Finance so as to look at the long term implications of his/her decision.
2. An understanding and a feel for Financial decision making.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the theoretical models of financial management in the context of business development.

CO2: Describe and analyse financial decisions made by company managements using accounting and other financial information.

CO3: Analyse and consider time value of money while taking investment decisions.

CO4: Explain theoretical understanding to real life problems, in order to develop possible solutions.

CO5: Identify and apply best investment options estimating future cash flows

CO6: Identify the need of working capital requirement along with inventory management.

CO7: Define the dividend policies and apply theories to practical decisions for dividends.

Modules	Blooms level*	Number of hours
Module I: Introduction to Financial Management Evolution of Financial Management, Key activities of Finance Manager Changing Role of Finance Managers, Key Decision Areas in Financial Management, Objectives of the firm	L1, L2	7
Module II: Financial Statement Analysis Introduction, objectives of financial statement analysis, Techniques-Ratio analysis, Comparative analysis and limitations of financial statement analysis, AS-20 (no numerical)	L1, L2, L4	8
Module III: Valuation Concepts Concept of Time value of Money, Process of Compounding and Discounting, Future Value of a Single amount, Future Value of an Annuity, Present Value of a Single Amount, Present Value of an Annuity, Cost of capital, Weighted average cost of capital, Leverage Analysis	L2,L3	8
Module IV: Financing Decision Capital structure, Factors affecting Capital Structure decisions, Theory of Capital Structure Decisions, MM Theory, NI, NOI and Traditional theory, Pecking order theory.	L2	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana

DMGT2402	MANAGERIAL ECONOMICS	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure	Basic knowledge of economic science preferred but not compulsory				
Co-requisites					

Catalog Description

In this course the students are introduced with various basic concepts of managerial economics to make them familiarize with undergraduate level working knowledge. To begin with, introductory concepts of economics, consumer behavior and utility theory are discussed. Thereafter concepts related to demand analysis, demand forecasting, supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Following that various macroeconomic concepts and business phases along with their implications are analyzed in detail. Finally, various concepts related to market structure are discussed in detail. The overall aim of this course is to make the students familiar with working knowledge of the fundamentals of managerial economics as part of rational choice decision science.

Course Objectives:

The objective of this course is to:

1. Make students aware of theoretical concepts of economic science so that they can analyze situations and improve upon their managerial decision process.
2. Provide students with extensive exposure about the micro and macro level variables that influence business and managerial strategies of the firm and business cycles under which they operate.

Course Outcomes:

On completion of this course, the students will be able to:

CO1: Explain basic concepts of economic analysis, utility theory, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism.

CO2: Analyze the relevant production and cost concepts along with revenue in managerial decision process.

CO3: Describe the various forms of market structure and their implications in economy.

CO4: Discuss holistically the various macroeconomic aspects of business decision process along with complexities of business phases.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Managerial Economics Nature, Scope, Definitions of Managerial Economics, Application of Managerial Economics to Business, Micro Vs. Macro Economics, Opportunity Costs, Time Value of Money, Marginalism, Incrementalism, Market Forces and Equilibrium.	L1, L2, L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Consumer Behaviour and Demand Analysis Cardinal Utility Approach: Diminishing Marginal Utility, Law of Equi-Marginal Utility, Ordinal Utility Approach: Indifference Curves, Marginal Rate of Substitution, Budget Line and Consumer Equilibrium, Theory of Demand, Law of Demand, Movement along vs. Shift in Demand Curve, Concept of Measurement of Elasticity of Demand, Factors Affecting Elasticity of Demand, Income Elasticity of Demand, Cross Elasticity of Demand. Production with one variable input, Production and optimal input proportions, two variable inputs, Law of variable proportions and law of return to scale, Cost Concepts, Theory of costs in short run and long run.	L1, L2, L4, L5	12
MODULE 3: Theory of Production, Cost and Firm's Behaviour Meaning and concept of Production, Factors of Production and Production Function, Fixed and Variable Factors, Law of Variable Proportion (Short Run Production Analysis), Law of Returns to a Scale (Long Analysis), Concept of Cost, Cost Function, Short Run Cost, Long Run Cost, Economics and Diseconomies of Scale, Explicit cost and Implicit Cost, Private and Social Cost	L1, L2, L4, L5	9
MODULE 4: Macro Economics and Business Decisions Phases of Business cycle - Evil effects of cyclical fluctuations on business firms - Minimizing effects of Business cycles, Economic and Business forecasting - uses of economic forecasts - Methods of economic forecasting - selecting a forecast - evaluating forecasts.	L1, L2, L4	9
MODULE 5: Price and Output Decisions under Different Market Structures Price and Output Decisions under Perfect Competition, Monopoly and Monopolistic Competition - Pricing under Oligopoly - Kinked Demand Curve - Price Leadership - Pricing under Collusion.	L1, L2, L4	8
Field work	L1,L2,L3,L4,L5	15

DBUA2401	INTRODUCTION TO ADVANCED EXCEL	L	T	P	C
Version 1.1	Latest Approved	0	0	4	2
Pre-requisites/ Exposure					
Co-requisites					

Course Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

Course Objectives

The course enables students to:

1. Explore the Microsoft Excel as a tool for facilitating solutions for business problems/decision making
2. Have an understanding on the advanced functions of excel through guided demonstration.
3. Enhance excel skills of students and develops a set of fundamental skills that are essential for survival in business amid global uncertainty.

Course Outcomes:

On successful completion of this course students shall be able to:

1: Demonstrating the basic mechanics and navigation of an Excel spreadsheet.
2: Use advanced functions and productivity tools to assist in developing worksheets.
3: Manipulate data lists using Outline, Auto filter, data cleaning and PivotTables.
4: Use Consolidation to summarise and report results from multiple worksheets.
5: Gain knowledge in Simulation and Decision tree Contents Record repetitive tasks by creating Macros.

Modules	Blooms level*	Number of hours
Module 1: Overview of Excel **Contents:** Introduction to Spreadsheets: data entry using autofill, sort & filter feature, widening rows and columns, inserting & deleting rows and columns, creating lists, wrapping & merging text and cells. Introduction to basic data formatting, saving work in excel. Protecting, signing & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel, page orientation and print area in Excel. How to adding hyperlinks to cells, inserting images, objects, equations and symbols. Activating separator. Introduction to Figures and Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart.	L1, L3, L4	9
Module 2: Data Cleansing and Lookups Contents: Textual functions- TRIM, SUBSTITUTE, CLEAN, STORED AS TEXT, DE-DUPLICATING, LEN & FIND, CONCATENATE, UPPER, LOWER, REPLACE functions, Warning messages and Data validation; Look up functions-VLookup, multiple Vlook up together and Hlookup with index and match.	L1, L3, L4	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3: Functions and Pivot Tables Contents: Basic functions- ROUNDING, SUM, PRODUCT, MIN, MAX, AVERAGE, CONDITIONAL COUNTS, LARGE, RANK, VAR, Std Dev, CONDITIONAL SUMS. Date functions and Time functions. Logical functions- IF, THEN, AND, OR, NOT, COUNTIFS, SUMIFS, TRUE, FALSE Functions. Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Math functions, What-if analysis, Goal Seek Analysis, Scenario Manager, Solver (Add- ins). Pivot table, pivot charts and conditional formatting.	L1, L3, L4	10
Module 4: Simulation and Decision Making Contents: Basics of simulation, Monte Carlo Experiment, Decision Analysis (DA): Terminology, DA without probabilities (Maximax, Maximin, Minimax Regret), DA with probabilities: (Decision point / branch, chance event / branch, Decision tree with examples.	L1, L3, L4	9
Module 5 : Use Macros to Automate Excel Tasks and Database: Intro to Macro, Recording a Macro, Running a Macro, Add a Macro Button to the Ribbon, Assign a Macro to a Button on the Quick Access Toolbar, Assign a Macro to a Graphic Object, Macro Security, Trust Center Macro Settings, Trusted Locations, Editing Recorded Macros, Editing the Macro in the Visual Basic Editor. Create a database in excel along with the use of filters, input masks.	L1, L3, L4	8
Field work	L1, L2, L3,L4,L5	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

SEMESTER-V

DMGT2551	OPERATIONS AND SUPPLY CHAIN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
Operations and Supply chain are an integral contributor to an organisation's top and bottom line success. This course is based on a foundation in the theories and practice of management in businesses where operations and supply chain management are critical to success. These include product and process design, choosing appropriate technology, adopting efficient work methods, planning (including location and facilities layout), streamlining the flow of people and materials, and continuously improving the quality of the final product, in order to create internal and external customer value.

Course Objectives:
The objectives of this course are to:
1. Provide and practice of management in businesses.
2. Make them aware regarding planning.
3. Know product and process design, appropriate technology, adopting efficient work methods

Course Outcomes
On completion of this course, the students will be able to:
CO1: Demonstrate ability to systematically analyse operational and supply chain strategies in the light of the emerging supply chain frameworks and business models;
CO2: Develop business, operations and supply chain management strategies using strategic alignment model;
CO3: Effectively apply the alignment model and assess the strategic needs of business and supply chain networks;
CO4: Evaluate emerging operations initiatives for supply chain collaboration and their strategic implication;
CO5: Integrate organisational changes related to supply chain strategy implementation

Modules	Blooms level*	Number of hours
Module I: Introduction, Significance of POM in business, POM model and its elements, Scope of POM, History of POM.	L1, L2	1
Module II:**Competitive Advantage through operations management** Competitive Advantage through POM Critical factors for gaining competitive advantage Operations models Operations strategy Case discussion	L1, L2, L3	2
Module III: **Product** Product – levels, types, categories Product design and development Commercial production and launch Support and up-gradation	L1, L2, L3	2

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module IV:Processes and Technology Types of productive systems Types of production processes Comparison of production processes Case discussion	L1,L2	2
Module V: Forecasting Significance of forecasting for operations management Forecasting techniques Mathematical models and their practical applications Forecasting errors. Laws of forecasting and how they affect operations	L1, L2	2
Module VI: Planning and Scheduling Operations Planning and Scheduling Long range and aggregate output planning Master production schedules Functional planning and production control Operations scheduling Case discussion	L1, l2, l3	2
Module VII: Quality Management Quality management SQT, AS, SQC, SPC and practical applications Case discussion	L1, L2,L3	2
Module VIII: Performance improvement in operations Latest techniques in operations management Just-In-Time technique Ergonomics and work study Case discussion		2
Module IX: Operations Management in the Indian context Implementation of operations management techniques by Indian companies Case discussion	L1, l2	2
Module X: Supply Chain Management Operations capacity Capacity measures Capacity planning process Evaluation of alternatives for capacity expansion	L1,L3,L6	2
Module XI: Site Location and Layout Planning Factors affecting site location decisions Evaluation of site location options Objectives of layout planning Types of layouts Designing of layouts	L1, L2, L6	2
Module XII: Supply Chain Management Basic Concepts Characteristics of business partners of a supply chain. Elements of supply chain management systems Demand management, customer service management Procurement, Outsourcing, supplier relationship management Physical distribution management, returns management	L1, l2	3 6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

DBUA2501	SQL AND DATAMINING	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/ Exposure					
Co-requisites					

Course Description

Every business organization is realizing the importance of data. They are harnessing the benefits offered by Data Mining as it allows them to see hidden patterns from the data and helps in framing business policies. This course emphasizes on utilizing the techniques offered by Data Mining.

Course Objectives

This course enable students to:

1. Understand the basic concepts, principles, methods, implementation techniques, and applications of data mining, with a focus on major data mining functions such as cluster analysis.
2. Develops skills to use data mining software and other data mining techniques to solve business problems.

Modules	Blooms level*	Number of hours
Module 1: Introduction to Data Mining- What is data mining? Related technologies - Machine Learning, DBMS, OLAP, Statistics, Data Mining Goals, Stages of the Data Mining Process, Data Mining Techniques, Knowledge Representation Methods, Applications (Example: weather data), Data Warehouse and DBMS, Multidimensional data model, OLAP operations (Example: loan data set). Data cleaning, Data transformation, Data reduction, Discretization and generating concept hierarchies, Data Mining Primitives: What Defines a Data Mining Task? Task-Relevant Data, The Kind of Knowledge to be Mined, KDD.	L1, L2,L3	9
Module 2: Mining Association Rules in Large Databases, Association Rule Mining, Market Basket Analysis: Mining A Road Map, The Apriori Algorithm: Finding Frequent Item sets Using Candidate Generation, Generating Association Rules from Frequent Item sets, Improving the Efficiently of Apriori, Mining Frequent Item sets without Candidate Generation, Multilevel Association Rules, Approaches to Mining Multilevel Association Rules, Mining Multidimensional Association Rules for Relational Database and Data Warehouses, Multidimensional Association Rules, Mining Quantitative Association Rules, Mining Distance-Based Association Rules, From Association Mining (Example: mining weather data , Basic idea: item sets, Generating item sets and rules efficiently) to Correlation Analysis.	L2, L3	9

Module 3: Classification (Basic learning/mining tasks, Inferring rudimentary rules: 1R algorithm) – Prediction (The prediction task, Statistical (Bayesian) classification, Bayesian networks, Instance-based methods (nearest neighbor), Linear models), Issues Regarding Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Bayes Theorem, Naïve Bayesian Classification, Classification by Back propagation, A Multilayer Feed-Forward Neural Network, Defining a Network Topology, Classification Based of Concepts from Association Rule Mining, Other Classification Methods, k-Nearest Neighbor Classifiers, Genetic Algorithms, Rough Set Approach, Fuzzy Set Approaches, Prediction, Linear and Multiple Regression, Nonlinear Regression, Other Regression Models, Classifier Accuracy.	L1, L2, L3	9
Module 4: Cluster Analysis, Types of Data in Cluster Analysis, Basic issues in clustering, First conceptual clustering system: Cluster/2, A Categorization of Major Clustering Methods, Classical Partitioning Methods: k-Means, expectation maximization (EM), and k-Medoids, Partitioning Methods in Large Databases: From k-Medoids to CLARANS, Hierarchical Methods, Agglomerative and Divisive Hierarchical Clustering, Grid based Methods, Density-Based Methods, Wave Cluster: Clustering Using Wavelet Transformation, CLIQUE: Clustering High-Dimensional Space, Model-Based Clustering Methods, Statistical Approach ,Neural Network Approach, Conceptual clustering and Cobweb.	L1, L2, L3,L4	8
Module 5: Introduction to Data, Databases and SQL – SELECT, NULL, ORDER BY, LIMIT, OFFSET, SELECT DISTINCT, WHERE, aggregate functions, multiple conditions, SQL Queries - WHERE –IN –clause, GROUP BY and GROUP BY HAVING clauses, Creating and Managing Tables – insert rows and columns (Multiple), ALTER TABLE, VALUES clause, Joining Tables – inner join, left join, right join, full join, ON, AS, Conditional Expressions- COALESCE, NULLIF function, text strings, sets and sub queries, exporting data into other applications.	L3,L4,L6	10
Field work	L1, L2, L3,L4,L5	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

DBUA2502	PROGRAMMING FOR BUSINESS ANALYTICS USING R	L	T	P	C
Version 1.1	Latest Approved	1	0	6	4
Pre-requisites/ Exposure					
Co-requisites					

Course Description

This course offers the specialization on R (powerful language used widely for data analysis and statistical computing). This course facilitates a good understanding on the process of data manipulation and visualization. The course provides ample working examples on statistical data analysis using R.

Course Objectives

The objective of this course is to:

1. Provide learning on how to program in R, how to use R for effective data analysis, how to install and configure software necessary for a statistical programming environment.
2. Provide applications on statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, debugging, profiling R code, and organizing and commenting R code.
3. Facilitate hands on experience to various real world business problems using R.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Gain an in-depth understanding of fundamentals of R Programming & data structure used in R and learn to import/export data in R.
CO2: Interpret the probability distributions and use the hypothesis testing method to drive business decisions.
CO3: Gain a basic understanding of various statistical concepts and use the various graphics in R for data visualization.
CO4: Understand and use linear and non-linear regression models, and classification techniques for data analysis.
CO5: Choosing the loops and decision-making statements to solve the problems.
CO6: Learn and use association rule, clustering methods including k-means and hierarchical clustering.

Modules	Blooms level*	Number of hours
MODULE 1: Introducing to R, Data types & Data structures: Scalars, Vectors, Lists, Matrices (Creating matrices, Matrix operations, Applying Functions to Matrix Rows and Columns, Adding and deleting rows and columns, Vector/Matrix Distinction), Arrays, and Factors. Basic syntax, Declarations, recycling, Variables, Types of operators: Arithmetic operators, Relational operators, Logical Operators, Assignment Operators, Conditional Statements in R, Loops in R, Functions in R, Help functions in R, NA and NULL values , Filtering , Vectorized if-then else , Vector Equality , Vector Element names, Importing CSV files and Excel files.	L1, L2,L3	12
MODULE 2: Data Frames- Creating Data Frames, Matrix-like operations in frames, Merging Data Frames, Applying functions to Data frames, Factors and Tables, factors and levels, Common functions used with factors, Working with tables - Other factors and table related functions - Control statements, Arithmetic and Boolean operators and values, Default values for arguments.	L1, L2,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Data Reshaping, Binomial distribution, Poisson distribution, normal distribution, missing values, removing outliers, Hypothesis, Data Sampling, Confidence and Significance Levels, Hypothesis Tests about Population Means, Hypothesis Tests about Population Variance, Hypothesis Tests about Population Proportions, Basic Statistics.	L1, L2,L3	8
MODULE 4: Parametric Tests, Non-Parametric Tests, Data Visualization Using Graphics in R, Ggplot2, File Formats of Graphic Outputs R, Pie charts, Bar charts, Box plots, Histograms, line graphs, Scatter plots, customizing graphs, saving graphs to files.	L1, L2,L3	9
MODULE 5: Introduction to Regression Analysis, Types of Regression Analysis Models, Simple Linear Regression, Non-Linear Regression, Regression Analysis with Multiple Variables, logistic regression, Cross Validation, Factor Analysis, cluster analysis, Survival analysis, association rule.	L1, L2, L3	8
Field work	L1, L2, L3,L4,L5	15

SEMESTER-VI

DMGT2651	BUSINESS POLICY AND STRATEGIC MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
This course introduce to the students theories and practices of Strategic Management acquired knowledge in formulation and implementation of strategies for better decision-making.

Course Objectives
The objective of this course is to
1.Orient the students in theories and practices of Strategic Management.
2. Apply the acquired knowledge in formulation and implementation of strategies for better decision-making.

Course Outcomes
On completion of this course, the students will be able to:
CO1: Define the basic concepts and principles of strategic management and define the internal and external environment of business.
CO2: Recognize organizational strategies that will be effective for the current business environment.
CO3: Illustrate strategic approaches to managing a business successfully in a global context.
CO4: Analyze and evaluate critically real life company situations and develop creative solutions, using a strategic management perspective.

Modules	Blooms level*	Number of hours
Module I: Introduction Planning, Evolution of strategic management, Concept of Corporate Strategy: Intended & Emergent, Patterns of Strategy Development, Levels of strategy	L1, L2	8
Module II: Mission & Vision Concept of Strategic Intent, Vision and Mission, Formulation of Vision and Mission Statements, Different Perspectives on Vision and Mission, Business Definition and concept of a Business Model**.**	L1, L2	7
Module III: Strategic Analysis Industry Analysis, Competitor Analysis using Porter's 5-Forces model, Market Analysis, Environmental Threat and Opportunity Profile (ETOP), Internal Analysis: Building Organization Capability Profile and Strategic Advantage Profile (SAP), Building competencies using Value chain Analysis, Environmental Analysis and dealing with uncertainty, Scenario Analysis, SWOT Analysis	L1, L2	8
Module IV: Strategic Choice Strategic alternatives at corporate level: Expansion, Stability, Retrenchment and Combination, Strategic choice models for dominant single- Business companies- Strickland's Grand Strategy Selection Matrix, Model of Grand Strategy Clusters, Strategic choice models for multi-business companies- BCG, GE Nine Cell Matrix, Hofer's Model, Coevolving, Patching, Strategy as simple rules, Strategic alternatives at business level: Michael Porter's Generic competitive strategies, Building Sustainable Competitive Advantage	L1,L2	7
Module V: Strategic Implementation	L1, L2	10

Prof. (Dr.) Anil Kumar

DBUA2601	INTRODUCTION TO MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE	L	T	P	C
Version 1.1	Latest Approved	1	0	6	4
Pre-requisites/ Exposure					
Co-requisites					

Course Description This module comprises of conceptual, statistical and Machine Learning algorithms. It covers all the necessary models pertaining to Machine Learning such as Regression, Decision Trees, Support Vectors, Clustering, Association Analysis and Dimensionality Reduction.

Course Objectives

After this course students will gain critical knowledge and understanding about major Data Mining procedures like Decision Tree, Cluster Analysis, Neural Networks, Support Vector Machine, Bayesian Networks and Machine Learning fundamentals. Students will be able to apply and practice this gained knowledge in variety of Business Scenarios.

Course Outcomes

Upon successful completion of this module, students should be able to:

CO1: Understand and employ a wide variety of Statistical and Machine Learning Algorithms.

CO2: Identify the characteristics of Datasets, Problem Statement and develop Machine Learning programs with reference to known Computing Techniques.

CO3: Understand the Model Performance Evaluation and select the best one based on the solution.

CO4: Implement Machine Learning techniques and the Programming Framework to obtain acceptable decisions for the Real-World problems.

Modules	Blooms level*	Number of hours
MODULE 1: Classification and Regression Tree Classification & Regression, working of a Decision Tree, Attribute Selection Measures, Information Gain, Gain Ratio, Gini Index, Building Decision Trees, CART, C5.0, and CHAID Trees, Prediction by Decision Tree, Advantages and Disadvantages of Decision Trees, Model Overfitting, Building Decision Trees in R.	L1, L2,L3	12
MODULE 2: Clustering Cluster Analysis versus Factor Analysis, Overview of Basic Clustering Methods, Agglomerative Hierarchical Clustering, Within-Group Linkage, Nearest Neighbour or Single Linkage, Furthest Neighbour or Complete Linkage, Centroid Clustering, Ward's Method, K-Means Algorithm, Dendrogram, Profiling of Cluster, Cluster Evaluation. **Module III**	L1, L2,L3	8
MODULE 3: Support Vector Machine Decision Boundaries for Support Vector Machine, Maximum Margin Hyperplanes, Structural Risk Minimization, Linear SVM-Separable Case, Linear SVM-Non-Separable Case, Kernel Function, Kernel Trick, Kernel Hilbert Space, Model Evaluation.	L1, L2,L3	10

Module 4 **Market Basket Analysis** Market Basket Analysis and Association Analysis, Market Basket Data, Stores, Customers, Orders, Items, Order Characteristics, Product Popularity, Tracking Marketing Interventions, Association Rules, Support, Confidence, Lift, Chi-Square Value, Sequential Pattern Analysis.	L1, L2,L3	8
Module 5 : Introduction to Artificial Intelligence Current Trends in AI, Intelligent Agents, Environments, Problem Solving Agents, Searching Techniques, Knowledge and Reasoning in AI, Forms of Learning, Structure of a Neural Network, Analogy with Biological Neural Network, Activation Functions, Gradient Descent, Model Accuracy.	L1, L2, L3	7
Field Work	L4,L5,L6	15

DBUA2602	PROGRAMMING FOR BUSINESS ANALYTICS USING PYTHON	L	T	P	C
Version 1.1	Latest Approved	1	0	6	4
Pre-requisites/ Exposure					
Co-requisites					

Course Description

This course is designed in such a way that leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of the fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language.
2. Provide applications on statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits such as pandas, matplotlib, scikit-learn, nltk, and networkx to gain insights into data analysis process.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create applications for data retrieval and processing
CO2: Conduct an inferential statistical analysis of various business problems
CO3: Explain fundamental Python functionality and features used for data science
CO4: Apply techniques such as lambdas and manipulate csv files

Modules	Blooms level*	Number of hours
MODULE 1: Installing Python; basic syntax, interactive shell, editing, saving, and running a script, Concept of data types; variables, assignments; immutable variables; numerical types; arithmetic operators and expressions; comments in the program; understanding error messages Conditions, boolean logic, logical operators; ranges; Control statements: if-else, loops (for, while); short-circuit (lazy) evaluation	L1, L2,L3	8
MODULE 2: Strings and text files; manipulating files and directories, os and sys modules; text files: reading/writing text and numbers from/to a file; creating and reading a formatted file (csv or tab-separated).String manipulations: subscript operator, indexing, slicing a string; strings and number system: converting strings to numbers and vice versa. Binary, octal, hexadecimal numbers	L1, L2,L3	10
MODULE 3: Lists, tuples, and dictionaries; basic list operators, replacing, inserting, removing an element; searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values; traversing dictionaries. Design with functions: hiding redundancy, complexity; arguments and return values; formal vs actual arguments, named arguments, Program structure and design, Recursive functions	L1, L2,L3	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 4: Simple Graphics and Image Processing: "turtle" module; simple 2d drawing - colors, shapes; digital images, image file formats, image processing Simple image manipulations with 'image' module (convert to bw, greyscale, blur, etc).Classes and OOP: classes, objects, attributes and methods; defining classes; design with classes, data modeling; persistent storage of objects OOP, continued: inheritance, polymorphism, operator overloading (_eq_, _str_, etc); abstract classes; exception handling, try block	L1, L2,L3	10
MODULE 5: Graphical user interfaces; event-driven programming paradigm; tkinter module, creating simple GUI; buttons, labels, entry fields, dialogs; widget attributes - sizes, fonts, colors layouts, nested frames Multithreading, Networks, and Client/Server Programming; introduction to HTML, interacting with remote HTML server, running html-based queries, downloading pages; CGI programming, programming a simple CGI form. Searching, Sorting, and Complexity Analysis.	L1, L2, L3	7
Field Work	L4,L5,L6	15

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

DBUA2603	DATA VISUALIZATION-TABLEAU & POWER BI	L	T	P	C
Version 1.1	Latest Approved	1	0	6	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

This course familiarizes the students on data visualization tools. This course is designed to provide a fundamental and strategic understanding on the concepts of Business Intelligence using Tableau.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of BIs and its types and how to connect to and import data, visualize data using Tableau
2. Emphasize on how to create dashboards and share with business users using Tableau.
3. Emphasize on how to create dashboards and share with business users using PowerBI.

Course Outcomes

On completion of this course, the students will be able to:

1: Connect, import, shape, and transform data for business intelligence (BI)
2: Visualize data, author reports, and schedule automated refresh of your reports
3: Create and share dashboards based on reports in tableau desktop and Excel
4: Use natural language queries and create real-time dashboards.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Tableau and Power BI Interface Data visualization and its significance, Connecting Tableau to a Data File – Excel, CSV File, etc., Navigating Tableau, creating calculated fields and set, Working with Discrete vs. Continuous Data, adding colors, adding labels and formatting, exporting worksheet. Working with data extracts, working with time series data, understanding aggregation, granularity and level of detail, creating an area chart and learning about highlighting, adding a filter and quick filter.	L1, L2,L3	10
MODULE 2: Data Blending and Data Joining Relationships v/s joins, Joining data – Inner join, Right Join, Left join, Full outer join, Cross database join, blending data, data joining v/s data blending, limitations of data blending and dual axis chart.	L1, L2,L3	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Basic and Advanced Charts Common chart types- Bar chart, times-series line chart, dot plot, scatter plot. Creating a map - Choropleth Map, Symbol Map, table, highlight table, Bullet graph, Gantt bar, bump chart, clouds and bubbles working with hierarchies, applying filters to multiple worksheets.	L1, L2,L3	10
MODULE 4: Interactive Dashboard Creation Create interactive dashboard- Metrics Dashboard, Design considerations for effective data visualization, Human cognition and visual perception, Using Maps to Visualize Spatial Data, What –if analysis, Multiple key performance metrics, Web analytics, Sentimental Analysis.	L1, L2,L3,L4	10
MODULE 5: Storytelling The visual storytelling framework, the business value of visual stories, Creating dashboards and story points, Formatting worksheets and dashboards. Common pitfalls of data visualization, Common pitfalls of data narratives, Share and critique an example of a data visualization, Provide your Tableau Public URL, Share data visualization on Tableau Public, Building a Dashboard in Tableau, Develop a data story pitch.	L1, L3,L4,L6	8
Field Work	L1, L2,L3,L4,L5,L6	15

SEMESTER-VII

DMGT2701	DISRUPTIVE MANAGEMENT PRACTICES	L	T	P	C
Version 1.1		2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:
Disruptive management practice has upended traditional profitability models of industry after industry. Executives, focused on fine-tuning their current business models, often haven't seen the threats before their business landscapes are suddenly and permanently changed. Data and the increased development of technology have accelerated the rate of these massive changes. No industry is immune from competitors looking to grab market share through disruptive innovation.

Course Objectives:
This course will prepare leaders to harness the power of disruptive innovation before their competitors do. Students will gain a deeper understanding of what disruptive innovation is and will learn how to spot potential threats and opportunities in their own business. The coursework will focus on planning for disruption, using concrete steps to identify potential disruptions in the industry, and building the right culture to implement change. Students will be trained to view their business through a "jobs to be done" framework and use customer-centric problem-solving to discover new ideas and justify business changes.

Course Outcomes:
- Understand the forces of disruption that could impact their business and see how to spot them early
- Uncover a new approach for customer centricity to spot and shape new opportunities by applying the jobs to be done framework
- Learn, through practical examples, how to leverage new business models and potential application for their companies

Modules	Blooms level*	Number of hours
Module 1 - Imperative and Fundamental Concepts- Disruptive Innovation- Complementary Thoughts on Christensen's Theory of Disruptive Innovation, Theory of Disruption Waves or the Modulation of Disruption, Benefit of a Unified View on Disruption, Relativity of Disruption, and Typical Warning Signals for Disruptive Threats. Form Follows Function - Concept and Architecture.	L1, L2, L4	10
Module 2 - Market Understanding - Understanding Your Market, Market Segmentation for Multiple Segmentation Criteria, Identifying a Customers' "Job to Be Done", Differentiating Market Segmentation from Design Thinking, Creating Customer Value Through Design Thinking- Design Thinking, When to Use Design Thinking?, Defining Understanding, The Different Levels of Understanding, Phases of Design Thinking, Empathy for Individuals, Empathy in the B2B Context, Ideation, Prototyping and Testing, Scaling.	L1, L2,L4,L5	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3 - Design to Value (DTV) - Defining Value in Product Development, Lifecycle Cost, the Framework and measuring value. Modularization: A Strategic Lever for Innovation, Platform- Core Platform versus Inclusive Platform, Implementing a Modular Platform- Organizational Aspects and Strategic Aspects, Agile – agile project management, frameworks.	L1, L2, L4, L5	10
Module 4 - Requirement Focus - Kano Model, Pair-wise Comparison, Requirements Management, Tree Diagram, Empathy Map, Concept Focus- Functional Modelling, Morphological Matrix/Morphological Box, Modular Function Deployment, Onion Peel Model, Design for Variety, Customer Focus Group, Osborne Checklist. Cost Focus - Target Costing, Measurement Sheet, Lifecycle Cost model, Complexity Cost Calculation for Product Families, Business Plan.	L1, L2,L3, L4	10
Module 5 - General Description of Disruption Management- Approaches to Uncertainties, General Guidance of Disruption Management, Understanding your business needs, Identify data roles in the organization. Challenges: Identify hurdles to becoming a data-driven organization, Disruption vs. Optimization, Disruptive Business Applications.	L1, L2, L3, L4	10
Module 6 - Enterprise Agile- Common Approach to Enterprise Agile Adoption, Building Blocks of Your Lean-Agile Culture Transformation, Base line assessment, Waterfall Training Development, sponsor Agile, Agility in a World of Change and Complexity, Traditional Organization v/s Agile Organizations and challenges in agile.	L1, L2, L4	10

Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination Scheme:

DMGT2702	ARTIFICIAL INTELLIGENCE IN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description:
This course introduces to the exciting world of Artificial Intelligence (AI) and its transformative impact on business. We will explore the core concepts of AI, delve into the power of Machine Learning and Deep Learning, and discover how AI is revolutionizing various business functions. Through real-world case studies, hands-on activities, and discussions with industry leaders, you will gain the knowledge and skills to leverage AI for strategic decision-making, optimize operations, and gain a competitive edge in the job market.

Course Objectives:

- Understand the fundamentals of Artificial Intelligence and its applications in business.
- Master the key concepts of Machine Learning, including supervised and unsupervised learning algorithms.
- Gain practical experience through case studies, hands-on exercises, and guest lectures.
- Prepare for a successful career in the AI-powered future of business.

Course Outcome
CO-1: Explore the potential of Deep Learning and its impact on various industries.
CO-2: Analyze the ethical considerations and challenges surrounding AI implementation.
CO-3: Develop critical thinking skills to evaluate the business value of AI solutions.
CO-4: Develop a model for decision making for business decision.

Modules	Blooms level*	Number of hours
Module 1: Introduction to AI What is AI?, A brief history of AI, Different types of AI, Applications of AI in business, The impact of AI on jobs and the workforce	L1, L2	9
Module 2: Machine Learning What is machine learning?, Supervised vs. unsupervised learning, Common machine learning algorithms, Applications of machine learning in business, Case studies of companies using machine learning	L1, L2	9
Module 3: Deep Learning What is deep learning?, Neural networks, Convolutional neural networks (CNNs), Recurrent neural networks (RNNs), Applications of deep learning in business, Case studies of companies using deep learning	L1, L2	9
Module 4: AI for Decision Making How can AI be used to improve decision making?, AI-powered analytics and reporting, Predictive modeling and forecasting Optimization and simulation, AI-driven marketing and customer relationship management	L1, L2,L3	9
Module 5: The Future of AI in Management The ethical implications of AI, The challenges of implementing AI The future of work in an AI-powered world,How to prepare for the AI revolution	L1,L2,L5	9
P - Project; This would be the field project related to the subject where the student need to work outside the class collect the data and make report .	L3 , L4	15

DMGT2703	SUSTAINABILITY MANAGEMENT	L	T	P	C
Version 1.1	Latest Updated	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Course Description: This cross-disciplinary graduate course provides a holistic overview of the environmental, social, economic and governance (ESEG) aspects of sustainability management and how to address them strategically to maximize business and product performance to meet changing stakeholder expectations. You will have the opportunity to learn about a variety of sustainability challenges faced by a variety of industry sectors, such as: mitigation and adaptation to climate change; energy, water, materials and resource management; minimizing supply chain risks that can derail business continuity. Internationally recognized frameworks, best practices, methodologies, tools and standards will be introduced as vehicles to tie the concepts together for practical application of solutions that support leadership in sustainability performance improvement.

Course Objectives: This course is for aspiring sustainability change agents who wish to gain a broader and deeper understanding of business and product strategic sustainability management from multiple stakeholder perspectives that make up the business-to-business value chain. This course is for you--- if you believe that businesses can and should be a thriving force for good in the world with products that do not harm the environment or social wellbeing. As a student, you seek to understand, facilitate and influence how stakeholders can collaborate to lead the development and implementation of transformative management systems and programs for a sustainably prosperous world for all.

Course Outcomes: At the end of this course, you will be able to:

• Identify the drivers, risks, challenges and opportunities associated with addressing sustainability management challenges.

• Apply the guiding principles and values that are a foundation for a holistic mind-set that guides an effective sustainability vision, strategy and implementation plans.

• Identify the factors in developing a credible business case for common sustainability management approaches that deliver actual improvements and breakthrough sustainability performance.

• Navigate common and conflicting needs, perspectives and interests of multiple stakeholder groups, cross-sector, cross-disciplinary, cross-functional and industry-specific perspectives.

• Promote strategic benefits of integrating and engaging the business value chain from suppliers through to end customers for achieving and communicating breakthrough sustainability outcomes.

• Link systems thinking and life cycle thinking to core business strategy and decision-making using product life cycle assessment based on international ISO standards.

Modules	Blooms level*	Number of hours
Module 1- Introduction – Global Challenges (Climate Change, Biodiversity Loss, Rising Inequality, and Resource Depletion), Sustainability- Global Sustainability Initiatives, Sustainable Approaches, SDGs and how are they linked ESG, Requirement of ESG, Value Creation Opportunities and Benefits From ESG, Setting up an ESG Strategy, Sustainable Supply Chain and its Decarbonisation, Sustainable Procurement.	L1, L2, L4	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 2 Introduction to Decarbonisation- Key terms, Decarbonisation Strategies, Challenges of Decarbonisation, Solutions and Initiatives, Role of Technology in Decarbonisation, Economic Impacts, Societal and Cultural Aspects, Measurement policies, Future prospects. Renewable Energy- Environmental Significance & its role in combating climate change, Sustainability & Resource renewal, Types of Renewable Energy, Importance of Renewable Energy, Challenges and Considerations, Future prospects -The role of Renewable Energy in a sustainable future, Call to action.	L1, L2,L4,L5	10
Module 3 Introduction - green hydrogen, Advantages & Disadvantages, The Impact of Green hydrogen, The Indian scenario, Uses of Green hydrogen. Introduction & history EV- Types of Electric vehicles, Advantages & Challenges, key components, Market trends, Indian Scenario, Future of EVs, Introduction & Types of Sustainable fuels, Advantages & Challenges, Indian Scenario.	L1, L2, L4, L5	10
Module 4 Introduction to Carbon Credits- Definition of Carbon Credits, Purpose and Significance, Historical Background, Types of Carbon Credits, Regulatory Framework, Carbon Credit Standards, Carbon Accounting and Measurement, Project Types Eligible for Carbon Credits, Carbon Credit Certification Process. Carbon Credit Market- Carbon Credit Pricing, Carbon Credit Trading Platforms, Voluntary vs. Compliance Markets, Challenges and Controversies, Benefits of Carbon Credits, Indian Energy Scenario and future outlook.	L1, L2,L3, L4	10
Module 5 ESG reporting- companies' Non- Financial Information report, use ESG reporting, improve your ESG sustainability reporting and score, Benefits of reporting, ESG reports includes, ESG score or rating, ESG regulations, Aligning with NGRBC Principles. BRSR- Nine Principles of BRSR, Key Concepts in BRSR, Frameworks and Guidelines for BRSR, The pillars of BRSR, Alignment of BRSR principles with the SDGs, Implementation and Benefits, Challenges.	L1, L2, L3, L4	10
Module 6 SEBI Circulars related to BRSR- Introduction to Cost of Capital and ESG- the Relationship between Cost of Capital and ESG, Factors Affecting Cost of Capital and ESG Integration, Measurement and Assessment, ESG Risk Management, Challenges and Trade-offs, Future Trends. Green Bonds- Market Growth, Types of Green Bonds, ESG Data Collection- Investor's Perspective on ESG- ESG Risk and Opportunity, GRI-Introduction, Structure, Benefits and Limitations of GRI, TCFD and its mission, Benefits of TCFD, Scenario Analysis, ISSB standards, GHG Emissions and Net Zero.	L1, L2, L4	10

DBUA2701	TEXT ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description: The following module aims to provide an exposure to students based on Natural Language Processing Techniques, Algorithms and Analytics based on Textual Data. The module comprises of NLP basics, Feature Extraction, Relationship Extraction, Text Categorization, Clustering and Topic Modelling Algorithms and Practices.

Course Objectives

The course introduces the concepts of Text Analytics, Unstructured Information Analysis for better decision making by deriving valuable insights. The course will help the students understand the roots behind Text Mining which evolved from Machine Learning, Natural Language Processing and Statistics. Upon completion, students are expected to be able to describe basic concepts and methods of Text Mining, Information Extraction, Text Classification and Clustering, Topic Modelling.

Course Outcomes

After the successful completion of this module, students will be able to:
CO1: Understand approaches to Syntax and Semantics in NLP.
CO2: Understand various methods for Statistical approaches to Machine Translation.
CO3: Build Models which extract information from Textual Unstructured Data.
CO4: Understand and implement Topic Modelling and Probabilistic Models for Information Extraction.
CO5: Implement and deploy programs based on Relationship Extraction, POS Tagging and Clustering Algorithms based on NLP.

Modules	Blooms level*	Number of hours
Module 1: Introduction to Text Mining Basics of Text Mining, Natural Language Content Analysis, Core Text Mining Operations, Associations, Using Background Knowledge for Text Mining, Domain Ontologies, Domain Lexicons. Text Mining Pre-processing Techniques, Task Oriented Approaches, NLP Tasks, Tokenization, Part-of-Speech Tagging, Syntactical Parsing and Shallow Parsing.	L4,L5	10
Module 2 Extracting Features, Relations from Text Finding Implicit Features, Finding Opinion Phrases and their Polarity, Context-Specific Word Semantic Orientation, Analysis of Word and Document Frequency, tf-idf, Zipf's Law, bind tf_idf Function, Subsequence Kernels for Relation Extraction, Capturing Relation Patterns with a String Kernel.	L2, L3,L6	5
Module 3 Text Categorization and Clustering Applications of Text Categorization, Document Representation, Knowledge Engineering Approach to Text Categorization, Machine Learning Approach to Text Categorization, Evaluation of Text Classifiers. Clustering Tasks in Text Analysis, Clustering Algorithms and Clustering of Textual Data.	L2, L5	10

DBUA2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DMGT2801	STRATEGIC LEADERSHIP	L	T	P	C
Version 1.1	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
This course introduces the concept of Strategic Leadership. Strategic leadership is a practice in which executives, using different styles of **management**, develop a vision for their organization that enables it to adapt to or remain **competitive** in a changing economic and technological climate. Strategic leaders can use this vision to motivate employees and departments, fostering among them a sense of unity and direction to implement change within their organization. The main objectives of this course is to understand that how strategic leaders streamline processes, boost strategic productivity, promote innovation and cultivate an environment that encourages employees to be productive, independent and to push forward their own ideas and how to manage the make use of reward or incentive programs to encourage employees and help them reach their goals.

Course Objectives
The objective of this course is to:
1. Introduce students to the key concepts, tools and principles of Strategy and leadership and strategic Leadership.
2. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.
3. Develop an understanding of the concept of leadership and different styles of leadership and models.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how Leadership can be instrumental of achieving these objectives.

Course Outcomes
On completion of this course, the students will be able to
CO1: Identify and determine the concept of strategy, Mission, Vision and Strategic Management Process.
CO2: Analyze and understand the concept Leadership its theories, Styles and Models and Strategic Leadership
CO3: Analyze the concept of how Leadership can be instrumental in Strategic formulation and implementation
CO4: Analyze the concept of Strategic Leadership and Change Management and Agile Leadership and Counseling

Modules	Blooms level*	Number of hours
MODULE I-Introduction and Purpose of Strategy Concept of Strategy, corporate, Business and Functional Levels of Strategy, Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making	L1, L2	2
MODULE 2: Leadership: Importance of leadership, Roles of a Leader, Overview of Organizational Leadership Major Coursework and Issues in Organizational Leadership Theories of Leadership, Leadership Traits, Leadership Skills, Leadership Styles, Levels of Analysis of Leadership Theory – Leadership Traits and Ethics: Leadership Behavior and Styles, Process Theories: Reinforcement Theory, Contingency Leadership Theories and Models, normative leadership theory,	L1,L2, L3	7
MODULE 3: Introduction To Strategic Leadership Definition and **Qualities** of a Strategic Leader, Strategic leadership skills and characteristics, How to Become a Strategic Leader Strategic leadership vs. other classifications of leadership, strategic leadership environment challenges of strategic leadership Examples of Strategic Leaders,. Integrating Strategy and Leadership, Mission and Vision: The Heart of Strategic Leadership, Leadership and Systems Thinking, Describe the relationship between strategy and operations	L1, L2, L3	9
MODULE 4: Strategic Leadership Model/TYPES Transactional Leaders, Transformational Leaders Sigruficance of Transformational Leadership Types of Transformational Leaders Intellectual Reforms Revolutionaries Charismatic Role of Transformational Leadership in What Strategies do Transformational Leaders Use ,Charismatic-Visionary Leadership Team Leadership – Strategic Leadership Models	L1, L3,	10
MODULE 5: Strategic Leadership and Change Management, Leading High-performance Teams, Leading organisations into a new paradigm/ growth strategies	L1,L2 L3,	8
Module 6: Agile Leadership and Coaching and counseling Applying positive psychology and positive psychological capital Coaching models & framework, Coaching skills practice, Creating a coaching culture in organizations. Reflection and action planning	L1,L2 L3	10
P - Project; This would be the field project related to the subject where the student need to work outside the class collect the data and make report .	L3 , L4	15

DBUA2801	BUSINESS RESEARCH METHODS	L	T	P	C
Course Version	Latest Approved	2	1	2	4
Pre-requisites/Exposure					
Co-requisites					

Catalogue Description:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Objectives :
The objectives of this course are to ensure that students are able to-

1: Understand the basic framework of research process.
2: Comprehend of various research designs and techniques.
3: Identify various sources of information for literature review and data collection.
4: Understand some basic concepts of research and its methodologies.
5: Understand as how to organize and conduct research in a more appropriate manner and write a research report, thesis and a research proposal.

Course Outcomes :
On completion of this course, the students will be able to:
CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues
CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making
CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process
CO4: Synthesize and Evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

Modules	Blooms level*	Number of hours
Module I: Introduction Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal	L1, L2	9
Module II: Measurement and Data Collection Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing	L1, L2,L3,L4, L6	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module III: Data Analysis I Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test	L1, L2,L3,L4,L5,L6	9
Module IV: Data Analysis-II Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)	L1,L2,L3,L4,L5,L6	9
Module V: Report Writing Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report	L1,L2,L3,L4,L6	9
Fieldwork		15

DBUA2802	ECONOMETRICS	L	T	P	C
Version 1.1	Latest Approved	3	1	0	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

This course offers both fundamental and strategic understanding on identification of business problem and how to approach that problem using econometric techniques. This course facilitates a good learning on the estimation of parameters and forecasting of any indicator/variable related to business/ economy at both micro and macro level. Also, this course covers the quantitative analysis, model building and policy making for any economic/business problem. The course starts with simple and multiple linear regressions, followed by topics of special interest to deal with model specification, endogenous variables, binary choice data, and time series data. The aim of the course is to make the students familiar with statistical techniques and quantitative analysis.

Course Objectives

The objective of this course is to

1. Provide a good understanding on identification of problem, estimation of parameters and interpretation of results.
2. Equip the students with major statistical tools and techniques using various statistical software such as STATA, R, SPSS, Eview.
3. Explore statistical techniques and demonstrate through practical examples and interactive experiments.
4. Facilitate hands on experience to various real world business problems.

Course Outcomes

On completion of this course, the students will be able to

CO1: Translate data into models to make forecasts and to support decision making in a wide variety of fields, ranging from macroeconomics to finance and marketing.

CO2: Use statistical software or programming languages to combine data sets and estimate econometric models.

CO3: Analyse time series, cross sectional and panel data using appropriate statistical models.

Modules	Blooms level*	Number of hours
MODULE 1: Parametric Tests Nature, meaning and scope of econometrics; Simple and general linear regression model —Assumptions, Estimation (through OLS approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of R2 and adjusted R2; Concept and analysis of variance approach and its application in regression analysis.	L1, L2,L3,L4,L5,L6	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

MODULE 2: Autocorrelation Nature, test, consequences, and remedial steps of problems of autocorrelation **Project 1:** Autocorrelation for time series analysis	L1, L2, L3, L4,L5,L6	9
MODULE 3: Heteroscedasticity Nature, test, consequences, and remedial steps of problems of heteroscedasticity. **Project 2:** Heteroscedasticity for cross section data analysis	L1, L2,L3,L4,L5,L6	9
MODULE 4: Multicollinearity Nature, test, consequences, and remedial steps of problems of Multicollinearity. **Project 3 -** Multicollinearity for panel data analysis	L1, L2,L3,L4,L5,L6	10
MODULE 5: Non-Parametric Tests Dummy variable technique, Testing structural stability of regression models, Stationarity Tests, Logit, Probit and Tobit models — Applications.	L1, L2, L3,L4,L5	9
Field Work	L3,L$,L5,L6	15

DBUA2803	SOCIAL MEDIA ANALYSIS	L	T	P	C
Version 1.1	Latest Approved	3	1	0	4
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description
This module comprises of advanced disciplines and Modules pertaining to Analytics, Data Acquisition via web, Understanding and analysing Unstructured Data along with the future implementations and growth in the discipline of Analytics.

Course Objectives
This course aims at giving exposure on the advanced aspects with regards to Analytics. The course comprises of social media, Mobile, Text Analytics along with Web Scraping and the future advancements in the field of Analytics.

Course Outcomes
Upon successful completion of this module, students should be able to:
CO1: Apply and use Social Media Analytics for the betterment of the business.
CO2: Use Mobile Analytics for solving complex business problems and to stop churn.
CO3: Evaluate the business problem and apply analytics techniques for better output.
CO4: Analyse and understand patterns and techniques in social media & Mobile Analytics to solve complex problems.

Modules	Blooms level*	Number of hours
MODULE 1: Overview Social Media, On-Line Social Network, Off-Line Social Network, Metrics and Measurement, Dashboard, Target Audience, Desired Action, Content, Market Research Online Comm Moduleies, Cluster Analysis, Conjoint Analysis, Multidimensional Scaling, Social Media Listening, Social Media Scoring, Social Media Modelling.	L1, L2,L3,L4,L5,L6	8
MODULE 2: Mobile Analytics Understanding Mobile Analytics Concepts, difference between Mobile Analytics and Site Analytics, Natural language Processing with Mobile Analytics, Text Mining for Mobile Analytics, Mobile Analytics Tools, Churn Analytics.	L1, L2, L3, L4,L5,L6	10
MODULE 3: Text Analytics Text Data, Sources of Text Data, Information Clusters, Patterns, Trends, Tagging, Natural Learning Process, Lexical Analysis, Social Network Nodes, Linkage Structure, Node Labelling, Content-Based Classification, Word Stemming, Stemming Algorithms, Polarity of the Attitude, Psychological Profiling, Sentiment Analysis.	L1, L2,L3,L4,L5,L6	9

DBUA2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

ACCOUNTING FOR MANAGEMENT

Course Code: MGT4102 **Credit Units: 03**

Course Objective:
Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

Course Contents:

Module I: Introduction
The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control.Balance sheet-Dual Aspect principle, Classification Items of Balance Sheet, Formats of Balance Sheet.Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS,GAAP&IFRS) Depreciation Accounting.

Module II: Measuring and Reporting
Measuring and Reporting :Cost of sales and Inventories, Debentures, Investments, Shareholder Equity. Human Resource Accounting-Valuation of Human Resources, Recording and Disclosure in Financial Statements

Module III: Management Accounting
Contrast between Management Accounting and Financial Accounting and Reporting, Types of Management Accounting Information and their uses, General Observation on Management Accounting. Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS,GAAP& IFRS).

Module IV: Analyzing and Interpreting Financial Statements
Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons.Du-pont analysis.Interpretations of calculated Ratios.

Module V: Cost Accounting: The behavior of cost- Relation of cost to volume, BEP & Profit graph-CVP analysis, Full cost and its uses. Techniques of costing.Standard costing.Strategic planning and budgeting.

QUANTITATIVE TECHNIQUES IN MANAGEMENT

Course Code: MGT4106 **Credit Units: 03**

Course Objective:
The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment using contemporary software.

Course Contents:
Module I: Introduction
Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.

Module II: Probability and Probability Distributions
Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution:Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.

Module III: Sampling and Sampling Distribution
Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,

Module IV: Tests of Hypothesis
Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test

Module V: Forecasting Techniques
Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis

Module VI: Introduction to SPSS, performing univariate and bivariate analysis on SPSS
Examination Scheme:

Course Code: MGT4109 **Credit Units: 02**

Course Objective:
This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in e-business models, electronic payment systems and data & information security

Course Contents:

Module I: Modern Computer Systems
Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

Module II: Data Resource Management
Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts.SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc.). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

Module III: Telecommunications and Computer Networks
Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.

Module IV: Electronic Commerce Systems
Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.

Module V: E-Commerce Business Models & EDI
Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI.Various business models in Ecommerce likeB2C, B2B, C2C.

Module VI: E-Payment Systems and Security Management
Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.
The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types.Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

BUSINESS RESEARCH METHODS

Course Code: MGT4203 **Credit Units: 02**

Course Objective:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Contents:

Module I: Introduction
Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

Module II: Measurement and Data Collection
Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing

Module III: Data Analysis I
Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test

Module IV: Data Analysis-II
Simple linear regression: coefficient of determination, significance tests, residual analysis,
Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)

Module V: Report Writing
Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Case study must be included in the discussion.

MANAGEMENT SCIENCE

Course Code:MGT4207 **Credit Units: 03**

Course Objective:
The main objective of the course is to provide the students the insight into structures and processes that management science can offer and the enormous practical utility of its various utility. The course is designed to introduce the fundamental tools of management science and their application to real life business problems. It will help students to take well informed decisions in their corporate life.

Course Contents:

Module I: Introduction
Management Science: uses, scope, applications in managerial decision making; assumptions of management science models, decision making environments: decisions under certainty, uncertainty and risk situation; decision tree approach and its applications.

Module II: Linear Programming Problems
Linear Programming Problems: Modeling and Solution Methods- graphical method, simplex methods, problems with maximization and minimization objects, duality and its managerial interpretation;
Sensitivity analysis: meaning, Change in Objective Function Coefficients, Change in Right Hand Side Values, Change in Availability of resources and Addition of a new variable.

Module III: Transportation and Assignment Model
Transportation model: various methods of finding initial basic feasible solution and optimal solution, MODI method, degeneracy, unbalanced problems, prohibited route problems, maximization transportation problems
Assignment Model: Hungarian method for solution, unbalanced assignment problems, restrictions on assignments, travelling salesman problem.

Module IV: Game Theory
Two-Person Zero Sum Games, Pure Strategies: Games with Saddle Point, Mixed Strategies: Games without Saddle Point, Principle of Dominance, and Solution Methods for Games without saddle point – Algebraic Method, Arithmetic Method, Graphical Method.

Module V: Markov Chains
Markov Chains: introduction, characteristics, applications, state and transition probabilities, steady-state probability (equilibrium conditions), absorbing states and other applications of Markov Analysis.

Module VI: Simulation
Simulation: meaning, types of simulation, steps of simulation process, Monte Carlo simulation, applications of simulation

Examination Scheme:

BUSINESS ANALYTICS

Course Code: MGT4210 **Credit Units: 02**

Course Objective:

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations.The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

Course Contents:

Module I: Introduction to Business Analytics

Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis- Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel

Module II: Data Mining

Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.

Module III: Decision Making & Optimization

Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis;
Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.

Module IV: Big Data and Introduction to R

Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns.
Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression.
Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning.
Introduction to R Programing

Module V: Simulation using R and Excel

Hands on Regression using R;Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)
Capstone Project.

EXCEL FOR MANAGERS

Course Code: MGT4211 **Credit Units: 01**

Course Objective:

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers.This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

Course Contents:

Module-I: Getting Started with Excel

Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells:Using autofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

Module-II: Basics in excel

Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area.Adding hyperlinks to cells, inserting images, objects, equations and symbols.

Module-III: Charts & Formulas in Excel

Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

Module-IV: Functions in Excel

Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions.Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

Module-V: Financial and Statistical Functions in Excel

Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

Examination Scheme:

Components	Written Test	Practical	V/P	File/Assignment	Attendance
Weightage (%)	20	30	30	15	5

CORPORATE FINANCIAL REPORTING & ANALYSIS

Course Code: FIN4201 **Credit Units: 03**

Course Objective:
The International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board (IASB) are gaining recognition as Global Reporting Standards. While appreciating the emerging diversities and complexities in the world of accounting and the need for knowledge of IFRS in relation to the convergence of the Indian Accounting Standards. The objective of this Subject is to enhance the knowledge of IFRS issued by IASB as well as to provide practical framework to the student in the globalization scenario.

Course Content:
Module-I:
Brief overview of Indian Accounting Standard and different accounting standards at international level.Rational of Accounting Standards. IFRS Framework, Features of IFRS, Genesis of IFRS, Journey of IAS to IFRS, Advantage of adopting. IFRS.Challenges in Adopting IFRS.Difference between Indian GAAP and IFRS.

Module-II:
Concept of Fair Value Accounting Concept of Adoption and convergence. Significant Difference between Ind AS and IFRS. Problem of Carve Out. Timeline for Adoption for Ind- As, Concept of Fair Value Accounting Presentation of Financial Statement as per Ind-AS1, Statement of Change in Equity, Cash Flow Statement and Ind AS 7.

Module-III:
Treatment of Inventories as per Ind AS 2-; Property plant and equipment- Ind AS 16, recognition, measurement, cost model, revaluation model, depreciation and impairment of assets and related disclosures, Revenue recognition Ind AS 18- scope, revenue from sales of goods, Services, interest royalties and dividends and disclosures, Financial Instruments: Presentation, Recognition and Measurement (Ind AS 32 and 39), Ind AS 33 Earnings per Share .

Module-IV:
First time adoption of accounting standard: Recognition and measurement, Presentation and Disclosure

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

FINANCIAL STATEMENT ANALYSIS

Course Code: FIN4203 **Credit Units: 03**

Course Objective:
This course is designed to prepare students to interpret and analyze financial statements for tasks such as credit and security analyses, lending and investment decisions, and other decisions that rely on financial data. This course explores in greater depth financial reporting from the perspective of financial statement users. Students develop a sufficient understanding of the concepts and recording procedures and therefore are able to interpret various disclosures in an informed manner. Students learn to compare companies financially, understand cash flow, and grasp basic profitability issues and risk analysis concepts. Ultimately, students who complete this course develop a more efficient and effective approach to researching, interpreting, and analyzing financial statements.

Course Contents:

Module-I: Introduction to Financial Statements
Income Statement- Introduction, Revenue Recognition, Expense recognition, Comprehensive income, Accrual concept, Balance Sheet-Introduction, Components, measurement base of Balance sheet, Cash Flow statement- Format, Analysis of Cash flow statement.

Module-II: Financial Ratios
Introduction, Financial Analysis tools and techniques, Internal liquidity ratios, operating profitability ratios, Return on investment ratios, financial risk ratios, growth potential ratios, Return on equity and du pont system, Basic earning per share, dilutive earning per share, uses and limitations of ratio analysis.

Module-III: Analysis of Assets
Investment securities, Inventory analysis- conversion of inventory methods, long term assets- capitalizing vs. expensing, depreciation accounting, capitalizing intangible assets, Asset Impairment, natural assets.

Module-IV: Aanlysis of Liabilities
Introduction, Income Tax- terminology, Deferred tax accounting, Long term bonds- total interest cost component, retirement or conversion of bonds, interest rate impact on bond value, Leases- operating vs. financing lease, determining the value of lease and lease assets.

Module-V: Red Flags
Introduction, Accounting shenanigans, causes of accounting shenanigans, finding shenanigans.

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Required text:
- Prescribed Textbook:
- "The Analysis and use of Financial Statements", (3rd Ed.), Gerald I. White, Ashinpaul C. Sondhi and Dov Fired, Wiley-India.
- Financial Reporting and Analysis CFA level 1, latest edition

WEB DESIGN USING HTML

Course Code: ECM4204 **Credit Units: 03**

Course Objective: To make the students understand the basics of web designing and to impart knowledge about the web page and website creation and making the students aware about the technologies available and their applications.

Course Contents:

Module I: Web Design Introduction

Basic principles involved in developing a web site, Planning process, Five Golden rules of web designing, Designing navigation bar, Page design, Home Page Layout, Design Concept, Brief History of Internet, What is World Wide Web. Why create a web site, Web Standards, Audience requirement.

Module II:HTML Basics

What is HTML, HTML Documents, Basic structure of an HTML document, creating an HTML document, Mark up Tags, Heading-Paragraphs, Line Breaks, HTML Tags.

Module III:Elements of HTML

Introduction to elements of HTML, Working with Text, Working with Lists, Tables and Frames, Working with Hyperlinks, Images and Multimedia, Working with Forms and controls. XML, Java Script

Module IV: CSS

CSS Introduction: CSS Syntax, CSS Id & Class, CSS How. **CSS Styling:** Styling Backgrounds, Styling Text, Styling Fonts, Styling Links, Styling Lists, Styling Tables. **CSS Box Model:** CSS Border, CSS Outline, CSS Margin, CSS Padding

Module V: CSS Advanced

CSS Grouping/Nesting, CSS Dimension, CSS Display, CSS Positioning, CSS Floating, CSS Align, CSS Pseudo-class, CSS Pseudo-element, CSS Navigation Bar, CSS Image Gallery, CSS Image Opacity, CSS Image Sprites. CSS Media Types, CSS Attribute Selectors

Module VI: Dreamweaver & Web Site

Dreamweaver Basics, Dreamweaver shortcuts, Dreamweaver panels, Dreamweaver toolbars, Dreamweaver automation, Source code formatting

Web Site: Creating the Web Site, Saving the site, working on the web site, Creating web site structure, Creating Titles for web pages, Themes-Publishing web sites.

Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, EE: End Semester Examination; Att: Attendance

SUMMER INTERNSHIP EVALUATION

Course Code: MGT4335 **Credit Units: 06**

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**)

INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page –** An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content –** An outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

- **Title or Cover Page**
  The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

- **Acknowledgements**
  Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

- **Abstract**
  A good"Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

- **Table of Contents**
  Titles and subtitles are to correspond exactly with those in the text.

- **Introduction**
  Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

- **Materials and Methods**
  This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

- **Results and Discussion**
  Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

  Note that in writing the various secions, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

  While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporing or contradicting the present case of research.

- **Conclusion(s) & Recommendations**
  A conclusion should be the final section in which the outcome of the work is mentioned briefly. Check that your work answers the following questions:
  - Did the research project meet its aims (check back to introduction for stated aims)?
  - What are the main findings of the research?
  - Are there any recommendations?
  - Do you have any conclusion on the research process itself?

- **Implications for Future Research**
  This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

- **Appendices**
  The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

- **References**
  References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

  Examples
  For research article
  Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. Clin Microbiol Infect, 8(suppl 1): 116–117.
  For book
  Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), **7**: 63-67

The Layout Guidelines for the Internship File & Internship Report

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Examination Scheme:

Continuous Evaluation by faculty guide	15%
Continuous evaluation by CRC	15%
Feedback from industry guide	35%
Report, Presentation & Viva Voce	35%
TOTAL	**100%**

BUSINESS VALUATION

Course Code: FIN4302 **Credit Units: 03**

Course Objective:
The objective of this course is to develop a detailed understanding of the tools used by market professionals and corporate managers to analyze the value of companies and stocks. The central theme of the course will be the pricing of equity securities using discounted cash flow and relative valuation techniques. Students will apply what they've learned to the valuation of a specific company, with the goal of becoming an expert on that firm. After completing this course, students should be able to: (i) Develop quantitative models for firm and equity valuation based on DCF and multiples. (ii) Identify and interpret accounting and non-accounting information necessary for valuation. (iii) Identify and interpret the key value drivers for a firm or industry. (iv) Critically analyze firm and equity valuation models and assumptions developed by others. (v) Present valuation analyses and assumptions in a professional manner.

Course Contents:
Module-I: Introduction to Valuation
Valuation vs. Pricing.A philosophical basis for Valuation, Misconceptions about Valuation, Biasness in Valuation, Uncertainties in Valuation.Approaches to Valuation, Understanding Financial Statements, Basics of Risk.

Module-II: Discounted Cash Flow Valuation
Discounted Cashflow Valuation: Basis for Approach, Going Concern versus Liquidation Valuation, Equity Valuation versus Firm Valuation, Three pathways to DCF value, Advantages & Disadvantages of DCF Valuation, Riskless Rates and Risk Premiums, Estimating Risk Parameters and Costs of Financing, Measuring Earnings,Earnings to Cash Flows, Estimating Growth, Closure in Valuation: Estimating Terminal Value, Free Cash flow to Equity Models,

Module-III: Relative Valuation
Fundamental Principles of Relative Valuation, Choices with multiples- Earnings Multiples, Book Value Multiples,Choosing the Comparable firm: Making the comparison, Revenue and Sector-Specific Multiples, Advantages &Disadvantages of Relative Valuation, DCF vs Relative valuation.

Module-IV: Applicability of Valuation (Cases and research papers); Valuing Financial Services firm, Valuing Firms with Negative Earnings, Valuing Young and Start-up Firms, Valuing Private Firms, valuing Acquisitions and Takeovers,

Examination Scheme:

FINANCIAL MODELING WITH MS-EXCEL

Course Code:FIN4306 **Credit Units: 03**

Introduction

Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel. There are many features of model building that are common irrespective of the final model that one intends to build. In the course we will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

By the end of the course the participants should be better able to:

- Understand the basic and advanced features of excel
- Understand how to build models in excel to suit one's purpose
- Building models in different areas of finance including investments, corporate finance and derivatives
- Identifying and controlling the key sensitivities with advanced spreadsheet simulation
- Understand how risk can be built into the model to enhance decision making process

Course Contents:

Module-I: Understanding the Basic Featuresof Excel : Introduction to Modeling, Introduction to Excel,Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models

Module-II: Simulation using Excel : Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation

Module-III: Excel in Capital Budgeting, valuation: Preparing common size statements directly from Trial Balance Forecasting Financial Statements using Excel Analysing Financial Statements by using Spreadsheet Model ; Determining Project Viability Risk Analysis in Project Appraisal Simulation in Project Appraisal; Determination of Value Drivers, DCF Valuation, Risk Analysis in Valuation; Determining Efficient Portfolio, Creating Dynamic Portfolios Portfolio Insurance Fixed Income Portfolio Management using Excel.

Module-IV: Understanding Subroutines and Functions and building simple financial models using subroutines and functions Recording and Editing Macros Subroutines and Functions Decision Rules Message Box and Input Box Debugging, **Designing Advanced Financial Models** using VBA User Forms Other Advanced Features Actual Model Building.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **Q** – Quiz; **V** - Viva; **CT** - Class Test; A-Attendance; **EE** - End Semester Examination)

TRAINING AND DEVELOPMENT

Course Code: HRM4305 **Credit Units: 03**

Course Objective:
This course is designed to provide in depth understanding and enable the students to manage training processes and system for developing human resource of the organization.

Course Contents:

Module I: Introduction to Training and Development
Training – concept, and rationale; training process: role of stakeholders in training programme; Organization and Management of training function; Training needs assessment – organizational analysis, operational analysis, person analysis; competency mapping; Learning theories, learning process.

Module II: Training Design
Designing the training programme: process of learning in training programme – attributes and factors influencing; learning process; learning styles; training climate and pedagogy; developing training modules; Training aids

Module III:Training Methods and Techniques
Training methods and techniques – role playing, business games, in basket exercises, laboratory training; incidents and cases; seminars, syndicates and group discussion; lecture, programmed instructions; inspirational techniques – brainstorming, mind mapping, creative problem solving; Management Development

Module IV:Evaluation of training
Evaluation of training – need for evaluation, principles of evaluation, criteria and approaches; return on investment in training, process of calculating ROI in training;

Module V: Emerging Trends in Training and Development
Emerging trends in training and development; new perspectives on training – cross cultural training, e-learning, knowledge management

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

DATABASE MANAGEMENT SYSTEMS

Course Code: ITM4302 **Credit Units: 03**

Course Objectives

The course aims to make the students understand the basic and advanced concepts in databases and database management systems. Students will be able to understand the importance of databases in day to day life. The course will also provide the students, a hands-on experience on the SQL-the language of databases.

Course Contents:

Module I: Introduction to DBMS

Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.

Module II: Relational Database & ER Model

Relational Database: Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views

ER Model: Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.

Module III: Relational Model Objects

Domains and Relations, Relations and predicates, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, Relational operators, Relational Algebra

Module IV: SQL

SQL Language, DDL,DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.

Module V: Database Applications and Types

Distributed Database, Object Oriented Database, Multimedia Database, Data Mining, Digital Libraries. Data Warehouse.

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

DIGITAL MARKETING

Course Code: ITM4303 **Credit Units: 03**

Course Overview:
The course examines digital marketing strategy, implementation and executional considerations for B-to-B and B-to-C brands and provides a detailed understanding of all digital marketing concepts. Participants will complete the course with a comprehensive knowledge of and experience with how to develop an integrated digital marketing strategy, from formulation to implementation. Strong focus will be on developing student's business skills and growing real-world experience of the digital media sector to enhance their knowledge to cope with employability demand.

Course Objectives:
Digital Marketing Course is an initiative designed to educate students and practitioners in the area of Digital Marketing analytics and make them ready for jobs or prepare them to launch campaign for their own organisations.

- To Understand how and why to use digital marketing for multiple goals within a larger marketing and/or media strategy
- Understand the major digital marketing channels - online advertising: Digital display, video, mobile, search engine, and social media
- Learn to develop, evaluate, and execute a comprehensive digital marketing strategy and plan
- Learn how to measure digital marketing efforts and calculate ROI
- Explore the latest digital ad technologies

Course Contents:

Module-I: Digital Marketing Overview:
What is Digital Marketing? Understanding Marketing Process? Why Digital Marketing Wins Over traditional Marketing? Understanding Digital Marketing Process; Digital Marketing Planning and Strategy

Module-II: Website Planning and Creation:
Understanding Internet; Difference between Internet & web; Understanding websites; Understanding domain names & domain extensions; What is web server & web hosting? Different types of web servers; Different types of websites; Planning & Conceptualising a Website; Building website using CMS in Class.

Module-III: Digital Advertising (PPC, Digital Display and YouTube):
Google AdWords Overview; Understanding Adwords Algorithm; Creating Search Campaigns; Types of Search Campaigns - Standard, All features, dynamic search & product listing. Tracking Performance/Conversion: What is conversion tracking? Why is it important, how to set up conversion tracking. Optimizing Search Campaigns: How to optimize campaigns at the time of creation? Optimizing campaign via adgroups.Creating Display Campaign; Types of display campaigns- All features, Mobile app, Remarketing, Engagement. Optimizing Display Campaign and Re-marketing .
What is Online Advertising? Types of Online Advertising, Display Advertising, Contextual advertising, what are Payment Modules?Different Online advertising platforms Creating Banner Ads Using Tools.

Module-IV: Emerging trends in Digital Marketing:
Affiliate Marketing- Affiliate marketing history**,** Affiliate marketing scenario in India**,** Different ways to do affiliate marketing. **Email Marketing-** What is email marketing and how it works? Types of email marketing- Opt-in & bulk emailing; Setting up email marketing account, creating a broadcast email. What are auto responders? Setting up auto responders; Tricks to land in inbox instead of spam folder; **Social Media Marketing-**Concept**,** How social media marketing is different than

others Forms of Internet marketing, Understanding Facebook marketing, Linkedin Marketing, Twitter Marketing, Video Marketing **and** VIDEO & AUDIO (PODCASTING) marketing; **and Mobile Web Marketing-** Understanding Mobile Devices, Mobile Marketing Measurement and Analytics; Fundamentals of Mobile Marketing, Creating mobile website through wordpress; Using tools to create mobile websites; Using tools to create mobile app Advertising on mobile (App & Web); Content Marketing on mobile. **Content Marketing-**Introduction to content marketing, Objective of content marketing, Content marketing 7 step strategy building process, How to write great compelling content, Optimizing content for search engines, How to increase opt-in email list with content marketing with examples.

Module-V: Search Engine Optimization (SEO):
What is SEO? Introduction to SERP, What are search engines? How search engines work? Major functions of a search engine; what are keywords? Different types of keywords ; Google keyword planner tool; Keywords research process; Understanding keywords; On page optimization; Off Page optimization; Top tools for SEO; Monitoring SEO process; Preparing SEO reports, How to create SEO Strategy for your business, What is link juice? Importance of domain and page authority?How to optimize exact keywords for your business. What is Google Panda Algorithm, Google Penguin and Google EMD Update. How to save your site from Google Panda, Penguin and EMD Update, How to recover your site from Panda, Penguin and EMD.

Module-VI: E-Commerce and Payment Gateway:
What is ecommerce? Top ecommerce websites around the world & it's scenario in India; Difference between E-Commerce software and Shopping Cart; software Payment Gateways, Merchant Accounts & Logistics for physical goods. Integrating Woo-commerce and setting up an ecommerce store on WordPress. Case studies on ecommerce websites. How to do Google Product Listing Ads (PLA) for ecommerce websites.How to do SEO for an ecommerce website.

Final Project: Group Paper and Presentation
Students will work in instructor-selected groups of four or five to complete a 15-20 page digital marketing plan utilizing the concepts and frameworks covered in the course. Papers should be double-spaced using 12-point font and 1-inch margins, and submitted accordingly. All groups will be required to give a presentation in class highlighting the important points of their plan and submit their presentation slides for review. Presentations will take place in class via web conference on prescribed date. Students will need to ensure their audio is working well in order to present. All students will be required to complete evaluations of the group presentations given in class. 25% will be deducted per day for late papers and slides.

INTRODUCTION TO CLOUD COMPUTING

Course Code: ITM4304 **Credit Units: 03**

Course Objective:
This course gives students an insight into the basics of cloud computing along with virtualization, cloud computing is one of the fastest growing domain from a while now. It will provide the students basic understanding about cloud and virtualization along with it how one can migrate over it.

Course Contents:
Module-I: Cloud Computing Overview
Origins of Cloud computing – Cloud components - Essential characteristics – On-demand self-service, Broad network access, Location independent resource pooling ,Rapid elasticity , Measured service, Comparing cloud providers with traditional IT service providers, Roots of cloud computing.

Module-II: Cloud Insights
Architectural influences – High-performance computing, Utility and Enterprise grid computing, Cloud scenarios – Benefits: scalability ,simplicity ,vendors ,security, Limitations – Sensitive information - Application development- security level of third party - security benefits, Regularity issues: Government policies.

Module-III: Cloud Architecture- Layers and Models
Layers in cloud architecture, Software as a Service (SaaS), features of SaaS and benefits, Platform as a Service (PaaS), features of PaaS and benefits, Infrastructure as a Service (IaaS), features of IaaS and benefits, Service providers, challenges and risks in cloud adoption.Cloud deployment model: Public clouds – Private clouds – Community clouds - Hybrid clouds - Advantages of Cloud computing.

Module-IV: Cloud Simulators- CloudSim and GreenCloud
Introduction to Simulator, understanding CloudSim simulator, CloudSim Architecture, Understanding Working platform for CloudSim, Introduction to GreenCloud

Module-V: Introduction to VMWare Simulator
Basics of VMWare, virtualization, advantages of virtualization, using Vmware workstation, creating virtualmachines-understanding virtual machines, create a new virtual machine on local host, cloning virtual machines, virtualize a physical machine.

SYSTEM ANALYSIS AND DESIGN

Course Code: ITM4305 **Credit Units: 03**

Course Objective:
The course aims at preparing students conceptualize and define scope and domain of system analysis and design. It also focuses on system development life cycle using conventional and structural look.

Course Contents:

Module I: Systems Development Environment. (Information system development life cycle)
System & its parts, Types of Systems, Characteristics of a System, System Analyst in system Development, Developing Systems- SDLC, Approaches to System Development (Prototyping, Joint Application Design (JAD), Participatory Design (PD)), System Development Models (Waterfall model & Spiral Model), System Planning & Selection (Identifying, Selecting, Initiating & Planning System Development Project).

Module II: System Planning and Selection (Graphic technology modeling tool)
Identifying and Selecting Projects (Identifying potential development projects, classifying and ranking projects, and selecting projects for development), Methods for project identification and selection, Evaluation criteria for classifying and ranking projects, Initiating and Planning System Development Projects (Process & performed Activities, Deliverables & Outcomes), Assessing Project Feasibility (Economic, Operational, Technical, Schedule, Legal & Contractual, Political Feasibility)

Module III: System & Data Analysis (Data Analyzing Modeling)
Determining System Requirements (Traditional Methods, Modern & Radical Methods), Structuring System Requirements (Process Modeling – DFD, Logic Modeling – Structured English & Decision Tables, Conceptual Modeling – ER Model), Data Analysis & Techniques (Interpretive, Coding, Recursive Abstraction and Mechanical Technique), Types of Analysis (Descriptive, Exploratory, Confirmatory and Predictive), Modeling Methodologies (Bottom Up method & Top Down Method), Generic and Schematic Data Modeling.

Module IV: System Design
System Design (Design Objectives, Phases in Designing, Purpose of System Design), System Design Goals, Type of Design, Design Strategy, System Decomposition (Modeling, Connection and Coupling of a System), System Design Methodologies, Roles & Duties of System Administration. Succeeding as System Analyst, Interpersonal kills, Management skills, Analytical skills and Technical skills.

Module V: System Implementation & Operation (System Management)
Activities in implementing (Coding, Testing & Installation, Documentation, Training, Support, Maintenance), Types of testing, planning installation, approaches to installation, Documenting a system, Training and Supporting users, Types & Frequencies of Training Methods, Reasons of System Implementation Failures, Project Closedown, Conducting System Maintenance – Types of Maintenance (Corrective, Adaptive and Perfective Maintenance), effective maintenance, Evaluation of System's Success, System Enhancement, Quality Assurance in System Cycle.

Module VI: System Security and Auditing
System Security: Data Security, Backup & Recovery during System & Database failure, Ethical Issues in System Development, Threat and Risk Analysis, Audit, System Audit, System Audit Standards (Planning, Implantation and Reporting Standards), System Analysis and Programming (Overview, Role & Duties of System Experts as Analyst and Programmer).

DYNAMIC WEB DESIGN & DEVELOPMENT

Course Code: ITM4306 **Credit Units: 03**

Course Objective:
To develop applications in PHP using various concepts like arrays, user defined functions, Sessions which makes the students to understand and to establish the connectivity between PHP and database and develop programs to add records, retrieve records and delete records from a table.

Course Contents:
Module I: Introduction to Web Development & Cascading Style Sheets
Web pages, Static and Dynamic web pages, Client side VS Server side, Introduction to HTML, HTML Elements, HTML attributes, Styling and formatting HTML, Forms, Tables.
CSS Basics: CSS Introduction: CSS Syntax, CSS Id & Class, CSS How
CSS Styling: Styling Backgrounds, Styling Text, Styling Fonts, Styling Links, Styling Lists, Styling Tables. **CSS Box Model:** CSS Border, CSS Outline, CSS Margin, CSS Padding

Module II: CSS Advanced
CSS Grouping/Nesting, CSS Dimension, CSS Display, CSS Positioning, CSS Floating, CSS Align, CSS Pseudo-class, CSS Pseudo-element, CSS Navigation Bar, CSS Image Gallery, CSS Image Opacity, CSS Image Sprites. CSS Media Types, CSS Attribute Selectors

Module III: Introduction to PHP, Decisions, Loop & Functions
Evaluation of Php, Basic Syntax, Defining variable and constant, Php Data type, Operator and Expression, Making Decisions, Doing Repetitive task with looping, Mixing Decisions and looping with Html.
What is a function, Define a function, Call by value and Call by reference, Recursive function, String Creating and accessing, String Searching & Replacing String, Formatting String, String Related Library function,Anatomy of an Array, Creating index based and Associative array Accessing array, Element Looping with Index based array, Looping with associative array using each () and foreach(), Some useful Library function

Module IV: Handling HTML Forms using PHP, Working with Files and Directories
Capturing Form, Data Dealing with Multi-value filed, and Generating File uploaded form, redirecting a form after submission.
Understanding, file & directory, Opening and closing a file, Coping, renaming and deleting a file, working with directories, Creating and deleting folder, File Uploading & Downloading.

Module V: Session and Cookie, Database Connectivity with MySql, Exception Handling
Introduction to Session Control, Session Functionality What is a Cookie, Setting Cookies with PHP. Using Cookies with Sessions, Deleting Cookies, Registering Session variables, Destroying the variables and Session.Introduction to RDBMS, Connection with MySql Database, Performing basic database operation(DML) (Insert, Delete, Update, Select), Setting query parameter, Executing queryJoin (Cross joins, Inner joins, Outer Joins, Self joins.)
Understanding Exception and error, Try, catch, throw. Error tracking and debugging.

Examination Scheme:

ADVERTISING AND SALES PROMOTION

Course Code: MKT4301 **Credit Units: 03**

Course Objective:
The main objective of this course is to familiarize the students with the role of advertising in the context of promoting products and services. Advertising is one of the most used promotional tools. It will help students to understand the advertising process and key decision areas for effective management of this function.

Course Contents:

Module-I: Introduction
Evolution of advertisement, Advertiser, Facilitating Institutions, advertising and society, advertising and regulations; ***Advertising Planning and decision making:*** Planning framework, Situation analysis, advertising plan, Communication and persuasion process.

Module-II: Objective Setting and Market Positioning
IMC: Role of advertising within marketing program and communication mix, sales promotion, public relations, publicity and integrating different elements; ***Setting goals and objectives:*** *Behavioral dynamics, advertising response variables, DAGMAR.* ***How advertising works:*** Low-Involvement learning, Central versus Peripheral routes to persuasion, ELM, Cognitive response model.

Module-III: Message Strategy
Attention and comprehension:Attention, Comprehension, Recall, Interpretation; ***Understanding Benefit-based attitude:*** Attitude levels, Means-Ends and Laddering Analysis, Multi-attribute models, Segmentation using attitude structure; ***Associating feelings with brands:*** Modeling the feelings response to advertising, transformational advertising, role of classical conditioning; brand personality associations; ***WOM Advertising:*** Informational influence and Normative influence.
Message Tactics-*Creative approaches*: Rational and emotional creative approaches, Using Endorser, Distraction Effect; ***Copywriting:*** Illustrating, layout, creative styles; ***Copy testing:*** Strategy, diagnostic copy tests; ***Production and implementation:*** Advertising production process, model of the creation and production process, Client-Agency relationship.

Module-IV: Media Strategy and tactics
Setting Media Budgets: Budget allocation, budgeting methods; ***Media Tactics:*** Media class decisions, media vehicle decisions, media option decisions, scheduling and timing decision, creativity in media planning.

Module-V: Sales Promotion
Introduction, Role & Scope, Consumer & Trade Promotions, Sales promotion Strategy, Promotional offers- coupons, price-offs, premiums, sweepstakes, refund and rebates, sampling, loyalty programmes, POP displays, Dealer loader, Celebrity Endorsements.

DIGITAL MARKETING

Course Code: MKT4303 **Credit Units: 03**

Course Overview
The course examines digital marketing strategy, implementation and executional considerations for B-to-B and B-to-C brands and provides a detailed understanding of all digital marketing concepts. Participants will complete the course with a comprehensive knowledge of and experience with how to develop an integrated digital marketing strategy, from formulation to implementation. Strong focus will be on developing student's business skills and growing real-world experience of the digital media sector to enhance their knowledge to cope with employability demand.

Course Objectives
Digital Marketing Course is an initiative designed to educate students and practitioners in the area of Digital Marketing analytics and make them ready for jobs or prepare them to launch campaign for their own organisations.

- To Understand how and why to use digital marketing for multiple goals within a larger marketing and/or media strategy
- Understand the major digital marketing channels - online advertising: Digital display, video, mobile, search engine, and social media
- Learn to develop, evaluate, and execute a comprehensive digital marketing strategy and plan
- Learn how to measure digital marketing efforts and calculate ROI
- Explore the latest digital ad technologies

Course Contents:

Module-I: Digital Marketing Overview:
What is Digital Marketing? Understanding Marketing Process? Why Digital Marketing Wins Over traditional Marketing? Understanding Digital Marketing Process; Digital Marketing Planning and Strategy

Module-II: Website Planning and Creation:
Understanding Internet; Difference between Internet & web; Understanding websites; Understanding domain names & domain extensions; What is web server & web hosting? Different types of web servers; Different types of websites; Planning & Conceptualising a Website; Building website using CMS in Class.

Module-III: Digital Advertising (PPC, Digital Display and YouTube):
Google AdWords Overview; Understanding Adwords Algorithm; Creating Search Campaigns; Types of Search Campaigns - Standard, All features, dynamic search & product listing. Tracking Performance/Conversion: What is conversion tracking? Why is it important, how to set up conversion tracking. Optimizing Search Campaigns: How to optimize campaigns at the time of creation? Optimizing campaign via adgroups. Creating Display Campaign; Types of display campaigns- All features, Mobile app, Remarketing, Engagement. Optimizing Display Campaign and Re-marketing .
What is Online Advertising? Types of Online Advertising, Display Advertising, Contextual advertising, what are Payment Modules? Different Online advertising platforms Creating Banner Ads Using Tools.

Module-IV: Emerging trends in Digital Marketing:
Affiliate Marketing- Affiliate marketing history**,** Affiliate marketing scenario in India**,** Different ways to do affiliate marketing. **Email Marketing-** What is email marketing and how it works? Types of email marketing- Opt-in & bulk emailing; Setting up email marketing account, creating a broadcast email. What are auto responders? Setting up auto responders; Tricks to land in inbox instead of spam folder; **Social Media Marketing-**Concept**,** How social media marketing is different than

DATABASE MANAGEMENT SYSTEMS

Course Code: ECM4302 **Credit Units: 3**

Course Objectives

The course aims to make the students understand the basic and advanced concepts in databases and database management systems. Students will be able to understand the importance of databases in day to day life. The course will also provide the students, a hands-on experience on the SQL-the language of databases.

Course Contents:

Module I: Introduction to DBMS

Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.

Module II: Relational Database & ER Model

Relational Database: Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views

ER Model: Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.

Module III: Relational Model Objects

Domains and Relations, Relations and predicates, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, Relational operators, Relational Algebra

Module IV: SQL

SQL Language, DDL,DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.

Module V: Database Applications and Types

Distributed Database, Object Oriented Database, Multimedia Database, Data Mining, Digital Libraries. Data Warehouse.

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

DYNAMIC WEB DESIGN & DEVELOPMENT

Course Code: ECM4307 **Credit Units: 03**

Course Objective:
To develop applications in PHP using various concepts like arrays, user defined functions, Sessions which makes the students to understand and to establish the connectivity between PHP and database and develop programs to add records, retrieve records and delete records from a table.

Course Contents:

Module I: Introduction to Web Development & Cascading Style Sheets
Web pages, Static and Dynamic web pages, Client side VS Server side, Introduction to HTML, HTML Elements, HTML attributes, Styling and formatting HTML, Forms, Tables.
CSS Basics: CSS Introduction: CSS Syntax, CSS Id & Class, CSS How
CSS Styling: Styling Backgrounds, Styling Text, Styling Fonts, Styling Links, Styling Lists, Styling Tables
CSS Box Model: CSS Border, CSS Outline, CSS Margin, CSS Padding

Module II: CSS Advanced
CSS Grouping/Nesting, CSS Dimension, CSS Display, CSS Positioning, CSS Floating, CSS Align, CSS Pseudo-class, CSS Pseudo-element, CSS Navigation Bar, CSS Image Gallery, CSS Image Opacity, CSS Image Sprites
CSS Media Types, CSS Attribute Selectors

Module III: Introduction to PHP, Decisions, Loop & Functions
Evaluation of Php, Basic Syntax, Defining variable and constant, Php Data type, Operator and Expression, Making Decisions, Doing Repetitive task with looping, Mixing Decisions and looping with Html.
What is a function, Define a function, Call by value and Call by reference, Recursive function, String Creating and accessing, String Searching & Replacing String, Formatting String, String Related Library function,Anatomy of an Array, Creating index based and Associative array Accessing array, Element Looping with Index based array, Looping with associative array using each () and foreach(), Some useful Library function

Module IV: Handling HTML Forms using PHP, Working with Files and Directories
Capturing Form, Data Dealing with Multi-value filed, and Generating File uploaded form, redirecting a form after submission.
Understanding, file & directory, Opening and closing a file, Coping, renaming and deleting a file, working with directories, Creating and deleting folder, File Uploading & Downloading.

Module V: Session and Cookie, Database Connectivity with MySql, Exception Handling
Introduction to Session Control, Session Functionality What is a Cookie, Setting Cookies with PHP. Using Cookies with Sessions, Deleting Cookies, Registering Session variables, Destroying the variables and Session.
Introduction to RDBMS, Connection with MySql Database, Performing basic database operation(DML) (Insert, Delete, Update, Select), Setting query parameter, Executing queryJoin (Cross joins, Inner joins, Outer Joins, Self joins.)
Understanding Exception and error, Try, catch, throw. Error tracking and debugging.

DISSERTATION

Course Code: MGT4437 **Credit Units: 06**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Selecting the Dissertation Topic
It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between 'dissertation topic' and 'dissertation title'. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

Planning the Dissertation
This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The Dissertation plan or outline
It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

Keeping records

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct a direct quotation and what is your paraphrase.

Dissertation format

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

For books, the following details are required:
Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

The Layout Guidelines for the Dissertation

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Guidelines for the Assessment of the Dissertation

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

Examination Scheme:

Contents & Layout of the Report	30
Conceptual Framework	10
Objectives & Methodology	15
Implications & Conclusions	15
Viva/ Presentations	30
TOTAL	**100**

COMPENSATION AND REWARD MANAGEMENT

Course Code: HRM4401 **Credit Units: 03**

Course Objective:
This course helps students to learn how compensation system operates to attract, retain and motivate competent work force.

Course Contents:

Module I: Introduction
Concept of Compensation, System of Compensating, Concept of Reward and Reward System, Economic Theory of Wages, Limitations of Economic Theories. Wage and Salary Administration at micro level, Wage concepts, Methods of Job Evaluation, Role of various parties – Employees, Employers, Unions & Government, Overview of Legislations affecting Compensation

Module II: Compensation Structure- Indian Practices
Salary Progression, Methods of Payment, Limitations of the Job Related Compensation, Competency based Compensations, Performance linked Compensations- Performance Appraisal

Module III: Elements of Compensation
Variable Compensation, Principles of Reward Strategy, Perquisites, Bonuses & Incentives Scope and Process, Ethical Considerations, Social Security, Sharing Productivity Gains with Employees, Gain Sharing, Team Based Pay, The Role of Compensation in Sales Force Success, Constructing pay structure

Module IV: Incentive Schemes / Payment by Results
Types of Incentive Schemes/ Systems and Plans, Merits and Demerits of Incentives

Module V: Benefits and Services
Concept of Benefit- Strategic Perspectives on Benefits, Type of Benefits, Factor Influencing Choice of Benefit Package, Administration of Benefits and Services

Module VI: Current Trends in Compensation and Reward Management
Elements of Managerial Compensation- A New Approach, VRS, Pay the Person, Rewarding Excellence, Individualizing the Pay System, Executive compensation, International Compensation

PSYCHOLOGICAL TESTING

Course Code: HRM4402 **Credit Units: 03**

Course Objective:
To develop an understanding of the concept of psychological testing by providing a theoretical background of psychological assessment of personality tests and their applications and the ethics of the usage of different types of psychological tests.

Course Contents:

Module I: Functions and Origins of Psychological Testing
Concept of Psychological Testing, Nature and Use of Psychological Tests, Historical Antecedents of Modern Testing

Module II: Technical and Methodological Principles
Norms and Meaning of Test Scores, Reliability and Validity

Module III: Personality Testing
Self-Report Inventories and Scales- MBTI and FIRO-B
Projective Techniques- TAT, Sentence Completion Test
Measures of Styles and Types
Situational Tests
Self-Concepts and Personal Constructs
Observer Reports

Module IV: Applications of testing
Educational Testing
Occupational Testing

Module V: Ethical and Social Considerations in Testing
Protection of Privacy and Confidentiality
Communicating Test Results

MANAGERIAL COUNSELLING

Course Code: HRM4406 **Credit Units: 03**

Course Objective:
To understand the concept and process so as to develop the professional counseling skills among the students.

Course Contents:

Module I: Introduction
Self-Development of Managers as Counselors, Barefoot Counseling, Assertiveness and Interpersonal Skills for Counselors, Counseling Relationship.

Module II: Approaches to Counseling
Development of Counseling Skill, Introduction to the Important Schools of Counseling, Psychoanalytic Foundations, Transactional Analysis, Gestalt Therapy, Rational Emotive Therapy, Person-Centered Approach to Counseling, An Integrated Model, Essentials of Skills, Nonverbal Clues.

Module III: Counseling Process
Counseling Interventions in Organizations, Empathy, Listening and Responding, Effective Feedback, Role conflict in counselling, Genuineness, Social Skills at workplace

Module IV: Counseling at Work
Performance Counseling, Counseling in Problem Situations, Interpersonal Conflicts, Midlife Blues, Integration and Action Plan.

Module V: Current Trends in Counselling
Modern trends in counselling, role of a counsellor, Importance of mindfulness, Counselling in Indian Industries.

Examination Scheme:

INTERNATIONAL TRADE PROCEDURES AND DOCUMENTATION

Course Code: IBM4407 **Credit Units: 03**

Course Objective:
Learning the importance and procedural & documentation aspects of export-import of goods and services; impart knowledge of governments, departments, international institutions involved ; teach an Export Manager to develop a systematic methodology to handle exports ; understand the relevance and importance of various government policy measures for export as well as import.

Course Contents:
Module I: Introduction
Export documentation Framework – the need, entities & documents as per requirement of (a) the contract (b) Govt. of India (c) Importing country d) for claiming export assistance.

Module II: Documents for processing export order and legal implications
Processing of Product enquiry/quotation, Purchase/Export Order, Letter of intent, Payment Terms, International Transport Modes, INCOTERMS, advising & scrutiny of a Letter of Credit (L/C), seeking L/C amendments, International Chamber of Commerce's UCPDC articles.

Module III: Export/Import Documents
How to make Commercial, Financial, Transport, Title, Official, Insurance, Export assistance Documents & Certificates for Exports.Ensuring error-free export documentation as per L/C. How to open L/C, apply for license and make Customs/ Sales Tax documents for imports. International Transactions involving Documents Against Payment and Document Against Acceptance. Negotiation of Export Bills, Bank realization, late payment follow-up.

Module IV: Central Excise, Sales Tax, Customs and Port Clearances
Clearance of Export & Import Cargo, Role of Clearing and Forwarding Agents, Shipment of Export Cargo, Excise, Sales Tax & Customs Department regulation compliance. Port and Shipping clearance of Export and Import cargo.

Module V: EXIM Policy Framework
EPCG Scheme, Duty Exemption Pass Book Scheme, Export Oriented Units, Export houses, Trading houses, Export Processing Zones, Special Economic Zone, Bank, RBI, DGFT, Customs & FEMA regulatory compliances.

Examination Scheme:

DATA WAREHOUSING & DATA MINING

Course Code: ITM4401 **Credit Units: 03**

Course Contents:

Module-I: DATA WAREHOUSING

Data warehousing Components –Building a Data warehouse –- Mapping the Data Warehouse to a Multiprocessor Architecture – DBMS Schemas for Decision Support – Data Extraction, Cleanup, and Transformation Tools –Metadata.

Module-II: BUSINESS ANALYSIS

Reporting and Query tools and Applications – Tool Categories – The Need for Applications – Cognos Impromptu – Online Analytical Processing (OLAP) – Need – Multidimensional Data Model – OLAP Guidelines – Multidimensional versus Multi relational OLAP – Categories of Tools – OLAP Tools and the Internet.

Module-III: DATA MINING AND TRENDS IN DATA MINING

Introduction – Data – Types of Data – Data Mining Functionalities – Interestingness of Patterns – Classification of Data Mining Systems – Data Mining Task Primitives – Integration of a Data Mining System with a Data Warehouse – Issues –Data Preprocessing,– Based Cluster Analysis – Outlier Analysis – Data Mining Applications.

Module-IV: CLUSTERING AND APPLICATIONS

Cluster Analysis - Types of Data – Categorization of Major Clustering Methods – K means – Partitioning Methods – Hierarchical Methods - Density-Based Methods –Grid Based Methods – Model-Based Clustering Methods – Clustering High Dimensional Data - Constraint

Module-V: ASSOCIATION RULE MINING AND CLASSIFICATION

Mining Frequent Patterns, Associations and Correlations – Mining Methods – Mining Various Kinds of Association Rules – Correlation Analysis – Constraint Based Association Mining – Classification and Prediction - Basic Concepts - Decision Tree Induction - Bayesian Classification – Rule Based Classification – Classification by Back propagation – Support Vector Machines – Associative Classification – Other Classification Methods – Prediction

Examination Scheme:

SEARCH ENGINE OPTIMIZATION

Course Code: ITM4405 **Credit Units: 3**

Course Objective:

Course Contents:

Module-I: SEO Basics
Introduction about Domain, World Wide Web, Difference between Portal & Search Engine, Importance of Search Engine, Working of search engine, Difference between directories & search engine. Website performance monitor in search engine

Module-II:
Introduction to SEO, Web Traffic, Need of SEO, Working of SEO, Steps in SEO, Types of SEO techniques : Black Hat Techniques, White Hat Techniques,

Module-III: Keyword Research & Analysis
Introduction to Keyword research: Types of keywords, Keyword research methodology, keywords analysis tools, Preparing keyword list, localized keyword research, Keyword density, Keyword prominence, keyword stuffing

Module-IV: On Page Optimization
Basis of website designing, Essentials of good website designing, HTML Basics for SEO : Page Title, Meta Descriptions & Meta Keywords, Headings, Bod Text, Image & Alt tag, Invisible text, HTML Site Map Creation, Web Master Tools

Module-V: Off Page SEO Optimization
Page Rank, Link Popularity, Link Building, Types of Link Building, Book Marking, Article Submission Blog Marketing, Blog commenting, XML Site Ma submission, Customer review submission, press release submission, search engine submission

TOOLS FOR BUSINESS INTELLIGENCE

Course Code: ITM4406 **Credit Units: 03**

Course Objective:
This course provides an introduction to the concepts of business intelligence (BI) as components and functionality of information systems. The course aims at examining Business Intelligence (BI) as a broad category of applications and technologies for gathering, storing, analyzing, sharing and providing access to data to help enterprise users make better managerial decisions. Students will be able to learn the principles and best practices for how to use data in order to support fact-based decision making

Course Contents:

Module-I: Business Intelligence: An Introduction
Introduction, Definition, History and Evolution, Business Intelligence Segments, Difference between Information and Intelligence, Defining Business Intelligence Value Chain, Factors of Business Intelligence System, Real time Business Intelligence, Business Intelligence Applications.

Module-II: Business Intelligence Types:
Types of Business Intelligence, Business Intelligence Platform, Dynamic roles in Business Intelligence, Roles of Business Intelligence in Modern Business- Challenges of BI, Multiplicity of Business Intelligence Tools, Types of Business Intelligence Tools, Modern Business Intelligence, the Enterprise Business Intelligence, Information Workers

Module-III: Business Intelligence Life Cycle
Introduction, Business Intelligence Lifecycle, **Enterprise Performance Life Cycle (EPLC)**Framework Elements, Life Cycle Phases, Human Factors in BI Implementation, BI Strategy, Objectives and Deliverables, Transformation Roadmap, Building a transformation roadmap, BI Development Stages and Steps, Parallel Development Tracks, BI Framework

Module-IV: Introduction to Data Warehousing& Data Mining
Data Warehousing, Advantages and Disadvantages, Data Mart, Online Analytical Processing (OLAP), Characteristics, Tools, Difference between OLAP and OLTP, Multidimensional Data Model. Definition of Data Mining, Data mining parameters, How Data Mining works?, Types of relationships, Architecture of Data Mining, Kinds of Data which can be mined, Functionalities of Data Mining, Classification on Data Mining system, Various risks in Data Mining, Advantages and disadvantages of Data Mining

Module-V: Business Intelligence User Model
Introduction, Evolution of Business Intelligence, Business Intelligence Opportunity Analysis Overview, Content Management System, End User Segmentation, Basic Reporting and Querying, Online Analytical Processing, OLAP Techniques, OLAP Applications, Applying the OLAP to Data Warehousing, Benefits of using OLAP, Dashboard, Advanced/Emerging BI Technologies, Future of Business Intelligence

SOCIAL MEDIA ANALYTICS

Course Code: ECM4401 **Credit Units: 03**

Course Objective:
Social media not only provides marketers with a means of communicating with their customers, but also a way to better understand their customers. This course will provide students with an advanced understanding of social media, marketing plans and social media analytics.

Course Contents:

Module-I: Introduction
Introduction to various social network platforms- Twitter, Facebook, Google+, LinkedIn and their features. Utilizing social media for Business. Promoting business on social media.

Module-II: Mining Twitter
Introduction to Twitter, Exploring Twitter's API and Terminology, exploring trending topics, searching for keywords, extracting tweet entities with frequency analysis, computing tweet diversity, examining patterns in retweets, visualizing frequency data with histograms.

Module-III: Mining Facebook & LinkedIn
Introduction, Understanding the Social Graph API, the Open Graph Protocol, Analyzing Social Graph Connections, analyzing facebook pages, examining friendships.
Introduction, Making LinkedIn API Requests, Data Clustering, normalizing data for analysis, measuring similarity, clustering algorithms.

Module-IV: Mining Google+
Introduction, Exploring the Google+ API, Term Frequency, Inverse Document Frequency, Querying Human Language Data with TF-IDF 1. Introducing the Natural Language Toolkit, Applying TF-IDF to Human Language,Finding Similar Documents , Analyzing Bigrams in Human Language Reflections on Analyzing Human Language Data

Module-V: Mining Web pages
Scraping, Parsing, and Crawling the Web, Breadth-First Search in Web Crawling, Discovering Semantics by Decoding Syntax. Natural Language Processing Illustrated Step-by-Step. Sentence Detection in Human Language Data. Document Summarization. Entity-Centric Analysis: A Paradigm Shift. Gisting Human Language Data. Quality of Analytics for Processing Human Language Data

Module-VI: Twitter Cookbook
Discovering the Trending Topics, Searching for Tweets, Collecting Time-Series Data, Extracting Tweet Entities Finding the Most Popular Tweets in a Collection of Tweets, Tabulating Frequency Analysis, Finding Users Who Have Retweeted a Status, Extracting a Retweet's Attribution, Making Robust Twitter Request, Resolving User Profile Information Extracting Tweet Entities from Arbitrary Text. Getting All Friends or Followers for a User, Analyzing a User's Friends and Followers Harvesting a User's Tweets. Crawling a Friendship Graph

SEARCH ENGINE OPTIMIZATION

Course Code: ECM4406 **Credit Units: 03**

Course Objective
The course will enable students the craft of optimizing websites for Search Engines. Students will learn about how the search engine works, the techniques for conducting SEO and keywords searching.

Course Contents:

Module-I: SEO Basics
Introduction about Domain, World Wide Web, Difference between Portal & Search Engine, Importance of Search Engine, Working of search engine, Difference between directories & search engine. Website performance monitor in search engine

Module-II:
Introduction to SEO, Web Traffic, Need of SEO, Working of SEO, Steps in SEO, Types of SEO techniques : Black Hat Techniques, White Hat Techniques,

Module-III: Keyword Research & Analysis
Introduction to Keyword research: Types of keywords, Keyword research methodology, keywords analysis tools, Preparing keyword list, localized keyword research, Keyword density, Keyword prominence, keyword stuffing

Module-IV: On Page Optimization
Basis of website designing, Essentials of good website designing, HTML Basics for SEO : Page Title, Meta Descriptions & Meta Keywords, Headings, Bod Text, Image & Alt tag, Invisible text, HTML Site Map Creation, Web Master Tools

Module-V: Off Page SEO Optimization
Page Rank, Link Popularity, Link Building, Types of Link Building, Book Marking, Article Submission Blog Marketing, Blog commenting, XML Site Ma submission, Customer review submission, press release submission, search engine submission

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

ACCOUNTING FOR MANAGEMENT

Course Code: MBF4102 **Credit Units: 03**

Course Objective:
Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

Course Contents:
Module I: Introduction
The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control.Balance sheet-Dual Aspect principle, Classification Items of Balance Sheet, Formats of Balance Sheet.Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS,GAAP&IFRS) Depreciation Accounting.

Module II: Measuring and Reporting
Measuring and Reporting :Cost of sales and Inventories, Debentures, Investments, Shareholder Equity. Human Resource Accounting-Valuation of Human Resources, Recording and Disclosure in Financial Statements

Module III: Management Accounting
Contrast between Management Accounting and Financial Accounting and Reporting, Types of Management Accounting Information and their uses, General Observation on Management Accounting. Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS,GAAP& IFRS).

Module IV: Analyzing and Interpreting Financial Statements
Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons.Du-pontanalysis.Interpretations of calculated Ratios.

Module V: Cost Accounting: The behavior of cost- Relation of cost to volume, BEP & Profit graph-CVP analysis, Full cost and its uses. Techniques of costing.Standardcosting.Strategic planning and budgeting.

Examination Scheme:

Components	Assessment 1 Group Presentation	Assessment 2 In Class Quiz	Class Test/Mid Term Exam	Attendance	External
Weightage (%)	10	5	10	5	70

QUANTITATIVE TECHNIQUES IN MANAGEMENT

Course Code: MBF4106 **Credit Units: 03**

Course Objective:
The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the business environment using contemporary software.

Course Contents:
Module I: Introduction
Application of Statistics in Business; Classification of Data; Interpretation of computer output of diagrammatic and graphical presentation of data, measures of central tendency, measures of dispersion and skewness.

Module II: Probability and Probability Distributions
Concepts of Probability, addition theorem, multiplication theorem, Baye's Theorem; continuous and discrete probability distribution:Binomial Probability Distribution, Poisson Probability Distribution and Normal Probability Distribution.

Module III: Sampling and Sampling Distribution
Sampling: Basic Concept, Types of Sampling, Errors and Precautions in sampling, size of sample, Parameter and Statistic, Sampling Distribution of the mean, Sampling distribution of proportion, Estimation – point estimation, Interval Estimation,

Module IV: Tests of Hypothesis
Null and Alternative hypothesis, One-Tailed and Two-Tailed tests of hypothesis, Type I and Type II error, rejection rule using p – Value and critical value approach. Hypothesis Testing to compare two populations: Test for one sample mean, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples), Tests for two population variances (Dependent Samples), F-test, Chi – Square Test

Module V: Forecasting Techniques
Correlation - Karl Person, Spearman's Rank methods, simple linear regression analysis – Estimated regression equation, least squares method, coefficient of determination, interpretation of computer output for Regression, Introduction to time series, trend analysis

Module VI: Introduction to SPSS, performing univariate and bivariate analysis on SPSS

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

INFORMATION TECHNOLOGY AND E-COMMERCE

Course Code: MBF4109 **Credit Units: 02**

Course Objective:
This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in e-business models, electronic payment systems and data & information security

Course Contents:

Module I: Modern Computer Systems
Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation, (e.g. Delhi Metro , Digitally Controlled Car engines etc.), Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

Module II: Data Resource Management
Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts.SQL Query handling, Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc.). Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

Module III: Telecommunications and Computer Networks
Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Network Topologies, Web 2.0/3.0, Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,Features of 3G & 4G technologies, VOIP and IPTV.

Module IV: Electronic Commerce Systems
Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.

Module V: E-Commerce Business Models & EDI
Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI.Various business models in Ecommerce likeB2C, B2B, C2C.

Module VI: E-Payment Systems and Security Management
Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards.
The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types.Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.

Examination Scheme:

BUSINESS RESEARCH METHODS

Course Code: MBF4203 **Credit Units: 02**

Course Objective:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Contents:
Module I: Introduction
Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

Module II: Measurement and Data Collection
Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing

Module III: Data Analysis I
Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test

Module IV: Data Analysis-II
Simple linear regression: coefficient of determination, significance tests, residual analysis,
Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)

Module V: Report Writing
Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

Case study must be included in the discussion.

BUSINESS ANALYTICS

Course Code: MBF4210 **Credit Units: 02**

Course Objective:

The course provides an introduction to data analytics to be used in business. The students will learn how data analysts describe, predict and make informed business decisions in various business domains like marketing, human resources, finance and operations.The aim of the course is to develop basic data literacy and an analytic mindset in students that will help them to make strategic decisions based on data.

Course Contents:

Module I: Introduction to Business Analytics

Importance and role of data driven decisions. Business Analytics – Definition, Market, Trends; Paradigm Shift from Data to Insight and from Business Intelligence to Business Analytics; Examples and Types of Business Analytics Analysis- Forecasting & Predictive Modeling; Descriptive, Prescriptive and Predictive Analytics. Data Summarization, Data visualization – Various visualization techniques, standardized reporting and Pivot Tables – Using Excel

Module II: Data Mining

Introduction to Data Mining; Crucial processes in data mining; Data Warehousing; Data Mining Techniques and Exploratory Data Analysis; Data Mining Tool – XL Miner.

Module III: Decision Making & Optimization

Decision making under uncertainty – Decision Trees and Risk Profiles; Sensitivity Analysis;
Optimizing complex decisions – Optimization of a large number of decisions while accounting for different kinds of physical and business decisions. Introduction to Optimization Techniques –Linear Programming; Optimization – Use of Excel to solve business problems like marketing mix, capital budgeting and portfolio optimization.

Module IV: Big Data and Introduction to R

Introduction to Big Data, Big Data driven decisions in business organizations – Benefits and Security/Privacy concerns.
Building Business and Economic Models –Tools to leverage data for Prediction purposes; Logistic Regression.
Introduction to Machine Learning; Statistical Learning vs. Machine Learning; Major classes of Learning Algorithms –Supervised Vs Unsupervised Learning.
Introduction to R Programing

Module V: Simulation using R and Excel

Hands on Regression using R;Introduction to Simulation; Applications of Simulation and Building a Simulation Model. (Using Excel and R)
Capstone Project.

Examination Scheme:

EXCEL FOR MANAGERS

Course Code: MBF4211 **Credit Units: 01**

Course Overview:
Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers.This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

Course Contents:

Module-I: Getting Started with Excel
Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells:Usingautofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

Module-II: Basics in excel
Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area.Adding hyperlinks to cells, inserting images, objects, equations and symbols.

Module-III: Charts & Formulas in Excel
Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

Module-IV: Functions in Excel
Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions.Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

Module-V: Financial and Statistical Functions in Excel
Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

Examination Scheme:

Components	Written Test	Practical	V/P	File/Assignment	Attendance
Weightage (%)	20	30	30	15	5

SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT

Course Code: MBF4308 **Credit Units: 03**

Course Objective:
This course aims at providing a clear understanding of the changing domestic and global investment scenario in general and Indian capital market in particular with reference to availability of various financial products and operations of stock exchanges. Important theories, techniques, regulations and certain advancements in theory of investment will be covered with an aim of helping the participants make sound investment decisions both in the context of individual security and portfolio investment.

Course Contents:
Module I: Background of Capital market/Corporate Governance and Methods of Fund Raising
Importance of Strong Capital market in Economy, Investment opportunities available to Investors, relation of demographic characteristics with investment pattern of individuals, Process of investment in Financial assets, intermediaries and Role of SEBIOTCEI//ROC/Stock exchanges-Listing agreement, clause 49, Importance of Corporate Governance and changes taking place/required in the law.Salient features and operation of stock exchanges,Trading arrangements, Changing scenario of Indian stock market.Relationship of Primary market with Secondary market, raising of Funds by IPO/FPO/Right issue and intermediaries involved. Merchant banking and its functions, contemporary issue in Capital market.

Module II: Debt
Malkiels's Law, Interrelationship of Bond Market and Stock market, International events and its impact on security market Risk and return in the context of Portfolio, , Common stock valuation models, Term structure of Interest Rates,Role of FII"S, DII/MF /QIB in Capital market.Participatory notes and its Impact, index formation..

Module III
Fundamental analysis-Economic &industry analysis, concept of Business Cycles, Indicators of economic prosperity, Industry analysis, Company analysis, Company valuation.DOW"s Theory, Various Technical analysis tools like Moving averages, Volume Analysis, Indicators, RSI, Patten analysis,Candlesicks,Market breadth analysis, Trend analysis,Elliot wave Rules Fibonacci numbers, ROC/RSI, CAPM and Fama and French challenge, lagging indicators and leading indicators analysis, reading and interpretations of technical patterns and charts,Other tools to Forecast the market and take Entry and exit decisions.

Module IV
Arbitrage pricing theory, Generating the efficient frontier,Efficient market theory, Valuation by PE ratio /Book value to price value analysis,Motivation for partitioning of risk, Markowitz Risk -return optimisation,

Module V
Types of Mutual Funds--SIP/ELSS, Tax Implications. , Investment Banking, Role of Fund Manager, Portfolio management services, Churning and revision of Portfolio, Portfolio re balancing and up gradation, Sharpe"performance Index, Trennor"performance Index, Jensen's performance Index.

BUSINESS VALUATION

Course Code: MBF4311 **Credit Units: 03**

COURSE DESCRIPTION AND OBJECTIVES:

The objective of this course is to develop a detailed understanding of the tools used by market professionals and corporate managers to analyze the value of companies and stocks. The central theme of the course will be the pricing of equity securities using discounted cash flow and relative valuation techniques. Students will apply what they've learned to the valuation of a specific company, with the goal of becoming an expert on that firm. After completing this course, students should be able to: (i) Develop quantitative models for firm and equity valuation based on DCF and multiples. (ii) Identify and interpret accounting and non-accounting information necessary for valuation. (iii) Identify and interpret the key value drivers for a firm or industry. (iv) Critically analyze firm and equity valuation models and assumptions developed by others. (v) Present valuation analyses and assumptions in a professional manner.

Course Contents:

Module-I: Introduction to Valuation

Valuation vs. Pricing.A philosophical basis for Valuation, Misconceptions about Valuation, Biasness in Valuation, Uncertainties in Valuation.Approaches to Valuation, Understanding Financial Statements, Basics of Risk.

Module-II: Discounted Cash Flow Valuation

Discounted Cashflow Valuation: Basis for Approach, Going Concern versus Liquidation Valuation, Equity Valuation versus Firm Valuation, Three pathways to DCF value, Advantages & Disadvantages of DCF Valuation, Riskless Rates and Risk Premiums, Estimating Risk Parameters and Costs of Financing, Measuring Earnings,Earnings to Cash Flows, Estimating Growth, Closure in Valuation: Estimating Terminal Value, Free Cash flow to Equity Models,

Module-III: Relative Valuation

Fundamental Principles of Relative Valuation, Choices with multiples- Earnings Multiples, Book Value Multiples,Choosing the Comparable firm: Making the comparison, Revenue and Sector-Specific Multiples, Advantages &Disadvantages of Relative Valuation, DCF vs Relative valuation.

Module-IV: Applicability of Valuation (Cases and research papers); Valuing Financial Services firm, Valuing Firms with Negative Earnings, Valuing Young and Start-up Firms, Valuing Private Firms, valuing Acquisitions and Takeovers,

Examination Scheme:

FINANCIAL MODELING USING MS- EXCEL/SPREADSHEET

Course Code: MBF4313 **Credit Units: 03**

Introduction

Modeling techniques for accurate financial forecasting are used in many areas of finance, such as derivatives, valuation, project evaluation, deal structuring, portfolio management and the like. In the course, the participants will learn the model building skills required to build powerful models in finance with the help of excel. There are many features of model building that are common irrespective of the final model that one intends to build. In the course we will also emphasize on the different model building skills that one should have irrespective of the final use that one is going to make of it.

By the end of the course the participants should be better able to:

- Understand the basic and advanced features of excel
- Understand how to build models in excel to suit one's purpose
- Building models in different areas of finance including investments, corporate finance and derivatives
- Identifying and controlling the key sensitivities with advanced spreadsheet simulation
- Understand how risk can be built into the model to enhance decision making process

Course Contents:

Module-I: Understanding the Basic Featuresof Excel : Introduction to Modeling, Introduction to Excel,Database Functions in Excel Creating Charts Using Forms and Control Toolbox Understanding Finance Functions present in Excel Creating Dynamic Models

Module-II: Simulation using Excel: Different Statistical Distributions used in Simulation Generating Random Numbers that follow a particular distribution Building Models in Finance using Simulation

Module-III: Excel in Capital Budgeting, valuation: Preparing common size statements directly from Trial Balance Forecasting Financial Statements using Excel Analysing Financial Statements by using Spreadsheet Model ; Determining Project Viability Risk Analysis in Project Appraisal Simulation in Project Appraisal; Determination of Value Drivers, DCF Valuation, Risk Analysis in Valuation; Determining Efficient Portfolio, Creating Dynamic Portfolios Portfolio Insurance Fixed Income Portfolio Management using Excel.

Module-IV: Understanding Subroutines and Functions and building simple financial models using subroutines and functions Recording and Editing Macros Subroutines and Functions Decision Rules Message Box and Input Box Debugging, **Designing Advanced Financial Models** using VBA User Forms Other Advanced Features Actual Model Building.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **Q** – Quiz; **V** - Viva; **CT** - Class Test; A- Attendance; **EE** - End Semester Examination)

FINANCIAL RISK MANAGEMENT

Course Code: MBF4314 **Credit Units: 03**

Course Objectives:

The FRM challenges candidates to understand and apply a range of knowledge and skills necessary to function effectively as a risk manager. Its curriculum is updated annually by a group of distinguished risk professionals and leading academics with diverse backgrounds, ensuring that the designation meets the evolving demands of the financial industry. The FRM helps professionals in risk management, investment management, or other critical areas of the financial services industry to broaden their knowledge of the different types of financial risk and enhance their current skill set. Those who are just beginning their careers benefit from the breadth of the curriculum, which exposes candidates to the major strategic aspects of risk management. More established practitioners often choose to become Certified FRMs in order to ensure that they are apprised of the latest trends in risk management, or because they want to challenge themselves by testing their knowledge against an elite pool of risk managers.

Course Contents:

Module I: Foundations of Risk Management

Basic risk types, measurement and management tools, Creating value with risk management; The role of risk management in corporate governance; Enterprise Risk Management (ERM); Financial disasters and risk management failures; The Capital Asset Pricing Model (CAPM); Risk-adjusted performance measurement; Multifactor models; Data aggregation and risk reporting; Ethics and the GARP Code of Conduct.

Module II: Financial Markets and Products

Structures and functions of financial institutions, Structure and mechanics of OTC and exchange markets Structure, mechanics, and valuation of forwards, futures, swaps, and options ; Hedging with derivatives; Interest rates and measures of interest rate sensitivity; Foreign exchange risk; Corporate bonds; Mortgage-backed securities

Module III : Valuation and Risk Models

Value-at-Risk (VaR)-VaR mapping • Expected shortfall (ES), Stress testing and scenario analysis • Option valuation • Fixed income valuation • Hedging • Country and sovereign risk models and management • External and internal credit ratings • Expected and unexpected losses • Operational risk

Module IV: Basel-I, Basel-II, Solvency-II, Basel 2.5, Basel-III:

The reasons for regulating Banks, Bank Regulation Pre-1988, 1988BIS Accord, The G-30 Policy recommendation, Netting, 1996 Amendment, Basel II, Credit Risk capital under Basel II, Operational Risk capital under Basel II, Pillar 2- Supervisory Review, Pillar 3- Market Discipline, Basel 2.5, Basel-III.

Module V: Credit Risk Measurement and Management

• Credit analysis • Default risk: Quantitative methodologies • Expected and unexpected loss • Credit VaR • Counterparty risk • Credit derivatives • Structured finance and securitization

Module VI: Operational and Integrated Risk Management

Risk-adjusted return on capital (RAROC) • Economic capital frameworks and capital planning • Liquidity risk measurement and management • Failure mechanics of dealer banks • Stress testing banks • Third-party outsourcing risk • Risks related to money laundering and financing of terrorism • Regulation and the Basel Accords

Banking Resolution and Deposit Insurance Act (BRDI) 2017, Insolvency and Bankruptcy Code (IBC).

SUMMER INTERNSHIP EVALUATION

Course Code: MBF4335 **Credit Units: 06**

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain and submit a file (**Internship File**) and a report (**Internship Report**)

INTERNSHIP FILE

The Internship File aims to encourage students to keep a personal record of their learning and achievements throughout the Programme. It can be used as the basis for lifelong learning and for job applications. **Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.**

The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and his/her own personal contribution to the organization.

The File is essentially a comprehensive documentation of how one proceeds while working on the assignment and should be regularly checked by the faculty guide/ supervisor, issues discussed with the students, doubts if any clarified and signed as having done so. This will form the basis of **continuous evaluation** of the project.

The File will include **five sections** in the order described below.

1. **The Title Page –** An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Table of Content – A**n outline of the contents of the file by topics and subtopics with the page number and location of each section.
3. **Introduction** – Short, but should include how and why you obtained the internship experience position and the relationship it has to your academic/professional and career goals.
4. **Main Body** – Should include a brief summary/ executive summary of the **Internship Project Report** that the student has worked on, an **analysis of the company/organization** in which the student is working, a **personal review** of the student's management skills and how they have been developed through the programme, the daily tasks performed, major projects contributed to, dates and hours spent on a task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
5. **Appendices** – Include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

INTERNSHIP REPORT

The **Internship Report** is the research report that the student has to prepare on the project assigned by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it). The lay out of the report

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

should be as per the standard layout prescribed by the organization wherein the student undertakes the Internship. In case, there is no layout prescribed by the organization the following components should be included in the report:

- **Title or Cover Page**
  The title page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide.

- **Acknowledgements**
  Acknowledgment to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.

- **Abstract**
  A good"Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.

- **Table of Contents**
  Titles and subtitles are to correspond exactly with those in the text.

- **Introduction**
  Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

- **Materials and Methods**
  This section should aim at experimental designs, materials used (wherever applicable). Methodology should be mentioned in details including modifications undertaken, if any. It includes organization site(s), sample, instruments used with its validation, procedures followed and precautions.

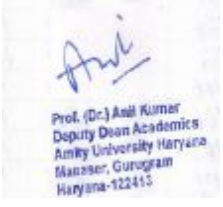
- **Results and Discussion**
  Present results, discuss and compare these with those from other workers, etc. In writing this section, emphasis should be laid on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

  Note that in writing the various secions, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary, do not write in "point" form.

  While presenting the results, write at length about the the various statistical tools used in the data interpretation. The result interpretation should be simple but full of data and statistical analysis. This data interpretation should be in congruence with the written objectives and the inferences should be drawn on data and not on impression. Avoid writing straight forward conclusion rather, it should lead to generalization of data on the chosen sample.

  Results and its discussion should be supporting/contradicting with the previous research work in the given area. Usually one should not use more than two researches in either case of supporing or contradicting the present case of research.

- **Conclusion(s) & Recommendations**
  A conclusion should be the final section in which the outcome of the work is mentioned briefly.
  Check that your work answers the following questions:
  - Did the research project meet its aims (check back to introduction for stated aims)?



- What are the main findings of the research?
- Are there any recommendations?
- Do you have any conclusion on the research process itself?

➢ **Implications for Future Research**
This should bring out further prospects for the study either thrown open by the present work or with the purpose of making it more comprehensive.

➢ **Appendices**
The Appendices contain material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

➢ **References**
References should include papers, books etc. referred to in the body of the report. These should be written in the alphabetical order of the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

Examples
For research article
Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic Escherichia coli O157: H7. ClinMicrobiol Infect, 8(suppl 1): 116–117.
For book
Kowalski,M.(1976) Transduction of effectiveness in Rhizobium meliloti. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), **7**: 63-67

The Layout Guidelines for the Internship File & Internship Report

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Examination Scheme:

Continuous Evaluation by faculty guide	15%
Continuous evaluation by CRC	15%
Feedback from industry guide	35%
Report, Presentation & Viva Voce	35%
TOTAL	**100%**

ENTREPRENEURSHIP DEVELOPMENT

Course Code: MBF4413 **Credit Units: 02**

Course Contents:

Module I: Decision to Become an Entrepreneur

Introduction to Entrepreneurship: What Is Entrepreneurship? Why Become an Entrepreneur?, Characteristics of Successful Entrepreneurs ,Common Myths About Entrepreneurs, Types of Start-Up Firms ,Changing Demographics Of Entrepreneurs.

Entrepreneurship's Importance: Economic Impact of Entrepreneurial Firms, Entrepreneurial Firms' Impact on Society, and Entrepreneurial Firms' Impact on Larger Firms.

The Entrepreneurial Process: Decision to Become an Entrepreneur, Developing Successful Business Ideas Moving from an Idea to an Entrepreneurial Firm, Managing and Growing an Entrepreneurial Firm.

Module II: Developing Successful Business Ideas

Identifying And Recognizing Opportunities: Observing Trends, Solving a Problem ,Finding Gaps In The Marketplace **,**Personal Characteristics of the Entrepreneur .

Techniques for Generating Ideas: Brainstorming, Focus Groups Library and Internet Research, Other Techniques.

Encouraging and Protecting New Ideas: Establishing a Focal Point for Ideas, Encouraging Creativity at the Firm Level, Protecting Ideas from Being Lost or Stolen, Find a mentor.

Feasibility Analysis: Product/Service Feasibility Analysis, Industry/Target Market Feasibility Analysis, organizational Feasibility Analysis, Financial Feasibility Analysis.

The Business Plan: Reasons for Writing a Business Plan , Who Reads the Business Plan—And What Are They Looking For? Guidelines for Writing a Business Plan, Outline Of the Business PlanandExploring Each Section of the Plan Oral Presentation of a Business Plan, Questions and Feedback to Expect from Investors.

Industry and Competitor Analysis: Studying Industry Trends, The Five Forces Model, The Value of the Five Forces Mode, Industry Types and the Opportunities They Offer , Identifying Competitors ,Sources of Competitive Intelligence, Completing a Competitive Analysis Grid.

Business Models: The Importance and Diversity of Business Models, How Business Models Emerge, Potential Fatal Flaws of Business Models, Components of An Effective Business Model**,** Core Strategy, Strategic Resources, Partnership Network, customer interface.

Module III: Moving from an Idea to an reality

Initial Ethical and Legal Issues Facing a New Firm: Establishing a Strong Ethical Culture for a Firm, Choosing an Attorney for a Firm, Drafting a Founders' Agreement.

Obtaining Business Licenses and Permits: Business Licenses, Business Permits, Choosing a Form of Business Organization, Sole Proprietorship, Partnerships, Corporations, Limited Liability Company.

Introduction To Financial Management : Financial Objectives of a Firm, The Process of Financial Management, Financial Statements ,Forecasts ,Pro Forma Income Statement ,Pro Forma Balance Sheet, Pro Forma Statement of Cash Flows, Ratio Analysis.

Building a New-Venture: Recruiting and Selecting Key Employees, Roles of the Board of Directors Board of Advisers, Lenders and Other Professionals.

Getting Financing or Funding: The Importance, Sources of Personal Financing, Preparing to Raise Debt or Equity Financing, business Angels, Venture Capital, Initial Public Offering, Commercial Banks, SBA Guaranteed Loans, Other Sources of Debt Financing, Leasing, Strategic Partners.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module IV: Managing and Growing the new venture

Marketing Issues: Segmenting the Market, Selecting a Target Market, Establishing a Unique Positioning, Branding, 4Ps/7Ps Of Marketing For New Ventures.

The Importance of Intellectual Property: Determining What Intellectual Property to Legally Protect, The Four Key Forms of Intellectual Property, Types of Patents, Who Can Apply for a Patent? The Process of Obtaining a Patent, Patent Infringement, The Four Types of Trademarks, What Is Protected Under Trademark Law? Exclusions from Trademark Protection, The Process of Obtaining a Trademark, What Is Protected by a Copyright? Exclusions from Copyright Protection,

How to Obtain a Copyright , Copyright Infringement, Copyrights and the Internet , Conducting an Intellectual Property Audit, The Process of Conducting an Intellectual Property Audit.

Preparing for and Evaluating the Challenges of Growth : Appreciating the Nature of Business Growth ,Staying Committed to a Core Strategy ,Planning for Growth, Knowing and Managing the Stages of Growth , Challenges Of Growth **,** Strategies for Firm Growth (internal and external),Franchising**.**

DISSERTATION

Course Code: MBF4437 **Credit Units: 06**

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Selecting the Dissertation Topic
It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between 'dissertation topic' and 'dissertation title'. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:
- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

Planning the Dissertation
This will entail following:
- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The Dissertation plan or outline
It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan
- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

Keeping records

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct a direct quotation and what is your paraphrase.

Dissertation format

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

  Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

  For books, the following details are required:
  Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

The Layout Guidelines for the Dissertation

- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Guidelines for the Assessment of the Dissertation

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

Examination Scheme:

Contents & Layout of the Report	30
Conceptual Framework	10
Objectives & Methodology	15
Implications & Conclusions	15

Programme Mission:

The mission of the MBA programme is to foster an environment of academic excellence in Business Management through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Marketing & Sales, Finance, Banking & Finance, Human Resource Management, International Business, Information Technology, E-Commerce and Hospital & Healthcare, who are socially responsible and globally minded professional to meet the current and emerging needs of business and society.

Programme Description:

The two year full time Masters in Business Administration programme is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to lead, to motivate and to manage diversified workforce, rapid technological change and competitive marketplace while considering the principles of ethical, legal and corporate governance fundamentals.

Programme Outcome (PO):

PO1	Apply the knowledge of marketing, human resource management, finance and other functional areas of management to solve complex management issues in volatile business environment
PO2	Student shall have ability to acquire & evaluate new knowledge through Business Research Methods, have the ability to identify, define, investigate, and solve critical business issues using management principles, analyse data/information and interpret results for reaching optimum solutions.
PO3	Student shall be able to understand global issues from different perspectives, recognize the opportunities to improve the business value chain as an entrepreneur and shall develop and display basic business acumen & business skills and be able to apply different forms of communication in diversified cultural settings.
PO4	Student shall able to critically thinkto assess societal, health, safety, legal, and cultural issues and apply range of strategies for solving a problem and decision making
PO5	Student shall be able to practice ethical principles and commit to professional ethics and responsibilities and norms of the management practice.
PO6	Student shall develop range of Leadership skills and shall demonstrate excellent interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.
PO7	Student shall be able to communicate effectively on complex management activities with various stakeholders being able to comprehend and write effective reports, design documentation, make effective presentations, and give & receive clear instructions.
PO8	Student shall recognize the need for, and have the ability to engage in independent and life-long learning in the broadest context of technological change.
PO9	Student shall be able to create, select, and apply appropriate techniques, resources, and modern management and IT tools including prediction and modeling to make decisions.

Supporting document for PSOs (Programme Specific Outcomes) of MBA BA

PSO 1			PSO 2	PSO 3		PSO4	
Student shall be able to describe fundamental knowledge of general and functional management courses & relevant technological tools to identify opportunities and apply appropriate business strategies & solutions.			Student shall be able to apply knowledge of business analytics to solve business problems using appropriate technology such as machine learning/artificial intelligence and software solutions such as R, Python, SPSS, SAS to make holistic judgment. Student shall also apply technical skills to design effective advanced analytics models and simulations for effective decision making.	Student shall be able to apply specific and cross functional knowledge to solve critical business and management issues, write effective reports, demonstrate leadership and interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.		Student shall be able to communicate effectively on complex management issues, make effective presentation with various stakeholders being able to comprehend and shall be able to practice ethical principles, professional values and fulfil social responsibilities and engage in life-long learning	
Fundamental Business Management	**Functional Management domain**	**Research, Analysis and Technical Management Domain**	**Business Analytics**	**NTCC**		**Communication**	**Value Added**
Management Process and Organizational Behaviour	Accounting for Management	Operations and Supply Chain Management	Datamining	Financial Analytics	Summer Internship Evaluation	Basics of Communication	Self Development & Interpersonal Skills
Economics for Management	Marketing Management	Business Research Methods	Predictive Analytics-I Machine Learning using R	Supply Chain Analytics	Dissertation (Analytics Project)	Corporate Communication	Behavioural Communication & Relationship Management
Strategic Management	Human Resource Management		Predictive Analytics-II Machine Learning using Python	HR Analytics		Interpersonal Communication	Leading Through Teams
Total Quality Management	Financial Management		Big Data Analytics- Hadoop	Marketing Analytics		Cross Cultural Communication	Professional Excellence
	Consumer Behaviour		Financial Decision Analysis	Data Privacy and Data Security Laws		**Foreign Business Language**

BUA4102	**ACCOUNTING FOR MANAGEMENT**	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure	Basic knowledge of general Management				
Co-requisites	Student must have basic understanding of General Management.				

Catalog Description

The intent of this course is to acquaint the students with fundamental concepts and processes of accounting so that they are able to appreciate the nature of item presented in the annual accounts of an organization. The student will be able to familiarize with the significant tools and techniques of financial analysis further useful in the interpretation of the financial statements. The aim of this course does not focus on to make the student's expert accountant but to have a good comprehension on the management planning and control systems. However, the principal focus will be related to the interpretation and use of the financial data by non-accounting students to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

Course Objectives

The objective of this course is to:

1. Equip the students to develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, students will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts.
2. Develop skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

Course Outcome:

On completion of this course, the students will be able to:

CO1: Enable the students to combine practice and theoretical knowledge of financial accounting.

CO2: Demonstrate the decision-making skills to the students in the financial analysis context,

CO3: Develop an ability to identify and analyze complex financial accounting problems and opportunities in real life situations.

CO4: Develop skills in applying management accounting techniques to assist in decision making.

Modules	Blooms Level	Number of Hours
Module 1: Introduction The Financial Accounting Framework, Accounting Policies, Need of Accounting. Users of Accounting Information, Accounting Cycle, Accounting and Management Control. Balance sheet- Classification Items of Balance Sheet, Formats of Balance Sheet. Preparation of Balance Sheet. Income Statement- Realization vs. Accrual Principle, Format of Income Statement), Preparation of Income Statement (IAS,GAAP&IFRS), Depreciation Accounting.	L1, L2, L3	8
Module 2: Measuring and Reporting Measuring and Reporting Assets, Liabilities &Equity:Cost of sales and Inventories, Debentures, Investments, Shareholder Equity; Human Resource Accounting: Valuation of Human Resources, Recording and Disclosure in Financial Statements.	L1, L2, L5	8
Module 3: Analyzing and Interpreting Financial Statements Financial Statement Analysis – Basic Relationship, Overall Measures, Profitability Ratios, Investment Utilization Ratios, Financial Condition Ratios, Making Comparisons. The Statement of Cash Flows-Profit versus Cash, Purpose and Use of Cash Flow Statement, Format of Cash Flow Statement (AS-3), Preparation of Cash Flow Statement (IAS,GAAP&IFRS).	L4, L5, L6	9
Module 4: Management Accounting Emergence of Management Account, Managerial costing and Cost-Volume- Profit Analysis, Budgeting and Budgetary control, Variance Analysis .	L1, L2, L5	5
Module 5: Cost Accounting: Elements of Cost, Cost Classification and Allocation, Cost sheet, Process Costing, Job Costing.	L1, L2, L5	5

*Bloom's Level: L1 – Knowledge; L2-Comprehension, L3 – Application, L4 – Analysis, L5 – Synthesis, L6 - Evaluation

BUA4104	**STATISTICAL TECHNIQUES**	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers the understanding on identification of data, analysis and interpretation of data using basic quantitative tools & techniques. In this course, students can apply the quantitative techniques in the analysis of statistical and economic problems. Probability and hypothesis testing are major topics to be covered. Basic understanding of statistical concepts helps in deciding on the suitable technique for data analysis and also to interpret results.

Course Objectives

The objectives of this course are to

1. Familiarize the students with basic quantitative tools & techniques for data analysis.
2. Equip the students with the concept of probability, hypothesis testing, data identification, and data analysis and interpretation using statistical tools.
3. Facilitate hands on experience to various statistical problems.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the basic concepts of probability and Bayes Theorem and manipulate the probability models that are most widely used in economics, and apply them correctly and carry out the appropriate statistical analysis.

CO2: Apply the appropriate statistical tools and techniques for data analysis of economic models.

CO3: Apply graphical, numerical methods and Excel to make calculate and illustrate descriptive statistics and critically evaluate the basis for these calculations.

CO4: Identify the appropriate regression model to apply to an economics dataset and also the problems associated with these models such as autocorrelation. Multicollinearity, heteroscedasticity, non Stationarity data series that may affect regression analyses.

Modules	**Blooms level***	**Number of hours**
MODULE 1: Probability Theory Elements of Probability Theory: Sample space Events, meaning of probability Classical definition of probability, The addition rule, Multiplication Rule, Theorems of total probability, conditional and statistical independence, limitation of classical definition, Bayes formula, random variable, expectation and variance of random variable (for random sampling with or without replacement)	L1, L2,L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram

MODULE 2: Random Variables and Probability Distributions Defining random variables; probability distributions; expected values of random variables and of functions of random variables; properties of commonly used discrete and continuous distributions (uniform, binomial, normal, poisson and exponential random variables).	L1, L2,L3	9
MODULE 3:Introduction to Estimation Methods of sampling; sampling distribution of a statistic; distribution of the sample mean; sampling error and standard error of a statistic with special reference to the mean; Point and interval estimation of parameters; properties of an estimator; unbiasedness, relative efficiency and consistency.	L1, L2,L3	9
MODULE 4: Hypothesis Testing Testing of Hypothesis; type I and type II errors, power of a test; large sample tests, "t" test for the mean; one tail and two tail tests for difference of means; z-test, f-test, Chi-square test for (i) goodness of fit and (ii) independence of two attributes.	L1, L2,L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5:Synthesis, L6:Evaluation*

BUA4105	**EXCEL FOR DECISION MAKING**	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

Course Objectives

The course enables students to:

1. Explore the Microsoft Excel as a tool for facilitating solutions for business problems/decision making

2. Have an understanding on the advanced functions of excel through guided demonstration.

3. Enhance excel skills of students and develops a set of fundamental skills that are essential for survival in business amid global uncertainty.

Course Outcomes

On completion of this course, the students will be able to

CO1: Manage data in excel.

CO2: Explore the functions of basic and advanced excel.

CO3: Analyze the real time series dataset.

CO4: Explain insights about decision making in business.

Module 1: Overview of Excel **Contents:** Introduction to Spreadsheets: data entry using autofill, sort & filter feature, widening rows and columns, inserting & deleting rows and columns, creating lists, wrapping & merging text and cells. Introduction to basic data formatting, saving work in excel. Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel, page orientation and print area in Excel. How to adding hyperlinks to cells, inserting images, objects, equations and symbols. Introduction toFigures and Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart.	L1, L3, L4	4
Module 2: Data Cleansing and Lookups **Contents:** Textual functions- TRIM, SUBSTITUTE, CLEAN, STORED AS TEXT, DE-DUPLICATING, LEN & FIND, CONCATENATE, UPPER, LOWER, REPLACE functions and Data validation; Look up functions- VLookup, multiple VLook up together and HLookup with index and match; Basics of Macros.	L1, L3, L4	4
Module 3: Logical Functions and Pivot Tables **Contents:** Basic functions- ROUNDING, SUM, PRODUCT, MIN, MAX, AVERAGE, CONDITIONAL COUNTS, LARGE, RANK, VAR, Std Dev, CONDITIONAL SUMS. Date functions and Time functions. Logical functions- IF, THEN, AND, OR, NOT, COUNTIFS, SUMIFS, TRUE, FALSE Functions. Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager. Pivot table, pivot charts and conditional formatting.	L1, L3, L4	4
Module 4: Simulation and Decision Making **Contents:** Basics of simulation, Monte Carlo Exoperiment, Decision Analysis (DA): Terminology, DA without probabilities (Maximax, Maximin, Minimax Regret), DA with probabilities: (Decision point / branch, chance event / branch, Decision tree with examples.	L1, L3, L4	4

BUA4106	**OPTIMIZATION TECHNIQUES**	L	T	P	C
Version 1	Latest approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The main objective of the course is to provide the students the insight into structures and processes that management science can offer and the enormous practical utility of its various utility. The course is designed to introduce the fundamental tools of MS and their application to real life business problems. It will help students to take well informed decisions in their corporate life.

C**ourse Objective:**

The main objectives of this course are to:

1. Take decision under certain, uncertain and risky environment
2. Understand various business problems and applying a suitable MS model
3. Formulate Linear Programming Problem and solving using graphical and Simplex methods
4. Design the transportation and assignment problem, solve them and interpret the result
5. Design and solving the problems of game theory for the optimal solution
6. Describe the application of simulations.

Course Outcomes

On completion of this course**, s**tudents shell be able to:

CO1. To recall the evolution of OR and specify currently used OR models for different business situations

CO2. To describe a business problem and analyzing it for the optimum solution

CO3. To illustrate different prevailing constraints while finding out optimum solution

CO4. To evaluate various models to take better and improved decisions

Modules	Blooms level*	Number of hours
Module I: Introduction Optimization Techniques: uses, scope, applications in managerial decision making; assumptions of management science models, decision making environments: decisions under certainty, uncertainty and risk situation; decision tree approach and its applications.	L1, L2, L3	6

Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Linear Programming Problems Linear Programming Problems: Modeling and Solution Methods- graphical method, simplex methods, problems with maximization and minimization objects, duality and its managerial interpretation; Sensitivity analysis: meaning, Change in Objective Function Coefficients, Change in Right Hand Side Values, Change in Availability of resources and Addition of a new variable.	L1, L2, L3, L4, L6	8
Module III: Transportation and Assignment Model Transportation model: various methods of finding initial basic feasible solution and optimal solution, MODI method, degeneracy, unbalanced problems, prohibited route problems, maximization transportation problems Assignment Model: Hungarian method for solution, unbalanced assignment problems, restrictions on assignments, travelling salesman problem.	L1, L2, L3, L4, L6	8
Module IV: Game Theory Two-Person Zero Sum Games, Pure Strategies: Games with Saddle Point, Mixed Strategies: Games without Saddle Point, Principle of Dominance, and Solution Methods for Games without saddle point – Algebraic Method, Arithmetic Method, Graphical Method.	L1, L2, L3, L4, L6	8
Module VI: Simulation Simulation: meaning, types of simulation, steps of simulation process, Monte Carlo simulation, applications of simulation	L1, L2, L3, L4, L6	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4107	**DATABASE MANAGEMENT SYSTEMS**	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course the students will learn about the importance and usage of database management systems in the modern day organizations. The students shall grasp sound knowledge of various types of databases that exist, creation of data warehouse and application areas of data mining. Also, the students will be learning SQL, the language of databases.

Course Objectives

The course aims to make the students

1. Understand the basic and advanced concepts in databases and database management systems
2. Analyze the importance of databases in day to day life.
3. Get a hands-on experience on the SQL-the language of databases.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the basic terminology used in databases.

CO2: Describe the concepts related to databases architecture.

CO3: Apply the knowledge of SQL in creating databases using DBMS software for a business organization.

CO4: Compare and contrast various types of keys used in database creation.

CO5: Review and assess the organization's data and network security aspects.

Modules	Blooms level*	Number of hours
Module I: Introduction to DBMS Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.	L1, L2	6

Module II: Relational Database & ER Model **Relational Database**: Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views **ER Model:** Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.	L2, L3	7
Module III: Relational Model Objects Domains and Relations, Relations and predicates, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, Relational operators, Relational Algebra	L1, L2	7
Module 4: SQL SQL Language, DDL, DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.	L1, L2	8
Module 5: Database Applications and Types Distributed Database, Object Oriented Database, Multimedia Database, Data Mining, Digital Libraries. Data Warehouse.	L1, L2	8

**Bloom's Level:*

BUA4204	**BUSINESS RESEARCH METHODS**	L	T	P	C
Version 1.1	Latest Approved	1	0	2	2
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Objectives:
The objectives of this course are to ensure that students are able to:

1. Understand the basic framework of research process.
2. Comprehend of various research designs and techniques.
3. Identify various sources of information for literature review and data collection.
4. Understand some basic concepts of research and its methodologies
5. Understand as how to organize and conduct research in a more appropriate manner and write a research report, thesis and a research proposal

Course Outcomes (CO):
On completion of this course, the students will be able to:
CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues
CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making
CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process
CO4: Develop necessary critical thinking skills in order to evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

Modules	**Blooms level***	**Number of hours**
Module I: Introduction Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal	L1, L2	2

Module II: Measurement and Data Collection Primary data, secondary data, design of questionnaire, sampling fundamentals and sample designs, Qualitative and quantitative research, measurement and scaling techniques, measures of central tendency mean, median, mode; measures of dispersion, data processing	L1, L2,L3,L4, L5	8
Module III: Data Analysis I Cross tabulation, univariate analysis, bivariate analysis: Correlation, Karl Pearson's coefficient of correlation, Spearman's coefficient of correlation, hypothesis testing, t-test, Z test, F-test, Chi- square test, Analysis of variance, Non-parametric tests: Sign test, Run test, Krushall-Wallis test	L1, L2,L3,L4,L5	6
Module IV: Data Analysis-II Simple linear regression: coefficient of determination, significance tests, residual analysis, Multivariate techniques: multiple linear regression: Multiple coefficient of determination, interpretation of regression coefficients, heteroscedasticity, multicollinearity, outliers, auto regression, factor analysis, cluster analysis (concept)	L1,L2,L3,L4, L5	4
Module V: Report Writing Pre-Writing Considerations, structure of research report, common problems encountered while preparing the research report, presentation of research report, ethical issues while preparing a research report	L1,L2,L3,L4, L5	4

*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

BUA4206	**PROGRAMMING FOR ANALYTICS USING R**	L	T	P	C
Version 1.1	Date of Approval: Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers the specialization on R (powerful language used widely for data analysis and statistical computing). This course facilitates a good understanding on the process of data manipulation and visualization. The course provides ample working examples on statistical data analysis using R.

Course Objectives

The objective of this course is to:

1. Provide learning on how to program in R, how to use R for effective data analysis, how to install and configure software necessary for a statistical programming environment.
2. Provide applications on statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, debugging, profiling R code, and organizing and commenting R code.
3. Facilitate hands on experience to various real world business problems using R.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Analyze different datasets using R

CO2: Explore real time data at various levels using appropriate visualizations

CO3: Apply critical programming language concepts such as data types, iteration, control structures, functions, and boolean operators by writing R programs and through examples

Modules	Blooms level*	Number of hours
MODULE 1: Introduction: Introducing to R , R Data Structures , Help functions in R , Vectors , Scalars , Declarations , recycling , Common Vector operations , Using all and any, Vectorized operations , NA and NULL values , Filtering , Vectorized if-then else , Vector Equality , Vector Element names	L1, L2,L3	8
MODULE 2: Matrices, Arrays And Lists: Creating matrices , Matrix operations , Applying Functions to Matrix Rows and Columns , Adding and deleting rows and columns , Vector/Matrix Distinction , Avoiding Dimension Reduction , Higher Dimensional arrays , lists , Creating lists , General list operations , Accessing list components and values , applying functions to lists , recursive lists	L1, L2,L3	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Data Frames: Creating Data Frames , Matrix-like operations in frames , Merging Data Frames , Applying functions to Data frames , Factors and Tables , factors and levels , Common functions used with factors , Working with tables - Other factors and table related functions - Control statements , Arithmetic and Boolean operators and values , Default values for arguments - Returning Boolean values , functions are objects , Environment and Scope issues , Writing Upstairs - Recursion , Replacement functions , Tools for composing function code , Math and Simulations in R	L1, L2,L3	7
MODULE 4: OOP: S3 Classes , S4 Classes , Managing your objects , Input/ Output , accessing keyboard and monitor , reading and writing files , accessing the internet , String Manipulation , Graphics , Creating Graphs , Customizing Graphs , Saving graphs to files , Creating three-dimensional plots	L1, L2,L3	7
MODULE 5: Interfacing: Interfacing R to other languages , Parallel R , Basic Statistics , Linear Model , Generalized Linear models , Non-linear models , Time Series and Auto-correlation , Clustering	L1, L2, L3	7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4207	**PROGRAMMING FOR ANALYTICS USING PYTHON**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is designed in such a way that leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of thefundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language.
2. Provide applications on statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits such as pandas, matplotlib, scikit-learn, nltk, and networkx to gain insights into data analysis process.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create applications for data retrieval and processing

CO2: Conduct an inferential statistical analysis of various business problems

CO3: Explain fundamental Python functionality and features used for data science

CO4: Apply techniques such as lambdas and manipulate csv files

Modules	Blooms level*	Number of hours
MODULE 1: Installing Python; basic syntax, interactive shell, editing, saving, and running a script, Concept of data types; variables, assignments; immutable variables; numerical types; arithmetic operators and expressions; comments in the program; understanding error messages Conditions, boolean logic, logical operators; ranges; Control statements: if-else, loops (for, while); short-circuit (lazy) evaluation	L1, L2,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Strings and text files; manipulating files and directories, os and sys modules; text files: reading/writing text and numbers from/to a file; creating and reading a formatted file (csv or tab-separated).String manipulations: subscript operator, indexing, slicing a string; strings and number system: converting strings to numbers and vice versa. Binary, octal, hexadecimal numbers	L1, L2,L3	7
MODULE 3: Lists, tuples, and dictionaries; basic list operators, replacing, inserting, removing an element; searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values; traversing dictionaries. Design with functions: hiding redundancy, complexity; arguments and return values; formal vs actual arguments, named arguments, Program structure and design, Recursive functions	L1, L2,L3	7
MODULE 4: Simple Graphics and Image Processing: "turtle" module; simple 2d drawing - colors, shapes; digital images, image file formats, image processing Simple image manipulations with 'image' module (convert to bw, greyscale, blur, etc).Classes and OOP: classes, objects, attributes and methods; defining classes; design with classes, data modeling; persistent storage of objects OOP, continued: inheritance, polymorphism, operator overloading (_eq_, _str_, etc); abstract classes; exception handling, try block	L1, L2,L3	7
MODULE 5: Graphical user interfaces; event-driven programming paradigm; tkinter module, creating simple GUI; buttons, labels, entry fields, dialogs; widget attributes - sizes, fonts, colors layouts, nested frames Multithreading, Networks, and Client/Server Programming; introduction to HTML, interacting with remote HTML server, running html-based queries, downloading pages; CGI programming, programming a simple CGI form. Searching, Sorting, and Complexity Analysis	L1, L2, L3	7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4302	**DATAMINING**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Every business organization is realizing the importance of data. They are harnessing the benefits offered by Data Mining as it allows them to see hidden patterns from the data and helps in framing business policies. This course emphasizes on utilizing the techniques offered by Data Mining.

Course Objectives

This course enable students to:

1. Understand the basic concepts, principles, methods, implementation techniques, and applications of data mining, with a focus on major data mining functions such as cluster analysis.
2. Develops skills to use data mining software and other data mining techniques to solve business problems.

Course Outcomes

On completion of this course, the students will be able to

CO1: Evaluate and implement a wide range of emerging and new technologies to facilitate the knowledge discovery.

CO2: Assess raw input data, and process it to provide suitable input for a range of data mining algorithms.

CO3: Compare and evaluate different data mining techniques like classification, prediction, clustering and association rule mining

CO4: Discover and measure interesting patterns from different kind of databases.

CO5: Determine data mining functionalities.

CO6: Identify appropriate data mining algorithms, and apply and interpret and report the output appropriately.

CO7: Describe complex data types with respect to spatial and web mining

CO8: Analyze data using the powerful data mining tool Weka.

Modules	**Blooms level***	**Number of hours**

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Amity University Haryana
Manesar Gurgaon-122413

Module I: Introduction to Data Mining What is data mining? Related technologies - Machine Learning, DBMS, OLAP, Statistics, Data Mining Goals, Stages of the Data Mining Process, Data Mining Techniques, Knowledge Representation Methods, Applications, Example: weather data, Data Warehouse and DBMS, Multidimensional data model, OLAP operations, Example: loan data set. Data cleaning, Data transformation, Data reduction, Discretization and generating concept hierarchies, Installing Weka 3 Data Mining System, Experiments with Weka - filters, discretization	L1, L2	6
Module II: Data mining knowledge representation and Attribute oriented Analysis **Data mining knowledge representation** Task relevant data, Background knowledge, Interestingness measures, Representing input data and output knowledge, Visualization techniques, Experiments with Weka – visualization. **Attribute oriented Analysis:** Attribute generalization, Attribute relevance, Class comparison, Statistical measures, Experiments with Weka - using filters and statistics.	L2, L3	7
Module III: Data mining algorithms **Association rules:** Motivation and terminology, Example: mining weather data , Basic idea: item sets, Generating item sets and rules efficiently, Correlation analysis, Experiments with Weka - mining association rules **Classification:** Basic learning/mining tasks, Inferring rudimentary rules: 1R algorithm, Decision trees, Covering rules, Experiments with Weka - decision trees, rules **Prediction:** The prediction task, Statistical (Bayesian) classification, Bayesian networks, Instance-based methods (nearest neighbor), Linear models, Experiments with Weka - Prediction	L1, L2, L3	7
Module IV: Cluster Analysis: Concepts and Methods Basic issues in clustering, First conceptual clustering system: Cluster/2, Partitioning methods: k-means, expectation maximization (EM), Hierarchical methods: distance-based agglomerative and divisible clustering, Density Based, Grid based Methods, Conceptual clustering: Cobweb, Experiments with Weka - k-means, EM, Cobweb	L1, L2, L3	8
Module V: Advanced techniques- Data Mining software and applications Text mining: extracting attributes (keywords), structural approaches (parsing, soft parsing), Bayesian approach to classifying text, Web mining: classifying web pages, extracting knowledge from the web, Data Mining software and applications	L1, L2, L3	8

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4303	**PREDICTIVE ANALYTICS-I MACHINE LEARNING USING R**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers fundamental and applied evidence based knowledge to improve professional practice of students. It provides a detailed understanding of both supervised and unsupervised learning as it is vital for a data scientist. This course offer insight on text mining using "tidytext."

Course Objectives

The objective of this course is to:

1. Facilitate an introduction to machine learning techniques using several popular algorithms.
2. Internalize a core set of practical and effective machine learning methods and concepts, and apply them to solve some real world problems.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain and apply a set of unsupervised learning concepts and methods, classification methods of increasing complexity (rules, trees, random forests), and associated optimization methods (gradient descent and variants)

CO2: Explain the common idioms of large-scale graph analytics, including structural query, traversals and recursive queries, PageRank, and community detection

CO3: Apply the popular algorithms of machine learning using R

CO4: Analyze and interpret the results using specific statistical tools and techniques in R.

Modules	Blooms level*	Number of hours
MODULE 1: Linear Methods for Regression and Classification: Overview of supervised learning, Linear regression models and least squares, Multiple regression, Multiple outputs, Subset selection, Ridge regression, Lasso regression , Linear Discriminant Analysis , Logistic regression, Perception learning algorithm	L1, L2,L3,L4	8
MODULE 2: Model Assessment and Selection: Bias, Variance, and model complexity, Bias-variance trade off, Optimism of the training error rate, Estimate of In-sample prediction error, Effective number of parameters, Bayesian approach and BIC, Cross- validation, Boot strap methods, conditional or expected test error	L1, L2,L3,L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

BUA4304	**PREDICTIVE ANALYTICS-II MACHINE LEARNING USING PYTHON**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers the specialization of Python staring with data strategy. This course covers the two core paradigms that account for most business applications of predictive modeling: classification and prediction. It also covers the use of partitioning to divide the data into training data (data used to build a model), validation data (data used to assess the performance of different models, or, in some cases, to fine tune the model) and test data (data used to predict the performance of the final model).

Course Objectives

The objective of this course is to:

1. Facilitates a good learning to students on how to make meaningful predictions for a wide range of business purposes.
2. Provide provides a sufficient understanding on development of statistical models and how to devise data-driven workflows.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Apply data science techniques to extract insights from a wide range of data sources and to provide an assessment basis for predictive models. Also, students shall be able to explain how ensemble models improve predictions

CO2: Visualize and explore data to better understand relationships among variables

CO3: Identify and implement appropriate performance measures for predictive models with popular algorithms

Modules	**Blooms level***	**Number of hours**
MODULE 1: Data Cleaning: Reading the data – variations and examples, Data frames, Delimiters, Various methods of importing data in Python: csv method, open method in Pyton, reading data form a URL, reading .xlsor .xlsx files, Reading from an .xls or .xlsx file, Writing to a CSV or Excel file. Handling missing values, Creating dummy variables, Visualizing a dataset by basic plotting, Scatter plots, Histograms, Boxplots	L1, L2,L3,L4	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Data Wrangling: Subsetting a dataset, Selecting columns, Selecting rows, Selecting a combination of rows and columns, Creating new columns, Generating random numbers and their usage, Seeding a random number, Generating random numbers following probability distributions, Probability density function, Cumulative density function, Uniform distribution, Normal distribution, Using the Monte-Carlo simulation to find the value of pi, Geometry and mathematics behind the calculation of pi, Generating a dummy data frame, Grouping the data: aggregation, filtering, and transformation	L1, L2,L3	7
MODULE 3: Statistical Concepts for Predictive Modelling, Random sampling and the central limit theorem, Hypothesis testing, Null versus alternate hypothesis, Linear Regression with Python: Understanding the math behind linear regression, Linear regression using simulated data, Fitting a linear regression model and checking its efficacy, Finding the optimum value of variable coefficients ,Making sense of result parameters, p-values, F-statistics, Residual Standard Error, Implementing linear regression with Python, Linear regression using the stats model library, Multiple linear regression, Multi-collinearity, Variance Inflation Factor, Model validation, Training and testing data split , Handling categorical variables, Transforming a variable to fit non-linear relations	L1, L2,L3,L4	7
MODULE 4: Logistic Regression with Python, Linear regression versus logistic regression, Understanding the math behind logistic regression, Contingency tables, Conditional probability, Odds ratio, Moving on to logistic regression from linear regression, Estimation using the Maximum Likelihood Method, Likelihood function: Log likelihood function, Building the logistic regression model from scratch, Making sense of logistic regression parameters, Wald test, Likelihood Ratio Test statistic, Chi-square test, Implementing logistic regression with Python, Processing the data, Data exploration, Data visualization, Creating dummy variables for categorical variables, Feature selection, Implementing the model, Model validation and evaluation, Cross validation, Model validation, The ROC curve, Confusion matrix.	L1, L2,L3,L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 5: Trees and Random Forests with Python: Introducing decision trees, A decision tree Understanding the mathematics behind decision trees, Homogeneity, Entropy, Information gain, ID3 algorithm to create a decision tree, Gini index, Reduction in Variance, Pruning a tree, Handling a continuous numerical variable, Handling a missing value of an attribute, Implementing a decision tree with scikit-learn, Visualizing the tree, Cross-validating and pruning the decision tree, Understanding and implementing regression trees, Regression tree algorithm, Implementing a regression tree using Python, Understanding and implementing random forests, The random forest algorithm, Implementing a random forest using Python, Why do random forests work?, Important parameters for random forests	L1, L2, L3,L4	7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4305	**BIG DATA ANALYTICS- HADOOP**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course familiarizes the students on how to perform analytical operations on structured and unstructured data to gain insights from data processed through Hadoop. This offers a specialization on Big Data Platform and its use cases providing an overview of Apache Hadoop.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of how to use Pig, Hive, and Impala to practice and examine tremendous datasets stored in the HDFS, and use Sqoop and Flume for data ingestion.
2. Provide applications on components of Hadoop and Hadoop Eco-System such as Hadoop Cluster Architecture, Important Configuration files in a Hadoop Cluster, Data Loading Techniques, how to setup single node Hadoop clusterl installation of VM player and Hadoop, Important Configuration files in a Hadoop Cluster, Linux commands, Importing Hadoop Jars, Data Loading Techniques

Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify Big Data and its Business Implications
CO2: Access and Process Data on Distributed File System
CO3: Manage Job Execution in Hadoop Environment
CO4: Develop Big Data Solutions using Hadoop Eco System

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Big Data Definition of Big Data, The 5 V's of Big Data(Volume, Variety, Velocity, Veracity, Value), Comparison of Traditional Data with Big Data, Management of Big Data, Analyzing Big Data, and Technology Challenges for Big Data. Big Data Sources, Big Data Applications, Big Data Architecture	L1, L2,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Technologies for Handling Big Data Introduction to Traditional RDBMS, OLTP, OLAP, Data Mining, Data Warehouse, Basic SQL Commands and queries: CREATE, INSERT, DELETE, UPDATE, SELECT Cloud Computing : Definition, Characteristics, Applications, Deployment Model, Service Models	L1, L2,L3	7
MODULE 3:Distributed Computing Using Hadoop Introduction, Hadoop Framework, Hadoop Distributed File System, Map Reduce, Hive, Pig Sample Map Reduce Application, HIVE language capabilities, Pig Language capabilities, HIVE query examples, Pig Scripts examples	L1, L2,L3	7
MODULE 4: Big Data in Business Case Studies: Big Data in Marketing, Retail Hospitality, Customer Services, Decision Support using Big Data. Developing a Big Data Strategy/ Defining a Big Data strategy for your organization, Big Data Platform for Internet of Things	L1, L2,L3	7
MODULE 5:Visualization and Analytics Visualizations - Visual Data Analysis Techniques - Interaction Techniques; Systems and Analytics Applications - Analytics using Statistical packages-Approaches to modeling in Analytics – correlation, regression, decision trees, classification, association-Intelligence from unstructured information	L1, L2, L3	7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4306	**FINANCIAL DECISION ANALYSIS**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Financial decision making involves analyzing the financial problems that the company faces and deciding which course of action should be taken. In order to make financial decisions, you must be able to identify potential financial problems and analyze the effects of alternative courses of action.

Course Objectives

This course provides a specialization on financial tools to apply to decision-making within organizations. The course helps the student to

1. Develop a range of financial analysis skills through a combination of class discussions and analyses of case studies of specific organizations.
2. Demonstrates the complex relationships between finance, impact, strategy, and governance in business organizations.

Course Outcomes

By the end of the course the participants should be better able to:

CO1: Explain how organisations make value optimising financial decisions, and reflectively and critically assess the ethical issues arising from these decisions.

CO2: Critically analyse and evaluate various financial models and decision making techniques and their impact on different constituencies of stakeholder. Apply financial analysis skills in the facilitation of strategic decision making.

CO3: Review Assess the features of alternative and diverse sources of finance and critically evaluate their appropriateness under different circumstances and evaluate elements of risk, return and value in a range of strategic operational financial decisions and understand the implications in regulatory and governance terms of the consequences of doing so.

Modules	**Blooms level***	**Number of hours**

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module I : Financial governance: objectives and environment The role of shareholder wealth maximisation in modern financial management, Shareholder v stakeholder perspectives, Role of the finance , function Balancing risk and return, Shareholder wealth maximisation and ethical behaviour Ethics and the finance function, Corporate Governance *:* Corporate Governance and the agency problem, Financial aspects of the Indian Corporate Governance Code New public management, Listing requirements in the Stock Exchanges.	L1,L2, L3	5
Module II: Management performance measurement Financial ratio analysis – Profitability – Efficiency – Liquidity - Investment performance. Operating, Financial and Combined Leverage. Financial distress and insolvency, including the use of financial ratios based on univariate and multivariate analysis to predict financial failure. Analysis of Risk and Uncertainty in Capital Budgeting, Description and Measurement of Risk; and Risk Evaluation Approaches. Risk and Return - Conceptual Framework of Risk and Return: Type of Risks; Risk and Return of a Single Asset; Risk and Return of Portfolio (only two asset portfolio); Portfolio Selection; and Capital Asset Pricing Model (CAPM)	L1, L2, L3	6
Module III:-Making distributions to shareholders Dividend policy and shareholder wealth – Traditional v Modigliani and Miller arguments Reasons for the importance of dividends, Factors determining the level of dividends Scrip dividends, Special dividends and share buybacks, Tax Aspects associated with Dividend Decision	L1, L3	6
Module IV: - Long term investment decisions The nature of investment decisions - Investment appraisal methods - Payback period (including discounted payback period) - Accounting rate of return - Net present value - Internal rate of return – MIRR – XIRR- CAGR, Investment opportunities and risk - Risk and Return preferences of investors. Risk appraisal methods – Sensitivity analysis – Scenario analysis –Simulations - Expected net present value - Risk-adjusted discount rate. **Shareholder value analysis:** Shareholder value and the need for new forms of measurement-Shareholder value analysis and net present value -Comparison of shareholder value analysis and Economic value added -Total shareholder return (TSR) and market value added (MVA) , Cash Value added, Market to Book Value , Evaluation of the shareholder value approach. **Analysis of securities**: Cost method and market method. Equity method of accounting and analysis of minority interest.	L1, L3,L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module V: Business combinations and share valuation **Business Valuation**: Conceptual Framework of Valuation; Approaches/Methods of Valuation; and other Approaches to Value Measurement, **Corporate Restructuring**: Conceptual Framework; Financial Framework; Tax Aspect of Amalgamation; Merger and Demergers; Legal and Procedural Aspects of Mergers/Amalgamations and Acquisition/Takeovers; and other forms of Corporate Restructuring. Economic rationale for mergers and acquisitions, forms of purchase consideration with DCF model. **Option Valuation**: Concept and Types of Options; Option Payoffs; Call Option Boundaries; Factors Influencing Option Valuation; and The Black-Scholes Option Pricing Model. **Valuation and forecasting -** Valuation models: Asset based models, DCF models and abnormal earnings or Edwards-Bells-Ohlson model. Forecasting models: Extrapolative models and index models, Forecasting with disintegrated data, Comparison with financial analysts' forecast.	L1, L3,L4	5
Module VI: Capital markets and long-term financing decisions Financial markets and institutions-The role of the Stock Exchange Advantages and disadvantages of a Stock Exchange listing Stock market efficiency – Long term sources of financing – Shares– Debts - Debentures – Personal financing -		7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

BUA4307	**VISUAL ANALYTICS- TABLUE /POWER BI**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

This course familiarizes the students on data visualization tools. This course is designed to provide a fundamental and strategic understanding on the concepts of Business Intelligence using Tablue.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of BIs and its types and how to connect to and import data, author reports using Power BI Desktop, and publish those reports to the Power BI service
2. Emphasize on how to create dashboards and share with business users—on the web and on mobile devices

Course Outcomes

On completion of this course, the students will be able to:

CO1: Connect, import, shape, and transform data for business intelligence (BI)
CO2: Visualize data, author reports, and schedule automated refresh of your reports
CO3: Create and share dashboards based on reports in Power BI desktop and Excel
CO4: Use natural language queries and create real-time dashboards

Modules	Blooms level*	Number of hours
MODULE 1: Tableau: Introduction, Getting Started with Tableau, Connecting to Data, Data Prep with Excel, Overview of the Tableau User Interface, Working with Discrete vs. Continuous Data, Calculated fields **Power BI**: Understanding key concepts in business intelligence, data analysis, and data visualization, Importing data and automatically creating dashboards from services such as Marketo, Salesforce, and Google Analytics, Connecting to and importing your data, then shaping and transforming that data, Enriching your data with business calculations.	L1, L2,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Tableau: Introduction to data visualization, the evolution of the BI industry, Understanding the business value of visual analytics, Data visualization best practices (overview), Power BI: Visualizing your data and authoring reports, Scheduling automated refresh of your reports, Creating dashboards based on reports and natural language queries, Sharing dashboards across your organization, Consuming dashboards in mobile apps	L1, L2,L3	7
MODULE 3:Tableau: Basic charts, Design considerations for effective data visualization, Human cognition and visual perception, Using Maps to Visualize Spatial Data, **Power BI:** Leveraging your Excel reports within Power BI, Creating custom visualizations that you can use in dashboards and reports, Collaborating within groups to author reports and dashboards, Sharing dashboards effectively based on your organization's needs.	L1, L2,L3	7
MODULE 4: Tableau: The visual storytelling framework, the business value of visual stories, Creating dashboards and story points, Formatting worksheets and dashboards. **Power BI:** Exploring live connections to data with Power BI, Connecting directly to SQL Azure, HD Spark, and SQL Server Analysis Services, Introduction to Power BI Development API, Leveraging custom visuals in Power BI	L1, L2,L3	7
MODULE 5: Common pitfalls of data visualization, Common pitfalls of data narratives, Share and critique an example of a data visualization, Provide your Tableau Public URL, Share data visualization on Tableau Public, Building a Dashboard in Tableau and Power BI, Develop a data story pitch	L1, L2, L3	7

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

BUA4335	**SUMMER INTERNSHIP EVALUATION**	**L**	**T**	**P**	**C**
Version 1.1	Latest Approved	0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship programme can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

.

Course Objectives

The objective of this course is to:

1. Offer students the opportunity to apply their knowledge in real-life environments through an industry placement for eight-weeks.
2. Providedesired skills to students that will help them perform better on their jobs after graduation.

Course Outcomes

On completion of Summer Internship,the students will be able to:

CO1: Get hands-on experience about real world problems in a field relevant to their major of studies.

CO2: Acquire confidence for employment after graduation.

CO3: Acquire skills important for time management, discipline, self-learning, effective communication and so on.

CO4: Learn practically about team-work, collaboration, and leadership.

Credit Hours: 6 hours

Course Duration: Six-Eight weeks

Semester Offered: Summer

Format for Report Writing	**Blooms level***	**Number of hours**

Prof. (Dr.) Anil Kumar

1. Title of the project 2. About the organization 3. Introduction and objectives of the project/ programme / organization 4. Funding agency—about the agency, how to get funding, Nature of funding agency 5. Staffing pattern of the project with their functions 6. Major activities going under project 7. Results achieved so far (target Vs achievement) 8. Role of the candidate in the project/programme / organization 9. Evaluation by the candidate	L1, L2 ,L3,L4,L5,L6	6hours (Duration-6-8 weeks during summer)

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

SIP Guidelines

1.Every student is required to write an Internship report upon completion of their internship and required to submit two copies (student copy + department copy) of the report to concerned department HOD (along with internal marks certificate given by the company) for final evaluation and awarding of end examination marks.

2.Before submitting the report to the HOD, the student required to go through multiple rounds of revision in collaboration with the industry guide and department internship mentor/coordinator/supervisor.

The Internship Report serves multiple purposes:

• Help the student develop written communication skills. • Serve as an archival record of the internship experience. • Give the student an opportunity to reflect on the professional aspects of the internship experience and the skills that were learned. • Allow the student to describe the science content of the internship. • Have the student to reflect on the initial goals of the internship and how they were (or were not) achieved during the internship.

Modes of Evaluation: Presentation/Viva/ Report /Assignment Examination

BUA4402	**FINANCIAL ANALYTICS**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Every business in the industry is generating loads of financial data and they understand the significance of deriving logical inferences out of it to streamline their decision making process. Lately, accurate financial data analysis is not enough for a business to sail through. They need predictive insights which can improve their real time day to day decision making. Financial analytics helps in combining internal and external financial information by using social media and big data to provide predictive insights. Whether it is with respect to stock market prediction or customer profitability, finance analytics enables to provide a direction in predicting all.This course blends easy-to-use statistical tools with complex machine learning tools and algorithms to equip the participants with the requisite skill set in analysing data. By the end of this course, the participants should be able to perform financial analysis using powerful tools like R and Python.

Course Objectives

The objective of this course is to:

1. Make students understand and diagnose the information contained in financial statement with a view to judge the profitability and financial soundness of the firm, and to make forecast about future prospects of the firm.
2. Provide understanding on diverse needs of the traditional financial department, and advancements in technology, all point to the need for financial analytics.
3. Help students to shape up the business' future goals and to improve the decision-making strategies for various business situations.
4. Emphasize on measuring and managing business' tangible assets such as cash and equipment.
5. Provides an in-depth insight into the organization's financial status and improves the cash flow, profitability, and business value.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Understand and interpret the financial data about the company

CO2: Forecast the firm financial position and interpret accordingly

CO3: Evaluate the financial position with the support of various financial tools like financial statement analysis, time value of money, bond valuation and valuation of the firm

CO4: Equip the requisite skill set in analyzing data in terms of finance

BUA4403	**SUPPLY CHAIN ANALYTICS**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course provides foundational knowledge associated with the operations analytics. The course offers insights on the various tools and techniques for implementation of analytics based on the supply chain drivers such as location, logistics and inventory.

Course Objectives

The objective of this course is to:

1. Manage uncertainty and risk within supply chain management
2. Segment different customers, products, and channels and design an optimal portfolio of logistics approaches and strategies for these various segments
3. Understand the appropriate forecasting methodology for each segment

Course Outcomes

On completion of this course, the students will be able to:

CO1: Describe the various techniques for analytics based on the Multi Attribute Decision Making (MADM) and risk.

CO2: Identify the inventory techniques for analytics and the different network models.

CO3: Analyze the inventory using aggregate production model.

CO4: Illustrate the transportation problems for analytics in network design.

CO5: Analyze the different dimensions using Analytic Hierarchy Process.

Modules	**Blooms level***	**Number of hours**
Module I: Warehousing Decisions, Mathematical Programming Models, P-Median Methods, Guided LP Approach, Balmer – Wolfe Method, Greedy Drop Heuristics, Dynamic Location Models, Space Determination and Layout Methods.	L1, L2	7
Module II:Inventory Management, Inventory aggregation Models, Dynamic Lot sizing Methods, MultiEchelon Inventory models, Aggregate Inventory system and LIMIT, Transportation Network Models, Notion of Graphs, Minimal Spanning Tree.	L1, L2	8

BUA4404	HR ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalogue Description:
Developing the right HR metrics and analytics for your specific context which support long-term performance and improving the decision making is a key competitive edge in the modern economy. HR is increasingly difficult in an era of talent wars, complex environments and a deluge of information.

Course Objective:
The course aims to:
1. Give students a good understanding on the concepts and techniques of human resource analytics.
2. Familiarize the students on how to prepare HR reports and identify decision technologies.
3. Develop a structured approach among students to apply judgment, and generate insight from data for enhanced decision making.

Course Outcomes:
On successful completion of the course a student will be able to:
CO1. Explain internal and external human resource metrics benchmarks and indicators.
CO2. Reproduce knowledge on relational databases and make recommendations regarding the appropriate HRIS to meet organization's human resource needs.
CO3. To identify appropriate software to record, maintain, retrieve and analyze human resources information (e.g., staffing, skills, performance ratings and compensation information).
CO4. To describe both the quantitative and qualitative analysis to understand trends and indicators in human resource data.

BUA4405	MARKETING ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course provides an understanding on the use of analytics in Marketing Management. The course offers insights to the students on the use of predictive analysis in decision making. The course familiarizes the students on the concept of the market place, various segments of products and services in the markets, and changing consumer needs in the markets.

Course Objectives

The objective of this course is to

1. Develop the ability to critically evaluate business problems and to determine the most appropriate analytical technique address marketing problems.
2. Acquaint the students to develop and implement the marketing strategy by providing a framework from which to identify and evaluate strategic options and programs.
3. Enable students to solve real-world marketing problems across a wide range of industries, giving them a competitive edge.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify various methods followed build CRM practices and various positioning strategies followed by the companies.

CO2: Contrast the characteristics of industrial and consumer goods.

CO3: Identify and apply the various techniques of predictive analysis in the different market situations.

CO4: Explain the need for digital evolution in marketing.

Modules	Blooms level*	Number of hours
Module 1: Introduction to Marketing Understanding the marketplace and consumer needs, Designing a Customer Driven Marketing Strategy, Building Customer Relationships, Consumer Behaviour and Business Buyer Behaviour	L2,L5	7
Module 2: Marketing Strategy Market Segmentation and Product Positioning, Market Segmentation, Market Targeting, Target Market Strategies, Product Positioning and Differentiation, Choosing a Differentiation and Positioning Strategy.	L1, L4	8

BUA4406	**DATA PRIVACY AND DATA SECURITY LAWS**	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is designed to familiarize the students with the basic concepts of data privacy issues and security laws including current and proposed laws and regulations that govern data security and privacy.

Course Objectives

The objective of this course is to:

1. Provide the foundational knowledge based on data security investigation and data policy questions concerning the value of data security and data privacy regulations.
2. Emphasize on the real world effects of data breaches on individuals and businesses.
3. Provide an understanding on how to secure data and balancing of interests among individuals, government, and enterprises from the technical and legal perspective.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain the fundamental concepts of data security and security laws.
CO2: Explain the business needs for data privacy and security investigation.
CO3: Assess the risk for data security.
CO4: Identify the legal, professional and ethical issues related to data.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Data Security History of data security, Meaning of data Security and data privacy, Critical Characteristics and components of Data security, Need for Security, Business Needs, Threats, Attacks, Meaning of term personal data, data processing, data protection, NSTISSC Data Security Model, Balancing Security and Access to data, The SDLC model, The Security SDLC	L1, L2	6
MODULE 2: Introduction to Data Security Laws Introduction of the General Data Protection Regulation (GDPR), rationale for the introduction of the GDPR , primary objectives of the General Data Protection Regulation, scope of data processing activities covered by the GDPR, territorial scope of the GDPR regarding the location of personal data processing and data subjects, GDPR impact on Indian Companies, Data protection Laws in India	L1, L2	6

BUA4437	**DISSERTATION (ANALYTICS PROJECT)**	L	T	P	C
Version 1.1		0	0	0	6
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. The dissertation topic is related to the field of specialization. Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

Course Objectives

The objective of this course is to:

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

Course Outcomes

On completion of Dissertation, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

Registrar
Amity University Haryana
Manesar Gurgaon-122413

• Selecting a topic for investigation. • Establishing the precise focus of the study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility. • Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation • Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.	L1, L2 ,L3,L4,L5,L6	6hours a Week

ACCOUNTING FOR MANAGEMENT

Course Code: HHM4102 **Credits Units: 03**

Course Objective: Participants in this course will develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, participants will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts. In addition the course develops skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyse financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.

Course Contents:

Module I:Accounting Basics
Introduction, Foundations, Accounting policies, Accounting and management control, Branches of accounting, Recording of transactions and classification, Trial Balance & Errors, Cash book

Module II:Final Accounts
Preparation, Adjustments, Analysis, Depreciation Accounting, Reserves &Provisions.Form and contents of financial statements with reference to Indian Companies Act.

Module III:Financial Statement Analysis
Relation and Comparison of Accounting data and using financial statement information, Ratio Analysis, Cash flow analysis.Determination of Existing and future capital requirement.

Module IV: Cost Accounting
Elements of cost, Cost Classification and Allocation, Cost Sheet

Module V:Management A**ccounting**
Emergence of Management Accounting, Marginal Costing and Cost Volume Profit Analysis, Budgeting & Variance Analysis.

Examination Scheme:

Components	CPA	TP	Q/S	A	ME	EE
Weightage (%)	5	5	5	5	10	70

BIOSTATISTICS

Course Code: HHM4104 **Credit Units: 03**

Course Objective:
The aim of this course is to develop the understanding of various statistical tools used for decisions making and how each applies to and can be used in the Hospital environment.

Course Contents:

Module I- Introduction to Statistics
Variables -Types of Variables ,Sampling-Sample size and Sampling techniques Data Collection – Types of data (Primary and Secondary Data) , Methods of Data Collection - Respondents, interviews, observation, questionnaire, survey, direct and indirect research techniques, Data Collection in Quantitative and Qualitative Research , Organizing the data.

Module II- Data Analysis
Data Analysis – techniques and tools, Manual and Computerized, Use of statistical software in data analysis - univariate, bivariate and multivariate analysis.

Module III- Data Presentation
Data Presentation - frequency distribution, charting of data – Bar Chart, Pie chart, Line Diagram, Tables, Histogram.

Module IV-Demography and Vital Statistics
Mortality and Morbidity Rates, Birth Rates, Specific Death Rates, Fertility Rates, Abortion Rates.

Module V-Hospital Statistics
Application of statistics in healthcare and hospital settings - utilization of the basic data, sources of health statistics, problems in collection of sickness data, measurement of sickness, vital statistics.

Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

INFORMATION TECHNOLOGY& E-COMMERCE

Course Code: HHM4109 **Credit Units: 02**

Course Objective:
This course will expose students to developments in computer technology and understand the working of a computer system. It will introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts, e-commerce etc. The course will expose the students to the latest trends in computer.

Course Contents:

Module I: Modern Computer Systems
Evolution of Computer Systems, Input, output and storage technologies, Computer Assisted Control and Automation , (e.g. Delhi Metro , Digitally Controlled Car engines etc.) , Computer Controlled Biometric/RFID based Access Control , Contemporary hardware and software platforms(Open Source, Web Software etc.), Storage of Data Resources

Module II: Data Resource Management
Introduction to DBMS, Benefits of DBMS over traditional file system, Types of DBMS, Application of DBMS using MS-ACCESS / ORACLE as a tool for understanding of DBMS concepts. SQL Query handling , Forms, Concept of Data Warehouses and Data Marts, Introduction to Data Centers. Storage Technologies and Architecture (DAT, NAS, SAN etc.) . Live examples of storage strategies of companies like Google, Amazon Wal-Mart dealing with storage crisis

Module III: Telecommunications and Computer Networks
Networked Enterprise :- Components, Types of networks, Advantages of Network Environment, Business Uses of Internet, Intranet and Extranet, Web 2.0/3.0 , Distributed/Cloud/Grid Computing, GSM & CDMA, GPRS ,3G & 4G technologies, VOIP and IPTV.

Module IV: Electronic Commerce Systems
Introduction to e-Commerce and M-Commerce, Advantages and Disadvantages of each. Concept of B2B, B2C, C2C , with examples. Concept of Internet Banking and Online Shopping, Electronic Payment Systems. Project Discussion :- Development of e-commerce store (Web Site Development, Internet Publicity , Payment Gateway, Packaging & Delivery , After Sales Support) .

Module V: E-governance
Concept of e-governance , World Perspective , Indian Perspective , Technologies for e-governance , e-governance as an effective tool to manage the country's citizens and resources, Advantages and Disadvantage of E-governance, E-governance perspective in India. Discussion on MCA21 Project ,Bhoomi etc. .

Module VI: Security Management
The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software , Hacking etc.) and counter measure. Definition of Cyber Crime and Types. Antivirus, Firewalls, Anti-Spyware , Security Audit, Discussion on Overview of IT-ACT 2000.

Examination Scheme:

Syllabus - Second Semester

RESEARCH METHODOLOGY

Course Code: HHM4203 **CreditUnits: 03**

Course Objective: To provide basic understanding towards research principles and methods. To introduce important analytical tools for research data analysis. To assist in the development of research proposals/reports

Course Contents:

Module I: Basics of Research
Definitions and designs, uses of research in healthcare, formulation of research problems, developing hypothesis, writing research questions

Module II
Sampling, Design, and development of interview schedule, questionnaire construction, pre-testing (reliability & validity), research ethics

Module III
- Data collection: field work, mapping and listing operations, selecting of respondents and MIS for major research projects
- Data Management: editing, entry and preparing data sets for analysis
- Data analysis: using SPSS/ epi.info/ use of matrices

Module IV: Qualitative Research
- Development of conceptual framework
- Qualitative methods: FGDs, in-depth interviews, biographics, participatory methods, participant observation etc.

Module V:Research Ethics
History of ethics in health research, Principles and Concepts in research ethics – confidentiality and privacy, informed consent, vulnerable subjects and special treatments, standards of care – principles, review processes etc.

Examination Scheme:

HOSPITAL PLANNING

Course Code: HHM4205 **Credit Units: 03**

Course Objective

To expose the students to planning and operation of hospitals in a detailed manner which will include all facets of hospital planning activities covering every department that is involved both in clinical care as well as supportive services. A chapter on research in Hospital Services and Resources is also added to give impetus for research in this field.

Course Contents

Module I: Introduction to Hospital Planning

Conception of idea, formation of hospital planning team, market survey, feasibility study, selection of location, Financial planning of hospitals, Macro level planning.
Conception to commissioning- site development, architects brief working drawings and specifications, engineering drawing, equipment planning, bed distribution, space allocation, interior designing and construction of building - commissioning, shake down period

Module II

Planning for the out-patient services and emergency services, day care services
Planning for patient care units –Inpatient services and intensive care units
Planning for surgical suites.
Planning for labor and delivery suites-LDRP suites

Module III

Planning for laboratory service, blood banking and Radiological services.

Module IV

Conceptual planning for advanced facilities like Cardiac catheterization laboratory, various endoscopy units, Extra corporeal shock wave lithotripsy, radiotherapy unit, IVF unit and Dialysis unit

ModuleV

Planning for supportive services-medical gases, HVAC, House-keeping, CSSD, Food and beverages.

Examination Scheme:

HOSPITAL MATERIALS MANAGEMENT

Course Code: HHM4206 **Credit Units: 03**

Course Objective:
Hospitals carry a large inventory of drugs, sophisticated and highly costly equipment besides beds, furniture and linen. The student should be conversant with Inventory and various methods of control and Purchase management.

Course Contents:

Module I: The Materials Function
Definition, scope and importance of materials management, objectives of materials management, functional areas of materials management, documents used in materials function, material identification codes, role of computers in the materials management, special features of materials management applied to hospitals.

Module II: Stores Management
Responsibilities and functioning of stores, Types of stores in hospitals, Location and layout of stores, Stock verification techniques, Control of pilferages, Standardization and codification.

Module III: Inventory Management
Definition of inventory- Need of control, objectives of inventory control, scope & importance, categories of materials in hospital, hospital, Cost associated with inventories- Ordering cost, carrying cost, over stocking cost, under stocking cost, other costs associated with service level. Inventory control Techniques, Economic order quantity (EOQ), inventory models: safety stocks, fixation of re-order level,

Module IV: Purchase Management
Objectives and responsibilities of purchasing, Vendor evaluation techniques, Price and quality considerations, Tendering procedures, Types of purchasing.

Module V: Legal aspects
Letter of credit, Duty of customs, Types of hospital imports, import procedures & Documentation, government policy.

Module VI: Maintenance Management & Disposal
Maintenance of equipment, Inventory control of spares, Maintenance contracts, Disposal of Waste and Scrap

Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

EXCEL FOR MANAGERS

Course Code: HHM4209 **Credit Units: 01**

Course Overview:
Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers.This course will provide all the tools necessary to create and use basic and advanced spreadsheets. After completion of this course, students will be able to learn the various methods for entering and editing data and also learn the various ways to write simple formulas.

Course Contents:

Module-I: Getting Started with Excel
Introduction to Spreadsheets: Launching Excel, entering data in spreadsheet, widening rows and columns, applying basic formatting in spreadsheet, saving work in excel. Entering Data into cells:Usingautofill, sort & filter feature, creating lists, inserting & deleting rows and columns. Wrapping & merging text and cells,

Module-II: Basics in excel
Protecting & sharing workbooks, freeze panes, understanding normal, page layout and page break preview in excel. Setting the page orientation and print area.Adding hyperlinks to cells, inserting images, objects, equations and symbols.

Module-III: Charts & Formulas in Excel
Understanding Charts: Inserting bar charts, pie charts, column charts and line charts in spreadsheets, formatting and resizing the chart. Using Basic functions- average, sum, min, max, product etc. date functions, time functions. Math Operators in Excel, combining mathematical operators.

Module-IV: Functions in Excel
Logical- using IF, AND, OR, NOT, TRUE, FALSE Functions. Textual- using TRIM, UPPER, LOWER, REPLACE Functions.Import data into excel, Look up functions with index and match. Rounding, sum product, conditional counts and conditional sums, Filtering data, pivot table, pivot charts, conditional formatting.

Module-V: Financial and Statistical Functions in Excel
Financial functions: Time value of money- Present value, Future value, PMT with beginning date, PMT with ending date, NPV, Goal seek, Scenario Manager, IRR. Statistical functions: Max, Min, Average, Large, Rank, Small, Var, Std Dev.

Examination Scheme:

Components	Written Test	Practical	V/P	File/Assignment	Attendance
Weightage (%)	20	30	30	15	5

TERM PAPER

Course Code: HHM4231 **Credit Units: 04**

Course Objective:

The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge by undertaking a **significant practical unit of examining and analyzing various aspects of healthcare management** at a level commensurate with the learning outcomes of the various courses taken upto them in the ongoing semester.

For students of the first semester, the required term paper is primarily a self- worded structured report written by the students after interpreting & analyzing various primary & secondary records of intelligent interviews/readings from several sources on a particular sector.

Conduct of Term Paper

The term paper will be executed & submitted by students individually.

- The students have to decide the topic of study / hospital of interest **within two weeks of the start of the semester**.
- A Faculty Mentor will be assigned to each group of students undertaking a Team Paper.
- Special Time slot to conduct the research will be included in the timetable.
- The Mentor will conduct weekly sessions to guide & follow up the students as well as to clarify any queries or problem faced by the students.
- Weekly review of the Work in Progress will be maintained by Faculty Mentor & will carry 20% weightage during the final evaluation.
- This will be substantiated through a proper economic diary maintained by the students documenting their daily objectives, plan of action, activities undertaken, documentation of reading & referencing material, analysis (if any) & learning outcomes.
- Students may use innovative tools & techniques to maintain this diary such as e-concepts, online blogs, charts, graphs etc.
- Students will be given some discretion in the choice of topic for the term paper and the approach to be adopted.
- The term paper has to be formulated with multi-disciplinary aspects explained in the section below.

Focus Areas of Study

1. Hospital organization & Management Process (HOMP)

Analysis of organisational process of 5 hospitals (include public and private hospitals) while maintaining a scrap book of the latest news & views.

2. Medical Records (MR)
   - Role of E-codes in injury prevention.
   - Differentiation of roles and functions of medical record practitioners
   - Bar code tracking system enhances record- and film-handling productivity
   - Evaluation of use of bar coding in medical record processing
   - Trends in utilization management: legal implications for health record administration

3. Management in Healthcare Systems (MEHS)
   a. A brief overview of the major management functions of health systems.
   b. Procurement Management in Healthcare Systems
   c. Cultural Variation in healthcare consumption in 5 Asian Countries including India: National and individual drivers in mild medical conditions

4. Epidemiology (ED)
   a. Epidemiology and RiskFactors for Isolation of Multi-Drug ResistantOrganisms in patients
   b. Overview of NutritionalEpidemiology
   c. RiskAssessmentStudies : Epidemiology
   d. Epidemiology of Endophthalmitis and Treatment

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

trend in India

e. Epidemiology of cause of death in Childrenwith Acute RespiratoryDistress Syndrome

5. Quality Management in Hospitals (QMH)
    a. Assessing the organizational characteristics influencing Quality Improvement implementation in Indian Hospitals
    b. Basic quality tools applied in Indian healthcare system
    c. Total Quality Management Approach to improve patient safety by preventing medication error incidences
    d. A Holistic Approach for Conceptualizing Hospital Service Quality

Needless to add, effective deployment of Self -Development, Interpersonal Skills & techniques of Business Communication is integral to all aspects of the term paper and will be evaluated accordingly.

General Guidelines

- All students must submit an *independently written* report of their term paper project.
- All contents need to be sourced from reliable primary & secondary sources; references for which **MUST** be maintained in proper format.
- At least one middle level or senior level person of a hospital from healthcare sector has to be interviewed face to face.

- Though the term paper is more a descriptive report covering the 'What, Why and How' aspects; participation in leg work or field research of a hospital (s) will add value to the study.

- The paper should utilise class room learning and industry exposure to evaluate issues on hand and suggest remedial/progressive measures that may be taken by a hospital(s).

Assessment & Evaluation:

The term paper will be in the form of an integrated report and assignment.

- A board consisting of all the faculty members who are teaching the students in the first semester will conduct the final evaluation.
- The faculty mentor assigned to the students will do the continuous evaluation.

All reports will be examined most strictly for plagiarism.

Components	**Continuous Assessment & Economic Diary**	**Presentation**	**Content & Layout of Report**	**Analysis**	**Conclusion & Recommend ations**	**Viva/ Defending Questions**
Weightage (%)	20%	15%	20%	20%	10%	15%

Syllabus - Third Semester

MANAGEMENT OF CLINICAL SERVICES

Course Code: HHM4303 **Credit Units: 03**

Course Objective:
To enable the students gain insights into various aspects like importance, functions, policies and procedures, equipping, controlling, co-ordination, communication, staffing, reporting and documentation of both clinical services in a hospital.To understand the processes and details related to effective patient care and to further increase the satisfaction level of patients

Course Contents:

Module I: Patient centric management
Concept of patient care, Patient-centric management, Organization of hospital departments, Roles of departments/managers in enhancing care, Patient counseling & Practical examples of patient centric management in hospitals.Patient safety and patient risk management.

Module II: Quality in patient care management
Defining quality, Systems approach towards quality, towards a quality framework, Key theories and concepts, Models for quality improvement & Variations in practice

Module III: Patient classification systems
Types of patient classification systems, ICD 9 (CM, PM), Casemix classification systems, DRG, HBG, ARDRG.

Module IV: Patient Medical Records
Policies & procedures for maintaining medical records.e-records, legal aspects of medical records, its safety, preservation and storage.

Module V: Overview
Hospital operations management, role and decisions, Difference of hospital operations from other sevice and manufacturing organizations.

Module VI: Out Patient Services
Overview of the department, day care, accident and emergency services, physical medicine and rehabilitation, occupational therapy unit, physiotherapy department

Module VII: In Patient Services
Ward design (general & specialized), critical care services – ICU, CCU, NICU, , medical services, surgical services – operation theater, nuclear medicine, burn unit, nursing services and administration.

Module VIII: Specialty Services
Pediatrics, Obs&Gynec, ENT, Ophthalmology, Orthopedic, Psychiatry, Anesthesia, Dental

Module IX: Super-specialty Services
Cardiology, Thoracic Surgery, Neurology, Neurosurgery, Nephrology- Dialysis Unit, Transplantation Services.

Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

OPERATIONS RESEARCH

Course Code: HHM4305 **CreditUnits: 03**

Course Contents:

Module I: Introduction
The OR approach to problem-solving and decision-making, Scope and limitations of OR in managerial decision-making.

Module II: Introduction to OR Techniques
Linear Programming, Decision Tree Analysis, Queuing theory, PERT/CPM, Replacement models, Sensitivity analysis, Assignment models, Inventory control models, Forecasting.

Module III: Applications of OR in Hospitals and Health Agencies
Resource allocation, Health services planning, Deployment of health human power, Materials Management, Equipment replacement, Patient scheduling.

Examination Scheme:

MANAGEMENT OF SUPPORT & UTILITY SERVICES

Course Code: HHM4308 **Credit Units: 03**

Course Objective:
To enable the students gain insights into various aspects like importance, functions, policies and procedures, equipping, controlling, co-ordination, communication, staffing, reporting and documentation of non clinical services in a hospital.
To understand the processes and details related to effective patient care and to further increase the satisfaction level of patients

Course Contents:

Module-I: Support Services
Diagnostic-Radiology & Imaging Services, Hospital Laboratory etc, Blood Bank & Transfusion Services, Ambulance Services, Pharmacy, CSSD, Oxygen Manifold/Concentrator, Dietary Service, Hospital Laundry and Linen, Medical Social Worker, Marketing and Public Relations, Finance and Administrative Departments, Outsourcing.

Module-II: Utility Services
Housekeeping, Hospital Engineering and Maintenance, Biomedical Department, Medical Records-confidentiality of records, reception, enquiry, registration and admission, central billing and accounts, Cafeteria/canteen, Mortuary.

Module-III: Biomedical Waste Management and Hazards in Hospital
Definition of Biomedical Waste, BMW – Segregation, collection, transportation, disposal, Liquid BMW, Radioactive waste, Metals / Chemicals / Drug waste, BMW Management & methods of disinfection, Modern technology for handling BMW, Monitoring & controlling of cross infection (Protective devices), BMW from Administrative point (Budget, Health check-up, Insurance)

Module-IV: Other Hospital Functional Activities
Hospital Acquired Infection - Source and Control, Modern trends in Hospital Administration, Telemedicine.

Examination Scheme:

Components	CP	V	A	ME	EE
Weightage (%)	5	5	5	15	70

SUMMER INTERNSHIP EVALUATION

Course Code: HHM4335 **Credits Units: 06**

Course Objective:
To provide on the job experience, as an understudy in a hospital, to help the student understand systems and procedures and learn to make decisions considering the Hospital as an integral unit.

Duration: 2 months

Objectives of Training:
- To collect the information about organization
- To learn about the differentprojects run by the organization
- To befamiliarwithcommunicationprocedurebetweenhealthworkersand community
- To identify practical things aboutproject planning and implementation
- To discover the problems faced in implementing the project
- To learn about working of the information system
- To know about method and source of evaluation

Format for Report Writing
1. Title of the project
2. About the organization
3. Introduction and objectives of the project/ programme / organization
4. Funding agency—about the agency, how to get funding, Nature of funding agency
5. Staffing pattern of the project with their functions
6. Major activities going under project
7. Results achieved so far (target Vs achievement)
8. Role of the candidate in the project/programme / organization
9. Evaluation by the candidate

Guidelines for presentation-
- Powerpoint presentation
- Timeforpresentation: 20minutes
- Time for discussion: 10 minutes

Examination Scheme:

Components	Presentation	Report submitted	Viva-voce
Weightage (%)	25	50	25

Syllabus - Fourth Semester

HOSPITAL MANAGEMENT INFORMATION SYSTEM

Course Code: HHM4401 **CreditUnits: 04**

Course Objective:
To understand the various indicators of health and health information system and health management information system in hospitals.

Course Contents:

Module I: Introduction
Concept of information as a resource, Understanding the principles of information systems, Classification of information systems in hospitals.

Module II: Managing Hospital Information Systems
Setting strategic objectives for information systems, organizing an information systems department, Principles of systems development, Importance of security and confidentiality of data.

Module III: Role of Information Technology in Hospitals
Principles of information processing, Role of information technology in information processing, Role of database management systems, Role of communication in managing hospital information systems.

Module IV: Management Information System
Concept of Management Information System (MIS).Developing indicators, identifying data and developing tools of measurement. Use of MIS: monitoring progress and evaluation, hospital planning, monitoring employees, monitoring health development, decision making. Computerization of MIS: demonstration and critical analysis of different MIS software packages used in health projects in hospitals.

Examination Scheme:

Components	CP	V	A	CT 1	CT 2
Weightage (%)	20	15	5	30	30

ENTREPRENEURSHIP & CONSULTANCY IN HEALTHCARE

Course Code: HHM4406 **Credit Units: 03**

Course Objective:
To create interest in students to start a venture, learn the intricacies of starting as enterprise, identifying opportunities, inculcating enterprising values with orientation towards setting up own enterprises and equip the student to take up consultancy work in various facets of hospital management.

Course Contents:
Module I- Overview of Entrepreneurship
Overview: Definition and Meaning of Entrepreneurship Characteristics and Function of Entrepreneur Importance and Limitations of Entrepreneurship: Entrepreneurial Laboratory: Types of Entrepreneurs Entrepreneurship Games Innovation and Entrepreneurship.
Idea Generation: Brain Storming in terms for Project Ideas, Normal Group Technique; Creativity. Lateral Thinking; Research &Development, Reverse Engineering IPR, Patenting ;Environment Scanning Opportunities in Health care ; NGO Collaboration.

Module II- Feasibility Study
Operational Feasibility, Technical Feasibility, Market Feasibility, Financial Feasibility, Economic Forecasting Project Report Writing; Support Systems for New Enterprise Creation, New Enterprise Identification and Selection Enterprise Establishment and Management.

Module III-Sources of Finance
Short Term Sources – Instruments – Long term Sources – Instruments – Sources – Commercial Banks, Development Agencies. Indian and International Funding Organizations Capita Market Venture and Startup Capital.

Module IV-Overview of Health care Consultancy
Consulting industry with specific reference to hospital and Health care Consulting Perspective.Professionalism& Ethics in Consulting Consultant – Client Relation ship, Behavioral roles of consultants.

Module V-Consulting Process in Health care
Entry: Initial Contracts – Preliminary Problem Diagnosis – Terms and Reference – Assignment Strategy and Plan – Proposal to the Clint – Consulting Contract.
Diagnosis: Conceptual Frame work of Diagnosis – Diagnosing Purpose and Problem - Defining Necessary Facts – Sources and Ways of Obtaining Facts – Data Analysis – Feedback.
Action Planning: Possible Solutions – Evaluating Alternatives – Presentation of Action. Implementation & Termination: Consulting in Various Areas of Health care Management.

DISASTER MANAGEMENT

Course Code:HHM4408 **CreditUnits: 02**

Course Objective

To learn, identify and assess disasters in the community. To set-forth policies and procedures for disaster preparedness and to prepare disaster plan.

Course Contents

Module I: Basics of Disaster Management

Basics of disaster management and Mass casualties, Classification of disaster on the basis of origin, source, onset response; Disaster Phases, Disaster Process, Effects of Disasters, Disasters and Health Problems, Triaging, Impact of Disasters on the Hospitals, Disaster Response – local, national & International, Disaster Management Act – 2005.

Module II: Disaster preparedness

Policies & procedures for general safety, fire safety procedure for evacuation, Components of Disaster Plan – Pre-hospital & Hospital, Hospital disaster plan formulation & implementation, crisis management.

Examination Scheme:

Components	CP	V	A	CT 1	CT 2
Weightage (%)	20	15	5	30	30

DISSERTATION

Course Code: HHM4437 **Credit Units: 06**

The Aim of the Dissertation

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

The dissertation can be defined as a scholarly inquiry into problem(s) or issues(s), involving a systematic approach to gathering and analysis of information / data and leading to production of a structured report.

The Dissertation Topic

It is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. Kindly ensure that the dissertation is related to the field of specialization.

Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

It is important to distinguish here between 'dissertation topic' and 'dissertation title'. The topic is the specific area that the student wishes to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally, it is expected that the topic is:

- Relevant to business, defined broadly;
- Related to one or more of the subjects or areas of study within the core program and specialization stream;
- Clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to the student's knowledge;
- Of value and interest to the student's personal and professional development.

Planning the dissertation

This entails the following:

- Selecting a topic for investigation.
- Establishing the precise focus of the study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The dissertation plan/ outline or Synopsis

It is recommended that the students should have a synopsis/dissertation plan to guide them right from the outset. Essentially, the synopsis/dissertation plan is an outline of what the student intends to do, chapter wise and therefore should reflect the aims and objectives of the dissertation in detail along with detailed bibliography and critical review of literature.

There are several reasons for having a dissertation plan

- It provides the correct area of focus
- It provides the faculty-guide with an opportunity, at an early stage, to make constructive comments and help guide the direction of the research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up confidence.
- In many ways, the plan encourages the student to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of the dissertation report in order to allow appropriate changes in the scope and even direction of work as it progresses.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Keeping records

This includes the following:

- Making a note of everything read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (Students may consider starting a card index or database from the outset).
- Making an accurate note of all quotations at the time they are read.
- Make clear what is a direct a direct quotation and what is a paraphrase.

Dissertation format

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary.**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to the major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, give a list of all the references used. These should be cross - references with the text. For articles from journals, the following details are required e.g.
  Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.
  For books, the following details are required:
  Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996
- Finally, include appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

Guidelines for the assessment of the dissertation

While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s)
2. If there is more than one objective, do these constitute parts of a whole?
3. Are the objectives and methodology of practical relevance to the business world/economy?
4. Has the student done sufficient background reading and reviewed the available literature critically?
5. Has the student developed an appropriate analytical framework for addressing the problem at hand?
6. Is this based on up-to-date developments in the topic area?
7. Has the student collected information / data suitable to the frameworks?
8. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
9. Has the student succeeded in drawing conclusion form the analysis?
10. Do the conclusions relate well to the objectives of the project?
11. Has the student been regular in his work?
12. Layout of the written report.
13. Confidence and knowledge of the student while answering questions and giving the presentation.

Examination Scheme:

Contents & Layout of the Report	30	
Conceptual Framework	10	
Objectives & Methodology	15

Master of Business Administration (Executive Working Professional)

Programme Mission:

The mission of the MBA programme is to foster an environment of academic excellence in Business Management through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Marketing & Sales, Finance, Banking & Finance, Human Resource Management, International Business, Information Technology, E-Commerce and Hospital & Healthcare, who are socially responsible and globally minded professional to meet the current and emerging needs of business and society.

Programme Description:

The two year full time Masters in Business Administration programme is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to lead, to motivate and to manage diversified workforce, rapid technological change and competitive marketplace while considering the principles of ethical, legal and corporate governance fundamentals.

Programme Outcome (PO):

PO1	Apply the knowledge of marketing, human resource management, finance and other functional areas of management to solve complex management issues in volatile business environment
PO2	Student shall have ability to acquire & evaluate new knowledge through Business Research Methods, have the ability to identify, define, investigate, and solve critical business issues using management principles, analyse data/information and interpret results for reaching optimum solutions.
PO3	Student shall be able to understand global issues from different perspectives, recognize the opportunities to improve the business value chain as an entrepreneur and shall develop and display basic business acumen & business skills and be able to apply different forms of communication in diversified cultural settings.
PO4	Student shall able to critically think to assess societal, health, safety, legal, and cultural issues and apply range of strategies for solving a problem and decision making
PO5	Student shall be able to practice ethical principles and commit to professional ethics and responsibilities and norms of the management practice.
PO6	Student shall develop range of Leadership skills and shall demonstrate excellent interpersonal skills, understanding of group dynamics and effective teamwork, including awareness about personal strengths and limitations.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana

MWP4106	BUSINESS STATISTICS	L	T	P	C
Version	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course not only exposes the students to the theory of probability and sampling distribution but also includes the various types of statistical tools which are to be used in the present rapidly changing business environment. Its main focus is on the application of data analytic tools to enable the students to make correct decision making under the complex and dynamic business scenario. The content of the course will also include the different forecasting techniques with main focus on the quantitative technique that would be immensely beneficial for the students to make the predictions correctly. Numerous empirical examples and real business cases are used to illustrate applications of the material covered

Course Objectives

The aim of this course is to:

1. Develop the understanding of the various statistical models used for decisions making
2. To appreciate the problems of obtaining or gathering the desired information or data.
3. To understand the types of classification of data, representation of data in the form of diagrams, graphs or tables.
4. To appreciate the basics of central value, dispersion, skewness etc and their applications in real business problems.
5. To examine the problems related to theory of probability, various types of probability distribution and particularly Baye's theorem and their application in real-life problems.
6. To describe the process of hypothesis testing for large and small samples and its uses in business problems
7. To equip with the knowledge of correlation, regression and time series; enabling them to make the correct future predictions

Course Outcomes

On completion of this course, the students will be able to:

CO1. Define and apply basic statistical concepts to various field of management

CO2: Apply statistical methods such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data, measures of central tendency, and dispersion for managerial decision making.

CO3. Apply various forecasting techniques.

CO4. Describe different types of probability distributions

CO5. Explain and analyze a given business problem and applying required statistical hypothesis and sampling tool accordingly

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

CO6. Define the decision theories for practical business problems.

Modules	Blooms level*	Number of hours
Module I: Introduction Application of Statistics in Business & Management; Basic Concepts of Statistical Studies: Variable and Classification of Data; Diagrammatic & Graphical Presentation of Data, Measures of Central Tendency, Measures of Dispersion	L1, L2	9
Module II: Forecasting Techniques Simple Correlation & Regression Analysis, Time Series Analysis-Introduction, Variation in Time Series, Trend Analysis, Cyclical Analysis, Seasonal Analysis, Irregular Variation	L1, L2, L3	9
Module III: Probability & Probability Distributions Probability: Basic Terminology in Probability, Types of Probability, Probability rules, Probabilities under condition of Statistical Independence, Probabilities under condition of Statistical dependence, Baye's Theorem Probability Distributions: Binomial Distribution, Poisson Distribution, The Normal Distribution	L2,L3	9
Module IV: Sampling, Estimation and Testing of Hypotheses Sampling & Sampling Distribution: Parameter and Statistic, Point and Interval Estimation, Interval Estimation of three common parameters viz. Mean Standard Deviation and Proportion. Hypothesis Testing for a Single Population: Concept of Hypothesis, Test involving a population mean, Test involving a population proportion, Test involving population Standard Deviation, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples),Tests for two population variances (Dependent Samples), F-test, Non-parametric Tests (Chi – Square Test)	L1, L2	9

*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

MWP4109	INFORMATION TECHNOLOGY FOR MANAGERS	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course the students will learn the concepts of computer evolution, database management systems, networking fundamentals and management information system.The aim of this course is to make the students familiar with the basic concepts of Information Technology that assists managers in executing their tasks with efficiency.

Course Objectives

This course will expose students to

1. Developments in computer technology and understand the advancements in Information Technology.
2. Introduce end-user computing and build skills in using IT and understanding various technologies like internet, telecom, DBMS concepts and information systems.
3. The latest trends in information system development and its relevance in present scenario for modern businesses.

Course Outcomes

On completion of this course, the students will be able to

CO1: State the strategic use of Information Technology in Business and differentiate between functional and cross functional information systems.

CO2: Describe the concepts related to databases and networking.

CO3: Apply the knowledge of Information Technology in managing the broad array of responsibilities in the business organization.

CO4: Analyze how are information systems transforming business and what is their relationship to globalization.

CO5: Review and assess the available tools and technologies pertaining to organization's information system.

MWP4204	Research Methodology & Report Preparation	L	T	P	C
Course Version	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalogue Description:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Objectives :
The objectives of this course are to ensure that students are able to-

1:Understand the basic framework of research process.
2:Comprehend of various research designs and techniques.
3:Identify various sources of information for literature review and data collection.
4:Understand some basic concepts of research and its methodologies.
5: Understand as how to organize and conduct research in a more appropriate manner andwrite a research report, thesis and a research proposal.

Course Outcomes :
On completion of this course, the students will be able to:
CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues
CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making
CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process
CO4: Synthesize and Evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

MWP4205	FUNDAMENTALS OF DATA ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Course Description

The course is designed at par with current industry needs for data analysis. It includes many cutting-edge learning modules which will provide a rich experience and exposure to different modern data analytical tools and techniques to the students.

Course Objectives:

1. To provide detail knowledge of data analytics and data science
2. To provide basic understanding of MS excel as a tool of data analysis
3. To help the students to know about different types of data, sources of data and data generation techniques
4. To provide the basic understanding of salesforce platform

Course Outcomes

On completion of this course, the students will be able to,

CO1: To develop a comprehensive understanding about data analytics and data science. It will help the students to identify the business problems where data analytics can used.
CO2: To develop basic understanding of MS Excel that can further be used to apply basic data analytic tools.
CO3: To develop an integrated knowledge about different types of data, data sources and data generation techniques which will help the students in decision making.
CO4: To develop the knowledge about wave analysis using salesforce platform. It will help the students to create various dashboards to understand the real business situation and suggesting possible solutions.

MWP4231	TERM PAPER	L	T	P	C
Version 1.1	Latest Approved	2	0	0	2
Pre-requisites/Exposure					
Co-requisites					

Course Description

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

Course Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.

2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.

3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)

- Inflation
- Unemployment
- Fiscal Deficit
- Poverty
- Education
- Malnutrition
- Rural Development
- Regional Imbalance
- Globalization
- Foreign Direct Investment
- Current trends in consumer behavior
- Innovative management
- Company rituals and corporate culture

MWP4311	INNOVATION AND ENTREPRENEURSHIP	L	T	P	C
Course Version	Latest Approved	2	1	0	3
Pre-requisites/Exposure	NA				
Co-requisites	NA				

Catalog Description:
The objective of the course is to provide students an understanding of entrepreneurship & the process of creating and grooming a new venture. students will be introduced to the basic terminology, typology of innovations and historical context for better comprehension. Also issues of innovation management will be introduced. Students will become familiar with the impact of innovation on competitiveness as well as individual companies with innovative processes and aspects that affect it, including applicable methods and innovation management techniques.The course also focuses on giving the students the concept of an entrepreneur who is willing to accept all the risks & put forth the effort necessary to create a new venture. The challenge rolls out in a learning environment corresponding to current and future workplace requirements - cross-functional and virtual teams with crowd-sourced work tasks, multicultural work force and extremely demanding organisation, planning and communication skills.

Course Objectives:
The objectives of this course are to ensure that-
1: The student is able to understand the concepts and theories related to entrepreneurship.
2: The student has gained up to date understanding of the field in regard to the process of assessing the commercial potential of new markets.
3: The student has acquired a cutting edge understanding when it comes to identifying opportunities and challenges affiliated with the organization and financing of new initiatives such as new business ventures.
4: The candidate is also aware of challenges affiliated with the rapid growth of new business ventures.

Course Outcomes (CO):
On completion of this course, the students will be able to-
CO1: Apply the various principles of entrepreneurship.
CO2: Apply the theories of viability of businesses, new business proposals, and opportunities within existing businesses;
CO3: Apply the principles of entrepreneurial management and develop strategic plans and prepare a startup business plan emphasizing financing, marketing, and organizing;
CO4: Able to define, identify and evaluate the concept related not only to creating but also to defend an entrepreneurial marketing plan along with developing pro forma financial statements.

MWP4337	PROJECT-I	L	T	P	C
Course Version	Latest Approved	-	-	-	8
Pre-requisites/Exposure	NA				
Co-requisites	NA				

Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the Research Project and the approach to be adopted. The Research Project topic is related to the field of specialization. Deciding this is often the most difficult part of the Research Project process, and requires thorough preparation and background research.

The aim of the Research Project is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

.

Course Objectives

The objective of this course is to

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

Course Outcomes

On completion of Research Project, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

Planning the Research Project	Blooms level*	Number of hours

Manesar Gurgaon-122413

• Selecting a topic for investigation. • Establishing the precise focus of the study by deciding on the aims and objectives of the Research Project, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility. • Drawing up initial Research Project outlines considering the aims and objectives of the Research Project. Workout various stages of Research Project • Devising a timetable to ensure that all stages of Research Project are completed in time. The timetable should include writing of the Research Project and regular meetings with your Research Project guide	L1, L2 ,L3,L4,L5,L6	6hours a Week

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis; L6-Evaluation*

Modes of Evaluation: Viva/ Report Examination

MWP4322	**DATABASE MANAGEMENT SYSTEM FOR BUSINESS**	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course the students will learn about the importance and usage of database management systems in the modern day organizations. The students shall grasp sound knowledge of various types of databases that exist, creation of data warehouse and application areas of data mining. Also, the students will be learning SQL, the language of databases.

Course Objectives

The course aims to make the students:

1. Understand the basic and advanced concepts in databases and database management systems.
2. Grasp the importance of databases in day to day life.
3. Gain a hands-on experience on the SQL-the language of databases.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the basic terminology used in databases.

CO2: Describe the concepts related to databases architecture.

CO3: Apply the knowledge of SQL in creating databases using DBMS software for a business organization.

CO4: Compare and contrast various types of keys used in database creation.

CO5: Review and assess the organization's data and network security aspects.

Modules	**Blooms level***	**Number of hours**
Module I: Introduction to DBMS Definition of DBMS, Concept and Goals of DBMS, Data Independence, DBMS Architecture, Levels, Database Administrator, File System Approach Vs DBMS Approach, Advantages of Using a DBMS, Data Models, Schemas, and Instances, Database Languages, Database Users, Database Abstraction.	L1, L2	4

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Relational Database & ER Model **Relational Database**: Relational System, Codd's Rule, Relational Model, Optimization, Tables and Views, Relational Data Integrity; Primary Key, Candidate Key, Foreign Key and their rules, **ER Model:** Entity Type, Entity Set, Relationship type, Relationship sets, Constraints: Cardinality Ratio and Participation Constraint, Keys, Mapping, Design of ER diagrams.	L2, L3, L4	4
Module III: SQL SQL Language, DDL,DML and DCL commands. Data definition, Data retrieval and update operations on MS ACCESS and SQL Server DBMS.	L2, L3, L4	4
Module IV: Transaction Management and Concurrency Control Transaction management: ACID properties, serializability and concurrency control, Lock based concurrency control (2PL, Deadlocks),Time stamping methods, optimistic methods, database recovery management.	L2, L3, L4	4

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

MWP4323	E-COMMERCE FUNDAMENTALS	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course the students will learn the fundamental concepts of e-commerce which includes various e-commerce business models, electronic data interchange, electronic payment systems and security issues related to computer systems. The aim of this course is to make the students familiar with the basic concepts of Information Technology and E-commerce.

Course Objectives

This course will expose students to:

1. To develop the techno managers with deep understanding of managerial aspects as to use Information Technology effectively and efficiently.
2. To help the students with a view to emulate, entrepreneurial ventures in e-commerce and m-commerce.
3. To prepare the students to cope with the ever changing IT- Industry and to useInformation technology to gain competitive advantage in business.

Course Outcomes

On completion of this course, the students will be able to

CO1: State the strategic use of Information Technology in Business and differentiate between functional and cross functional information systems.

CO2: Describe the concepts related to databases and networking.

CO3: Apply the knowledge of Information Technology in managing the broad array of responsibilities in the business organization.

CO4: Design the e-commerce website for various e-business organization using e-commerce models.

CO5: Review and assess the organization's data and network security aspects.

Module I: Electronic Commerce Systems Meaning, Definition, Concept, Features, Function of E-Commerce, E-Commerce Practices v/s Traditional Practices, Scope and basic models of E-Commerce, Limitations of E-Commerce, Precaution for secure E-Commerce, proxy services.	L1, L2	6
Module II: E-Commerce Business Models & EDI Concept of EDI, Difference between paper based Business and EDI Based business, Advantages of EDI, Application areas for EDI, Action plan for Implementing EDI, Factors influencing the choice of EDI.Various business models in Ecommerce likeB2C, B2B, C2C.	L1, L2	6
Module III: E-Payment Systems and Security Management Transactions through Internet, Requirements of E-Payment system, Post paid payment system- Credit card solutions, Cyber cash Internet Cheques, Instant Paid payment system- Debit card, Direct Debit, Prepaid payment system- Electronic cash, Digicash, Netcash, Cybercash, Smart Cards. The Information Security, System Vulnerability and Abuse, Security Threats (Malicious Software, Hacking etc.) and counter measure. Definition of Cyber Crime and Types.Antivirus, Firewalls, Anti-Spyware, Security Audit, Discussion on Overview of IT-ACT 2000.	L1, L2	6
Module IV: E-Marketing and E-Finance Traditional Marketing V/S E-Marketing, impact of Ecommerce on markets, marketing issue in E-Marketing, promoting your E-Business, Direct marketing, one to one marketing Areas of E-Financing, E-Banking, traditional v/s E-Banking, operations in E-Banking; E-Trading- Stock marketing, trading v/s E-Trading, importance of E-Trading, advantages of E-trading, operational aspects of E-Trading.

MWP4326	**PROGRAMMING FOR ANALYTICS USING R**	L	T	P	C
Version 1.1	Date of Approval: Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers the specialization on R (powerful language used widely for data analysis and statistical computing). This course facilitates a good understanding on the process of data manipulation and visualization. The course provides ample working examples on statistical data analysis using R.

Course Objectives

The objective of this course is to:

1. Provide learning on how to program in R, how to use R for effective data analysis, how to install and configure software necessary for a statistical programming environment.
2. Provide applications on statistical computing which includes programming in R, reading data into R, accessing R packages, writing R functions, debugging, profiling R code, and organizing and commenting R code.
3. Facilitate hands on experience to various real world business problems using R.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Analyze different datasets using R

CO2: Explore real time data at various levels using appropriate visualizations

CO3: Apply critical programming language concepts such as data types, iteration, control structures, functions, and boolean operators by writing R programs and through examples

Modules	**Blooms level***	**Number of hours**
MODULE 1: Introducing to R , R Data Structures , Help functions in R , Vectors , Scalars , Declarations , recycling , Common Vector operations , Using all and any, Vectorized operations , NA and NULL values , Filtering , Vectorized if-then else , Vector Equality , Vector Element names.	L1, L2,L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Matrices, Arrays And Lists: Creating matrices , Matrix operations , Applying Functions to Matrix Rows and Columns , Adding and deleting rows and columns , Vector/Matrix Distinction , Avoiding Dimension Reduction , Higher Dimensional arrays , lists , Creating lists , General list operations , Accessing list components and values , applying functions to lists , recursive lists.	L1, L2,L3	9
MODULE 3: Data Frames: Creating Data Frames , Matrix-like operations in frames , Merging Data Frames , Applying functions to Data frames , Factors and Tables , factors and levels , Common functions used with factors , Working with tables - Other factors and table related functions - Control statements , Arithmetic and Boolean operators and values , Default values for arguments - Returning Boolean values , functions are objects , Writing Upstairs - Recursion , Math and Simulations in R.	L1, L2,L3	9
MODULE 4: Input/ Output , accessing keyboard and monitor , reading and writing files , accessing the internet , String Manipulation , Graphics , Creating Graphs , Customizing Graphs , Saving graphs to files , Creating three-dimensional plots Interfacing R with Python , Basic Statistics , Regression Basic Idea, Linear Model , Generalized Linear models , Non-linear models , Time Series and Auto-correlation.	L1, L2,L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

MWP 4327	**PROGRAMMING FOR ANALYTICS USING PYTHON**	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is designed in such a way that leads the students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of the fundamental programming concepts including data structures, networked application program interfaces, and databases, using the Python programming language.
2. Provide applications on statistical, machine learning, information visualization, text analysis, and social network analysis techniques through popular python toolkits to gain insights into data analysis process.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create applications for data retrieval and processing

CO2: Conduct an inferential statistical analysis of various business problems

CO3: Explain fundamental Python functionality and features used for data science

CO4: Apply techniques such as lambdas and manipulate csv files

Modules	**Blooms level***	**Number of hours**
MODULE 1: Installing Python; basic syntax, interactive shell, editing, saving, and running a script, Concept of data types; variables, assignments; immutable variables; numerical types; arithmetic operators and expressions; comments in the program; understanding error messages Conditions, boolean logic, logical operators; ranges; Control statements: if-else, loops (for, while); short-circuit (lazy) evaluation.	L1, L2,L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Strings and text files; manipulating files and directories, os and sys modules; text files: reading/writing text and numbers from/to a file; creating and reading a formatted file (csv or tab-separated).String manipulations: subscript operator, indexing, slicing a string; strings and number system: converting strings to numbers and vice versa. Binary, octal, hexadecimal numbers.	L1, L2,L3	9
MODULE 3: Lists, tuples, and dictionaries; basic list operators, replacing, inserting, removing an element; searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values; traversing dictionaries. Design with functions: arguments and return values; formal vs actual arguments, named arguments, Recursive functions.	L1, L2,L3	9
MODULE 4: Simple Graphics and Image Processing: digital images, image file formats, image processing Simple image manipulations with 'image' module (convert to bw, greyscale, blur, etc).Classes and OOP: classes, objects, attributes and methods; defining classes; design with classes, data modeling; persistent storage of objects OOP, continued: inheritance, polymorphism, abstract classes; exception handling, try block.Graphical user interfaces; event-driven programming paradigm; tkinter module, creating simple GUI; buttons, labels, entry fields, dialogs; widget attributes - sizes, fonts, colors layouts, nested frames.	L1, L2,L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation*

MWP4328	**VISUAL ANALYTICS- TABLEAU /POWER BI**	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/ Exposure					
Co-requisites					

Catalog Description

This course familiarizes the students on data visualization tools. This course is designed to provide a fundamental and strategic understanding on the concepts of Business Intelligence using Tableau.

Course Objectives

The objective of this course is to:

1. Equip students with the concepts of BIs and its types and how to connect to and import data, author reports using Power BI Desktop, and publish those reports to the Power BI service
2. Emphasize on how to create dashboards and share with business users—on the web and on mobile devices

Course Outcomes

On completion of this course, the students will be able to:

CO1: Connect, import, shape, and transform data for business intelligence (BI)
CO2: Visualize data, author reports, and schedule automated refresh of your reports
CO3: Create and share dashboards based on reports in Power BI desktop and Excel
CO4: Use natural language queries and create real-time dashboards

Modules	Blooms level*	Number of hours
MODULE 1: **Tableau:** Data visualization and its significance, Connecting Tableau to a Data File - CSV File, Navigating Tableau, creating calculated fields, adding colors, adding labels and formatting, exporting worksheet. **Power BI**: What is Power BI? Installing Power BI Desktop & Project Setup, Connecting Power BI Desktop to Source Files, Working in the Query Editor, Understanding the Data Model & Creating Visuals.	L1, L2,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: **Tableau:** working with data extracts, working with time series data, understanding aggregation, granularity and level of detail, creating an area chart and learning about highlighting, adding a filter and quick filter. **Power BI:** Understanding the Power BI Desktop Workflow, Exploring the Interface of the Data Model, Understanding the Query Editor Interface, Keeping & Removing Rows, Working with Filters, Removing Empty Rows, Working with Columns, Replacing Values, Formatting Data & Handling Formatting Errors.	L1, L2,L3	8
MODULE 3: **Tableau:** Relationships v/s joins, Joining data, blending data, data joining v/s data blending, dual axis chart. **Power BI:** Pivoting & Unpivoting Data, Splitting Columns, Creating Groups & Cleaning Up Project, The Star Schema, Query Duplicates vs References, Creating the DIM-Region Table & Removing Duplicates, Merging Queries, Understanding "Extract", Working with Conditional Columns, Understanding Basic Mathematical Operations, Performance Optimization	L1, L2,L3,L4	10
MODULE 4: **Tableau:** Creating a map, scatter plot, working with hierarchies, applying filters to multiple worksheets, create interactive dashboard, storytelling. **Power BI:** Understanding Relationships, Cross Filter Direction & Many-to-Many, Understanding the DAX Basics, Applying the DAX Basics, Creating Visuals in the Report View	L1, L2,L3,L4,L5	10

*Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis;L6-Evaluation

MWP4411	ENVIRONMENTAL GOVERNANCE AND SUSTAINABILITY	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Environmental problems and global environmental change are multifaceted, trans-boundary, multi-level and multi-sector issues, that need to be dealt with at all administrative levels and with an integrated approach across policy areas. By applying theories of governance, we will discuss what this may imply in practice for the policy-making and implementation of environmental politics at different levels. The course introduces key theoretical concepts useful for the understanding of environmental change as a policy problem. This course explores the crucial link between governance and sustainable development. Sustainable development has emerged as the global norm and dominant approach to reconcile the goals of economic development, environmental quality and social equity. Governance can be understood as the rules, mechanisms, processes and institutions through which important decisions are made and implemented. The course discusses the contested nature of both these concepts, and investigates how both are combined in local, national, regional and international policy-making about environment and development challenges such as poverty, global inequalities, loss of biodiversity, deterioration of global eco-systems, and the threat of climate change to human societies.

Course Objectives

The objectives of this course are to:

1. Provide the students exposure to environmental governance practices.
2. Enhance student's knowledge towards concepts of sustainable development and global institutional arrangements for the governance of different dimensions of environment
3. Familiarize students with contemporary environmental issues, including alternative sources of energy and climate change, as well as with the most important global and regional institutions that create the global environmental governance architecture.
4. Comprehend and critically discuss the contemporary sustainable development agenda.

Course Outcomes

On completion of this course, the students will be able to:

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

CO1: Classify and compare different Environmental Governance practices employed by multiple factors across different levels.
CO2: Describe the rationale behind regulatory, community-based, and market/incentive-based approaches to environmental governance, as well as newer approaches in integrated governance.
CO3: Describe different initiatives and strategy for sustainable development and also able to analyze the implementation of the Sustainable Development Goals.
CO4: Describe and understand the complexity of environmental problems, and drivers of and societal solutions to global environmental change.
CO5: Conduct analyses of Environmental Governance practices.

Modules	Blooms Level*	Number of hours
Module 1: **Introduction to the challenges and players in environmental governance:** Overview of environmental governance, Contemporary Discourses on Governance in India, problem and prospects of environmental governance in India, Democracy, Development and Governance. **Environmental Governance**: Human–Environment Interaction, Green Governance: Sustainable Human Development. Global environmental change. Governance of ecological conflicts and disasters, global ecological governance in particular in regard to climate change.	L1, L2	10
Module 2: Good Governance Initiatives in India: Government, Governance and Public Service Delivery in India, E-Governance in India. Democratic Decentralization and Local Governance in India. People's Participation in Governance, Citizen's Charter and Right to Information in India Corporate Social Responsibility: the Indian Experience.	L1, L2, L3	8
Module-3: Sustainable Development: Issues and Challenges-I **Introduction to Sustainable Development:** Parameters of sustainable development, Approaches to the study of SD, Issues and challenges. **Developmental issues**: Natural resource exploitation, Patterns of Industrialization, Inequitable Growth, Global and Regional dimensions	L1, L2, L3	9
Module-4: Sustainable Development: Issues and Challenges-II **Initiatives towards sustainable development:** State Initiatives global initiatives, Civil Societies and Community Initiatives, **Strategy for sustainable development:** Community Knowledge, Harness Technology, Innovative Practices, Cooperation and Partnership. SDGs.	L1, L2, L3	9

MWP4412	E-BUSINESS ESSENTIALS	L	T	P	C
Version 1.1	Latest Approved	2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course aims to make the students understand the nuts and bolts of forming an e-business and prepares students to evaluate the requirements of an e-business and develop e –business plans. As business environment is witnessing so many changes every day, it gets vital for business organizations to recognize and learn to create their presence in cyber space.

Course Objectives

The objective of this course is to:

1. Introduce the students to the world of e-business, the openings and the risks and makes them learn the strategies of making businesses successful worldwide.
2. Make the students understand the nuts and bolts of forming an e-business and prepares students to evaluate the requirements of an e-business and develop e –business plans

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the digital technologies necessary for e-business.

CO2: Identify and use the database to improve business performance and decision making.

CO3: Create a web design for an e-business web portal.

CO4: Analyze the processes associated with e-payment systems, e-marketing, e-procurement and e-distribution.

Modules	Blooms level*	Number of hours
Module 1: Introduction to E-Business The impact of the electronic communications on traditional businesses, difference between e-commerce and e-business, E-business opportunities, Business adoption of digital technologies for e-commerce and e-business, E-business risks and barriers to business adoption, Management responses to e-commerce and e-business, Business models for e-commerce.	L2 ,L4	4

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 2: E-Business Web Design Elements of site design, site navigation, site structure, page and content design, web accessibility. Components of a business model, classification of business webs, comparison and valuation of networks, price formation process. Internet, intranet and extranet, choosing an ISP and Internet terminology Acquiring e-business systems, development of web based content and services, Software and services for web-site development and testing , testing process, environment, database creation and data migration, content management and maintenance	L2, L4	4
Module 3: E-Marketing & E-Procurement E-Marketing: comparison of communication media, development model for online customers, online promotion strategies. E-procurement: strategic and operational procurement, information support for e-procurement, types, catalog management.	L2,L4,L5	4
Module 4: E-Payment Systems and E-Distribution E-payments: credit card based procedures, SSL, SET, paypal and very-sign, Secure e-commerce transactions, principles, approaches to develop secure systems, digital certificates, symmetric and asymmetric encryption, digital signatures, PKI's and CA's. E-Distribution: components and types, online, offline and hybrid types, SCM and ESD: architecture, functions and services, digital watermarks.	L2,L4	4

MWP4437	PROJECT-II	L	T	P	C
Version 1.1	Latest Approved	2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the dissertation and the approach to be adopted. The dissertation topic is related to the field of specialization. Deciding this is often the most difficult part of the dissertation process, and requires thorough preparation and background research.

The aim of the dissertation is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

Course Objectives

The objective of this course is to

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently**.**

Course Outcomes

On completion of Dissertation, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

Planning the dissertation	**Blooms level***	**Number of hours**

• Selecting a topic for investigation. • Establishing the precise focus of the study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility. • Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation • Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.	L1, L2 ,L3,L4,L5,L6	6hours a Week

MWP4426	**DIGITAL MARKETING**	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course examines digital marketing strategy, implementation and executional considerations for B-to-B and B-to-C brands and provides a detailed understanding of all digital marketing concepts. Students will learn the course with a comprehensive knowledge of and experience with how to develop an integrated digital marketing strategy, from formulation to implementation. Strong focus will be on developing student's business skills and growing real-world experience of the digital media sector to enhance their knowledge to cope with employability demand. The course is an initiative designed to educate students and practitioners in the area of Digital Marketing analytics and make them ready for jobs or prepare them to launch campaign for their own organisations.

Course Objectives

The objectives of this course are to:

1. To understand how and why to use digital marketing for multiple goals within a larger marketing and/or media strategy.
2. Understand the major digital marketing channels - online advertising: Digital display, video, mobile, search engine, and social media.
3. Learn to develop, evaluate, and execute a comprehensive digital marketing strategy and plan.
4. Learn how to measure digital marketing efforts and calculate ROI.
5. Explore the latest digital ad technologies.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Gain knowledge about digital marketing strategy and planning.

CO2: Create and/or improve a strategy for measuring and improving digital media effectiveness

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

CO3: Examine online advertising including ad networks and behavioral targeting.
CO4: Devise Emerging trends in digital marketing.
CO5: Analyze how to create search engine optimization strategy for own business.

Modules	Blooms Level*	Number of hours
Module 1: Introduction to Digital Marketing: Understanding Digital Marketing, Importance of Digital Marketing. Difference between traditional and digital marketing. Understanding Digital Marketing Process; Digital Marketing Planning and Strategy. **Website Planning and Creation:** Understanding websites; Understanding domain names & domain extensions; Web server & web hosting, Different types of web servers; Different types of websites; Planning & Conceptualizing a Website; Building website using CMS in Class.	L1, L2, L3	10
Module 2: Digital Advertising (PPC, Digital Display and YouTube): Creating Display Campaign; Types of display campaigns- All features, Mobile app, Remarketing, Engagement. Optimizing Display Campaign and Re-marketing. Concept of Online Advertising. Types of Online Advertising, Display Advertising, Contextual advertising, Payment models and bidding strategies for online advertising, Different Online advertising platforms. Pay per click advertising.	L1, L2, L3	9
Module 3: Search Engine Optimization (SEO): Introduction to Search Engine Optimization, History and Growth of SEO, Functions of search engines. Concept of search engine result page. Understanding keywords; On page optimization; Off Page optimization; Creating SEO Strategy for your business. Keywords, Google Adwords.	L1, L2, L3, L6	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram

MWP4425	ERP FOR BUSINESSES	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In the face of intense competition and other business pressures on organizations, quality initiatives and continuous, incremental process improvement, though still essential, will no longer be sufficient. Such radical levels of change require powerful information technology tools such as ERP to facilitate the fundamental redesign of work. Students learn about the state-of-the-art techniques used in support of business process redesign.

Course Objectives

The students will be able to:

1. Grasp the concepts of enterprise resource planning
2. Have a contemporary and forward-looking on the theory and practice of Enterprise Resource Planning Technology
3. Integrate the ERP concepts with the organization's IT system.
4. Understand the concepts of business process reengineering.
   Develop the basic understanding of how ERP enriches the business organizations in achieving a multidimensional growth.

Course Outcomes

On completion of this course, the students will be able to:

CO1: List and define the concepts, vies and latest methodologies of business process design.

CO2: Explain key concepts in the design and utilization of best business practices embedded in an Enterprise Resource Planning System.

CO3: Analyze the strategic options for ERP identification and adoption

CO4: Summarize the activities carried out under Business Process Reengineering.

Modules	Blooms level*	Number of hours

MWP4428	**PREDICTIVE ANALYTICS-I MACHINE LEARNING USING R**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers fundamental and applied evidence based knowledge to improve professional practice of students. It provides a detailed understanding of both supervised and unsupervised learning as it is vital for a data scientist. This course offer insight on text mining using "tidytext."

Course Objectives

The objective of this course is to:

1. Facilitate an introduction to machine learning techniques using several popular algorithms.
2. Internalize a core set of practical and effective machine learning methods and concepts, and apply them to solve some real world problems.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain and apply a set of unsupervised learning concepts and methods, classification methods of increasing complexity (rules, trees, random forests), and associated optimization methods (gradient descent and variants)

CO2: Explain the common idioms of large-scale graph analytics, including structural query, traversals and recursive queries, PageRank, and community detection

CO3: Apply the popular algorithms of machine learning using R

CO4: Analyze and interpret the results using specific statistical tools and techniques in R.

Modules	Blooms level*	Number of hours
MODULE 1: Linear Methods for Regression and Classification: Overview of supervised learning, Linear regression models and least squares, Multiple regression, Multiple outputs, Subset selection, Ridge regression, Lasso regression , Linear Discriminant Analysis , Logistic regression, Perception learning algorithm.	L1, L2,L3,L4	9
MODULE 2: Model Assessment and Selection: Bias, Variance, and model complexity, Bias-variance trade off, Optimism of the training error rate, Estimate of In-sample prediction error, Effective number of parameters, Bayesian approach and BIC, Cross- validation, Boot strap methods, conditional or expected test error.	L1, L2,L3,L4	9

MWP4429	**PREDICTIVE ANALYTICS-II MACHINE LEARNING USING PYTHON**	L	T	P	C
Version 1.1	Latest Approved	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course offers the specialization of Python staring with data strategy. This course covers the two core paradigms that account for most business applications of predictive modeling: classification and prediction. It also covers the use of partitioning to divide the data into training data (data used to build a model), validation data (data used to assess the performance of different models, or, in some cases, to fine tune the model) and test data (data used to predict the performance of the final model).

Course Objectives

The objective of this course is to:

1. Facilitates a good learning to students on how to make meaningful predictions for a wide range of business purposes.
2. Provide provides a sufficient understanding on development of statistical models and how to devise data-driven workflows.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Apply data science techniques to extract insights from a wide range of data sources and to provide an assessment basis for predictive models. Also, students shall be able to explain how ensemble models improve predictions

CO2: Visualize and explore data to better understand relationships among variables

CO3: Identify and implement appropriate performance measures for predictive models with popular algorithms

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to machine learning, ML python essentials: numpy, pandas, matplotlib. Data Cleaning: Reading the data – variations and examples, Data frames, Delimiters, Various methods of importing data in Python: csv method, open method in Pyton, reading data form a URL, reading .xlsor .xlsx files, Reading from an .xls or .xlsx file, Writing to a CSV or Excel file. Handling missing values, Creating dummy variables, Visualizing a dataset by basic plotting, Scatter plots, Histograms, Boxplots.	L1, L2,L3,L4	9
MODULE 2: Data Wrangling: Subsetting a dataset, Selecting columns, Selecting rows, Selecting a combination of rows and columns, Creating new columns, Generating random numbers and their usage, Seeding a random number, Generating random numbers following probability distributions, Probability density function, Cumulative density function, Uniform distribution, Normal distribution, Generating a dummy data frame, Grouping the data: aggregation, filtering, and transformation.	L1, L2,L3	9
MODULE 3: Statistical Concepts for Predictive Modelling, Random sampling and the central limit theorem Hypothesis testing, Null versus alternate hypothesis, Linear Regression with Python: Understanding the math behind linear regression, Linear regression using simulated data, Fitting a linear regression model and checking its efficacy, Finding the optimum value of variable coefficients ,Making sense of result parameters, p-values, Residual Standard Error, Implementing linear regression with Python, Linear regression using the stats model library, Multiple linear regression, Model validation, Training and testing data split , Handling categorical variables.	L1, L2,L3,L4	9
MODULE 4: Logistic Regression with Python, Linear regression versus logistic regression, Understanding the math behind logistic regression, Contingency tables, Conditional probability, Odds ratio, Estimation using the Maximum Likelihood Method, Likelihood function: Log likelihood function, Processing the data, Data exploration, Data visualization, Creating dummy variables for categorical variables, Feature selection, Implementing the model, Model validation and evaluation, Cross validation, Model validation, The ROC curve, Confusion matrix.Decision Tree and Ensemble Techniques: RandomForest, Bagging and Boosting, Adaboost in python. ML based Web app development.	L1, L2, L3,L4	9

Master of Business Administration-Executive (Sustainability Management)

Programme Mission:

The mission of the MBA programme is to foster an environment of academic excellence in Business Management through research and innovation, industry integration, internationalization and extension activities and develop highly trained and employable professionals with specialization in the area of Marketing & Sales, Finance, Banking & Finance, Human Resource Management, International Business, Information Technology, E-Commerce and Hospital & Healthcare, who are socially responsible and globally minded professional to meet the current and emerging needs of business and society.

Programme Description:

The two year full time Masters in Business Administration programme is to educate and prepare students with the knowledge, analytical ability, and management perspectives and skills needed to lead, to motivate and to manage diversified workforce, rapid technological change and competitive marketplace while considering the principles of ethical, legal and corporate governance fundamentals.

PO1	Apply the expertise in marketing, human resource management, finance and other functional areas of management to solve sustainability issues in volatile business environment.
PO2	Evaluate business issues within the context of ethics and social sustainability through business research methods and inculcate among students the awareness of the mandatory compliances that are pertinent to their respective organizations.
PO3	Student shall be able to understand global issues from sustainability perspectives, like climate change, come up with sustainable solutions as a social entrepreneur to contribute to the greater good of the society.
PO4	Student shall able to critically think to assess societal, safety, environmental, and human issues and apply a range of strategies for solving a problem and decision making
PO5	Student shall develop range of Leadership skills and understanding of group dynamics and effective teamwork, to be able develop sustainable enterprise.
PO6	Enable students to formulate, evaluate and implement crucial business strategies considering the 3 Ps of People, Profit and Planet to make a sustainable business organization.

Semester - I

MSP4101	SUSTAINABLE MARKETING CONCEPTS	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:

Course Objectives: The purpose of the course is to educate the students about various aspects of marketing at Social Organization, working towards public good. Course will also provide knowledge of marketing tools to promote social change and to achieve social goals. It will focus on the roles of different stakeholders such as Government, Corporate Social Responsibility Entities as well as Non-profit Organizations.

Pre-requisites: Student should have completed the basic course of Marketing Management

Course Outcomes: After Completion of Course Students will be able to:

Module I: Introduction to Sustainable marketing	**15% weightage**
Developments and Challenges, Alternative Concepts: No- Profit Marketing, Sustainable marketing Role of Stakeholders such as Government, Corporate Social Responsibility Entities as well as Non-profit Organizations	
Module II: Social Messaging and Communication	**15% weightage**
Identifying consumers and beneficiaries, Achieving Social Goals through Marketing, Decision processes-Implications for the promotion of pro-social behavior, Social Messaging, Learning & behavior modification, Fare Trade Principles	
Module III: Marketing Mix	**20% weightage**
Marketing Orientation towards Non-profit / social change promotion, 4Ps of Social Marketing, Strategic Marketing Planning: Value Proposition, Branding, Segmentation, Targeting, Positioning, Competitive Advantage, Community based Social marketing	
Module IV: Understanding Campaigns	**20% weightage**
Ongoing Marketing Campaigns in non-profits: e.g. arts, education, health, rural development, charities Developing an effective marketing Campaign: Objective formulation, Identifying Audience, reducing barriers, communicatingeffectively; Evaluation, Monitoring and Control for Marketing Initiatives, Prominent Cases	
Module V: Corporate Social Responsibility	**15% weightage**
Cause Marketing: Introduction, Need and Relevance, Corporate Social Responsibility: Introduction, Regulations and Linkages with Non-Profits, CSR utility towards Brand & Image Building and Recruitment	
Module VI: Latest Trends	**15% weightage**
Latest trends in Social Marketing, Employee volunteering, Multi stakeholder Initiatives, Campaign Financing & Regulations, Useof Information Technology.

MSP4102	**ACCOUNTING FOR MANAGERS**	L	T	P	C
Version 1.1	Latest Approved	2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The intent of this course is to acquaint the students with fundamental concepts and processes of accounting so that they are able to appreciate the nature of item presented in the annual accounts of an organization. The student will be able to familiarize with the significant tools and techniques of financial analysis further useful in the interpretation of the financial statements. The aim of this course does not focus on to make the student's expert accountant but to have a good comprehension on the management planning and control systems. However the principal focus will be related to the interpretation and use of the financial data by non-accounting students to gain the ability of using accounting information as a tool in applying solutions for managerial problems, evaluating the financial performance, and interpreting the financial structure.

Course Objectives

The objective of this course is to:

1. Equip the students to develop the essential ability of all managers, to use complex accounting information as a platform for decision-making. As the course unfolds, students will build an increasingly sophisticated level of understanding of the language of accounting and its key concepts.
2. Develop skills in interpreting earnings statements, balance sheets, and cash flow reports. This ability to analyze financial statements will enable participants to deal more effectively with strategic options for their businesses or business units.
3. To make the students to understand the corporate financial resources

Course Outcome

On completion of this course, the students will be able to:

CO1: Explain the theoretical and practical aspects of financial accounting.
CO2: Prepare financial statements as per the Accounting principles and standards.
CO3:Evaluate Depreciation and Inventory valuation of the given organization
CO4: Demonstrate the decision-making skills in financial analysis context.
CO5: Having an ability to use techniques, skills and modern managerial tools & techniques necessary for business practice
CO6: Comprehend the role of financial manager, objectives of financial management and sources of finance.
CO7: Apply the recent trends of accounting in business decision-making.

MSP4103	BUSINESS STATISTICS	L	T	P	C
Version	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course not only exposes the students to the theory of probability and sampling distribution but also includes the various types of statistical tools which are to be used in the present rapidly changing business environment. Its main focus is on the application of data analytic tools to enable the students to make correct decision making under the complex and dynamic business scenario. The content of the course will also include the different forecasting techniques with main focus on the quantitative technique that would be immensely beneficial for the students to make the predictions correctly. Numerous empirical examples and real business cases are used to illustrate applications of the material covered

Course Objectives

The aim of this course is to:

1. Develop the understanding of the various statistical models used for decisions making
2. To appreciate the problems of obtaining or gathering the desired information or data.
3. To understand the types of classification of data, representation of data in the form of diagrams, graphs or tables.
4. To appreciate the basics of central value, dispersion, skewness etc and their applications in real business problems.
5. To examine the problems related to theory of probability, various types of probability distribution and particularly Baye's theorem and their application in real-life problems.
6. To describe the process of hypothesis testing for large and small samples and its uses in business problems
7. To equip with the knowledge of correlation, regression and time series; enabling them to make the correct future predictions

Course Outcomes

On completion of this course, the students will be able to:

CO1. Define and apply basic statistical concepts to various field of management

CO2: Apply statistical methods such as statistical collection, species characteristics, statistical series, tabular and graphical representation of data, measures of central tendency, and dispersion for managerial decision making.

CO3. Apply various forecasting techniques.

CO4. Describe different types of probability distributions

CO5. Explain and analyze a given business problem and applying required statistical hypothesis and sampling tool accordingly

CO6. Define the decision theories for practical business problems.

Modules	Blooms level*	Number of hours
Module I: Introduction Application of Statistics in Business & Management; Basic Concepts of Statistical Studies: Variable and Classification of Data; Diagrammatic & Graphical Presentation of Data, Measures of Central Tendency, Measures of Dispersion		
Module II: Forecasting Techniques Simple Correlation & Regression Analysis, Time Series Analysis- Introduction, Variation in Time Series, Trend Analysis, Cyclical Analysis, Seasonal Analysis, Irregular Variation		
Module III: Probability & Probability Distributions Probability: Basic Terminology in Probability, Types of Probability, Probability rules, Probabilities under condition of Statistical Independence, Probabilities under condition of Statistical dependence, Baye's Theorem Probability Distributions: Binomial Distribution, Poisson Distribution, The Normal Distribution		
Module IV: Sampling, Estimation and Testing of Hypotheses Sampling & Sampling Distribution: Parameter and Statistic, Point and Interval Estimation, Interval Estimation of three common parameters viz. Mean Standard Deviation and Proportion. Hypothesis Testing for a Single Population: Concept of Hypothesis, Test involving a population mean, Test involving a population proportion, Test involving population Standard Deviation, Test for two population means (Independent Samples), Tests for two population means (Dependent Samples), Tests for two population proportions (Independent Samples),Tests for two population variances (Dependent Samples), F-test, Non-parametric Tests (Chi – Square Test)

MSP4104	**ECONOMICS FOR MANAGERS**	L	T	P	C
Version 1.1	Latest Approved	2	1	0	3
Pre-requisites/Exposure	Basic knowledge of managerial economic science preferred but not compulsory				
Co-requisites					

Catalog Description

In this course the students are introduced with various concepts of economic science that relates to decision making process based on rational choice approach. To begin with, introductory concepts of economic theory and their implications on managerial decision process are analyzed. Thereafter concepts related to demand analysis, demand forecasting supply analysis, and equilibrium market conditions are discussed in detail. The next phase deals extensively concepts related to production theory, cost theory and revenue aspects. Third, various concepts related to market structure are discussed in detail. Finally, various macroeconomic concepts, policy perspectives of government and other institutions are explored in detail. The overall aim of this course is to make the students familiar with working knowledge of the fundamentals of economic theory relevant to business and industry.

Course Objectives:

The objective of this course is to:

1. Make the students aware of the theoretical concepts of managerial economic science so that they can analyze situations and improve upon their managerial decision process in workplace.
2. Provide students with extensive exposure about the micro and macro level variables that influence business operations and strategies of the firm and business environment and regulatory framework under which they operate.
3. Enhance students' understanding of application of various theoretical perspectives of managerial economics into practical working environment in order deal with industry complexities in an efficient manner.
4. Explain the various macroeconomic policy initiatives in terms of their implications in management and business decision process thereby facilitating optimization of resources.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Explain basic concepts of managerial economics, demand and supply dynamics, demand forecasting techniques and their application, and analyze the working of free market mechanism and appreciate how forces of demand and supply reinforce each other for attaining market equilibrium.

CO2: Analyze rationally the dynamics of production and cost aspects in order to make a holistic assessment of the complexities inherent in production system.

CO3: Describe the various forms of market structure and their implications in managerial decision process.

CO4: Discuss holistically the various macroeconomic aspects of business and implications of government policies in shaping the dynamics of business and industry.

Modules	Blooms level*	Number of hours
MODULE 1: Theory of demand and supply Nature and scope of economic analysis: its relevance for managerial decision making, Demand analysis: nature of demand for a product- individual demand and market demand, demand by market segmentation. Demand function and determinants of demand. Supply function: determinants of supply of a product, law of supply. Elasticity of supply. Concept of elasticity of demand- income, cross, price and advertizing elasticity. Theorems on the price elasticity of demand. Applications of the concept of price elasticity of demand in business decisions. Demand forecasting need for forecasting and techniques of forecasting. Free Market Mechanism. Cost concepts: costs relevant for management decision making. Economies of scale: internal and external. Cost function: cost and output relationship. Short run and long run.		
MODULE 2: Theory of production and cost Production analysis: Production function-neo-classical, Least cost combination of inputs for a firm. Concept of an isoquant-smooth curvature and right angle. Returns to scale and returns to a factor. Expansion path of a firm. Cost Analysis: Cost relevant for management decision making. Economies of scale: Internal and External, Cost Function: Cost and output relationship. Short Run and Long run. An Analysis of the Objectives of a Business Firm: Profit Maximization Model.		
MODULE 3: Market Structure: Price and Output decisions Pricing and Output decisions – Perfectly Competitive and Monopoly Market Pricing and Output Decisions-Under Monopolistically Competitive Market-Product Differentiation; Price Discriminating Monopolist; Models of Oligopolistic Market: Collusive and Non-Collusive Oligopoly structure. Price Rigidity – The Kink Demand Curve Model and Price War. Price Leadership Models, Cartels and Collusion.		
MODULE 4: Macroeconomics Analysis Economic Policy and Analysis: Macro Economic Variables and Functional Relationships. Business Environment: Exogenous Variables. Factors Influencing the Business Environment. National Income Analysis: National Income Aggregates. Circular Flow of income, Money-Incorporating Savings Investment, Foreign Trade and Government Sector. Government Macroeconomic Policy Measures – GST, Demonetization – and their impact on Business; Consumption Function, Saving Function and investment Function. Concepts of Investment Multiplier. Factors Influencing Consumption Function- Objective, Subjective and Structural. Demand and Supply of Money: Transaction, Precautionary and Speculative Demand for Money; Liquidity preference function; Components of Money Supply. Business Cycles: An Analysis of Fluctuation in the level of Economic Activity. Phases of Business Cycles. Inflation and Deflation: Demand – Pull and Cost – Push Inflation. Impact of Inflation on Employment, Price Level and other Macro Economic Variables and Analysis of Policies to control inflation. Deflation. Monetary Policy: Objectives of Monetary Policy. Function of Central Bank. Credit Policy and its implications on the Corporate Sector. Fiscal Policy: meaning, objectives and impact on economy. Money Market, Capital Market and Foreign Exchange Market.

MSP4105	Organizational Behaviour and Human Resource Management	L	T	P	C
Version 1.1	Latest approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:

The general purpose of this course is to familiarize students with the basic principles and techniques of human resource management. This course takes a practical approach that integrates contributions of behavioural sciences with the technical aspects of implementing the HR function in the real world.

Course Objectives:

The objective of this course is to:

1. Appreciate the importance of human resource management as a field of study and as a central management function;
2. Understand the implications for human resource management of the behavioral sciences, government regulations.
3. Know the elements of the HR function (e.g. – recruitment, selection, training and development, etc.) and be familiar with each element's key concepts & terminology; and
4. Apply the principles and techniques of human resource management gained through this course to the discussion of major personnel issues and the solution of typical case problems.

Course Outcomes:

On completion of the course the students will be able to:

CO1: Explain and apply the concepts of human resources management.

CO2: Demonstrate a basic understanding of different tools and techniques used in forecasting and planning human resource requirements.

CO3: Interpret the industry regulations that will effect employees and employers and apply them effectively.

CO4: Analyze and solve key issues related to the human elements, both nationally and internationally such as employee acquisition, retention compensation, appraisal, training, career planning and diversity.

MSP4106	APPLICATION OF DISRUPTIVE TECHNOLOGIES IN BUSINESS	L	T	P	SW/FW	C
Version 1.1	Latest Approved	2	0	1		3
Pre-requisites/Exposure						
Co-requisites						

Course Description:

Disruptive technology significantly alters the way businesses or entire industries operate. It often forces companies to change the way they approach their business for fear of losing market share or becoming irrelevant. Disruptive Technologies are the ultimate challenge in current business environment. This course will review in detail the basis of Disruptive Technologies ie. Disruptive Innovation and how these technologies are impacting the Business.

Course Objectives: The aim of this course is to

1. To understand how Organizations need to evolve to address the changing business landscapes.
2. To study how technological innovations leads to technology disruptions and how these innovations bring value to the organization.
3. To understand how these technologies are endangering the organization or industry in which we operate.
4. To study whether these technologies are easily adopted or is the organization experiencing difficulty integrating these new technologies.

Course Outcomes

On successful completion of this course, students should be able to

CO1: Analyze the processes that have enabled certain technologies to change our lives.

CO2: Illustrate the positive and negative consequences of disruptive technologies.

CO3: Devise the understanding of the key elements that need to be evaluated when trying to anticipate and manage disruptive technologies in the marketplace.

CO4: Manage the dynamic aspects of technology-enabled marketplaces as a way to understand industry disruption.

Course Structure

Module No.	Course Contents	Weightage
1	Introduction to Disruptive Technologies - Determining technology trends by a historical review , overview of how technological disruption happens, "DisruptiveTechnologies: Understand, Evaluate, Respond,. Positive & Negative Effects Of Disruptive Technology " Application of Various Disruptive technologies in Business	20%
2	BI Disruption- Effective & timely decisions using BI, Role of mathematical models using BI, BI Architecture, Descriptive Analytics – Datawarehousing, Business Analytics: Emerging Trends and Future Impacts, Application of BI Disruptions in industry	20%

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

3	Artificial Intelligence Disruption- Introduction to AI , Various AI Tools, Problem solving to find the "best" solution in the problem space. How AI helps to Reason &Interpret to justify solutions or sub-solutions, language comprehension to handle for data/problem/knowledge representation, Business decision using AI a process to find better ways for solving a problem (or a class of problems). Application of AI in Automobile, health care, retail sector	20%
4	IOT & Smart application Disruptions- Introduction to IoT , Future Factor Concepts, Brownfield IoT, Smart Objects, Smart Applications, Four Aspects in Business toMaster IoT, Value Creation from Big Data and Serialization Application of IoT in Industry (Home Management, eHealth., banks, Retail sector)	20%
5	Block chain Disruptions – Introduction to the Block chain , Its Origin, Blockchain working, Benefits of Blockchain and Challenges. Blockchain Database vsTraditional Database, Public, Private and Hybrid Blockchain , Smart contract working and its benefits Application of Block chain in Supply chain , KYC , Healthcare etc.	20%

Pedagogy for Course Delivery: This course pedagogy will involve a blended learning approach, having formal lectures, Case studies, group project work; andstudent presentations of the work in progress, as well as online lectures and tutorials.

List of Professional Skill Development Activities (PSDA):

1. Student will be divided into a group of 4-5 and will present on any one Disruptive Technology in the class.
2. Students will explore the application of disruptive technology in any area /domain
3. and document it in a form of case study and then present the same inthe class.
4. Students will submit a 10 page write up on how the disruptive technology is impacting the society in general & business in particular.

Continuous Assessment/Internal Assessment					**End Term Examination**

Semester - II

MSP4201	FUNDAMENTALS OF DATA ANALYTICS	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Course Description

The course is designed at par with current industry needs for data analysis. It includes many cutting-edge learning modules which will provide a rich experience and exposure to different modern data analytical tools and techniques to the students.

Course Objectives:

1. To provide detail knowledge of data analytics and data science
2. To provide basic understanding of MS excel as a tool of data analysis
3. To help the students to know about different types of data, sources of data and data generation techniques
4. To provide the basic understanding of salesforce platform

Course Outcomes

On completion of this course, the students will be able to,

CO1: To develop a comprehensive understanding about data analytics and data science. It will help the students to identify the business problems where data analytics can used.
CO2: To develop basic understanding of MS Excel that can further be used to apply basic data analytic tools.
CO3: To develop an integrated knowledge about different types of data, data sources and data generation techniques which will help the students in decision making.
CO4: To develop the knowledge about wave analysis using salesforce platform. It will help the students to create various dashboards to understand the real business situation and suggesting possible solutions.

Modules	Blooms level*	Number of hours
Module I: Introductionto Data Analytics • Introduction to Data Analytics • Data Analytics vs Data Science • Data Analytics in business needs • Data Analysis Types, Process, Techniques and Tools • Role of Data Analyst in Analytics • ELT Process • DWH, Benefit of DWH, Use, Type of DWH		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Data Analytics using MS-Excel • Data Analysis with Excel, Advantages, Business need and usage • Data Import – Text, CSV, JSON, XML, SQL Query • Data Table, Pivot Table • Excel Formula, usage, advantages, formula use in Data Analysis. • What-If-Analysis, scenario Manager, Goal Seek, Solver. • Data Visualization with Charts – Histogram, Run Chart, Line, Scatter, Bar • Functions – Financial, Logical, Text and Mathematical		
Module III: Introduction to Data Science • Data Mining Process Techniques and Tools • Exploratively Data Analysis • Machine learning, Advantage Algorithms, Types • Machine learning VS Statistical Learning • Supervised ML VS Unsupervised ML vs Reinforcement ML		
Module IV: Industry Wave Analytics using Salesforce CRM • SFDC Data Analysis, Advantages, Industry Needs and Usage • Reports, Reports Types – Tabular, Summary, Matrix, Joined • Charts – Line, Bar, Pie, Funnel, Scatter, Donut • Dashboard: Executive Dashboard, Sales & Service Dashboards • Reports & Dashboards Access and Security with Users, Groups and Roles		

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

MSP4202	SUSTAINABLE DEVELOPMENT & SUSTAINABILITY	L	T	P	SW/FW	C
Version 1	Latest Approved	3	0	0		3
Pre-requisites/Exposure						
Co-requisites						

Course Objectives

1. The course seeks to build an inter-disciplinary perspective on understanding sustainable development concerns and challenges.
2. This course familiarizes students with current debates and perspectives in analyzing constraints and opportunities for sustainable development**.**

Pre-requisites: Basic understanding of the concept of sustainability.

Course Outcomes

On completion of this course, the students will be able to
CO1: Implement world policies based on sustainable development, cooperative responsibility and environmental security.
CO2: Study sustainable alternatives for strengthening local economies.
CO3: Build capacity of communities, with special emphasis on those regions or populations characterized by poverty, marginalization andexclusion.

Course Contents/Syllabus:

Modules	Blooms level*	Number of hours
Module I: Perspective of Sustainable Development Definitions & principles of Sustainable Development; Origin and evolution of the Sustainable Development; Notion of carrying capacity; Brundtland Commission Report; UN Conference on Human Environment 1972; Earth Summit 1992; World Summit 2002; The role of population growth, migration, technological change, industrialization and international politics; Millennium Development Goals: Status (Global and Indian), Sustainable Development Goals: Status (Global and Indian); Indicators of environment and social development.		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Concept of Sustainability Definition sustainability; Dimensions of sustainability; Measuring sustainability: indicators and certifications; Governance and scales of decision-making; Consumption patterns and ecological footprints; Resources, Wealth Distribution and Quality of Life; Environmental security; Measuring, monitoring and improving sustainability performance; Establishing sustainability indicators, developing goals and improvement program; Life cycle assessment; Principles and guidelines of corporate sustainability.		
Module III: Sustainable Development Challenges and Response Challenges to sustainable development: limited awareness, poor education systems, social barriers, governance,conflict between governments, political will, technology; Responses to sustainable development: Public Policy (Community Participation and Participatory Learning); Economics and Policy Coherence; Rural development & environmental sustainability; ESP: Equality, sustainability and peace; Sustainable development in private sector; International cooperation on sustainable development; Sustainable development: futurescenarios. Case studies		

Pedagogy for Course Delivery:

The subject methodology will follow the teaching approach which takes into account the students' own knowledge and their autonomous learning. In this regard, classes focus on a combination of lectures and participatory dynamics. The structure of each unit includes a daily compulsory reading, followed by oral presentations by the students which will lead to class debates, group works and other activities. These activities will be complemented by lectures.

MSP 4203	FINANCIAL MANAGEMENT	L	T	P	C
Version 1.1		2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

The focus of this course is in the area of financial management. Course will explain know financial management and its interface with other areas of management, applying time value of money in investment decision-making and understanding cost of capital in financing decisions of firms. It helps to understand how firms meet their financial objectives utilising financial decision-making. This course will also explain financial tools and techniques, which can be used to help firms maximize value by improving decisions relating to capital budgeting, capital structure, and working capital management.

Course Objectives

1. To familiarize the students with basic concepts of financial management and financial system.
2. To understand concept of time value of money and its implication.
3. To evaluate the investment proposals.
4. To understand the management of working capital in an organization.
5. To analyze capital structure and dividend decision.

Course Outcomes:

At the end of the course the student will be able to:
CO 1:Understand the basic financial concepts
CO2: Apply time value of money
CO3:Evaluate the investment decisions
CO4: Estimate working capital requirements
CO5: Analyze the capital structure and dividend decisions

Modules	Blooms level*	Number of hours
Module I Meaning and objectives of Financial Management, changing role of finance managers. Interface of Financial Management with other functional areas. changing role of finance managers. Emerging issues in Financial Management-Risk Management, Behavioural Finance, Financial Engineering, Derivatives (Theory)		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

MSP4204	OPERATIONS AND SUPPLY CHAIN MANAGEMENT	L	T	P	C
Version 1.1	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Course Description

This course is designed to explain the basic theories and techniques of operations and supply chain management to examine the prevailing issues and problems in changing business environment and to show how enterprises can augment their effectiveness and competitiveness by focusing on different operations and supply chains.

Course Objectives:

1. To provide the basic understanding of different operational strategies to be used in manufacturing and service providing organizations.
2. To provide knowledge about various types of inventories, costs of inventories and control of inventories
3. To provide an understanding about different types of supply chains and their issues
4. To provide an insight about the modern trends and challenges of supply chains

Course Outcomes

On completion of this course, the students will be able to,

CO1: To develop a comprehensive understanding about different operational strategies so that students can analyze and apply them in given situation.

CO2: To develop insights about inventory management so that students can understand various types of inventory control techniques and use them efficiently under a given situation.

CO3: To develop an integrated knowledge about different designs of supply chains, key issues, problems, and suggested solutions.

CO4: To help the students understand the latest trends in supply chains, contemporary challenges like greening, flexibility, and adaptability etc. of supply chains.

Modules	Blooms level*	Number of hours
Module I: Introduction Operations in manufacturing and service organizations, scope of operations management, operations strategy and competitiveness, facility location decisions, factors affecting location, location techniques: factor rating method, centroid method, types of production systems- continuous and intermittent production systems, facility layout, process layout, systematic layout planning, product layout, fixed position layout, service operations layout, capacity planning: long term and short term, operations scheduling: loading, sequencing, priority rules and techniques, economies of scale		
Module II: Inventory Management Inventory management: Objectives, factors, process, inventory costs, inventory models, inventory control techniques: ABC, VED, EOQ, SED analysis, Just-in-Time (JIT), JIT vs traditional systems of operations, JIT in services

MSP4205	Research Methodology & Report Preparation	L	T	P	C
Course Version	Latest Approved	2	0	1	3
Pre-requisites/Exposure					
Co-requisites					

Catalogue Description:
The main objective of the course is to equip the students with the basic understanding of research methodology in changing business scenario. It will also provide them an insight into the application of dynamic analytical tools to face the stormy challenges aimed at fulfilling the purpose of business decision making.

Course Objectives :
The objectives of this course are to ensure that students are able to-

1:Understand the basic framework of research process.
2:Comprehend of various research designs and techniques.
3:Identify various sources of information for literature review and data collection.
4:Understand some basic concepts of research and its methodologies.
5: Understand as how to organize and conduct research in a more appropriate manner andwrite a research report, thesis and a research proposal.

Course Outcomes :
On completion of this course, the students will be able to:
CO1: Apply a range of quantitative and / or qualitative research techniques to business and management problems / issues
CO2: Determine and apply research approaches, techniques and strategies in the appropriate manner for managerial decision making
CO3: Demonstrate knowledge and understanding of data analysis and interpretation in relation to the research process
CO4: Synthesize and Evaluate different research approaches utilised in the different industries and be able to critically assess the overall process of designing a research study from its inception to its final report preparation.

Modules	Blooms level*	Number of hours
Module I: Introduction Meaning of research, importance of scientific research in business decision making, types of research, complete research process, research methodology, criterion for good research, Identification of research problem and formulation of hypothesis, research designs, drafting a research proposal

MSP4231	TERM PAPER-I	L	T	P	C
Version 1.1	Latest Approved		0	0	2
Pre-requisites/Exposure					
Co-requisites					

Course Description

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

Course Objectives

The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.

2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.

3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

4. Examples of a few broad areas for Term Paper (List is indicative, not exhaustive)

- Inflation
- Unemployment
- Fiscal Deficit
- Poverty
- Education
- Malnutrition
- Rural Development
- Regional Imbalance
- Globalization
- Foreign Direct Investment
- Current trends in consumer behavior
- Innovative management
- Company rituals and corporate culture
- Negotiation and diplomacy
- Effective advertising
- International trade trends in the USA
- Geo-arbitrage and business success
- Advantages of increasing brand awareness
- Social media as a new market
- Healthy work environment and employee diversity

SEMESTER-III

MSP4301	**STRATEGIC MANAGEMENT**	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course introduces the key concepts, tools, and principles of strategy formulation and competitive analysis. It is concerned with managerial decisions and actions that affect the performance and survival of business enterprises. The course is focused on the information, analyses, organizational processes, and skills and business judgment managers must use to devise strategies, position their businesses, define firm boundaries and maximize long-term profits in the face of uncertainty and competition.

Course Objectives

The objective of this course is to

1. Introduce students to the key concepts, tools and principles of business policy and strategic management.
2. Expand the student's capacity to integrate and appreciate the changes in the environment that shape the strategy of a business and lead to developing a competitive edge.
3. Develop the perspective of students towards understanding the culmination of different functional areas into building up of a corporate strategy.
4. Expose the students to the various approaches in crafting business strategy, tools that aid in reasoning carefully about strategic options, and learning how companies use what-if analysis to evaluate action alternatives and make sound strategic decisions.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify and explain the various levels at which strategic decision making happens in an organization.

CO2: Analyse the internal and external environment of business that will lead to formulation of strategic plans.

CO3: Determine the suitability of strategies that firms have developed in the real world scenario to achieve valueable outcomes.

CO4: Prepare strategic analysis and choice in order to determine alternative courses of action that could best enable the firm to achieve its mission and objectives.

CO5: Review strategy implementation to gain competitive advantage.

Modules	Blooms level*	Number of hours
Module I: Introduction and Purpose of Strategy Formulation Evolution and Introduction of strategic management, Concept of Strategy, corporate, Business and Functional Levels of Strategy, Mission, Vision, Objectives, Approaches to four Phases in Strategic Management Process, Stakeholders in business and their roles in strategic management, Strategic decision making.		
Module II: Environmental Analysis Analysing company's External Environment: PESTLE Analysis; Preparing an Environmental Threat and Opportunity Profile (ETOP), Analysing Industry Environment: Industry Analysis – Porter's Five Forces Model of competition, Strategic Group analysis.		
Module III: Analysis of Organizational Competencies Analysing Company's Internal Environment Resource based view of a firm, meaning, types & sources of competitive advantage, analysing company's Resources and Competitive Position, VRIO Framework; Benchmarking as a method of comparative analysis, Competitive advantage; Concept of a Core competence and Distinctive competitiveness, Characteristics of Core Competencies; Value Chain Analysis Using Porter's Model; Organizational Capability Profile: Strategic Advantage Profile.s		
Module IV: Strategic Analysis and Choice Generic Competitive Strategies: Meaning of Generic competitive strategies, Low cost, Differentiation, Focus – when to use which strategy; Grand Strategies: Stability, Growth (Diversification Strategies, Vertical Integration Strategies, Mergers, Acquisition & Takeover Strategies, Strategic alliances & Collaborative Partnerships), Retrenchment – Turnaround, Divestment, Liquidation, Outsourcing Strategies; Offensive and Defensive Strategies, Blue Ocean Strategy, Strategy in the age of Internet and E-commerce; Portfolio Analysis Business Portfolio Analysis – BCG Matrix – GE 9 Cell Model; Evaluation of Strategic Alternatives: SWOT Analysis, Grand Strategy Selection Matrix.		
Module V: Strategy Implementation and Evaluation Strategy Implementation, Barriers to implementation of strategy, Mc Kinsey's 7s Framework; Organization Structures for Strategy Implementation, Leadership Implementation, Functional Implementation, Strategic evaluation review and control.		

**Bloom's Level: L1-Knowledge;L2-Comprehension;L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

MSP 4337	PROJECT-I	L	T	P	C
Course Version	Latest Approved	-	-	-	8
Pre-requisites/Exposure	NA				
Co-requisites	NA				

Catalog Description

Under this, it is usual to give the student some discretion in the choice of topic for the Research Project and the approach to be adopted. The Research Project topic is related to the field of specialization. Deciding this is often the most difficult part of the Research Project process, and requires thorough preparation and background research.

The aim of the Research Project is to provide the students with an opportunity to further their intellectual and personal development in their chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of their degree.

.

Course Objectives

The objective of this course is to

1. Understand and apply theoretical frameworks to the chosen area of study.
2. Produce a coherent and logically argued piece of writing that demonstrates competence in research and the ability to operate independently.

Course Outcomes

On completion of Research Project, the students will be able to

CO1: Describe a relevant area of career development, career coaching, coaching or work-related learning studies.

CO2: Identify research methods and state research questions.

CO3: Critically analyze and evaluate the knowledge and understanding in relation to the agreed area of study.

CO4: Integrate theory and practice for the development of responses on the basis of the evaluation and analysis undertaken.

CO5: Communicate in written form by integrating, analyzing and applying key texts and practices.

CO6: Demonstrate advanced critical research skills in relation to career development or work-related learning studies.

MSP4303	SUSTAINABLE DEVELOPMENT & CLIMATE CHANGE	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:

1. To familiarizes students with the development of the Earth's atmosphere, its dynamic nature and variability in terms of the global energy balance
2. To appraise the students on the management of climate change through mitigated and adaptive measures.
3. To enhance the understanding on the varied impacts of climate change on various sectors and introduces about the international and national bodies like UNFCCC, IPCC, Kyoto Protocol; national and international policies, laws & regulations applicable to climate change.

Pre-requisites: Basic understanding of the environment and natural resources.

Course Outcome

On the completion of the course, students will be able to

CO1: Explain the greenhouse effect, including consideration of natural and anthropogenic greenhouse gases, and their principal sources and sinks

CO2: Describe the natural carbon cycle and human impacts on the carbon cycle

CO3: Demonstrate an understanding of the range of options available for reducing global greenhouse gas emissions, including the use of carbon sinks andcarbon sequestration

CO4: Describe the various incentives and mechanisms used to promote greenhouse gas emissions reductions

CO5: Evaluate Global and National policies on climate change

CO6: Assess and select low-carbon products and services

Modules	Blooms level*	Number of hours
Module I: Introduction to Climate Change Green House Effect and Global Warming, Radiative Forcing, Feedback Mechanism, Global Warming Potential (GWP), Green House Gas emissions from various natural & anthropogenic sources, Natural causes of climate change – Milankovitch cycles, Schwabe cycles, Eccentricity and Obliquity, Records of climate change (glacial cycles, ocean sediments, corals, trees) Earth energy balance, Ozone Layer Depletion, ENSO - El Nino and La Nina Effects		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Climate Change Vulnerability and Impacts Potential impacts of climate change on water resources, agriculture, forest, natural ecosystems, infrastructure & energy sector, coastal zones, human habitats (rural & urban) and health. Approaches and tools of assessment of climate change.		
Module III: Climate Change Adaptation Definition of adaptation and mitigation; Adaptation options for terrestrial, fresh water & ocean ecosystem and their confluences. Adaptation options available for human systems like human health, human settlement, agriculture and food security and energy industry under various climate change scenarios. Carbon Sequestration – Carbon Capture and Storage		
Module IV: Climate Change Policy and Law **I**nternational & national legislative framework in the field of climate change agreements, UNFCCC and Implementation (JI), decisions of the COP and COP/MOP, DNA, CDM-EB and all Subsidiary Bodies, Introduction toREDD and REDD Plus.		

Pedagogy for Course Delivery: The course will be delivered through lecture mode. During tutorial sessions, written assignments, quiz and seminar presentations on various topics related to the course will be organized. Class room interactions on one to one basis will be an integral part of the learning experience. Students will be supplied with study materials regularly.

MSP4305	HUMAN DIMENSIONS OF SUSTAINABILITY	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:

1. Aims at understanding the human dimensions of sustainability issues, encompassing societal, political, economic, technological and cultural aspects
2. Helps to analyse the human dimensions of environmental change and sustainability issues are: Transitions Theory, Social-Ecological Systems and Political Ecology

Course Outcome

On the completion of the course, students will be able to

CO1: Engage critically with a range of contemporary environmental change and sustainability topics, especially regarding the societal, political, economic,technological and cultural aspects of managing and responding to contemporary environmental change and sustainability problems.

CO2: Critically reflect on the interrelationships between environmental change and sustainability

CO3: Evaluate and gain a deeper understanding of particular environmental change and sustainability

Modules	Blooms level*	Number of hours
Module I: Introduction Introduction to human dimensions of sustainability issues; Sustainability and societal, political, economic, technological and cultural aspects; Origins and Evolution: History of international efforts for environment and sustainability		
Module II: Analytical Perspective Origins and Evolution, Transitions Theory, Social-Ecological Systems, Political Ecology, Economic development, wealth and poverty, social development, and the environment in an integrated systems perspective		
Module III: Issues & Challenges Sustainability issues in regard to land, climate change, energy conservation and water supplies, biodiversity, food and governance; Relevance of sustainability as a priority for communities, national governments, and the international system; Sustainable Development Goals and the need for an integrated approach to their implementation		
Module IV: Education for Sustainable Development and Responsible Living Understanding sustainable development at the individual level, Action plan to live in a more sustainable way, Explain the importance of sustainability to others and to accompany them as they implement more sustainable practices		

Pedagogy for course delivery:

The subject methodology will follow the teaching approach which takes into account the students' own knowledge and their self- learning. In this regard, classes focus on a combination of lectures and participatory method. The structure of each unit includes a daily compulsory reading and by oral presentations by the students which will lead to class debates, group works and

MSP4306	BUSINESS CERTIFICATION FOR SUSTAINABILITY	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:

To develop an understanding of how going green can save money, increase customers and provide a new way to business for going up

To explain the relevance of sustainability on the specific areas which can help companies to make a difference tothe world.

Pre-requisites: Introduction to Sustainable development and sustainability

Course Outcome

On the completion of the course, students will be able to

CO1: Understand eco-friendly programs relevant to the companies

CO2: Analyze impact of sustainable solutions on businesses and eliminate carbon emission

CO3: Evaluate the importance of sustainability certifications as voluntary standard relating to environmental, social, ethical and food safety issues

CO4: Critically reflect understanding of third party certification

Modules	Blooms level*	Number of hours
Module I: Introduction Meaning and Benefits of sustainable business certification; Business commitment to environmentalism and social responsibility; Best practices in green business certification		
Module II: Green programs and social initiatives Eco friendly and socially responsible programs for the companies, importance of leadership and expert guidance, Self assessment of company's sustainable efforts and identify areas to focus to become green, Eliminate operational carbon emissions from the facilities.		
Module III: Reporting Corporate Sustainability Reporting Standards, Public disclosure of Corporate information, Sustainability reporting by independent organizations: Global Reporting Initiative (GRI), Sustainability Accounting Standards Board (SASB), Task force on Climate related financial disclosures.		
Module IV: Third Party Certifications Importance & Impact of Third party Certification on business, Third party certification organizations including LEED, ISO, B-Corp, and Green Business Bureau.		

Pedagogy for course delivery:

The subject methodology will follow the teaching approach which takes into account the students' own knowledge and their self- learning. In this regard, classes focus on a combination of lectures and participatory method. The structure of each unit includes a daily compulsory reading and by oral presentations by the students which will lead to class debates, group works and other activities. Semester- IV

MSP4401	ENVIRONMENTAL GOVERNANCE AND SUSTAINABILITY	L	T	P	C
Version 1.1	Latest Approved	3	0	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Environmental problems and global environmental change are multifaceted, trans-boundary, multi-level and multi-sector issues, that need to be dealt with at all administrative levels and with an integrated approach across policy areas. By applying theories of governance, we will discuss what this may imply in practice for the policy-making and implementation of environmental politics at different levels. The course introduces key theoretical concepts useful for the understanding of environmental change as a policy problem. This course explores the crucial link between governance and sustainable development. Sustainable development has emerged as the global norm and dominant approach to reconcile the goals of economic development, environmental quality and social equity. Governance can be understood as the rules, mechanisms, processes and institutions through which important decisions are made and implemented. The course discusses the contested nature of both these concepts, and investigates how both are combined in local, national, regional and international policy-making about environment and development challenges such as poverty, global inequalities, loss of biodiversity, deterioration of global eco-systems, and the threat of climate change to human societies.

Course Objectives

The objectives of this course are to:

1. Provide the students exposure to environmental governance practices.
2. Enhance student's knowledge towards concepts of sustainable development and global institutional arrangements for the governance of different dimensions of environment
3. Familiarize students with contemporary environmental issues, including alternative sources of energy and climate change, as well as with the most important global and regional institutions that create the global environmental governance architecture.
4. Comprehend and critically discuss the contemporary sustainable development agenda.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Classify and compare different Environmental Governance practices employed by multiple factors across different levels.

CO2: Describe the rationale behind regulatory, community-based, and market/incentive-based approaches to environmental governance, as well as newer approaches in integrated governance.

CO3: Describe different initiatives and strategy for sustainable development and also able to analyze the implementation of the Sustainable Development Goals.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

CO4: Describe and understand the complexity of environmental problems, and drivers of and societal solutions to global environmental change.
CO5: Conduct analyses of Environmental Governance practices.

Modules	Blooms Level*	Number of hours
Module 1: **Introduction to the challenges and players in environmental governance:** Overview of environmental governance, Contemporary Discourses on Governance in India, problem and prospects of environmental governance in India, Democracy, Development and Governance. **Environmental Governance**: Human–Environment Interaction, Green Governance: Sustainable Human Development. Global environmental change. Governance of ecological conflicts and disasters, global ecological governance in particular in regard to climate change.		
Module 2: Good Governance Initiatives in India: Government, Governance and Public Service Delivery in India, E-Governance in India. Democratic Decentralization and Local Governance in India. People's Participation in Governance, Citizen's Charter and Right to Information in India Corporate Social Responsibility: the Indian Experience.		
Module-3: Sustainable Development: Issues and Challenges-I **Introduction to Sustainable Development:** Parameters of sustainable development, Approaches to the study of SD, Issues and challenges. **Developmental issues**: Natural resource exploitation, Patterns of Industrialization, Inequitable Growth, Global and Regional dimensions		
Module-4: Sustainable Development: Issues and Challenges-II **Initiatives towards sustainable development:** State Initiatives global initiatives, Civil Societies and Community Initiatives, **Strategy for sustainable development:** Community Knowledge, Harness Technology, Innovative Practices, Cooperation and Partnership. SDGs.

MSP4402	E-BUSINESS ESSENTIALS	L	T	P	C
Version 1.1	Latest Approved	2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course aims to make the students understand the nuts and bolts of forming an e-business and prepares students to evaluate the requirements of an e-business and develop e –business plans. As business environment is witnessing so many changes every day, it gets vital for business organizations to recognize and learn to create their presence in cyber space.

Course Objectives

The objective of this course is to:

1. Introduce the students to the world of e-business, the openings and the risks and makes them learn the strategies of making businesses successful worldwide.
2. Make the students understand the nuts and bolts of forming an e-business and prepares students to evaluate the requirements of an e-business and develop e –business plans

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the digital technologies necessary for e-business.

CO2: Identify and use the database to improve business performance and decision making.

CO3: Create a web design for an e-business web portal.

CO4: Analyze the processes associated with e-payment systems, e-marketing, e-procurement and e-distribution.

Modules	Blooms level*	Number of hours
Module 1: Introduction to E-Business The impact of the electronic communications on traditional businesses, difference between e-commerce and e-business, E-business opportunities, Business adoption of digital technologies for e-commerce and e-business, E-business risks and barriers to business adoption, Management responses to e-commerce and e-business, Business models for e-commerce.		
Module 2: E-Business Web Design Elements of site design, site navigation, site structure, page and content design, web accessibility. Components of a business model, classification of business webs, comparison and valuation of networks, price formation process. Internet, intranet and extranet, choosing an ISP and Internet terminology Acquiring e-business systems, development of web based content and services, Software and services for web-site development and testing , testing process, environment, database creation and data migration, content management and maintenance		
Module 3: E-Marketing & E-Procurement E-Marketing: comparison of communication media, development model for online customers, online promotion strategies. E-procurement: strategic and operational procurement, information support for e-procurement, types, catalog management.		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

MSP4403	SUSTAINABLE ENTERPRISE DEVELOPMENT & LEADERSHIP	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:
To examine a wide variety of leadership styles in sustainable enterprise development with the intent to investigate their long-term application to a more global visionof leadership.
To pay attention to those individuals and institutions that are changing world for better

Pre-requisites: The student opting for this course should have interest in leadership and global environment.
Course Outcomes
On completion of Dissertation, the students will be able to

CO1: Understand key concepts of global leadership
CO2: Discuss pressing global issues that require leaders' attention.
CO3: Personalize and implement the practices of altruistic leadership
CO4: Discover characteristics and challenges of leadership in the global environment
CO5: Gain insights to more effective personal leadership in cross-cultural settings

Modules	Blooms level*	Number of hours
Module I Introductions and Overview Leadership and management for sustainable enterprise development, Introductions and assessment of needs for sustainable business solution, Perspectives on global leadership and management, **Leadership and Management in a Globalized World:** Leadership with global perspective of human and ecological survival, Globalization Implications for shifts in Leadership.		
Module II Leadership Dimension **Leadership: The Individual Dimension:** The EMERGE Solution to Wicked Challenges: Public Leadership for Sustainable Development, Values Integration for Professional and Personal Grounding, From Personal to Systems Mastery :The Leadership Role Profile, **Leadership: The Team Dimension:** Team Concepts and Applications, Leadership and Followership, Cross-cultural Awareness and Communications

Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module III Leadership: The Organizational and Societal Context **Leadership: The Organizational and Societal Context:** Inspirational Visioning: From Rhetoric to Empowerment and Action, Norming New Solutions **The Powers to Lead:** Leadership and Smart Power, Releasing the Full Potential of Followers, Convening Coalitions for the Public Good		
Module IV Building and Sustaining a Culture of Authentic Leadership: Leadership and Management Development, The Performance Learning Approach and Collective Individualism, Concluding Thoughts on Public Leadership and Management		

Pedagogy for Course Delivery
This class will be taught using a mix of theory, latest concepts from research publications in leading International Journals and the case method.

Assessment/Examination Scheme:

Components	**Project**	**Viva**	**Class Test**	**Attendance**	**End Term**
Weightage	10%	5%	10%	5%	70%

MSP4404	CREATIVITY AND INNOVATION IN DESIGNING SUSTAINABLE SOLUTIONS	L	T	P	SW/FW	C
Version 1.1	Latest Approved	2	1	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:

To introduce the student to the practices necessary to stimulate and manage innovation in a business for designing sustainable solutions.
To give frameworks and methods to students for designing, developing, and implementing innovation in real work situations.
To provide the perspective and skill base necessary to manage innovation-focused projects, people, and ventures.
To develop creative problem-solving skills to identify emerging opportunities and challenging conventional wisdoms.

Prerequisites:
The student opting for this course should have successfully completed the course "Entrepreneurship and New Venture Creation" offered by the university.This course focuses on the understanding the concept of innovation and creativity from a real-life perspective. The student should have a keen sense of understanding analytical thinking as the course is designed to help the students use new techniques to think creatively and innovatively.

Course Outcomes
On completion of Dissertation, the students will be able to:

CO1: Interpret and examine the impact of innovation and creativity in business.
CO2: Identify, infer and apply different creative thinking techniques and model them against principles of creative management.
CO3: Construct the processes and determinants of the successful exploitation of innovation.
CO4: Develop and formulate managerial strategies to shape innovative performance by capturing emerging trends.
CO5: Assess and evaluate creative development within an organization and support a plan of action to enhance theability to think creatively and foster innovation.

Module I: Introduction to Innovation Defining innovation and its relevance in developing sustainable business solutions, Need and importance of innovation, types of innovation, innovation v/s invention, Lateral & horizontal technique of innovation, Need for Creativity and Innovation in start-ups and existing organizations, Drivers to Innovation; Barriers and Challenges to Innovation, Game changer		
Module 2: Idea Generations: Creativity & Innovation, Nature of Creativity: Person, Process, Product and Environment, Generation of ideas, Capturing & Processing of thoughts, Methods for generating and evaluating creative ideas including brainstorming, mapping, metaphors, networking,intuition, judgment and imaging		
Module-3: **Idea Conversion:** Evaluating ideas, conversion and implementation of ideas, Business Dimension of Innovation and nature of Innovation, Making the Idea a reality, Connecting the dots, Lasting & differentiating leadership, motivation & success		
Module-4: Models of Innovation: Static and dynamic models of Innovation, Incremental versus Radical innovation, Abernatty- Clark Model, Henderson Clark Model, Disruptive Technological Changes		
Module V Managing Creativity and Innovation Assessing Personal Creativity and Ability to Innovate, Enhancing Creative and Innovative Abilities, Entrepreneurial Tools for Creativity and Innovation—Exploring the Intersection, Developing and Contributingto a Creative-Innovation Team, Evolving a Culture of Creativity and Innovation in Organizations		

Pedagogy for Course Delivery:
This class will be taught using the theory and case method. In addition to assigning the case studies, the course instructor will spend considerable time in understanding the concept of innovation through the eyes of the consumer. The instructor will cover the ways to think innovatively liberally using thinkingtechniques.

List of Professional Skill Development Activities (PSDA):

i. Identifying the problem and searching for an appropriate solution through Design thinking framework
ii. Searching for newer platforms for efficacy of the idea

MSP4405	GREEN MARKETING & ENVIRONMENTAL PRODUCT DESIGN	L	T	P	SW/FW	C
Version 1.1	Latest Approved	3	0	0	1	4
Pre-requisites/Exposure						
Co-requisites						

Course Objectives:
To explain the strategies for green marketing and to introduce students to the role of environmental marketing within society and within the economic system.
To develop student's understanding of the breadth of activities that fall within the domain of green marketing

Course Outcomes
On completion of Dissertation, the students will be able to:

CO1: Demonstrate knowledge of concepts and definitions of sustainability marketing.
CO2: Understand ways to deliver superior customer value based on sustainability principles.
CO3: Understand commercial, institutional, ecological and social perspectives of sustainability marketing
CO4: Evaluate the relationship between sustainability with marketing mix.

Modules	Blooms Level*	Number of hours
Module I: Green Marketing Strategy and the Four P's of Marketing Green marketing strategy, incorporating a green strategy into a company's vision, how sustainability works in the marketing mix, consumer market segmentation, marketing tools to help promote a brand		
Module II: Sustainable Marketing Mix 4Ps of Marketing based on sustainability principles, Consumer Target Market Segmentation, Eco-friendly environmental packaging		
Module III Environmental Product Design: Minimize materials use, Minimize the negative impact of the production process, Maximize the efficiency of the distribution process.		
Module-4: Models of Innovation: Static and dynamic models of Innovation, Incremental versus Radical innovation, Abernatty- Clark Model, Henderson Clark Model, Disruptive Technological Changes		
Module IV Tools for developing Sustainable business model Product, service, Design and packaging, Life Cycle Analysis, Design for Environment, MET Matrix, ecological footprint and environmental checklists

Bachelor of Arts (Honors/ Honors with Research) in Economics
SEMESTER-I

DECO2151	MICROECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is designed to expose first –year students, who may be new to economics, to the basic principles of microeconomic theory. The emphasis would be on thinking like economists & the course will illustrate how microeconomic concepts can be applied to analyze real-life situations. The course provides an introduction to a core area of economics known as microeconomics. It considers the operation of a market economy and the problem of how best to allocate society's scarce resources. The course considers how various decision-making units in the economy (individuals and firms) make their consumption and production decisions and how these decisions are coordinated. It considers the laws of supply and demand and introduces the theory of the firm and its components, production and cost theories and models of market structure.

Course Objectives

The objective of this course is to

1. Explain how competitive markets organise the allocation of scarce resources and the distribution of goods and services
2. Assess the efficiency of markets and describe the various factors that might impact efficiency
3. Distinguish between the various forms of market failure and explain how governments might need to intervene
4. Describe the various types of markets and compare their efficiency
5. Introduce a framework for learning about consumer behaviour and analyzing consumer decisions
6. Demonstrate mathematical applications of microeconomic problems and different market situations to analyze production and consumption decisions

Course Outcomes

On completion of this course, the students will be able to:-

CO1: Evaluate the basic economic theory and principles of current microeconomic issues and related policies.

CO2: Analyze economic models and relate them to realistic situations.

CO3: Comprehend their knowledge and understanding of economic issues using written, verbal and visual expression.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

CO4:Evaluate outcomes based on the costs and benefits involved.

CO5:Comprehend the broader consequences of economic decision-making.

Modules	Blooms level*	Number of hours
MODULE I: Consumer Behaviour The scope and method of economics; scarcity and choice; questions of what, how and for whom to produce and how to distribute output; Individual demand and supply schedules and the derivation of market demand and supply; shifts in demand and supply curves; the role of prices in resource allocation; Elasticity of Demand — price, income and cross; Consumer's surplus. Utility-cardinal and ordinal approaches, Indifference curves; budget constraints; Consumer's equilibrium (Hicks and Slutsky); Giffin goods; Compensated demand; Revealed preference theory; Engel curve.	L1, L2, L4	15
MODULE II: Production and Costs: Technology, Isoquants, production with one or more variable inputs, Returns to scale, short-run and long-run costs, cost curves in the short run and long run, total, average, and marginal product, cost minimization and expansion path, elasticity of substitution.	L1, L3, L4, L6	12
MODULE III: Market Structure Review of perfect competition and monopoly; Equilibrium of Firm and Industry under perfect Competition, Supply curve under perfect competition; Equilibrium of Firm under monopoly, Discriminating Monopoly, Price Discrimination, Degree of Monopoly; Monopolistic competition; Oligopoly.	L1, L3,L4,L6	12
MODULE IV: Factor Pricing Derived demand for a single input and multiple inputs in competitive & imperfect competition markets, firm demand and industry demand, collective bargaining and exploitation rent & quasi rent. Ricardian and Modern Theories of Rent.; Quasi Rent: Theories of Interest-Classical, Keynesian and Modern theories.	L1,L3,L4,L6	12
Module V: Welfare Economics Conditions of Pareto optimality in pure exchange and with production, optimality of perfect competition.	L1,L3,L4,L6-	9

Bloom's Level:
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5:Synthesis, L6:Evaluation

DECO2101	MATHEMATICS METHODS FOR ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Basic understanding of mathematical concepts				
Co-requisites					

Course Description

The main objective of the inclusion of this course in economics is to familiarize the students with basic quantitative & algebraic tools & techniques which will be needed for the understanding of the core subject and the students can apply the quantitative techniques in the analysis of economic and managerial problems.

Course Objectives

The objective of this course is to

1. Equip the students with the concepts of real numbers, sets, relations, functions, differentiation, integration, marginal utilities, marginal products, partials derivatives and linear programming.
2. Familiarize the students with economic applications of mathematical concepts. For instance, how to minimize risk, maximize profit, calculate elasticities, and consumer and producer surplus.

Course Outcomes

Upon completion of this course, the students will be able to

CO1: Define and replicate the connections between diagrammatic models and their underlying formal mathematical structures using algebra and calculus.
CO2: Compile and review derivatives of functions defined implicitly and learn the notion of differential of a function and apply it for finding approximate changes in functions.
CO3: Use the mathematical method to solve optimization problems such as cost minimization and profit maximization.

Modules	Blooms level*	Number of hours
MODULE I: Preliminaries Sets and set operations; relations; functions and their properties; Number systems; Types of functions- constant, polynomial, rational, exponential, logarithmic; Graphs and graphs of functions; Limit and continuity of functions; Limit theorems	L1,L2, L3 L4, L5, L6	8
MODULE II: Matrices and Determinants Matrices: concept, types, matrix algebra, transpose, inverse, rank; Determinants: concept, properties, solving problems using properties of determinants, the solution to a system of equations - Crammer's rule and matrix inversion method	L1,L2, L3 L4, L5, L6	10
MODULE III: Derivative of a function Rate of change and derivative; Derivative and slope of a curve; Continuity and differentiability of a function; Rules of differentiation for a function of one variable; Application- Relationship between total, average and marginal functions; Partial differentiation techniques; Geometric interpretation of partial derivatives; Partial derivatives in Economics; Elasticity of a function – demand and cost elasticity, cross and partial elasticity	L1,L2, L3 L4, L5, L6	11

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE IV: Differential calculus Properties of linear homogenous functions, Euler's theorem. Problems of Maxima and Minima in Single and Multivariable functions; Constrained and unconstrained optimization with first-order and second-order conditions, Lagrangian Method, Hessian and Jacobian Matrices, Applications – utility maximization, cost minimization, profit–output maximization	L1,L2, L3 L4, L5, L6	11
MODULE V: Integration Integration - meaning and economic interpretation; Indefinite and definite integration; Simple techniques including integration by substitution and integration by parts; Applications-consumer surplus and producer surplus	L1,L2, L3 L4, L5, L6	11
MODULE VI: Linear Programming Linear Programming - Relevance and basic concepts, graphic, simplex and dual solution, Economic interpretation.	L1,L2, L3 L4, L5, L6	9

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

SEMESTER-II

DECO2251	STATISTICAL METHODS IN ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
The course teaches students the basics of descriptive statistics. It sets a necessary foundation for the study of inferential statistics in the Honors programme.

Course Objective:

1. This course will deal with all fundamental statistical methods of tools that the students have to use in economic analysis and decision-making problems.
2. The student will understand the concepts in descriptive statistics and be familiar with some commonly used statistical techniques like correlation, regression, index numbers and time series analysis.

Course Outcome:
Upon successful completion of the course, a student will be able to:
CO1: Define statistical methods and provide an insight into their uses in economics
CO2: Demonstrate the application of a range of statistical techniques to economic problems
CO3: Apply Skills in describing, analysing and interpreting statistical data
CO4: Comprehend the principles and assumptions on which these procedures are based
CO5: Apply the ability to analyse statistical data using MS Excel
CO6: Apply the ability to relate statistical methodology to economic enquiry

Modules	Blooms level*	Number of hours
Module I : Introduction: Basic concepts: Population, Sample, Parameter, Statistic, Frequency distribution, Cumulative frequency distribution; Graphic and diagrammatic representation of data; Techniques of data collection. Sampling vs. Population, primary and secondary data.	L1, L2, L3, L4, L5, L6	15
Module II: Central Tendency and Dispersion: Measures of Central Tendency: Mean, Median, Mode, Geometric mean, Harmonic mean; Measures of Dispersion; Range, Quartile deviation Mean deviation, Standard deviation; Skewness and Kurtosis, Moments.	L1, L2, L3, L4, L5, L6	12
Module III: Correlation and Regression: Correlation: Simple; Coefficient of correlation; Karl Pearson and Rank correlation; Partial and Multiple Correlation analysis; Regression analysis – Estimation of a regression line in a bivariate distribution, Least squares method; Interpretation of correlation and regression coefficients; Coefficient of determination.	L1, L2, L3, L4, L5, L6	12
Module IV: Time Series: Time Series Analysis - concept and components, determination of trend (Linear, Quadratic and Exponential) and seasonal indices	L1, L2, L3, L4, L5, L6	12

Prof. (Dr.) Anil Kumar

DECO2201	INDIAN ECONOMY	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This subject covers the major features of the Indian Economy at Independence in the field of agriculture industry and other infrastructure of the economy. It also deals with the growth of development of different phases on the current issues in Indian economic policy.

Course Objectives

The objective of this course is to

1. To Understand the various aspects of India's economy.
2. To Develop a perspective on the different problems and approaches to economic planning and development in India
3. To Understand the role of the Indian Economy in the global context, and how different factors have affected this process
4. To Know the development process in India after independence
5. To Understand the problems and measures in their contextual perspective
6. To Identify and analyse current issues and policy formulation

Course Outcomes

Upon completion of this course, the students will be able to

CO1: Explain the Historical Growth and Development of the Indian Economy
CO2: Assess the Concept and Development of Economic Planning in India
CO3: Interpret the major Economic Issues related to Poverty and Unemployment
CO4: Assess and analyse the Concept and Functioning of India's External Sector
CO5: Assess and analyse the Development of the Industrial Sector in India.

Modules	Blooms level*	Number of hours
MODULE I: Economic Development on the Eve of Independence Major features of the economy at the time of independence: Colonial economy; Semi-feudal economy; Backward economy; Stagnant economy	L1, L2,	8
MODULE II Planning in India Objectives; Strategy; Broad achievements and failures; Five Year Plans — objectives, allocation and targets; New economic reforms — Liberalization, privatization and globalization; Rationale behind economic reforms; Progress of privatization and globalization; NITI Aayog and latest developments; Viksit Bharat@2047	L1, L2,	10
MODULE III: Major Economic Issues Poverty Alleviation; Unemployment; Inequality -Disparities between urban and rural areas, as well as among different states, have been a major issue, Infrastructure Deficiency- in sectors like transportation, energy, and healthcare; Corruption- public services, government projects, and business operations. Environmental Sustainability-sustainable development practices and policies to balance economic growth with environmental conservation. Globalization and	L1, L2	10

SEMESTER-III

DECO2351	MACROECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The objective of the course is to provide students with a thorough understanding of the principles of economics that apply to an economic system as a whole. This course aims to introduce the fundamentals of Macroeconomic theories, policies and models from a historical perspective. It deals with totals or aggregate measures of the economy, like national income or average unemployment rates, aggregate consumption, aggregate investment, etc. Macroeconomics asks how economic aggregates are determined, why problems related to aggregate economic performance occur, and what government can and should do to overcome such problems. Throughout the course, a focus will be on 'critical thinking' to analyze macroeconomic problems

Course Objectives

The objective of this course is to

1. This course aims to introduce the fundamentals of Macroeconomic theories, policies and models from a historical perspective.
2. To enable the students to develop a critical insight on Classical and Keynesian macroeconomic models.
3. To understand the relationship between inflation and employment by providing exposure to the constructions of Friedman, Phelps & Phillips.

Course Outcomes

Upon completion of this course, the students will be able to

CO1: Analyse the factors determining gross domestic product, employment, the general level of prices and interest rates.

CO2: Critically Evaluate Economic Theories.

CO3: Apply Theories of Money and Investment to assess the functioning of financial markets.

CO4: Evaluate Consumption Theories in the context of changing economic conditions and individual behaviour.

CO5: Analyze inflation types, business cycle theories, and the effectiveness of economic policies in stabilizing the economy.

CO6: Demonstrate a deep understanding of market equilibrium, both in the product and money markets and its relevance to macroeconomic stability.

Modules	Blooms level*	Number of hours
MODULE I: Introduction & National Income Accounting The roots of macroeconomics, macroeconomic concerns, the role of government in the macro economy, the components of the macro economy, the methodology of macroeconomics; Concepts of GDP and national income, approaches to calculating GDP, GDP and personal income, Nominal and real GDP, Limitations of the GDP concept.	L1, L3,L4, L6	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE II: Income and Employment Determination Determination of Income and Employment, Classical Theory of Income and employment, Say's law of Markets; Wage Price Flexibility; Implication of Classical Theory; Keynes Theory of Income and employment; Theories of Demand for Money: Quantity Theory and Keynes approach; Characteristics of a monetary economy; the supply of money and overall liquidity position; credit creation	L1, L3,L4, L6	12
MODULE III: Consumption Theories Consumption function; theory of investment-marginal efficiency of capital; saving and investment; The Investment Multiplier and its application to LDC's; Income Consumption Relationship-Absolute Income Hypothesis, Relative Income Hypothesis; Permanent Income Hypothesis, Life Cycle Hypothesis	L1, L3,L4,L6	10
MODULE IV: Investment Theories Types of Investment; Classical & Keynes Approach; Multiplier- Concept of Multiplier, Leakages in Multiplier; Concept of Acceleration.	L1,L3,L4,L6	10
MODULE V: Inflation & Business Cycle Inflation: types, causes, consequences and impact on the Indian economy; remedial measures; Fiscal policy: objectives, targets, instruments and implications on an economy. Monetary policy :objectives, targets, instruments and implications on an economy. Business Cycle Theories of Schumpeter, Kaldor, Samuelson and Hicks; Control of business cycles –relative efficacy of monetary and fiscal policies	L1,L3,L4,L6	10
MODULE VI: Equilibrium of Product Market and Money Market Theory of Interest; IS and LM curves: Derivation, shifts and rotations. Simultaneous equilibrium of product market and money markets..	L1,L3,L4,L6	10

Bloom's Level:
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

DECO2301	AGRICULTURAL ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This subject is aimed at providing knowledge on the agricultural economy of India and developing a critical study on recent agricultural crises in India. As an introductory course on the basics of the agricultural economy of India, it enables the students to learn the importance of agriculture in the economy of India. This course explores the economic principles and theories applied to agriculture in the unique context of India. Students will analyze agricultural policies, market structures, technology adoption, rural development, and sustainability issues within the Indian agricultural sector. The course also covers key challenges and potential solutions to enhance agricultural productivity, income, and rural livelihoods in India.

Course Objectives

The objective of this course is to

1. This subject is aimed at providing knowledge on the agricultural economy of India, its development, productivity, rural indebtedness and defects in the agricultural market and to develop a critical study on recent agricultural crises in India.
2. To familiarize the agricultural situation in India to provide a sound knowledge base on India's Agricultural economy before the green revolution and after it.
3. It will enhance the conceptual knowledge in finding the relationship between Agriculture and the economic development of the country.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify the Features and Importance of Agriculture in the Indian Economy.
CO2: Track the History of Agriculture Development in India.
CO3: Assess the Concept and features of Agriculture Marketing in India.
CO4: Analyse the Issues and Growth-related aspects of the Indian Agriculture Sector.

Modules	Blooms level*	Number of hours
MODULE I: Agriculture in the Indian Economy Features of Agriculture - Importance of Agriculture in the Indian Economy – Relationship between Agriculture and Non-Agriculture sectors, Agricultural Geography of India, Agro-climatic Zones and Crop Pattern in India	L1, L2, L6	8
MODULE II: Issues of Agricultural Development in India Agriculture Development in India - Subdivision and Fragmentation of holdings in India and causes - Land Tenure and Land Reforms Productivity in Agriculture - Factors of Production in Agriculture: Land, Labor, Capital, and Technology, Input-Output Analysis in Agriculture New Agriculture Strategy - Green Revolution - Nature of Food Economy - Agriculture Price Policy in India - Public Distribution System	L1, L2 , L6	13

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

SEMESTER-IV

DECO2451	PUBLIC FINANCE	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This subject is primarily aimed at introducing principles of public finance, the role of different governments, public expenditure, taxation, budget and fiscal policy in India. The government plays different roles and performs varied functions which are different from earlier societies. In this context, the public financial functions of the government need to be understood by a student, by studying the relevant theory, empirical analysis and functioning of modern public finance.

Course Objectives

The objective of this course is to

i. Understand the role and functions of government in an organized society.
ii. Provide the students with an in-depth understanding of public revenue, public expenditure and public debt management.
iii. Provide the students with an understanding of budget and fiscal federalism with practical experience in the Indian context.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Demonstrate the economic and regulatory functions of the government and its significance in an organised society,
CO2: Examine the impact of government policies on taxation, expenditure and public debt.
CO3: Analyze the Union Budget of India and its macroeconomic implications in a federalism.

Modules	Blooms level*	Number of hours
MODULE I: Introduction Nature, Scope and Importance of Public Finance; Public Finance and Private Finance – Similarities and Dissimilarities; Theory of Maximum Social Advantage; Private goods, Public goods and Merit goods; Economic systems – Characteristics, Role of government in managing the economy under different economic systems; Market failure, Externalities – Problems in allocation of resources.	L1, L2, L4	10
MODULE II: Public Revenue Public Revenue - Sources of Public Revenue; Tax and non-tax revenue; Objectives of Taxation; Canons of Taxation; Characteristics of a good Tax system; Types of Taxes – Direct and Indirect; Proportional, Progressive, Regressive and Degressive taxes; Impact, Shifting and Incidence of Taxation; Effects of taxation; Benefit and ability-to-pay approaches; Subjective approach of ability to pay principle; Requirements of a sound tax system; Indian Tax Structure – VAT, GST; Chelliah Committee Report - Evaluation of Tax Reforms	L1, L3, L4, L6	12
MODULE III: Public Expenditure	L1, L3, L4,	14

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Public Expenditure – Meaning and Scope, Structure and growth of public expenditure; Wagner's Views on Public Expenditure; Peacock - Wiseman Hypothesis; Objectives of Public Expenditure (Musgrave's View), Canons of Public Expenditure; Effects of Public Expenditure; Growth of public expenditure in India; Role of public expenditure in development of the economy; Social cost-benefit analysis.	L6	
MODULE IV: Public Debt Public Debt: Meaning, objectives and Classification; Impact of Public Debt on the Economy; Causes and Consequences of public debt accumulation. Burden of Public debt; Methods of debt redemption. Debt Sustainability: Measures to assess and manage public debt sustainability. Debt Management Strategies: Approaches to debt management and their implications. Indian Public Debt Scenario: Analysis of India's public debt and strategies for prudent management. Budget: Principles of budgeting; Budgetary procedure; Types or Classification of budget – Revenue and Capital Budget, Balanced and Unbalanced budget	L1, L3, L4, L6	14
Module V: Fiscal Policy Objectives of Fiscal Policy; Role of Fiscal Policy in India; Factors that Affect Fiscal Policy – Roles of Multiplier and Accelerator, Roles of Taxation and Public Expenditure. Fiscal Policy-Economic Growth and Distribution Justice – Fiscal Policy and Economic Growth, Fiscal Policy and Distributive Justice. Impact of Deficit Financing policies on the economy – Effects on growth, employment, Income. Functions of Finance Commissions, (15th and 16th); Planning Commission; State Finance Commissions and Local Self Government finance.	L1, L3, L4, L6	10

Bloom's Level:
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5:Synthesis, L6:Evaluation

DECO2401	RESEARCH METHODOLOGY	L	T	P	C
Version 1.1	Date of Approval:	2	0	0	2
Pre-requisites/Exposure	Statistics for Economics				
Co-requisites					

Catalog Description

The course imparts skills to undertake data-based research. The student would develop, in addition to the deep knowledge of the use of scientific method(s) in knowledge generation, competency in executing sample surveys and reasonable exposure to a variety of secondary data sources and analysis of the data collected.

Course Objective:

To provide exposure to the students about the nature and extent of research orientation, which they are expected to possess when they enter the industry/organization as practitioners. To give them an understanding of the basic techniques and tools of Economics research. The objective of the course is to equip students with designing and adhering to the appropriate methodology for conducting quality research and familiarizing the students with different techniques for research related to economic issues.

Course Outcome:

On completion of this course, the students will be able to:

CO1: Apply scientific research methods and techniques in dealing with issues in Applied Economic Research.

CO2: Identify a research problem, prepare the research design, collect & analyse of data and writing of research reports with a focus on problem-oriented Applied Economics research in India.

CO3: Prepare research proposal for the dissertation work/ get research funding from agencies

CO4: Apply the key analytical techniques of the discipline of Statistics with confidence and use them to support and enhance the outcome of research work.

CO5: Analyze and take initiative in research activities at a professional level take up own research projects and manage a research team.

Modules	Blooms level*	Number of hours
MODULE I: Introduction Meaning and definition of research- classification of research (pure, applied, exploratory, descriptive, historical, diagnostic, experimental, qualitative, quantitative) - importance, applications and limitations of social science research- interdisciplinary and trans-disciplinary approaches Statistics and information - communication technology in research- Basic elements of the scientific method- theory and research- the meaning of methodology	L1, L2, L3, L4, L5, L6	9
Module II: Research problem and design An overview of the different steps in the research process - Selection of the topic and formulation of the research problem in Economics with illustrations- review of literature- Research design, features of a good design-different research design for exploratory, descriptive, diagnostic and experimental research	L1, L2, L3, L4, L5, L6	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module III: Collection and analysis of data Sample design- probability and non-probability sampling- complex random sampling designs- Methods of collecting primary data- questionnaire and schedules- sources of secondary data on Indian economy- case study method -processing of data- sources of hypothesis-Testing of hypothesis – procedure for testing hypothesis-one tailed and two-tailed tests – basics of the important parametric and non-parametric tests- basic awareness of SPSS	L1, L2, L3, L4, L5, L6	8
Module IV: Interpretation and preparation of the report Interpretation, drawing conclusions and reporting it structure of the research report- Types of reports- Methods of footnotes and referencing	L1, L2, L3, L4, L5, L6	5

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

DECO2402	BANKING AND FINANCIAL INSTITUTIONS	L	T	P	C
Version 1.1	Date of Approval:	1	1	0	2
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

In this course, the students are provided with substantive knowledge regarding the various banking and financial institutions operating in the country. Enumerating various types of financial instruments, financial institutions, and financial services within the Indian financial landscape. Thereafter comprehensive analysis of central banking, commercial banking and development banks are done for students to get comprehensive knowledge on the same. The next phase deals extensively with prevailing financial practices and the working of other non-banking financial institutions including major insurance companies. Finally, a detailed appraisal of the regulatory framework associated with the financial market is made. The overall aim of this course is to make the students familiar with meaningful knowledge about the changing paradigm in the banking and financial sector.

Course Objectives

The objective of this course is to

1. Make the students aware of theoretical concepts related to the origin and functionalities of banking and financial institutions with special reference to the regulatory framework.
2. Provide students with extensive exposure to the prevailing practices and major players in the banking and financial sector in the country.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understand the theoretical concepts related to the origin and functionalities of banking and financial institutions, and the regulatory framework that governs them.

CO2: Analyse and evaluate the roles and functions of different types of financial institutions, such as commercial banks, investment banks, and credit unions.

CO3: Synthesize and apply theoretical knowledge to critically assess and propose solutions to real-world issues and challenges in the banking and financial sector.

CO4: Explore contemporary issues and challenges faced by the banking and financial industry, such as digital banking, fintech innovations, and changing customer preferences.

CO5: Identify and explain the major regulatory bodies and frameworks that oversee the banking and financial sector, including their roles and responsibilities.

Modules	Blooms level*	Number of hours
MODULE I: Indian Financial System Introduction to financial systems; Indicators of financial development; components of financial system: financial markets, financial instruments, financial institutions and financial services; role, functions, and types of financial institutions.	L1, L2,	6
MODULE II: Banking Institutions Banks- concept, classifications, objectives, and functions. Structure of the Indian banking system: Central Bank (Reserve bank of India), Commercial banks and the nationalisation of commercial banks, Cooperative banks, Regional Rural banks, Development banks, NABARD, SFBs, and Microfinance Institutions	L1, L2, L4	6

SEMESTER-V

DECO2551	INTERNATIONAL ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course provides a strong foundation in the various theories of international economics. It also enables the understanding of the trade policies and practices adopted in various countries as well as the impact of the same. The course exposes the students to the forms of economic integration in theory and practice. The module on the structure of the balance of payments and foreign exchange markets gives an in-depth understanding of the same and the issues therein. The course concludes with a detailed discussion of the international monetary system and the economic crises in recent times.

Course Objectives

The objective of this course is to

1. Introduce the different theories about international trade.
2. Enhance the understanding of trade policies and practices adopted globally.
3. Understand how cross-country differences in endowment and technology determine the world trade pattern and why similar countries also trade with each other.
4. Comprehend the interlinkages between the balance of payment, foreign exchange markets, financial liberalization and economic crises.
5. Provide a theoretical and practical understanding of the forms and effects of economic integration.

Course Outcomes

On completion of this course, the students will be able to:
CO1: Demonstrate a strong foundation in the theories of international economics.
CO2: Examine the trade policies and practices adopted globally.
CO3: Apply economic reasoning to issues of the day surrounding globalization.
CO4: Interpret the causes and consequences of economic crises and other issues that have occurred globally in recent times.
CO5: Analyse the effects of economic integration on the economy.

Modules	Blooms level: l*	Number of hours
MODULE I: Introduction and International Trade Theories Meaning, Nature and Scope of International Economics; The Subject Matter of International Economics; Theories of International Trade: Trade Based on Absolute Advantage; Trade Based on Comparative Advantage; Haberler's Opportunity Cost Theory; Mill's Reciprocal Demand Theory; Factor Endowment Theory: Heckscher Ohlin Theorem; Factor Price Equalisation theorem; Leontief paradox. Intra-industry trade.	L1, L3, L4, L6	12
MODULE II: Gains from Trade Gains from Trade: Distribution of Gains; Special Gains to Small Countries; Disadvantages/Problems of Trade; Factors affecting Gains from Trade; The Basis for and the Gains from Trade with Increasing Costs; Trade Based on	L1, L3, L4, L6	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Differences in Tastes; The Equilibrium Relative Commodity Price with Trade; Partial Equilibrium Analysis & General Equilibrium Analysis.		
MODULE III: Terms of Trade Terms of Trade: Types of Terms of Trade; Different Concepts of Terms of Trade; Factors Affecting Terms of Trade; Problems of Measurement of Terms of Trade; Economic Growth and International Trade: Effects of Growth on Trade – Production and Consumption effects. Effects of growth on terms of trade; Immiserating growth; Increase in factor endowments and International Trade: Rybczynski theorem; Harmful Effects of Trade.	L1, L3, L4, L6	12
MODULE IV: The Balance of Payments, Foreign Exchange Rates Balance of Payments: Principles; Disequilibrium in BOP, BOP Crisis in India in 1991. Functions of the Foreign Exchange Markets; Foreign Exchange Rates; Purchasing Power Parity Theory; Stable and Unstable Foreign Exchange Markets. Fixed v/s Flexible Exchange Rate. Role of RBI in foreign exchange management.	L1, L3,L4,L6	12
Module V: Economic Integration Meaning of Economic Integration, Trade-Creating Customs Unions; Trade-Diverting Customs Unions; The Theory of the Second Best and Other Static Welfare Effects of Customs Unions; EU, ASEAN, SAARC, BRICS, G7, G20, Multilateralism; WTO; New outlook towards a global trading system.	L1, L3, L4, L6	12

DECO2501	ADVANCED STATISTICAL METHODS IN ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Basic understanding of statistical concepts				
Co-requisites	Basic understanding of MS Excel				

Course Description

In this course, students learn the conceptual underpinnings of statistical methods and how to apply them to address more advanced statistical questions than are covered in a statistical method in economics course. The statistical methods covered in the course are useful for many types of questions that relate to multiple variables and/or multiple groups. Learning how to effectively use data and statistical methods to make evidence-based business decisions is the overarching goal of the course. Statistical analyses will be performed using SPSS and Excel.

Course Objectives

The objective of this course is to

1. Understand the types of questions that the statistical method addresses and apply the method to other examples and situations.
2. Implement the method using software (e.g., SPSS or Microsoft Excel).
3. Interpret the results in a way that addresses the question of interest.
4. Use data to make evidence-based decisions and communicate the purposes of the analyses, the findings from the analysis, and the implications of those findings.

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply statistical methods and hypothesis testing to business problems

CO2: Understand the details, complexities and implications of hypothesis testing.

CO3: Understand the details, complexities and implications of Analysis of Variance (ANOVA)

Modules	Blooms level*	Number of hours
MODULE I: Probability: Introduction, random experiments, sample space, events and algebra of events. Definitions of Probability-classical, statistical, and axiomatic. Conditional Probability, Addition and multiplication theorem of probability, independent events, Theorem of Total probability, Bayes' theorem and its applications.	L1,L2, L3 L4, L5, L6	12
MODULE II: Random variables Discrete and continuous, illustrations and properties of random variables, pmf, pdf and cdf, Two-dimensional random variables: Joint, marginal and conditional pmf/pdf, independence of random variables. Univariate transformation. Mathematical Expectation: Expectation of random variables and their properties.	L1,L2, L3 L4, L5, L6	12

Prof. (Dr.) Anil Kumar

MODULE III: Probability distributions Discrete Probability Distributions: Uniform, Binomial, Poisson, Geometric, Negative Binomial and Hyper-geometric distributions along with their characteristic properties and limiting/approximation cases. Continuous probability distributions: Normal, Exponential, and Uniform distributions along with their characteristic properties and limiting/approximation cases.	L1, L2, L3 L4, L5, L6	12
MODULE IV: Estimation Concepts of estimation, unbiasedness, sufficiency, consistency and efficiency. Principles of test of significance: Null and alternative hypotheses (simple and composite), Type-I and Type-II errors, critical region, level of significance, size and power, best critical region, most powerful test. Sampling distribution and standard error.	L1, L2, L3 L4, L5, L6	12
MODULE V: Hypothesis Testing Large sample tests, exact sampling tests: t-test, F-test and ANOVA, z-transformation, Chi-square tests	L1, L2, L3 L4, L5, L6	12

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

DECO2502	HISTORY OF ECONOMIC THOUGHT	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course is essential for a student who aspires to advanced training in economics. Contemporary economic ideas have evolved over many centuries. The evolution of economics in each instance was as much a response to immediate economic problems and policy issues as it was a self-conscious attempt to refine the earlier analysis by correcting mistakes and filling in the gaps in analysis. Economic ideas did not evolve in isolation but were an integral and important part of the evolution of modern social thought. Prevailing ideas of science, scientific rigour and measurement played a significant role in the shaping of economic science at each stage of its evolution. This course, tracing the history of economic thought, would enable the student to understand how contemporary economics came to be what it is.

Course Objectives

The objective of this course is to

1. Students will be able to understand well-developed economic theories and distinguish them from inconsistent ones.
2. Students will be able to understand the evolution of economic thoughts, views and ideas of different economists from time to time, even before Adam Smith (1776).
3. Students will be able to gain knowledge regarding various economic models and theories developed from the very beginning of economies and will be able to analyze their pros and cons for current economic scenarios.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the basic and very important thoughts and views regarding different economic subjects.

CO2: Explain and analyse the different economic models and theories developed by mercantilists, physiocrats, classical, marginalists, and neo–classical and modern economists.

CO3: Describe the impact and influence of different economic thoughts on the current economic setup of the countries.

CO4: Discuss the changes required for the growth and development of particular countries and make a comparative analysis.

CO5: Comprehend the development of the theory of economics from a historical perspective and emerging paradigms and aberrations with its reasons and will Debate on similarities and differences among different economy schools.

SEMESTER-VI

DECO2651	ECONOMICS OF GROWTH & DEVELOPMENT	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course explores theories and empirical evidence related to economic growth and development. Students will analyze the factors influencing economic growth, the role of institutions, policies, and globalization, and the challenges faced by developing economies. The course will provide insights into both macroeconomic and microeconomic aspects of growth and development, preparing students to critically assess development strategies and policies.

Course Objective:

By the end of the course, students should be able to:

1. Understand Growth Theories: Explain classical and modern theories of economic growth.
Analyze factors influencing economic growth at the macroeconomic level.
2. Examine Development Theories: Understand key development theories, including dependency theory, modernization theory, and structuralist approaches. Evaluate the relevance of these theories in different historical and global contexts.
3. Analyze Policy Interventions: Assess the impact of various policy interventions on economic growth and development. Understand the role of institutions and governance in promoting sustainable development.
4. Explore Globalization and Development: Analyze the effects of globalization on developing economies. Understand trade, investment, and technology transfer in the context of economic development.
5. Evaluate Social and Human Development: Examine social and human development indicators and their role in economic development. Analyze poverty, inequality, and social justice issues in developing economies.

Course Outcome:

Upon successful completion of the course, students will be able to:

CO1: Demonstrate Knowledge-Demonstrate a deep understanding of growth and development theories, policies, and challenges.
CO2: Critical Analysis- Critically analyze economic growth strategies and development policies in different countries. Evaluate the strengths and weaknesses of various development theories.
CO3: Policy Evaluation-Evaluate the effectiveness of economic policies in promoting inclusive growth and sustainable development. Understand the implications of policy decisions on different sectors of the economy.
CO4: Research and Presentation Skills-Conduct research on specific development issues and present findings effectively. Use data and empirical evidence to support arguments and policy recommendations.
CO5: Global Perspective- Develop a global perspective on economic development challenges and opportunities. Understand the interconnectedness of economies in the era of globalization.

Modules	Blooms level*	Number of hours

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana

Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module I : Introduction Definitions and distinctions between economic growth and development. Overview of Economic Growth and Development: Historical perspectives on global economic development and Sustainable Development Measurement of Economic Development: GDP, HDI, and other Indicators– Factors determining economic development – Obstacles of economic development: vicious circle of poverty.	L1, L2, L3, L4, L5, L6	10
Module II: Theories of Economic Growth: Classical growth theories: Mercantilist, Smithian, and Malthusian perspectives. Growth Theories- Karl Marx-Schumpeter's theory of Development-Keynes-Rostow's stages of Economic Growth-Big Bush theory. Modern growth theories: Harrod-Domar, Solow-Swan, and endogenous growth models. Endogenous growth models: Human capital, innovation, and institutions. Assessing the limitations and applicability of growth theories.	L1, L2, L3, L4, L5, L6	10
Module III: Development Theories and Approaches: Dependency theory, structuralist theory, and modernization theory. Human development approach and capability approach (Amartya Sen). Millennium Development Goals (MDGs) and Sustainable Development Goals (SDGs). Poverty, Inequality, and Development, Education and Health in Economic Development, Gender Inequality and Development	L1, L2, L3, L4, L5, L6	10
Module IV: Growth and Development Policies Role of government and institutions in promoting economic growth and development. Policy interventions in areas such as education, health, infrastructure, and industrialization. Development Planning and Policies: Evaluation of the effectiveness of development policies. Import substitution vs. export-led growth strategies. Poverty alleviation programs and social safety nets. Institutional Development: Role of institutions in economic development. Governance, corruption, and development outcomes.	*L1, L2, L3, L4, L5, L6*	10
Module V: Globalization, Trade, and Development Globalization and Economic Development: The impact of globalization on developing economies. Trade liberalization, foreign direct investment, and technology transfer. Trade-offs and challenges faced by developing countries in a globalized world. Sustainable Development Goals (SDGs): Understanding the UNs' SDGs and their relevance to developing countries. Case studies on successful implementation of SDGs in different regions.	*L1, L2, L3, L4, L5, L6*	10
Module VI: Development Challenges and Future Directions Income Inequality and Poverty: Causes and consequences of income inequality. Poverty measurement methods and anti-poverty programs. Environmental Sustainability: Environmental degradation and its economic implications. Sustainable development practices and green growth. Emerging issues in growth and development: Digital transformation, gender equity, and inclusive development. Impact of digitalization and artificial intelligence on developing economies. Future challenges and opportunities in the era of technology-driven development. Success stories and lessons learned from development experiences.	*L1, L2, L3, L4, L5, L6*	10

DECO2601	MONETARY ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Macroeconomics.				
Co-requisites					

Catalog Description

This course introduces the concept of money; what it is, why we use it and how it is created. It examines monetary policy in a closed and open economy, considering several models that allow real effects of monetary policy, ranging from new-Classical to Keynesian. Specific models will be introduced and solved, allowing students to see exactly how these models work and what differentiates one from another.

Course Objectives

The objective of this course is to

1. Analyze and discuss the essential functions of money, including its role as a medium of exchange, unit of account, and store of value in economic transactions.
2. Gain insight into how money is created, including the roles of central banks, commercial banks, and the money supply. They should understand the mechanisms by which new money enters the economy.
3. Evaluate the objectives and tools of monetary policy, as well as the role of central banks in influencing the money supply and interest rates. Also, to assess the impact of monetary policy on the economy.
4. Distinguish between closed and open economies, understand the implications of international trade and capital flows, and apply economic models to analyze these scenarios.
5. Analyze the real-world consequences of monetary policy decisions, including their impact on variables like inflation, employment, and economic growth.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understand the fundamental concepts and principles of money, monetary policy, and economic models.

CO2: Explain the process of money creation and the central role of central banks and commercial banks in managing the money supply.

CO3: Critically assess the objectives and tools of monetary policy and understand the implications of different policy choices for the broader economy.

CO4: Differentiate between new-Classical, Keynesian, and other economic models, and apply the appropriate model for analyzing specific economic scenarios.

CO5: Apply economic models to real-world situations, demonstrating the ability to make informed judgments and policy recommendations.

Modules	Blooms level*	Number of hours
MODULE I: Introduction to Money and its Functions The Concept of Money; Functions of Money; Historical Evolution of Money - Barter Systems, Emergence of Currency, Development of Modern Money; Types	L1, L2,	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

of Money - Physical Money (Coins and Banknotes), Digital and Electronic Money, and Cryptocurrencies; Role of Money in an Economy: The Quantity Theory of Money and its relationship with the supply and demand for money.		
MODULE II: Money Creation and Monetary Policy Money Creation Process- Role of Central Banks, The Money Supply Process, Fractional Reserve Banking, the concept of the money multiplier and its connection to the money supply. Central Banks and Their Functions, Objectives, Role in Monetary Policy, Monetary Policy: Objectives, Tools of Monetary Policy - Open Market Operations, Reserve Requirements, Discount Rate, and Forward Guidance	L1, L2, L4	12
MODULE III: Closed Economy Models Introduction to Economic Models; New-Classical Models- Assumptions and Key Concepts, Implications for Monetary Policy; Keynesian Models - Assumptions and Key Concepts, Implications for Monetary Policy	L1, L2	12
MODULE IV: Open Economy Models Introduction to Open Economies- Defining Open Economies, Role of International Trade, Exchange Rates and Trade- Determinants of Exchange Rates, Trade Balances and Flows; Open Economy Models - Model Assumptions and Components, Analysis of Open Economy Effects	L1, L2, L4	12
MODULE V: Evaluating Monetary Policy and Real-World Applications Real-World Application of Models - Applying Economic Models to Real Situations: Case Studies and Examples; Analyzing the Effects of Monetary Policy- Evaluating Monetary Policy Decisions, Measuring Policy Impact; Monetary Policy in Practice- Central Banks' Decision-Making Process, Monetary Policy Challenges and Implementation	L1, L2, L3, L4	12

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

DECO2602	ECONOMETRICS: BASIC THEORY AND APPLICATIONS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Basic understanding of statistical concepts				
Co-requisites	Basics of MS Excel				

Catalog Description

This course provides a comprehensive introduction to basic econometric concepts and techniques. It covers the estimation and diagnostic testing of simple and multiple regression models. The course also covers the consequences of tests for misspecification of regression models. At the same time, helps develop a deeper understanding of the applications and limitations of econometrics in various fields of economics and related disciplines.

Course Objectives

The objective of this course is to

1. Introduce students to fundamental econometric concepts, tools, and techniques used in empirical economic analysis.
2. Provide a solid understanding of the principles of estimation in econometrics, focusing on both simple and multiple regression models.
3. Equip students with the skills to conduct diagnostic tests to assess the validity and reliability of regression models.
4. Explore the consequences of misspecification in regression models and how to identify and address these issues.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define and explain key econometric concepts, including endogeneity, heteroscedasticity, multicollinearity, and autocorrelation.
CO2: Perform and interpret ordinary least squares (OLS) estimation for simple and multiple regression models, including the estimation of coefficients, standard errors, and confidence intervals.
CO3: Apply appropriate diagnostic tests to assess the assumptions of the classical linear regression model (CLRM), including tests for homoscedasticity, normality of residuals, and linearity of relationships.
CO4: Identify and address misspecification in regression models by employing relevant diagnostic techniques, such as specification tests and model selection methods.
CO5: Construct and interpret hypothesis tests and confidence intervals for regression coefficients, making informed inferences about the relationship between variables.
CO6: Select and justify the most suitable regression model for a given empirical analysis, taking into account the research question and data characteristics.
CO7: Use econometric software and tools effectively to estimate, diagnose, and analyze regression models, and to generate meaningful graphical representations of the results.

DECO2603	INDUSTRIAL ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course exposes students to theory and analytical understanding of the industrial sector of the economy. The core idea behind the inclusion of this subject is to introduce the students to the industrial developmental side of India, its different facts, different areas, policies & prospects. Industrial Economics is concerned with issues such as Patterns, Processes, speed and implications of Industrialization and the main focus is on issues relating to the composition of Indian Industry, Industrial Policies of India and introduction to Industrial finance of India. It also discusses productivity studies concerning the Indian industries and the impact of government policies on the Indian industries since independence.

Course Objectives

The objective of this course is to

1. Examine industrial models and their links in practice, with a special accent on government policy.
2. Understand various industrial productivity concepts and methods of measurement.
3. Provide insight and exposure to industrial development in India.
4. Enhance the conceptual knowledge of students regarding the role & functions of financial institutions in Industrial Development in India

Course Outcomes

On completion of this course, the students will be able to

CO1: Outline the basic idea about the issues and policies about the industrial environment.

CO2: Demonstrate and explain various industrial productivity concepts and measurements.

CO3: Describe the various theories, problems, and perspectives and integrate them to begin the process of developing an innovative research agenda.

CO4: Demonstrate the role & functions of financial institutions in the Industrial Development of India.

Modules	Blooms level*	Number of hours
MODULE I: Introduction Concepts in industrial Economics; Meaning, Characteristics, Patterns, speed of industrialization; Effect of Industrialization; Factors inhibiting industrialization; Measures conducive to industrialization; Size and efficiency of an industrial unit; Factors determining the optimum size of industrial units. Regional inequalities in industries. Agro-based industries. **Group-wise Project on an industrial sector**	L1, L2, L4	12
MODULE II: Industrial Composition and Productivity Composition of Indian Industry: Small Scale Industries; Large Scale Industries; Micro Small and Medium Industries (MSMEs). Public and Private Sectors: Role of Public Sector in India; Problems of Public Sector Enterprises; Role of Private Sector in India; Problems and Prospects of Private Sector. Productivity: Concept, importance and growth of productivity; Efficiency of Firm and Industry: Dimensions of Industrial Efficiency; Determinants of Economic Efficiency. Empirical evidence of productivity in Indian industries; Industrial sickness - factors	L1, L2, L4	14

Prof. (Dr.) Anil Kumar

Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

accounting for it and consequences. **Group-wise Project on an industrial sector**		
MODULE III: Theories of Industries and Location Theories of Industrial Growth: Hoffmann's Industrial Growth Theory; Chenery's Pattern of Industrial Growth. Theories of industrial location: Alfred Weber's Theory of Industrial Location; Sargant Florence's Theory of Industrial Location; Factors Influencing the Location of Industries. **Group-wise Project on an industrial sector**	L1, L2, L4	12
MODULE IV: Role of Industrial Policies in Industrial Development Introduction to Industrial Policy; Industrial Development in India**:** New Industrial Policy 1991 and recent industrial policies in India; Industrial Growth and Pattern in India; Performance of Industrial Development Since Independence; Globalization and its impacts on industries; Industrial regulations in India. **Group wise Project on industrial sector**	L1, L2, L4	12
MODULE V: Industrial Finance Need of finance; Types of finance; Sources of finance; Choice of funding; Role and functions of IFCI, IDBI, SIDBI, MSFC in Industrial Finance. **Group wise Project on industrial sector**	L1, L2, L4	10

SEMESTER-VII

DECO2701	ADVANCED MICROECONOMICS THEORY & APPLICATIONS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This paper analyses the economic behaviour of individuals, firms and markets. It is mainly concerned with the objective of equipping the students rigorously and comprehensively with the various aspects of consumer behaviour and demand analysis, production theory and behaviour of costs, the theory of traditional markets and the equilibrium of firms in modern non-profit maximizing framework.

Course Objectives

The objective of this course is to:

1. acquire a profound knowledge of fundamental problems from microeconomics
2. Understand that policy decisions require different kinds of actions to take place when producing goods/services for different markets.
3. Understand models used for the analysis of problems within microeconomics, and learn the latest developments in microeconomic theory and apply them in research.
4. Understand the modelling of markets and present ideas mathematically, and provide economic modelling of human decisions under uncertainty, cooperation, etc

Course Outcomes

On completion of this course, the students will be able to

CO1: analyse various theories of demand and its relation with the market.
CO2: interpret various decisions related to production and behaviour of different firms.
CO3: Design or relate different models of market structure.
CO4: Compile and review various theories related to market structure.

Modules	Blooms level*	Number of hours
MODULE 1: Demand Analysis Theories of demand — utility; indifference curve (income and substitution effects, Slutsky theorem, compensated demand curve) and their applications; Revealed preference theory; Revision of demand theory by Hicks; Characteristics of goods approach; consumer's choice involving risk; Indirect utility functions (duality theory); Recent developments in demand analysis (pragmatic approach and linear expenditure systems); Consumer's surplus; Inter-temporal consumption; Recent developments in demand; Elementary theory of price formation — demand and supply equilibrium; Cobweb theorem; lagged adjustment in interrelated markets.	L1,L2, L3 L4, L5, L6	12
MODULE 2 Production, Costs and Uncertainty & Information Technology, isoquants, production with one or more variable inputs, returns to scale, short run and long run costs. Total, average and marginal costs, cost minimization and expansion path, elasticity of substitution, Cobb – Douglas Linear and CES production function.	L1,L2, L3 L4, L5, L6	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Expected utility; Why expected utility is reasonable; Risk aversion; Risk spreading; Asymmetric Information-Market for lemons; Market signalling. Principle- agent problems Moral Hazard;		
MODULE 3: Market Structure & Theories of Distribution Marginal analysis as an approach to price and output determination: perfect competition — short-run and long-run equilibrium of the firm and industry, price and output determination, supply curve; Perfect competition: short-run and long-run equilibrium of a firm and industry. Monopoly: short-run and long-run equilibrium of a monopolist, price discrimination under monopoly: first-degree, second degree and third-degree discrimination; welfare aspects, monopoly control and regulation. Monopolistic Competition. Marginal productivity theory, the general theory of factor price discrimination under competition, monopoly and monopsony; Determination of rent wages and interest; Concept of exploitation of labour and role of labour unions in wage determination; The nature of profit; Euler's Product – Exhaustion theorem	L1,L2, L3 L4, L5, L6	10
MODULE 4: Game theory Theory of games, zero-sum and non-zero-sum games; Nash equilibrium; Mixed strategies; Oligopoly- Cournot, Bertrand and Stackelberg models; Cartels - Joint profit maximization and market sharing cartels; Price leadership - low-cost price and dominant price leadership;	L1,L2, L3 L4, L5, L6	6
Module 5: Managerial theories of firm Marginalism - attacks and defence; Average cost pricing- the markup rule; Limit pricing-Bain's concept of entry and barriers to entry; Model of Sylos-Labini and Franco Modigliani; Baumol's static and dynamic models of sales revenue maximization; Marris's model of managerial enterprise; Williamson's simplified model of managerial discretion;		
Module 6: General Equilibrium & Welfare Economics Meaning, partial v/s general equilibrium approach, Walrasian General Equilibrium model, Tatonnement, Existence, Uniqueness and stability of equilibrium; A graphical treatment of the 2-factor, 2-commodity, 2-consumer general equilibrium system (2x2x2 model) Criteria of social welfare – value judgments in welfare economics, basic theorems of new welfare economics – Pareto Optimality and necessary conditions to achieve it; Market forms and welfare. Compensation principle: Kaldor – Hick's criterion, Little's criterion, the Bergson criterion: social welfare function.

DECO2702	ADVANCED MACROECONOMIC THEORY & APPLICATIONS	L	T	P	C
Version 1.1	Date of Approval	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course aims to lead students to the arena of macroeconomic theories, policies and models such as investment demand, the New classical model, the New Keynesian model and macroeconomics of an open economy**.**

Course Objectives

The objective of this course is to

1. Measure living standards, inflation, and unemployment for use as economic indicators.
2. Understanding the perspective of classical economists on the nature and causes of the wealth of nations.
3. Understand the factors determining gross domestic product, employment, the general level of prices, and interest rates.
4. Explain the differences between the classical and Keynesian approaches to understanding the macro economy, including the political implications of each approach and the role of an activist fiscal policy in the Keynesian approach.
5. Analyze the determinants of the relative strengths of fiscal and monetary policy for affecting gross domestic product.
6. Understand the importance of wage flexibility and price expectations for the impact of spending behaviour on gross domestic production, the unemployment rate, and the rate of inflation.
7. Understand monetarist, supply-siders, and New Classical approaches to macroeconomic issues.
8. Learn the determinants of long-term economic growth, including the role of saving and investment on the rate of growth.
9. Understand the role of international trade, international finance and exchange rates in affecting living standards.
10. Analyze the factors that determine currency exchange rates and the impact of changes in exchange rates on exports and imports.

Course Outcomes

On completion of this course, the students will be able to

CO1: Analyse the workings of the economy.
CO2: Assess and analyse various theories of investment demand.
CO3: Compile the different models of macroeconomics.
CO4: Analyse how Equilibrium is determined in the Money Market

Modules	Blooms level*	Number of hours
MODULE I: New Macroeconomics Main Features of New Classical Macro Economics; Friedman's Adaptive Expectations hypothesis; Rational Expectations-Anticipated and Unanticipated Shocks; Lucas Critique; Policy Ineffectiveness theorem; Policy Implications of	L1, L2,, L3, L4, L5	15

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

New Classical approach; New Keynesian Model of wage-price stickiness; Mankiw Model; Efficiency wage Model; Policy Implication of New Keynesian Model		
MODULE II: Theory of Inflation and Business Cycle Inflation-Bent Hansen Model of Inflation; Modified Philips Curve-Friedman, Tobin and Solow; Money-Inflation Link; Fishers's Equation; Budget Deficit and Growth of Money Supply; Money Financing of Budget Deficit and debt Financing of Budget Deficit; Inflation Tax, Ricardian Equivalence; Theories of Trade cycle-Cob-web theory; Kaldor's Model, real Business Cycle	L1, L2,, L3, L4, L5	15
MODULE III: Macroeconomics and Open Economy Macroeconomics variables and equilibrium in open economy; IS-LM Model; IS-LM curve and Balance of Trade-Zero Capital Mobility; Implications of capital mobility for Macroeconomic policy; Mundell-Fleming Model under fixed and flexible exchange rate system; Relative effectiveness of monetary and fiscal policies under imperfect and perfect Mobility; Marshall-learner condition; Internal and External Balances and Economics Policies	L1, L2, L3, L4, L5	15
MODULE IV: Macro Economic Policy Issues Macroeconomic Policy-Meaning and Objectives; Targets and Instruments; Fixed and Flexible target approach; Uncertainty and economic policies; Lags in the effect of policy; Gradualism vs Shock therapy; Rules Vs Discretion; Problems of coordination of macroeconomic policy objectives; Policy Implications of Monetarism vs Keynesianism. Contemporary Issues in Macroeconomics and their Dynamic Model-based Analyses	L1,L2, L3, L4, L5	15

DECO2703	ENVIRONMENT, SUSTAINABILITY & RESOURCE ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Environment and Resource Economics is an advanced course that integrates the principles of environmental economics and resource economics. It provides students with a comprehensive understanding of the economic aspects of environmental issues, natural resource management, and sustainable development. The course explores the economic theories, tools, and policies used to analyze and address the challenges related to environmental degradation, resource allocation, and sustainability.

Course Objectives

By the end of the course, students will have developed a comprehensive understanding of the economic principles, theories, and tools used in the field of environment and resource economics. They will be equipped with the knowledge and skills to critically analyze environmental problems, assess policy interventions, and propose sustainable solutions to address the challenges of environmental degradation and resource management.

Course Outcomes

Upon successful completion of the course, a student will be able to:

CO1. Develop an in-depth understanding of the economic principles and theories underlying environmental and resource economics.

CO 2. Analyze the economic implications of environmental problems and their interdependence with resource allocation.

CO 3. Explore the role of economic instruments and policies in addressing environmental degradation and managing natural resources.

CO 4. Examine the challenges and trade-offs between economic growth, environmental sustainability, and resource conservation.

CO 5. Enhance critical thinking and problem-solving skills through case studies and real-world applications in environment and resource economics.

Modules	Blooms level*	Number of Lecture hours

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 1: Introduction to Environment and Resource Economics - Definition and scope of environment and resource economics - The interplay between environmental degradation and resource scarcity - Economic approaches to sustainable development **Market Failure and Environmental Externalities** - Market failures in the presence of environmental externalities - Cost-benefit analysis and environmental valuation - Economic instruments for pollution control - Externalities and their impact on resource allocation - Public goods and common property resources	L1, L2, L3, L4,L5	12
MODULE 2: Natural Resource Economics - Classification and characteristics of natural resources - Intertemporal allocation and optimal extraction of non-renewable resources - Renewable resource management and sustainability - Cost-benefit analysis, Discounting and intergenerational equity, Economic impact assessment **Economics of Climate Change** - The economics of greenhouse gas emissions and global warming - Mitigation and adaptation strategies for climate change - Economic analysis of climate policies and international agreements	L1, L2, L3, L4,L5	12
MODULE 3: Biodiversity and Ecosystem Services Economics - Valuation of biodiversity and ecosystem services - Economic approaches to conservation and ecosystem management - Market-based instruments for biodiversity conservation **Environmental Policy and Governance** - Command and control regulations vs. market-based approaches - Environmental policy instruments (taxes, subsidies, tradable permits) - Institutions and governance mechanisms for environmental management	L1, L2, L3, L4,L5	12
MODULE 4: Economic Analysis of Energy, Water Resources and Natural Resource Markets - Economics of energy production and consumption - Resource markets and pricing (e.g., minerals, forests, fisheries) - Economic impacts of resource extraction and energy transitions **Economics of Water Resources** - Water scarcity and economics of water allocation - Pricing mechanisms and efficiency measures in water management - Integrated water resource management and conflicts	L1, L2, L3, L4,L5	12
Module 5: Sustainability and Economic Development Sustainable Development- Conceptual Frameworks and Goals Sustainable Development Indicators and Measurements Economics of Sustainability- Balancing Economic Growth and Environmental Conservation Sustainable Development and Poverty Alleviation - Linkages between economic development, poverty, and environmental degradation, Green growth strategies and inclusive sustainability **Case Studies and Applications in Environment and Resource Economics** - Case studies on specific environmental and resource management challenges in Sustainable development. - Application of economic tools and models to real-world problems - Group projects and presentations	L1, L2, L3, L4,L5	12

DECO2704	URBAN ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

To understand the causes and consequences of urban growth and economic issues in the provision of urban amenities. Urban economics is the study of the location choices of firms and consumers and how these choices affect city size, urban growth or decline, the spatial distribution of economic activity, pollution, congestion, poverty and segregation.

Course Objectives

The objective of this course is to

1. Define the Model of the Urban System
2. Understand the concept and Importance of the Economics of Location
3. Understand the development of regional metropolitan economies.
4. Assess the economic underpinnings and issues of selected urban problems (e.g., poverty, transportation, education, employment
5. Trace the evolution of cities and urban areas, including the economic incentives for their development.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the concepts and functions of Urban Systems
CO2: Describe the unique features of the Economics of Location
CO3: Asses the Importance of Urban Infrastructure
CO4: Assess and analyse the concept of Urban Planning
CO5: Assess and analyse the concept of Urban Finance

Modules	Blooms level*	Number of hours
MODULE 1: Urban Systems Urban Economics: Meaning; Five Axioms of Urban Economics. Urbanization; Structure of Human settlement; Functional dependencies between human settlements of different sizes; Urban Settlement; Urban system; Characteristics of an economy passing through different stages of urbanization.	L1, L2,	6
MODULE 2: Economics of Location Economics of location: Satellite Town; Neo-classical spatial equilibrium; Neo-classical location theory; Central Place Theory; Core-Periphery Model; Core-Periphery Stages of Development in an Urban System; Agglomeration economics; Location Decisions of Firms; Why Do Firms Cluster? Benefits and Costs of Bigger Cities; Urban Spatial Structure: Features and Concepts of City Structure.	L1, L2,	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Urbanization Challenges Urbanization, Urban Life, and Urban Spaces; Patterns and process of Urban development; Nature and dimensions, factors initiating and perpetuating urbanization process; Characteristics of an economy passing through different stages of urbanization; Overpopulation and Congestion; Urban sprawls, Urbanization and Housing; Urban Poverty and Emerging New Inequalities; Urban crimes; Urban Infrastructure: Water Supply, Sanitation and Solid waste management.	L1, L2	8
MODULE 4: Urban Planning Urban Planning: Meaning, Need and Importance; Types of Plans for Urban Planning; Strategy of Urban Planning; Role of Smart Cities for economic development. Urban Planning under Five-Year Plans in India; Urban Land Use Planning: Meaning and Types; Objectives, Processes and Steps in Land Use Planning; Principles of Land Use Planning; Key Legislations on Land Use Planning; The Future of Sustainable Cities; Sustainable Urban Development.	L1, L2, L4	8
MODULE 5: Urban Governance Urban Governance: Concept and Need; Urban Local Bodies and Municipal Governance in India; Urban Governance in India: Structural Changes and Innovations; Impediments in Improved Governance; Measures to strengthen Urban Governance; Management of Urban Services.	L1, L3, L4	6

Bloom's Level:
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

DECO2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATIONS	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DECO2801	ADVANCED ECONOMETRICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Basic understanding of statistics and econometrics				
Co-requisites	Basic understanding of MS Excel or other statistical software				

Course Description
This course focuses on developing different techniques that are commonly used in empirical research. This course assumes that students are familiar with simple linear regression and multiple regression analysis and will build on this foundation. Students will learn how to analyze data, make informed conclusions, and critique the limitations and assumptions of empirical analysis. The course will emphasize the application of econometrics, particularly through econometric software packages such as STATA/Eviews/R.

Course Objectives
The objective of this course is to
1. Familiarize the students with advanced econometric methods, estimation methods and related econometric theories and application of methods for data analysis and data interpretation.
2. Facilitate hands-on experience to estimate econometric models using software like Eviews, STATA, SPSS, R etc. various statistical problems.

Course Outcomes
On completion of this course, the students will be able to
CO1: Identify different datasets and use a variety of econometric techniques for conducting empirical research using data.
CO2: Apply econometric techniques that are most appropriate to use, by assessing their limitations and assumptions, for making causal inferences for a given question and dataset.
CO3: Analyze data by implementing econometric techniques using the econometric software package STATA.

Modules	Blooms level*	Number of hours
MODULE 1: Simultaneous Equation Models Introduction and examples; The simultaneous equation bias and inconsistency of OLS estimators; The identification problem; Rules of identification — order and rank conditions.	L1, L2,L3,L4,L5,L6	8
MODULE 2: Methods of Estimating Simultaneous Equation System Recursive Methods and OLS; Indirect Least Squares (ILS), Instrumental Variables (IV) 2SLS and 3SLS Methods	L1, L2,L3,L4,L5,L6	12
MODULE 3: Time Series Analysis Stationarity, unit roots, co-integration-spurious regression, Dickey-Fuller test, Engle-Granger test, Random walk model	L1, L2,L3,L4,L5,L6	10

DECO2802	DATA ANALYSIS USING STATISTICAL SOFTWARE	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure	Basic understanding of statistics and econometrics				
Co-requisites	Basic understanding of MS Excel				

Course Description

This course will provide students with a comprehensive overview of data management, exploration, visualization and analysis. It is designed to serve as a bridge between economic theory, statistics/econometrics, and practical work. The emphasis throughout the class will be placed on providing hands-on experience with data analysis using statistical software.

Course Objectives

The objective of this course is to

1. Introduce students to the field by covering state-of-the-art modelling, analysis and visualization techniques.
2. Emphasize practical challenges involving complex real-world data and include case studies and hands-on work to communicate relevant data patterns in the form of graphical displays.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explore univariate and bivariate data consisting of categorical and quantitative variables by using numerical summary measures to explain which summary measures have good statistical properties.
CO2: Apply methods for data analysis using different data types: temporal data, categorical data, and textual data.
CO3: Draw conclusions about the distribution of data using graphs, summarize data using measures of centre, spread and association, and analyze data using normal distribution.

Modules	Blooms level*	Number of hours
MODULE 1: Descriptive Statistics Descriptive Statistics: Type of data (dichotomous, continuous, nominal, categorical, ordinal, etc.); proportions, ratios and rates; building, cleaning and administering databases in SPSS (including defining, computing, selecting and recoding variables for data analyses); measures of central tendency (mean, median, mode); measures of dispersion (range, extreme values, percentiles, variance, standard deviation); data presentation and visualisation (tabulations, bar/pie diagrams, histogram, frequency curve, boxplots, scatterplots, etc.	L1, L2,L3,L4,L5,L6	8
MODULE 2: Statistical Inference Statistical population, Parameter, Sample, Statistic, Sampling distribution, sampling error, point estimation, interval estimation, Null hypothesis, Alternative hypothesis, level of significance, sample size determination, one-side test, two-side test, type I error, type II error, power of a test, confidence intervals for proportions, means, variances, standard deviations	L1, L2,L3,L4,L5,L6	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Parametric Tests Large sample tests (Z-test) and small sample tests (t-test, F-test, Chi-square test), ANOVA (One-way analysis, Two-way analysis, missing observations), Bonferroni test for multiple comparisons. Non-parametric tests: Kolmogorov-Smirnov test of normality, difference between 2 medians (Mann-Whitney and Wilcoxon tests for independent and related samples); difference among >2 medians (Kruskal-Wallis and Kendall tests for independent and related samples)	L1, L2,L3,L4,L5,L6	10
MODULE 4: Correlation and Regression Analysis definition of Correlation, Pearson correlation coefficient, Spearman correlation coefficient, coefficient of determination, testing the significance of correlation coefficient, correlation matrix, linear regression lines, multiple regression analysis with more than two variables, stepwise regression, best-set regression, residual analysis, logistic regression analysis.	L1, L2,L3,L4,L5,L6	10
MODULE 5: Time Series Analysis : Components of time series, Decomposition of time series, Trend analysis (moving averages method, curve fitting method), growth rates (linear, geometric), test for trend, Seasonality indices, smoothing methods (moving average method of smoothing, exponential smoothing), periodogram analysis	L1, L2,L3,L4,L5,L6	10

DECO2803	FINANCIAL ECONOMICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Globally, the financial sectors have, in recent years, been expanding at phenomenal rates and witnessing dramatic changes in their range and sophistication of operations. Hence, there is increasing demand for financial practitioners who are not only equipped with a good foundation in economics, mathematics and statistics but who are also well-trained in the emerging theoretical and empirical tools for a better understanding of the sector. The Financial Economics course is meant to cater to this demand. This course introduces students to the economics of finance. Some of the basic models used to benchmark the valuation of assets and derivatives are studied in detail; these include the CAPM and the Binomial Option Pricing models.

Course Objectives

The objective of this course is to

1. Understand various terms and concepts related to financial markets.
2. Acquire extensive theoretical knowledge in portfolio risk management.
3. Understand different asset-pricing models and apply them to real-world economics
4. Understand the operation of financial derivatives.

Course Outcomes

On completion of this course, the students will be able to

CO1: Students acquire extensive theoretical knowledge in portfolio risk management, capital asset pricing, and the operation of financial derivatives.

CO2: The course familiarizes students with the terms and concepts related to financial markets and helps them comprehend business news/articles better.

CO3: The course also helps to enhance a student's understanding of real-life investment decisions.

CO4: The course has a strong employability quotient given the relatively high demand for skilled experts in the financial sector.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Financial Markets Capital markets, consumption and investments with and without capital markets, market places and transaction costs and the breakdown of separation; Fisher separation theorem; the agency problem; maximization of shareholder's wealth.	L1, L2,	7
MODULE 2: Mean-Variance Portfolio Theory Measuring portfolio return and risks, the effect of diversification, minimum variance portfolio, perfectly correlated assets, minimum variance opportunity set, optimal portfolio choice; mean-variance frontier of risky and risk-free asset, portfolio weights.	L1, L2, L4	7
MODULE 3: Index Models, CAPM & APT Models of asset returns, multi-index models, single index model, systematic and specific risk, equilibrium models-capital asset pricing model, capital market line, security market line, estimation of beta, arbitrage pricing theory.	L1, L2	7
MODULE 4: Fixed Income Securities	L1, L2, L4	7

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Bond prices, spot prices, discount factors, and arbitrage, forward rates and yield-to-maturity, Price sensitivity, Hedging.		
MODULE 5: Future Contracts and Markets: Option Pricing Models Forward and future contracts and markets; European and American options; pricing futures, wasp and synthetic futures; bounds for option prices, put-call parity; derivation of option pricing formula-Binomial approach; Black-Scholes option pricing models, option to expand, valuation of a real option	L1, L2, L3, L4	8

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

DECO2804	HEALTH AND GENDER ECONOMICS	L	T	P	C
Version 1.1	Date of Approval: Latest Approved	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The importance of education and health in improving well-being is reflected in their inclusion among the Millennium Development Goals adopted by the United Nations member states, which include among other goals, achieving universal primary education, reducing child mortality, improving maternal health and combating diseases.

Course Objective:

This course provides a microeconomic framework to analyse, among other things, individual choice in the demand for health and education, government intervention and aspects of inequity and discrimination in both sectors. It also gives an overview of health and education in India.

Course Outcome:

Upon successful completion of the course, a student will be able to:

CO1: Describe the unique economics of the health care system adopted by the United Nations member states.
CO2: Describe the differences between public and private insurance systems.
CO3: Describe the role of health policy in shaping incentives for consumers and providers.
CO4: Evaluate hypothetical and existing health policies in India.
CO5: Devise feasible policies to solve healthcare system problems using economic analysis**.**
CO6: Evaluate the strengths and weakness of analyses in health care economics.

Modules	Blooms level*	Number of hours
Module I: Introduction to Health Economics; Health, good health and quality of life; Determinants of good health; Measurement of health status; Mortality, morbidity and "HALY family" of summary measures QALY	L1, L2, L3, L4, L5, L6	10
Module II: Healthcare Delivery and Market Analysis Healthcare Markets: Demand and Supply Dynamics, Provider Behavior: Incentives, Regulation, and Quality , Pharmaceutical Markets and Pricing Strategies **Demand for Health and Demand for Health Care Services**. Supplier-induced demand; Production of health care, providers- physicians, hospitals and pharmaceuticals; Role of technological change in health care; Sustainability, equity-efficiency trade-off	L1, L2, L3, L4, L5, L6	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module III: Health Cost concepts – opportunity cost, fixed and variable costs, incremental and marginal cost, direct and indirect medical costs time costs and travel cost. **Healthcare Financing and Insurance**; Information asymmetry –adverse selection; Risk aversion; Moral hazard; Health insurance-challenges; Insurance concepts; Co-payments; Co-insurance rates, deductibles, group insurance Models of Healthcare Financing: Public vs. Private Systems Health Insurance Mechanisms and Coverage Equity and Efficiency in Healthcare Financing	L1, L2, L3, L4, L5, L6	14
Module IV: **Health and Education Sector and Health Policy in India**: Overview: Health outcomes; health systems; health financing Literacy rates, school participation, school quality measures **Health Policy and Evaluation:** Health Policy Analysis and Design Assessing Healthcare Interventions and Programs, Economic Evaluation in Healthcare: Cost-Benefit and Cost-Effectiveness Analysis	L1, L2, L3, L4, L5, L6	10
Module V Gender Economics Introduction to Gender Economics, Theoretical frameworks, Measuring Gender Inequality, Gender Disparities in Labor Markets, Education, Human Capital & Gender, Gender & Entrepreneurship and Innovation, Gender& Macroeconomic Policies. Case study on policy interventions to understand how gender influences economic outcomes and shapes socio-economic structures.	L1,L2,L3, L4,L5,L6	14

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

DECO2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

COMPUTER APPLICATION IN ECONOMIC ANALYSIS

Course Code: ECO4103 **Credit Unit: 03**

Course Objective:

The objective of the course is to demonstrate knowledge of the computer applications in economic analysis and be able to choose the appropriate application for a given task.

Course Content:

Module 1: Computers and Peripherals
Basic components of computer – CPU, input-output devices, keyboard, mouse and scanner, Video display, printers and plotters, data storage and retrieval, hard disk, floppy disk and CD ROM; Types of computers and their applications; Computer networking and resource sharing, Hardware and software - Operating system.

Module 2: Data Processing, Techniques and Algorithms
Concept of data, record and file; Types of data and data structures, data analysis; File handling and, appending and cascading, closing and attribute control; Data storage and retrieval; Data operations; Algorithms like sorting, merging, joining and bifurcation; Database concepts and operation on database; DBMS and RDBMS. Introduction to MS Excel and MS Access

Module 3: Software-based Analysis
SPSS/STATISTICA: A package for Statistical Analysis in Social Sciences. Basic Operations; File, Edit, View, Data, Transformation, Graph and Utilities. Statistical Analysis using SPSS/STATISTICA: Summary, Tabulation and Comparison of Summary Statistics; Correlation and Regression (Linear and Non-linear) using SPSS/STATISTICA; Discriminant analysis, Principal Components, Factor Analysis and Cluster analysis by SPSS/STATISTICA; Use of MATLAB.

Module 4: IT Application to Economics
On line banking; ATM‘s Electronic stock exchange; Electronic trading; Data sharing and dissemination; Electronic transaction; Document delivery; Authentication and validation transaction processing – Electronic trading and marketing; On line shopping and malls, B2B, B2C, models, Document and transaction security and digital signature; Integrated transaction on mobile platforms. E-Commerce applications in India

Examination Scheme:

INDIAN ECONOMY-ISSUES & POLICY

Course Code: ECO4105 **Credit Unit: 04**

Course Objective:
The objective of this course is to provide to students the basic knowledge of the structure of Indian Economy and its current developments.

Course Contents

Module I: Growth and Structure of Indian Economy Since 1950
Growth of Indianeconomy since 1950; Measures for raising economic growth; Trends in the nature andmmagnitude of poverty, inequality and unemployment; Changes in occupational Pattern, Demographic trends and economic development; Rate and trend in saving, Investment and growth rate

Module II: Growth of Agricultural and Industrial Sectors
Trends in agricultural production and productivity; Food policy and Public Distribution System (PDS); Impact of liberalization in agricultural sector; Industrial Growth performance and problems; Industrial concentration; its nature and extent; Cottage and small scale industries; Impact of liberalization and privatization on the
Industrial sector

Module III: Money Supply, Inflation and Public Policies
Factors determining interest rates; Money supply and inflation in India; financial sector reforms during 1990's Recent tax reforms; Growth and structure of Subsidies in India; Macro-economic policies – fiscal policy, income policy and Stabilization policy; Parallel economy and its implications

Module IV: International Trade Policies
Composition and directions of India's foreign trade; Factors determining the Balance of payment. Is equilibrium in the balance of payment? Causes, consequences; and policy measure; India's policies towards foreign capital; collaboration, export; Promotion and import substitution. Exchange rate policy and the convertibility of Rupee

Module V: Development Policies
India's planned development; Successes and failures. Policies for social justice (With special reference to the alleviation of poverty, inequality and unemployment) Sectoral policies: Industrial and agrarian. Policies for liberalization and privatization

TERM PAPER/ REVIEW OF DISSERTATION-I

Course Code: ECO4231 **Credit Units: 02**

GUIDELINES FOR TERM PAPER

A term (or research) paper is primarily a record of intelligent articulation through several sources on a particular topic of a given subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned/chosen. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned/chosen. The evaluation will be done by Board of examiners comprising of the faculties.

The procedure for writing a term paper may consists of the following steps:

Choosing a topic

1. Finding sources of material
2. Collecting the notes
3. Outlining the paper
4. Writing the first draft
5. Editing & preparing the final paper

1. Choosing a Topic

The topic chosen should not be too general. Student will normally consult the faculty guide while finalizing the topic.

2. **Finding Sources of material**

- The material sources should be not more than 5 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- Begin by making a list of subject-headings under which you might expect the topics to be listed.
- The sources could be books and magazines articles, news stories, periodicals, journals, internet etc.

3. Collecting the notes

Skim through sources, locate the useful material, make notes of it, including quotes and information for footnotes.

- ***Get facts, not just opinions***. Compare the facts with author's conclusion(s)/recommendations.
- In research studies, notice the methods and procedures, results & conclusions.
- Check cross references.

4. Outlining the paper

- Review notes to find main sub-divisions of the topic.
- Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- statement of purpose/objectives
- main body of the paper
- statement of summary and possible conclusion(s)/recommendations

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Avoid short, bumpy telegraphic sentences and long straggling sentences with more than one main ideas.

6. Editing & preparing the final paper

a) Before writing a term paper, you should ensure you have an issue(s) which you attempt to address in your paper and this should be kept in mind throughout the paper. Include only information/ details/ analyses that are relevant to the issue(s) at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure that you briefly explain the relevance of every section.
b) Read the paper to ensure that the language is not awkward, and that it "flows" smoothly.
c) Check for proper spelling, phrasing and sentence construction.
d) Check for proper form on footnotes, quotes, and punctuation.
e) Check to see that quotations serve one of the following purposes:
   (i) Show evidence of what an author has said.
   (ii) Avoid misrepresentation through restatement.
   (iii) Save unnecessary writing when ideas have been well expressed by the original author.
f) Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

Term papers should be composed of the following sections:

1. Title page
2. Abstract
3. Introduction
4. Review of the Literature
5. Discussion&Conclusion
6. References
7. Appendix

Generally, the introduction, discussion, conclusion and references should account for a third of the paper and the review part should be two thirds of the paper.

Discussion

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the paper.

Conclusion

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

a. summary of objectives and issues raised.
b. summary of findings
c. summary of limitations of the study at hand
d. details of possibilities for related future research

References

From the very beginning of the research work, one should be careful to note all details of articles or any other material gathered. The Reference part should list ALL references included in the paper. References not included in the text in any form should NOT be listed here. The key issue here is consistency. Choose a particular convention and stick to this.

Appendix
The appendix should be used for data collected (e.g. questionnaires, transcripts etc.) and for tables and graphs not included in the main text due to their subsidiary nature or to space constraints in the main text.

The Layout Guidelines for the Term Paper
- A4 size Paper
  - Font: Arial (10 points) or Times New Roman (12 points)
  - Line spacing: 1.5
  - Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Assessment Scheme:

Continuous Evaluation: 40%
(Based on abstract writing, interim draft, general approach, research orientation, readings undertaken etc.)

Final Evaluation: 60%
(Based on the organization of the paper, objectives/ problem profile/ issue outlining, comprehensiveness of the research, flow of the idea/ ideas, relevance of material used/presented, outcomes vs. objectives, presentation/ viva etc.)

FUNDAMENTALS OF ECONOMETRICS

Course Code: ECO4301 **CreditUnits: 04**

Course Objective:

This course presents the basic econometrics techniques emphasizing numerical estimation of economic relationships as applied to practical economic and managerial problems

Course Contents:

Module I: Basic Econometrics

Nature, meaning and scope of econometrics; Simple and general linear regression model — Assumptions, Estimation (through OLS approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of R2 and adjusted R2; Concept and analysis of variance approach and its application in regression analysis;

Module II: Problems in Regression Analysis

Nature, test, consequences and remedial steps of problems of heteroscedasticity; Multicollinearity and auto-correlation; Problems of specification error; Errors of measurement

Module III:Regressions with Qualitative Independent Variables

Dummy variable technique — Testing structural stability of regression models comparing to regressions, interaction effects, seasonal analysis, piecewise linear regression, use of dummy variables, regression with dummy dependent variables; The LPM, Logit, Probit and Tobit models — Applications.

Module IV: Dynamic Econometric Model

Autoregressive and distributed lag models — Koyak model, Partial adjustment model, adaptive expectations; Instrumental variables; Problem of auto-correlation — Application; Almon approach to distributed-lag models; Error correlation mechanism, Causality test, Granger test and Sim's test

Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

RESEARCH METHODS IN ECONOMICS

Course Code: ECO4303 **Credit Units: 03**

Course Objective:

The need of this subject is for those concerned with research to pay due attention to the designing and adhering to the appropriate methodology for improving the quality of research and specifically for introducing the different techniques of doing marketing research.

Course Contents:

Module I -Preliminaries
Meaning and definition of research- classification of research(pure, applied, exploratory, descriptive, historical, diagnostic, experimental, qualitative, quantitative) - importance, applications and limitations of social science research- interdisciplinary and trans-disciplinary approaches Statistics and information -communication technology in research- Basic elements of the scientific method-theory and research- the meaning of methodology

Module II- Research problem and design
An overview of the different steps in research process-selection of the topic and formulation of the research problem in Economics with illustrations- review of literature- Research design, features of a good design-different research designs for exploratory, descriptive, diagnostic and experimental research

Module III -Collection and analysis of data
Sample design- probability and non probability sampling- complex random sampling designs-Methods of collecting primary data- questionnaire and schedules- sources of secondary data on Indian economy- case study method -processing of data- sources of hypothesis-Testing of hypothesis – procedure for testing hypothesis-one tailed and two tailed tests – basics of the important parametric and non-parametric tests- basic awareness of SPSS

Module IV- Interpretation and preparation of the report
Interpretation, drawing conclusions and reporting it-Structure of the research report- Types of reports-Methods of footnotes and referencing

Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

ENVIRONMENTAL ECONOMICS

Course Code: ECO4309 **Credit Units: 03**

Course Objective:

The course will provide an insight into basics of environmental problems environmental management and interrelationshipbetweenenvironment and economic development.

Course Contents:

Module I: Introduction
Environmental Economics - Meaning, nature and Historical development of environmental economics. Structure of environment, Characteristics of Environment, Sustainable development: concept, indicator and measurement.

Module II: Waste management
Pollution prevention, physical operations of waste treatment, Water pollution, Air pollution and control, Global Environmental Issues

Module III: Environmental Management
Environmental Legislations in India, Environment Quality Objectives and standards, Institutional Environmental agreements; Tools for environmental management; Environmental economics

Module IV:Environment and Economic Development
Interrelationship between environment and economic development; Environnemental pollution in global perspective; Case studies on environmental management – Textile Industries and Tanneries

Examination Scheme:

Components	P0(Att.)	P1	C1	CT	EE
Weightage (%)	5	5	5	15	70

TERM PAPER/ REVIEW OF DISSERTATION-II

Course Code: ECO4331 **Credit Units: 02**

GUIDELINES FOR TERM PAPER

A term (or research) paper is primarily a record of intelligent articulation through several sources on a particular topic of a given subject.

The students will choose the topic at the beginning of the session in consultation with the faculty assigned/chosen. The progress of the paper will be monitored regularly by the faculty. At the end of the semester the detailed paper on the topic will be submitted to the faculty assigned/chosen. The evaluation will be done by Board of examiners comprising of the faculties.

The procedure for writing a term paper may consists of the following steps:

Choosing a topic

1. Finding sources of material
2. Collecting the notes
3. Outlining the paper
4. Writing the first draft
5. Editing & preparing the final paper

1. Choosing a Topic

The topic chosen should not be too general. Student will normally consult the faculty guide while finalizing the topic.

2. **Finding Sources of material**

- The material sources should be not more than 5 years old unless the nature of the paper is such that it involves examining older writings from a historical point of view.
- Begin by making a list of subject-headings under which you might expect the topics to be listed.
- The sources could be books and magazines articles, news stories, periodicals, journals, internet etc.

3. Collecting the notes

Skim through sources, locate the useful material, make notes of it, including quotes and information for footnotes.

- ***Get facts, not just opinions***. Compare the facts with author's conclusion(s)/recommendations.
- In research studies, notice the methods and procedures, results & conclusions.
- Check cross references.

4. Outlining the paper

- Review notes to find main sub-divisions of the topic.
- Sort the collected material again under each main division to find sub-sections for outline so that it begins to look more coherent and takes on a definite structure. If it does not, try going back and sorting again for main divisions, to see if another general pattern is possible.

5. Writing the first draft

Write the paper around the outline, being sure that you indicate in the first part of the paper what its purpose is. You may follow the following:

- statement of purpose/objectives
- main body of the paper
- statement of summary and possible conclusion(s)/recommendations

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Avoid short, bumpy telegraphic sentences and long straggling sentences with more than one main ideas.

6. Editing & preparing the final paper

a. Before writing a term paper, you should ensure you have an issue(s) which you attempt to address in your paper and this should be kept in mind throughout the paper. Include only information/ details/ analyses that are relevant to the issue(s) at hand. Sometimes, the relevance of a particular section may be clear to you but not to your readers. To avoid this, ensure that you briefly explain the relevance of every section.
b. Read the paper to ensure that the language is not awkward, and that it "flows" smoothly.
c. Check for proper spelling, phrasing and sentence construction.
d. Check for proper form on footnotes, quotes, and punctuation.
e. Check to see that quotations serve one of the following purposes:
   (i) Show evidence of what an author has said.
   (ii) Avoid misrepresentation through restatement.
   (iii) Save unnecessary writing when ideas have been well expressed by the original author.
f. Check for proper form on tables and graphs. Be certain that any table or graph is self-explanatory.

Term papers should be composed of the following sections:

1. Title page
2. Abstract
3. Introduction
4. Review of the Literature
5. Discussion&Conclusion
6. References
7. Appendix

Generally, the introduction, discussion, conclusion and references should account for a third of the paper and the review part should be two thirds of the paper.

Discussion

The discussion section either follows the results or may alternatively be integrated in the results section. The section should consist of a discussion of the results of the study focusing on the question posed in the paper.

Conclusion

The conclusion is often thought of as the easiest part of the paper but should by no means be disregarded. There are a number of key components which should not be omitted. These include:

a) summary of objectives and issues raised.
b) summary of findings
c) summary of limitations of the study at hand
d) details of possibilities for related future research

References

From the very beginning of the research work, one should be careful to note all details of articles or any other material gathered. The Reference part should list ALL references included in the paper. References not included in the text in any form should NOT be listed here. The key issue here is consistency. Choose a particular convention and stick to this.
