Binary Classification, Logistic Regression Cost Function, Gradient Descent, Derivatives, More Derivative Examples, Computation graph, Derivatives with a Computation Graph, Logistic Regression Gradient Descent, Gradient Descent on m Examples, Vectorization, More Vectorization Examples, Vectorizing Logistic Regression, Vectorizing Logistic Regression's Gradient Output, Explanation of logistic regression cost function

Module 3: Shallow neural networks:
Neural Networks Overview, Neural Network Representation, Computing a Neural Network's Output, Vectorizing across multiple examples, Explanation for Vectorized Implementation, Activation functions, Why do you need non-linear activation functions?, Derivatives of activation functions, Gradient descent for Neural Networks, Backpropagation intuition, Random Initialization

Module 4: Deep Neural Networks:
Deep L-layer neural network, Forward Propagation in a Deep Network, Getting your matrix dimensions right, Why deep representations?, Building blocks of deep neural networks, Forward and Backward Propagation, Parameters vs Hyperparameters, What does this have to do with the brain?

Module 5: Case study using real world data.
Building a neural network model and generating predictions from the model.

Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

TIME SERIES

Course Code: DSC4303 **Credit Units-03**

Course Contents:

Module 1: Autoregressive-moving average models ARIMA
Moving average models MA(q). Condition of invertability. Autoregressive models AR(p). Yull-Worker equations. Stationarity conditions. Autoregressive-moving average models ARMA (p,q).

Module 2: Coefficient estimation in ARIMA processes.
Coefficients estimation in autoregressive models. Coefficient estimation in ARMA (p) processes. Quality of adjustment of time series models. AIC information criterion. BIC information criterion. "Portmonto"-statistics.

Module 3: Forecasting in the framework of Box-Jenkins model
Forecasting, trend and seasonality in Box-Jenkins model.

Module 4: Non-stationary time series
Non-stationary time series. Time series with non-stationary variance. Non-stationary mean. ARIMA (p,d,q) models. The use of Box-Jenkins methodology to determination of order of integration.

Examination Scheme:

Components	CT	Attendance	Assignment/ Project/Seminar/Quiz	EE
Weightage (%)	15	5	10	70

GRAPH & SOCIAL NETWORK ANALYSIS

Course Code: DSC4304 **Credit Units-03**

Course Contents:

Module 1: Introduction to graph theory
Use of graph theory to construct different types of networks : Undirected, directed graphs, Cyclic, Directed acyclic graphs, trees, weighted graphs, bipartite graph, Study data structures of the graphs. Adjacency matrix, adjacency list.

Module 2: Study different network models
Small world phenomena, Scale free network, Erdös-Rényi model for random graphs, Watts and Strogatz model, Barabasi-Albert model

Module 3: Stduy network properties
Degree distribution, power law, graph density, graph isomorphism, path length, diameter, clique, shortest distance, clustering coefficient, network motifs, network centralities and node ranking, degree centrality, closeness centrality, betweenness centrality, eigenvector centrality, ecentricity centracility, subgraph centrality, matching index,

Module 4: Network randomization
Randomization with Erdös-Rényi model, Randomization with node degree conservation, Permutation of node labels

Module 5: Introduction to social network
Introduction to social network data, Different data format, Paths and Connectivity-Graphs to represent social relations. Working with network data- Network Datasets-Strong and weak ties - Closure, Structural Holes, and Social Capital.

Module 6: Data and Text Mining In Social Media
Data mining in nutshell, Social media, Motivations for data mining in social media, Data mining methods for social media. Social networking sites: illustrative examples. Text Mining: Keyword search, query semantics and answer ranking, Classification algorithms, Clustering algorithms.

Module 7: Community Detection in Social Networks
Introduction, Communities in context, core methods and algorithm for community detection, Quality functions, Agglomerative/Divisive algorithms, discuss different approached for clustering.

Module 8: Case study using real world data.

Examination Scheme:

NATURAL LANGUAGE PROCESSING

Course Code: DSC4305 **Credit Units-02**

Course Contents:

Module 1: Introduction to text mining
Introduction, Challenges of Text Processing, Character-Set Dependence, Language Dependence, Corpus Dependence, Application Dependence

Module 2: Exploring Text Data For Preliminary Ideas
A case study for a brief introduction, Examine multiple document corpus of text, Creation of text corpus, Text pre-processing, Stemming, Word tokenisation, Word vectorisation, Word embedding

Module 3: Natural Language Processing:
Sentiment Analysis, Word Frequency in text data, Wordclouds for visualizing sentiments with a case study, Wordclouds for Visualizing text data, Tidy wordclouds, Topic modelling a document

Module 4: Text Data and Machine Learning
Clustering for text data, Clustering tweets, Regression on text data, Introduction to RTextTools, More on RTextTools, Word2Vec approach, The Doc2Vec approach, Doc2Vec approach for predicting a binary outcome, Doc2Vec approach for multi-class classification

Module 5: Sentiment Analysis
What is sentiment, What is sentiment analysis, Scope of sentiment analysis: Document level, Sentence level, Sub-sentence level, Types of sentiment analysis, Word embeddings, Word associations or Text similarities, Building dictionaries, Summarise text, Polarity calculation, Algorithms for sentiment analysis: Rule based, Automatic Hybrid

Module 6: Case study using real world data.
Identify Spam-ham Emails or sms classification.

GRAPH & SOCIAL NETWORK ANALYSIS LAB

Course Code: DSC4306 **Credit Units-01**

Course Contents:

Module 1: Study Tools for graphs and network study :
Case studies will be implement by using any programming language such as R or python. Learn other tools like Cytoscape and Gephi, and igraph

Module 2: Introduction to graph theory
Input graph data : Read different network format, load network data, Construct network from matrix, Adjacency matrix. Input different types of networks : Undirected, directed graphs, Cyclic, Directed acyclic graphs, trees, weighted graphs, bipartite graph. Study data structures of the graphs. Adjacency matrix, adjacency list.

Module 3: Study different network models
Small world phenomena, Scale free network, Erdös-Rényi model for random graphs, Watts and Strogatz model, Barabasi-Albert model

Module 4: Stduy network properties
Degree distribution, power law, graph density, graph isomorphism, path length, diameter, clique, shortest distance, clustering coefficient, network motifs, network centralities and node ranking, degree centrality, closeness centrality, betweenness centrality, eigenvector centrality, ecentricity centracility, subgraph centrality, matching index,

Module 5: Network randomization
Randomization with Erdös-Rényi model, Randomization with node degree conservation, Permutation of node labels

Module 6: Introduction to social network
Introduction to social network data, Different data format, Paths and Connectivity-Graphs to represent social relations. Working with network data- Network Datasets-Strong and weak ties - Closure, Structural Holes, and Social Capital.

Module 7: Data and Text Mining In Social Media
Data mining in nutshell, Social media, Motivations for data mining in social media, Data mining methods for social media. Social networking sites: illustrative examples. Text Mining: Keyword search, query semantics and answer ranking, Classification algorithms, Clustering algorithms.

Module 8: Community Detection in Social Networks
Introduction, Communities in context, core methods and algorithm for community detection, Quality functions, Agglomerative/Divisive algorithms, discuss different approached for clustering.

Module 9: Case study using real world data.

BIG DATA TOOLS & TECHNOLOGIES-III

Course Code: DSC4307 **Credit Units-01**

Course Contents:

Module 1: Apache Sqoop (SQL to Hadoop)
Sqoop Tutorial, How does Sqoop Work, Sqoop JDBCDriver and Connectors ,Sqoop Importing Data Various Options to Import Data (Table Import , Binary Data Import ,Speedup the Import ,Filtering Import, Full Database Import ,Introduction to Sqoop

Module 2: Apache Flume
Data Acquisition: Apache Flume Introduction, Apache Flume Components, POSIX and HDFS File Write, Flume Events, Interceptors, Channel Selectors, Sink Processor

Module 3: Advanced Apache Flume
Sample Twitter Feed Configuration, Flume Channel (Memory Channel, File Channel),Sinks and Sink Processors, Sources, Channel Selectors, Interceptors

Module 4: HBase Introduction
Fundamentals of HBase, Usage Scenario of HBase, Use of HBase in Search Engine, HBase Data Model (Table and Row, Column Family and Column Qualifier, Cell and its Versioning, Regions and Region Server), HBase Designing Tables, HBase Data Coordinates, Versions and HBase Operation (Get/Scan, Put, Delete)

GENERALIZED & LINEAR MODELING LAB

Course Code: DSC4308 **Credit Units-01**

Course Contents:

Module 1: Linear Regression Models:
Multiple regression model, Parameter estimation, Maximum likelihood, Model adequacy checking, Weighted least squares with case studies

Module 2: Nonlinear Regression Models:
Linear and Non linear regression models, transforming a linear model, Parameter estimation with case studies

Module 3: Logistic and Poisson Regression Models:
Logistic regression, Poison regression, Overdispersion with case studies

Module 4: The Generalized Linear Model: Exponential family, Likelihood equations, Quasi likelihood, Gamma family, The power function, Generalized Estimating Equation with case studies

Examination Scheme:

DEEP LEARNING & NEURAL NETWORKS LAB

Course Code: DSC4310 **Credit Units-01**

Course Contents:

Module 1: Neural Networks Basics:
Calculation of Logistic Regression Cost Function, Implementation of Gradient Descent, Derivatives, More Derivative Examples, Computation graph, Derivatives with a Computation Graph, Logistic Regression Gradient Descent, Gradient Descent using case studies

Module 2: Shallow neural networks:
Neural Network Representation, Computing a Neural Network's Output, Vectorizing across multiple examples, Calculation of Activation functions, non-linear activation functions, Derivatives of activation functions, Gradient descent for Neural Networks, Backpropagation intuition, Random Initialization using case studies

Module 3: Deep Neural Networks:
Developing a Deep L-layer neural network, Forward Propagation in a Deep Network, Getting your matrix dimensions right, Understanding Building blocks of deep neural networks, Forward and Backward Propagation, Parameters vs Hyperparameters using case studies

Examination Scheme:

SUMMER INTERNSHIP EVALUATION

Course Code: DSC4335 **Credit Units: 08**

Guidelines:

There are certain phases of every Intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal classroom situations. These attributes are intellectual ability, professional judgment and decision-making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives:

- **Each student will be allotted a supervisor** for proper guidance.
- **Student will first submit synopsis in the format given by coordinator/supervisor.**
- Student will maintain a file (**Internship File/Project Report**). **Further, coordinator will provide NTCC project guidelines and sample to help in preparation of file.** The Internship File aims to encourage students to keep a personal record of their learning and achievement throughout the Programme. It can be used as the basis for lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development. The File will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization.

The **layout guidelines** for the Project Report

1. File should be in the following specification

- A4 size paper
- **Font**

For normal text Font Type and Size must be- Times New Roman, 12 pt. The minimum font size of materials within a table or a figure can be 10 point.

- **Margins**

A margin of 3.75 cm (1½ inch) is to be given on the binding edge while on the other sides it is to be 2.5 cm (1 inch). The text of the report, including headings, figures, tables, and notes, but excluding page numbers, must be accommodated within the page area.

- **Line Spacing**

The line spacing in the main text must be between one-and-a-half (1.5). Single line spacing should be given for figure captions, table titles, figure legends, and footnotes. Equations, tables, figures, and quotations should be set off from the main text with adequate space (not less than the normal line spacing adopted for the main text). Two consecutive paragraphs should be separated by a spacing which must be larger than the line spacing adopted for the text.

- **Tables and Figures**

Each sketch, drawing, graph and photograph should have a figure number and title below the figure etc. Numbering should be sequential, chapter wise. For instance, if there are 24 figures chapter 3

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

spread over all of its sections the figure numbers run from Figure 3.1 through Figure 3.24. In figures experimental data should typically be represented by centered symbols, and theoretical data by continuous curves.
Each table should have a table number and caption above the table. Numbering should be sequential, chapter wise, as in the case of Figure numbers. For instance, if there are 18 tables in chapter 3 the table numbers run from Figure 3.1 through Figure 3.18.
Make sure that figures and tables are complete in other respects such as legends, references (if any) and coordinate labels with units. Each figure and table must be explicitly referred to in the text and located where its first reference occurs, preferably after the reference.

- **Drawings**

All engineering drawings must conform to relevant Standards and should include a title block. If drawings are large they should be included at the back of the report in a separate pocket. In case drawings are made using CAD packages, a CD ROM should be included which contains all the files and details of the packages used.

- **Equations**

The numbering of equations should be sequential, chapter wise. Numbered equations must be explicitly referred to in the text.

2. Report Size: The maximum number of pages of the Report should be preferably between 50-80 pages.

3. Report Layout: The report should contain the following components
Front Page
Table of Content
Acknowledgement
Student Certificate
Company Profile (optional)
Introduction
Main Body
References / Bibliography

The File will include ***five sections*** in the order described below. The content and comprehensiveness of the main body and appendices of the report should include the following:
1. **The Title Page**--Title - An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.
2. **Declaration by the Students-**This is page number (i), the beginning of the small case Roman numeral page numbers. The student has to give a declaration to the effect that the data used for the work, the work depicted in the report, and the written material contained in the report are not copied from others and that due permission has been taken from, and due credit has been given to, the sources whenever they are used.
3. Certificate-This is page number (ii). The certificate will be signed by the Faculty Supervisor(s) before the viva-voce after verifying the format and by the Head of the Department after review with the Supervisor(s).
4. Acknowledgements-This is page number (iii). Keep this brief and avoid using informal language. This page must be signed by the candidate.
5. Abstract and **Keywords-**This is page number (iv). The abstract (preferably one page) should contain the context/relevance of the problem at hand, a description of what was done and a gist of the significant observations/results.
The keywords (maximum 6) are a hint that what is contained in the report.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

7. Contents-This is page number (v). The table of Contents should be titled just *Contents* (not Table of Contents). Try to fit it into one or two pages.
8. **Introduction**--short, but should include how and why you obtained the internship experience position and the relationship it has to your professional and career goals.
9. **Main Body**--should include but not be limited to daily tasks performed. Major projects contributed to, dates, hours on task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.
10. **References / Bibliography** --This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

ASSESSMENT OF THE INTERNSHIP FILE

Continuous Internal Assessment		**Final Assessment**
40 Marks		60 Marks

Continuous Internal Assessment consists of topic relevance, progress report and synopsis marks. Final Assessment includes viva, presentation and report marks.

Examination Scheme:

Components	**V**	**S**	**R**	**PR**	**FP**
Weightage (%)	20	20	20	20	20

V – Viva, S – Synopsis, FP – Final Presentation, R – Report, PR-Progress Report

DISSERTATION/ PROJECT REPORT/ PRESENTATION/ VIVA VOCE

Course Code: DSC4437 **Credit Units: 20**

GUIDELINES FOR DISSERTATION

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

The File is the principal means by which the work carried out will be assessed and therefore great care should be taken in its preparation.

In general, the File should be comprehensive and include

A short account of the activities that were undertaken as part of the project;

A statement about the extent to which the project has achieved its stated goals.

A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;

Any activities planned but not yet completed as part of the DISSERTION, or as a future initiative directly resulting from the project;

Any problems that have arisen that may be useful to document for future reference.

- **Report Layout**

The report should contain the following components:

- **Title or Cover Page**

The title page should contain the following information: Project Title; Student's Name; Course; Year; Supervisor's Name.

- **Acknowledgements** (optional)

Acknowledgment to any advisory or financial assistance received in the course of work may be given.

- **Abstract**

A good "Abstract" should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project

- **Table of Contents**

Titles and subtitles are to correspond exactly with those in the text.

- **Introduction**

Here a brief introduction to the problem that is central to the project and an outline of the structure of the rest of the report should be provided. The introduction should aim to catch the imagination of the reader, so excessive details should be avoided.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- **Materials and Methods**

This section should aim at experimental designs, materials used. Methodology should be mentioned in details including modifications if any.

- **Results and Discussion**

Present results, discuss and compare these with those from other workers, etc. In writing these section, emphasis should be given on what has been performed and achieved in the course of the work, rather than discuss in detail what is readily available in text books. Avoid abrupt changes in contents from section to section and maintain a lucid flow throughout the thesis. An opening and closing paragraph in every chapter could be included to aid in smooth flow.

Note that in writing the various secions, all figures and tables should as far as possible be next to the associated text, in the same orientation as the main text, numbered, and given appropriate titles or captions. All major equations should also be numbered and unless it is really necessary never write in "point" form.

- **Conclusion**

A conclusion should be the final section in which the outcome of the work is mentioned briefly.

- **Future prospects**

- **Appendices**

The Appendix contains material which is of interest to the reader but not an integral part of the thesis and any problem that have arisen that may be useful to document for future reference.

- **References / Bibliography**

This should include papers and books referred to in the body of the report. These should be ordered alphabetically on the author's surname. The titles of journals preferably should not be abbreviated; if they are, abbreviations must comply with an internationally recognised system.

Examples

For research article

Voravuthikunchai SP, Lortheeranuwat A, Ninrprom T, Popaya W, Pongpaichit S, Supawita T. (2002) Antibacterial activity of Thai medicinal plants against enterohaemorrhagic *Escherichia coli* O157: H7. *Clin Microbiol Infect*, **8** (suppl 1): 116–117.

For book

Kowalski,M.(1976) Transduction of effectiveness in *Rhizobium meliloti*. SYMBIOTIC NITROGEN FIXATION PLANTS (editor P.S. Nutman IBP), **7**: 63-67

ASSESSMENT OF THE DISSERTATION FILE

Essentially, marking will be based on the following criteria: the quality of the report, the technical merit of the project and the project execution.
Technical merit attempts to assess the quality and depth of the intellectual efforts put into the project.
Project execution is concerned with assessing how much work has been put in.
The File should fulfill the following ***assessment objectives:***

Examination Scheme:

Dissertation	50
Viva Voce	50
Total	**100**

Selecting the Dissertation Topic
It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between 'dissertation topic' and 'dissertation title'. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:
- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

Planning the Dissertation
This will entail following:
- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The Dissertation plan or outline
It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

Keeping records

This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct a direct quotation and what is your paraphrase.

Dissertation format

All students must follow the following rules in submitting their dissertation.

- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words)
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

  Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

  For books, the following details are required:
  Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

The Layout Guidelines for the Dissertation

- A4 size Paper

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Guidelines for the assessment of the Dissertation
While evaluating the dissertation, faculty guide will consider the following aspects:

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

Assessment Scheme:

Continuous Evaluation: (Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	40%
Final Evaluation: Based on,	60%
Contents & Layout of the Report,	20
Conceptual Framework,	05
Objectives & Methodology and	05
Implications & Conclusions	10
Viva & Presentation	20

SEMESTER-I

DJRN2151	UNDERSTANDING MASS COMMUNICATION	L	T	P	FW/Proj	C
Version	2023	2	1	2	-	4
Pre-requisites/Exposure	NIL					
Co-requisites	NIL					

Catalog Description

Students will begin with understanding basics of communication, its various forms and then acquire knowledge of various traditional media that provided vital means of communications in group settings. Tracing the evolution, they would then discover various forms of contemporary mass communication and the number of professions these media have given birth to. Lastly, they would understand how digital media is the way forward and the various platforms and technologies, imagining the future of mass communications with digitization at the center of this growth and development.

Course Objectives

The objectives of this course are:

- To explain the basics of communication including its various levels and elements.
- To inform about traditional forms of communication, their significance and current scenario.
- To discuss about the different forms of Print, Electronic and Digital media along with their social, economic and political functions.
- To inform about the various professions under mass communication and the plethora of new job opportunities opening up in the field.
- To discuss about prominent developments in the area of digital communication, important media technologies that are shaping a new world.

Course Outcomes

On completion of this course, the students will be able to:

Expected Outcome	Bloom's Taxonomy Level
CO1. Explain what is communication along with aspects such as possible barriers, various elements and levels of communication.	L1, L2
CO2. Define the different kinds of traditional media along with their evolution and significance.	L1, L2
CO3. Discuss various types of Print, Electronic and Digital media, their evolution and various functions.	L1, L2
CO4. Analyze the inter-relationships among Print, Electronic and Digital media along with the scenario of media convergence.	L4
CO5. Identify the different options available under the banner of professions in mass communications.	L1, L2
CO6. Evaluate the new and emerging trends in digital communication and reflect upon the future of mass communication.	L4, L5

Modules	Blooms level*	Number of hours
MODULE 1: Basics of Communication What is communication? Why do we need communication? Process and elements of communications, Levels of communication, Barriers to effective communication, Forms and Functions of communication, Major vehicles of communication (Introduction to traditional and mass communication vehicles)	L1, L2	6
MODULE 2: Understanding Traditional Media What is traditional media (street theatre, puppetry, music, dance/ballads, folk and tribal art, local fairs); Historical and contemporary significance of such media (tool for political, social, economic, health awareness and sensitization,) dwindling popularity of such media and possible reasons.	L1, L2	7
MODULE 3: Understanding Mass Communication: Print & Electronic Media What are different forms of Print (newspapers, magazines, periodicals etc.) and Electronic Media (Radio, T.V, films). Inception of Print and Electronic Media and motivating factors; their social, economic and political functions.	L1, L2	8
MODULE 4: Understanding Mass Communication: Digital Media What is digital media? Factors leading to inception of the Internet, Journey of the Internet (from earliest platforms, their tools and functions to contemporary use,) the present scenario of Media convergence.	L1, L2, L4	8
MODULE 5: Overview of Professions in Mass Communication Historical relevance and advent of Journalism, Advertising, Public Relations, Photography, Films, Television and Radio professions. Professions in digital communication, especially in management of communication for different purposes like Branding, Media planning & buying, Events, Social media managers.	L1, L2	8
MODULE 6: Futuristic Communication & Expansions in Digital Media New and Emerging Trends in digital communication Overview of various digital media platforms. Overview of latest and upcoming media technologies (like Artificial Intelligence, its tools, AR and VR etc.) and possible effects on interpersonal and mass communication Pros and Cons of such media use for society (Case studies).	L4, L5	8

DJRN2101	STILL PHOTOGRAPHY AND IMAGE EDITING	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course is designed to offer the students a thorough conceptual and practical understanding of uses, techniques, aesthetics and various genres of still photography. Besides, the students shall also learn the need and about popular tools for photo editing.

Course Objectives

This course is designed to enable students to understand the meaning, importance, evolution, types and genres of still photography. The student shall be introduced to the concepts and techniques of working of cameras including operations of digital cameras, exposure control, focus control, composition and visual storytelling. The learner shall also be offered knowledge about photo-editing and various tools available for the same.

Course Outcomes (COs):

On completion of this course, the students will be able to

- Define photography, classify the genres and types, and recognize the importance of photography in daily human life as art and as a medium of communication from its birth till now.
- Classify and explain the working of different types of cameras and associated accessories.
- Handle the camera and other photography equipment professionally, explain and demonstrate the working of various controls on still cameras.
- Analyze and evaluate the photographs on basis of exposure, focus, creative lighting, composition and visual storytelling. Critically appreciate and capture photographs of daily human life as art and as a medium of communication
- Shoot professional looking photographs as per requirements of different photography genres.
- Examine the need for photo-editing and recommend the best software and tools for it. Edit photographs on Smartphones and on PC using various software.
- Create and present a portfolio of their photography work both in soft as well as in hard copy.

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Intro to Visual Communication and Photography Definition, Types, Uses, Principles of Light and Genres of Photography World renowned photographers from different genres Evolution and development of Photography Holding cameras properly, identifying the controls on DSLR/Mirrorless cameras, controlling the focus, exposure and apply all technical adjustments on cameras to shoot photographs.	**L1, L2, L3**	15
Module II: Photography as an art and a medium of communication Visual Storytelling, its importance, and elements Rules of Composition including (but not limited to) 1. Shooting with purpose and perspective	**L1, L2, L3**	15

DJRN2251	PRINT MEDIA: REPORTING & EDITING	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description
This course describes various aspects of print journalism. The course begins with the history of Indian Press. It introduces basics of journalism and news reporting and editing. The aim of this course is to explore various dimensions of print journalism in concept and practice.

Course Objectives
The objective of this course is to
1. Provide an overview of the fundamentals of Print Jour nalism.
2. Introduce the students to the most important aspects of print journalism – reporting & editing.
3. Describe the growth of Press in India.
4. Introduce beat reporting and discuss the finer points of specialized writing.
5. Provide understanding for different types of journalistic writing.
6. Provide knowledge regarding investigative reporting and its tools.

Course Outcomes (COs):
On completion of this course, the students will be able to
CO1: Outline the history of print journalism in India.
CO2: Describe and apply various concepts of print journalism such as news, news values, style guides, reporting, editing etc.
CO3: Describe the process of news reporting and editing.
CO4: Explain the finer points of beat reporting.
CO5: Apply conceptual knowledge to write different types of features and reviews.
CO6: Argue if sting journalism is a healthy practice in a democracy.

DJRN2201	CRITICAL THINKING: UNRAVELLING MEDIA	L	T	P	C
Version	2023	2	1	2	4
Pre-requisites/Exposure	Nil				
Co-requisites	Nil				

COURSE DESCRIPTION:

This course will examine, discuss and defamiliarize us from the different media that we can study. Any "technology" that changes the way we identify, understand, and relate to the world of mass media will be focused on. Critical thinking is reflective thinking focused on what to do or believe in when making decisions. Students will focus on honing the ability to understand, evaluate and create arguments that will enable them to become good critical thinkers. Based on selected readings from media studies and related fields, we will conduct creative experiments for a better understanding of the tools and technologies.

Course Objectives

The objective of this course is-

1. To develop a reasoned argument and hone necessary skills to make one. To also recognize fallacious arguments.
2. To evaluate the strength of evidence to support claim of arguments.

Course Outcomes

On completion of this course, the students will be able to

CO1. To identify important issues and concepts in the media studies field.
CO2. To analyze key theoretical and methodological concepts in the media domain.
CO3. To synthesize continued critical analyses of texts, institutions and audiences in the field of media.
CO4. To Demonstrate the ability to conduct research.

Course Content

Modules	Blooms level*	Number of hours
MODULE 1: Introduction What is/are Media? A Brief History of Media Studies McLughan: The Mechanical Bride What works, what doesn't: Examples. Ethical issues related to media: Privacy concerns, sensationalism & responsibility of Journalists	L1, L2	15

SEMESTER-III

DJRN2351	ELECTRONIC MEDIA: RADIO AND TELEVISION	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course is designed to offer the students a comprehensive understanding of the evolution, technological transformations and socio-economic and developmental outcomes of two major means of electronic communication-- radio and television. The paper seeks to ground the students in both the theoretical and practical understanding of radio and TV production, the crew and equipment used, the various radio and TV formats and the aesthetics of the two media. For the practical component of the course, students will be required to write scripts for radio and TV shows that they will record and edit in class groups for assessment.

Course Objectives

This course is designed to enable students to appreciate the fine nuances, the art and aesthetics involved in radio and TV content production. A thorough understanding of the concepts and techniques of sound and visuals as means of communication will be achieved as students are exposed to a wide variety of popular radio and TV shows from India and abroad.

Course Outcomes (COs):

On completion of this course, the students will be able to

- The evolution of radio and TV as media of communication from the earliest inventions to contemporary times.
- Classify and explain the working of different types of microphones and sound recording systems and related accessories.
- Handle the TV cameras and other television production equipment, studio lighting and Tv production recording for a wide variety of shows and genres including news bulletins
- Master the art and craft of audio and audio-visual storytelling.
- Critically appreciate radio and television in the everyday life of our communities and society as not only the source of *information* but also of *education* and *entertainment*.
- Storytelling for radio and TV. Creating jingles, advertisements and other genres that are popular on AIR and FM radio. Storyboading and writing for TV production using single and multi-camera set-ups both in the studio and outdoors.

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Evolutionary history of Radio 1. History and Development of Radio in the World 2. Characteristics of radio as a medium 3. The coming of the Radio in India 4. BBC and the early radio broadcasting in India 5. Radio for Propaganda, Radio and Nazi wartime propaganda	**L1, L2, L3**	15

DJRN2301	**NEWS AND CONTEMPORARY ISSUES**	**L**	**T**	**P/FW/ Project**	**C**
Version	2023	2	1	2	4
Pre-requisites/Exposure	Nil				
Co-requisites	NIL				

Course Description:

This course aims to cultivate and enhance critical thinking abilities in the realm of news and information analysis. By delving into the intricate nuances of contemporary issues, students will gain a fundamental understanding of the multifaceted dynamics that shape our modern world. With a specific focus on the interplay between journalism and communication, the course equips participants with the necessary tools to navigate the complex intersections of political, economic, social, and cultural landscapes. Through a comprehensive exploration of various perspectives, students will develop the intellectual acumen required to assess the significance and implications of diverse narratives within the context of our ever-evolving global society.

Course Objectives:

The objectives of this course are:

- To develop intellectual skills to evaluate and analyze the meanings of news and information.
- To develop a basic understanding of Contemporary Issues.
- To create a foundation to further understand journalism and communication processes in context of political, economic, social and cultural realities of contemporary world.

Course Outcomes:

On completion of this course, the students will be able to:

Expected Outcome	**Bloom's Taxonomy Level**
CO1: Define contemporary issues (National/International)	**L1, L2**
CO2: Demonstrate a habit of staying informed and knowledgeable about current and contemporary issues	**L3, L4, L6**
CO3: Explain the Indian and world's political, social, and economic systems.	**L1, L5**
CO4: Identify the core concepts of journalism (Objectivity, Fairness, Balance, and Accuracy	**L2, L3, L5**
CO5: Study the debates on (inter) national issues, language, and culture	**L2, L3, L6**

SEMESTER-IV

DJRN2451	DIGITAL MEDIA	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

Digital media production is the study of media creation and display through online and interactive experiences. This includes audio and video steaming in online contexts, but it also covers other types of new media that are hybrids of the two. Using various multimedia systems and formats, you will explore the foundations of development, content creation and distribution across multiple platforms. Focusing on multi-platform digital media, this course is designed to offer the students with a thorough conceptual and practical understanding of various digital media production tools, their uses, techniques, and aesthetics. The students shall have the opportunity to write, produce and edit their own digital media content for online distribution.

Course Objectives

The objectives of this course are to:

- Enable students to discuss various digital media production workflows from concept to distribution.
- Allow the students to analyze and differentiate between media formats and choose appropriate actions for initiating and completing media projects.
- Offer the learner with techniques to produce, design, record and edit original content for websites, apps, podcasts, video etc.
- Introduce the students to the software and hardware interface and their functions.
- Develop, organize, and create content optimized for various media distribution formats.

Course Outcomes (COs):

On completion of this course, the students will be able to

- Discuss various digital media production workflows from concept to distribution.
- Differentiate between media formats and choose appropriate actions for initiating and completing media projects.
- Produce, design, record and edit original content for websites, apps, podcasts, and videos.
- Identify various software and hardware interface items and define their function.
- Develop, organize, and create content optimized for various media distribution formats.

SEMESTER-V

DJRN2551	MEDIA LITERACY & FACT CHECKING	L	T	P	C
Version	2023	2	2	0	4
Pre-requisites/Exposure	Nil				
Co-requisites					

Catalog Description

Fake news has captured the attention of politicians, the media, and the general public since 2016. But the concept is hardly new; it has existed in some form for centuries. In this course, we will explore the history of fake news in different media, culminating in an examination of the modern phenomenon of fake news. We will learn information literacy techniques for evaluating news sources and will study a specific contemporary manifestation of "fake news" in depth.

Course Objectives

The objective of this course is to

- Define fake news and discuss its history for the learners.
- Explain the modern phenomenon of fake news and discuss its significance
- Share the sources of false or misleading information on a variety of media platforms
- Evaluate news and other information outlets for bias
- Describe how news items are created and disseminated across different types of media and social networks.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1: Define fake news and discuss its history for the learners

CO2: Explain the modern phenomenon of fake news and discuss its significance

CO3: Share the sources of false or misleading information on a variety of media platforms

CO4: Evaluate news and other information outlets for bias

CO5: Describe how news items are created and disseminated across different types of media and social networks.

Modules	Blooms level*	No. of hours
Module I : History of Fake News History of fake news, Definition and Characteristics of fake news, Variations of fake news, Information cycle of fake news, Identifying and dealing with fake news, Credible sources and organizations. Distinguish among different kinds of information and media: news, commentary/opinion, advertising, publicity, entertainment, propaganda, persuasion, raw information.	**L1 L2**	15
Module-II Media literacy and Real News Concept of Dis-information, Mis-information& Mal-information, Narratives in disinformation and misinformation, Elements of Information disorder, Phases of	**L3, L5, L6**	20

DJRN2502	CORPORATE COMMUNICATION	L	T	P	C
Version	2023	1	1	4	4
Pre-requisites/Exposure	Nil				
Co-requisites					

Catalog Description

Various components like corporate philosophy, identity, citizenship and philanthropy will be learnt and discussed by the students. Image and its management and enhancement which is the core of corporate communication will also be explained. Direct marketing, issue support and crisis management will be learnt. Public affairs and political PR and lobbying as a weapon in the hand effective communicators will be discussed.

Course Objectives

The objective of this course is to

- To impart knowledge of basic concepts of corporate communication and its application in an organization.
- To impart knowledge of basic concepts of event management and its relevance in corporate communication.
- To apply knowledge and skills as communication practitioner to resolve issues and crisis situations using various specific strategies.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1. Define and describe corporate communication and its various elements: Corporate Culture, Corporate Philosophy and Corporate Identity, Citizenship and Philanthropy.

CO2. Describe and summarise various concepts in Corporate Communication such as Image Management, Media Management, Direct Marketing and Celebrity Management.

CO3. Describe and summarise Public Affairs, Political PR, Lobbying, Group Communication.

CO4. Define and classify Crisis Communication and strategic planning, the crisis life cycle, Determine the traits of a crisis spokesperson.

CO5. Explain Employee Relations/Internal Communication-importance of localized information to line employees, benefits, and challenges.

Modules	Blooms level*	Number of hours
MODULE 1: Foundations of Corporate Communication Introduction, Importance and Functions, Elements of Corporate Communication: Corporate Philosophy, Culture, Corporate Identity, Citizenship and Philanthropy.	L1, L2	10
MODULE 2: Concepts of Corporate Communication Group Communication, Media Relations, Public Affairs, Political PR, Lobbying, Employee Relations/Internal Communication-importance of localized information	L1, L2	18

DJRN2501	**MEDIA PLANNING & BUYING**	L	T	P	C
Version	2023	2	2	0	4
Pre-requisites/Exposure	Nil				
Co-requisites					

Catalog Description

This course comes under an interdisciplinary domain which describes various concepts of media planning and media buying. It includes marketing and negotiation skills and concepts of selection of media mix and substantial marketing and advertising research etc. The aim of the course is to explore various creative fields involved in the placement of advertisements.

Course Objectives

The objective of this course is to

- Equip the students with concepts of creative fields involved in media planning and buying for advertisements.
- Provide an overview of the process of selecting and buying of media mix for the placement of advertisements.

Course Outcomes (COs):

On completion of this course, the students will be able to
CO1: Describe media planning and select the media mix.
CO2: Describe and distinguish various media forms.
CO3: Select and apply research data to develop media strategy process.
CO4: Apply software to create media plans and schedules.

Modules	Blooms level*	Number of hours
MODULE 1: MEDIA PLANNING Introduction to Media Planning (MP), Defining Media Planning, Objectives of MP, Importance of MP in the current scenario, Developing Media Strategy- the Media Mix/ communication mix, Factors influencing media strategy decisions.	L1, L2	15
MODULE 2: MEDIA: AN OVERVIEW Media types, characteristics of major media forms, Internet- the big medium, ATL & BTL Media, Electronic Media, Outdoor Advertising, and Transit Advertising, Evaluating Media Vehicles.	L1, L2	10

SEMESTER-VI

DJRN2651	COMMUNICATION FOR SOCIAL CHANGE	L	T	P	C
Version	2023	2	2	0	4
Pre-requisites/Exposure	Nil				
Co-requisites	Nil				

COURSE DESCRIPTION:
This course explores and examines media and social change. During this course the students will evaluate the various media outlets that are used for communication to catalyze social change. A historical and contemporary perspective on different design and communication techniques related to a variety of social and cultural issues will be put forth.

Course Objective
Communication for social change is a way of thinking and taking action that gives people influence over the channels and content of communication processes. This is a process of discussion through which individuals decide who they are, what they need, and what they want in order to improve their lives. It is based on discourse and communal action. This course will explore alternative conceptions of communication and media that have emerged over time. This includes various community projects and participatory communication initiatives that consider the rural poor in developing nations not a passive information receiver but active content producers. We will get a basic understanding of participatory methods that are useful for engaging in development work and research.

Course Outcomes
On completion of this course, the students will be able to
CO1: Comprehend the development issues plaguing the country.
CO2: Developing a communication design for a developmental issue/or creating a campaign.
CO3: Knowledge of alternative communication concepts.
CO4: Analyze how participatory methods are important for development work.

Modules	Blooms level*	Number of hours
MODULE 1: Definition, meaning and process of development. Theories and paradigms of development – unilinear and non-unilinear theories/paradigms Characteristics of underdeveloped economics & Indicators of Development Communication, Democracy, Human Rights as an indicator, Sustainable development, Social Relations [inequality]	L1, L2	15
Module 2 Mapping the field: Actors and Issues. Institutional & Alternative agendas and development Alternative visions and approaches Role of communication in development and Social Change.	L3	15

DJRN2601	FICTION AND NON FICTION FILM-MAKING	L	T	P	C
Version	2023	2	1	2	4
Pre-requisites/Exposure	Nil				
Co-requisites	Nil				

COURSE DESCRIPTION:

Students will learn to compare and contrast between fiction and non-fiction filmmaking and media formats from the point of production and post-production processes involved in the two. The course will help develop a highly nuanced understanding of the two basic divisions in film production, namely, fiction and non-fiction formats. They will be equipped with a critical understanding of the fundamental differences in which the same technology and crew and the camera is employed when shooting and directing for fiction and for documentaries.

Practical exercises like screenplay writing for fiction and writing and researching for a documentary will be undertaken to develop the necessary skills and appreciation of how the two forms have varied histories, relationship with reality, feel and treatment, audience / viewer profile and segmentation and revenue and budgetary models.

Course Objective

The objectives of this course are:

- Students will learn to contrast fiction with documentaries
- To appreciate the interplay of imagination and art in fiction and that of reality and faithfulness to truth in documentaries and time
- To examine the roles that cinema/ fiction and documentaries play in representing and recording the world or the historical world.
- To appreciate the techniques of narrative structure, filming and post production involved in fiction and in non- fiction as well as long-form television documentary journalism and other genres and sub-genres.
- To develop the skills to write proposals and make show reels in order to pitch for projects in the fiction/non-fiction film categories.

Course Outcomes

On completion of this course, the students will be able to

CO1. Understand the difference between fiction/non-fiction genres in filmmaking

CO2. Identify the use and significance of documentaries and non-fiction in representing the objective world

CO3. Analyze the evolutionary history of documentaries

CO4. Master the elements of filmmaking in fiction through a deep understanding of the three stages of film production right from ideation to the final product

CO5. Pitch for story ideas and projects in fiction and non-fiction formats and learn how to do proposal writing and budgeting in order to get their films funded

DJRN2602	INTRODUCTION TO COMMUNICATION RESEARCH	L	T	P	C
Version	2023	3	1	0	4
Pre- requisites/Exposure	Student should have a basic knowledge of Statistics to understand better				
Co-requisites					

Catalog Description

Research is an important part of communication. To inculcate the habit of research and to nurture innovation, this subject is being introduced to the learners. Purpose is that the students should be able to not just understand the nuances of social science research but should also be able to eventually generate new knowledge in the field.

Course Objectives

- To introduce the students to the concept of communication research
- To establish relationship between mass communication, journalism & research
- To explain to students the various research designs and approaches to research
- To discuss the media research process and various sampling techniques
- To introduce students to statistical applications in communication research
- To discuss research report writing methods and ethical issues in communication research

Course Outcomes (COs):

On completion of this course, the students will be able to:

- CO1: To introduce the students to the concept of communication research
- CO2: To establish relationship between mass communication, journalism & research.
- CO3: To explain to students the various research designs and approaches to research.
- CO4: To discuss the media research process and various sampling techniques
- CO5: To introduce students to statistical applications in communication research
- CO6: To discuss research report writing methods and ethical issues in communication research

Modules	Blooms level*	Number of hours
Module I – Introduction to Communication Research Definition, Research Methods and Approaches in Social Sciences. Mass Media Research and Scientific Methods. Importance of Communication Research – Indian Scenario. Formulation of Research Problem, Review of Literature, Hypothesis, Research Design.	L1, L2	10

DJRN2603	FILM THEORY AND APPRECIATION	L	T	P/ FW/ Proj	C
Version	2023	1	1	0	2
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

Catalog Description

Major theories of 'reading' and understanding cinema will be introduced. The course will help develop a nuanced and critical understanding of film and film theory as a field of inquiry. The Students will be introduced to the finest of world and Indian cinema where these theoretical positions will be elucidated in the works of the greatest film directors of all times. Various elements of cinema will be identified and discussed in order to unpack the technique behind the great art of filmmaking. An evolutionary history of film will help trace the key developments that have contributed towards making cinema as one of the most powerful and creative mediums. The film appreciation aspect of the course will inculcate a deeper understanding of the art, aesthetics and the grammar of 'good cinema'. Such a theoretical and critical grounding of films will go a long way into nurturing the creative and aesthetic sensibilities of students who aspire to tell their stories successfully and differently as future media professionals.

Course Objectives

The objectives of this course are:

- To appreciate cinema as an art and the interplay of image and time
- To identify and appreciate the various elements of filmmaking and the major technological shifts from the era of the silent films to the contemporary times of digital and high end graphic adaptations of films
- To discuss the form, format and principles of cinema in order to have a deeper understanding of cinema as form of storytelling.
- To critically analyze films from the earliest productions of the silent era until the contemporary times of the digital era.
- To develop a keen understanding of the medium and the timeless world of cinema through an appreciation of the history of the cinema and major cinema movements that transformed it.
- To understand the intersections between film theory and practice and its future

Course Outcomes

On completion of this course, the students will be able to:

CO1. Understand film theory and criticism

CO2. Identify the use and significance of different aspects of film appreciation

CO3. Analyze the evolutionary history of cinema and major cinema movements

CO4. Analyze the elements of cinema and their use by the finest film directors

DJRN2604	MEDIA LAWS & ETHICS	L	T	P/ FW/ Proj	C
Version	2023	2	0	0	2
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

Catalog Description

Today's media is increasingly market driven, and the students in this course will learn about regulations and practices in media houses. The course talks in details about legal implications of news and other issues and laws which rule the everyday lives of newsmen. The course discusses in details various ethical issues.

Course Objectives

The objective of this course is to

1. Describe in detail various regulations like Contempt of Court, Right to Information, IPR to the future journalists.
2. Explain the importance and relevance of media ethics.
3. Provide knowledge about the relevant constitutional framework such as freedom of speech and expression.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1: Explain the differences and importance of media laws and ethics.
CO2: Explain in detail relevant laws for reporting.
CO3: Describe codes of conduct for reporting, as given by different regulatory bodies.
CO4: Distinguish between different types of sources.
CO5: Recognize if the news report is legally safe.
CO6: Relate the media laws and ethical concepts to the daily working of a journalist.

Modules	Blooms level*	Number of hours
MODULE I: Constitutional Framework Constitutional Provisions on Freedom of Speech and Expression, Constitutional Restrictions on Freedom of Speech and Expression, Law on Morality, Obscenity and Censorship	L1, L2	6
MODULE II: Media Laws Contempt of Court, Defamation, Right to Privacy, Intellectual Property Rights, Right to Information (Official Secrets Act, 1923, Evidence Act, 1872), Indecent Representation of Women Prohibition Act, Cyber Laws	L2, L3	10
MODULE III: Media Ethics Defining ethics, truth, fairness & objectivity, Editorial Content & Integrity, Editorial & Advertorial, Meeting Advertisers' Needs, Press Council Guidelines, Broadcast Regulation, Sting Journalism, Trial by the Media, Yellow Journalism, accountability and independence of media	L1, L3	14

SEMESTER-VII

DJRN2701	EVENT MANAGEMENT: CONCEPTS & PRACTICE	L	T	P	C
Version	2023	2	1	2	4
Pre- requisites/Exposure	Corporate Communication				
Co-requisites					

Catalog Description

This course gives important insights to the students on an extremely important element of marketing communications- Event Management. With the traditional forms of communication becoming saturated, event management has emerged as an effective alternate for brand awareness. The students will essentially be taken through fundamentals of event management, concept and design, logistics, marketing and promotion and finally evaluation processes. The students will also practice event proposal making, decision-making, conceptualizing as well as planning for events.

Course Objectives

The objective of this course is to

- To equip the students with concepts and activities in event management.
- To teach students about different event planning essentials.
- To teach students about the various marketing techniques involved in promotion of events.
- To explain importance of post event evaluation and different ways of doing it.

Course Outcomes (COs):

On completion of this course, the students will be able to:

Expected Outcome	Bloom's Taxonomy Level
CO1: Define and explain different kinds of events; various pre, during and post event activities in event management.	**L1, L2**
CO2: Describe and illustrate various themes for different events.	**L1, L2, L3**
CO3: Describe and apply various processes for organizing an event.	**L2, L3, L5**
CO4: Describe and assess basic two way evaluation process for any event.	**L2**

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Event Management Historical perspectives, Size and Types of Events, Event Team: roles and responsibilities, leadership traits and characteristics, Team management skills, who are the different stakeholders, Event laws and licenses (relevant regulations, liquor licenses, obtaining necessary permits and licenses, registrations etc.), code of ethics.	L1, L2	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Event Planning Essentials Setting aims and objectives, Event Proposal Making and Planning Tools, Budgeting and basic event accounting, 5 C's of Event Designing, Scheduling, Pre, During and Post Event Activities, Logistics, Suppliers and handling vendors, Technical Requirements (Lighting, Audio/Video, Photography/ Videography), Catering, Staffing, Guest List, Dress Codes, Protocols, Event Security management, crowd management, Risk and Emergency Planning related to Health, Safety etc.	L2, L3, L5	15
MODULE 3: Event Theme and Setting Venue, Target Audience, audience sampling methods- counts and estimates, Layout, Theme, Backdrop, Banner, Décor, Staging, New Trends- Economical, Environment Friendly, Sustainable Practices	L1, L2, L3	6
MODULE 4: Event Marketing and Promotions Different kinds of Event Promotion, Various Media for Event Promotion, Understanding the Relevance of each Media for Event Promotion, Comparisons among them with understanding the Strengths and Weaknesses of each, media invitations, Press Release, Process of Marketing, Marketing Mix, Branding, Sponsorships, Merchandising, Give-aways, Event Reminders SMS's, e-mailers etc.	L2, L4	15
MODULE 5: Event Evaluation Basic Evaluation Processes, Internal (management's collective responsibility to ensure that all programs and activities are meeting goals) and External Evaluation (organization's links with other agencies and stakeholders and the impacts of its actions), Evaluation from Event Organizer's Point of View, Evaluation from Client's Point of View, SWOT analysis, Return on Investment, Audits and checking key financial statements, measures of financial performance, Attendance, Media Coverage, Feedback, Impact assessments and preparing final reports	L2	15

DJRN2702	CONTENT ANALYSIS IN MEDIA	L	T	P	C
Version	2023	2	2	0	4
Pre- requisites/Exposure	Critical Thinking: Unraveling Media				
Co-requisites	NIL				

Catalog Description

Through this course, students will discover content analysis as an important tool for understanding media messages. In different domains of media, through engaging with case studies, they shall formulate a rich understanding of its significance in varied media scenarios whether its news industry, advertising and marketing or Public relations. They shall also be made aware of popular analytical tools and Content analysis approaches, helping them develop a critical bent of mind and improving the media messages that they create in future, in their respective professional domains.

Course Objectives

The objective of this course is to

- To introduce Content analysis as a viable and significant tool for meaning making of media messages and developing critical thinking.
- To explain different purposes of content analysis, its understanding and application by experts of this approach within media studies.
- To introduce different real world, industry oriented applications of content analysis and understanding its significance in improving media messages and media campaigns.
- To introduce the main content analysis approaches and popular tools used by industry experts along with the range of aspects possible to decode.

Course Outcomes (COs):

On completion of this course, the students will be able to:

Expected Outcome	Bloom's Taxonomy Level
CO1 Explain the concept of content analysis and its significance for media professionals.	**L1, L2**
CO2. Understand and describe the different roles of content analysis, its advantages and limitations for experts.	**L1, L2**
CO3. Understand and analyze case studies using content analysis in different media contexts.	**L2, L4**
CO4. Understand the different tools of content analysis, Qualitative and Quantitative along with aspects possible to study through these approaches.	**L2, L4, L5**

Modules	Blooms level*	Number of hours
MODULE 1: Overview of Media Content Analysis (CA) Meaning and purposes of content analysis. Range of media texts possible to study Descriptive, Inferential, Psychometric, Predictive roles of content analysis. Understanding of content analysis by important scholars, practitioners, political scientists of the time- Harold Lasswell, David Lerner, Ithiel de Sola Pool, Max Weber, Neuendorf, Riffe and Freitag etc. Advent of content analysis for meaning making processes (early 1920's for propaganda research, through audio-visual media and subsequent evolution, use cases).	**L1, L2**	20
MODULE 2: Understanding CA through Case Studies Advantages and Disadvantages/ Limitations of Content Analysis, Discussing applications of CA techniques for news meaning making, Advertising, Branding and marketing initiatives Public relations Case studies (determining message accuracy of media coverage that includes inclusion of basic facts, inclusion of any misstatements about the facts covered, any deceptive or misleading coverage, omissions; Analyzing match between the message communicated with the communication objectives of the brand or program which further depends on the brand/program's stage in the communications lifecycle.	**L2, L4**	20
MODULE 3: Tools for Content Analysis Use and importance of various approaches to CA- Qualitative and Quantitative. Qualitative (Humanist approach identifying what media content says about society and the culture producing it. Display usage and significance of tools like NVIVO and QDA Miner to code descriptive data and decode themes, unravelling deeper meaning and context. Quantitative (volume of mentions, 'messages' determined by key words in context (KWIC), circulation of the media (audience reach) and frequency. Behaviorist approach to CA concerned with the effects that content produces, also determining future effects. Brands using tools like Google Analytics to conduct competitor research, keyword research and comparisons, page and domain authority of brands, understanding new keyword opportunities, gaps to be filled in topics addressed by the brand.	**L2, L4, L5**	20

DJRN2703	ADVANCE COMMUNICATION THEORIES & MODELS	L	T	P/ FW/P roj	C
Version	2023	2	2	0	4
Pre-requisites/Exposure	Basics of Communication				
Co-requisites	NIL				

Catalog Description

Students will begin with understanding the meaning of theory and model building as important steps in Communication Studies. Subsequently, they will learn about global Communication models and theories, including Indian philosophies to Communication and Mass Communication. Emphasis will be laid on the different time periods of their emergence and growth, the prevailing conditions of the times and evaluation of their strengths and weaknesses. Their application in research contexts will also be discussed in the process.

Course Objectives

The objectives of this course are:

- To explain the concept of 'theory' and model building and its relevance in Communication Studies.
- To introduce and explain the various Communication models and theories that have emerged from different schools of thought and varied time periods.
- To assist in the evaluation of their strengths and weaknesses, their evolution and present day relevance and research applications.

Course Outcomes

On completion of this course, the students will be able to:

Expected Outcome	Bloom's Taxonomy Level
CO1. Explain the concept of 'theory' and model building, its relevance in Communication Studies.	L2
CO2. Explain the different kinds of communication models, apply them in real world contexts and evaluate their strengths and weaknesses.	L2, L3, L6
CO3. Understand and compare scholarly perspectives emerging from different eras in the history of Mass Communication.	**L2**
CO4. Interpret the meaning of different Mass Communication Theories and consider real world applications.	L2, L3
CO5. Interpret the meaning and genesis of different cultural theories and constructs, and consider present day relevance and applications.	L2, L3

SPECIALIZATION-I (CHOOSE ANY ONE)

- Print Media
- Advertising
- Still Photography
- Electronic Media (TV/Radio)
- Digital Media
- Media Literacy and Fact Checking

Course Objective:

This subject is an attempt to inculcate professional writing skills and knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

To give an in-depth exposure to the area of specialization, in order to make the students "industry ready" immediately after the programme

Course Contents:

Project Outlines

The students can opt for any of the following specialized area:

- Print Media
- Advertising
- Still Photography
- Electronic Media (TV/Radio)
- Digital Media
- Media Literacy and Fact Checking

Project details and Topics can be chosen in consultation with the concerned faculty

DJRN2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DJRN2801	PUBLIC RELATIONS: CONCEPTS AND PRACTICE	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

Public Relations courses strive to educate the media, potential clients, investors, sponsors, staff, and other stakeholders and eventually encourage them to retain a positive or friendly impression of the company, its management, goods, or policy decisions. Public Relations focuses on independent media promotion through press releases, online content, and marketing. As part of Public Relations courses, students develop and conduct marketing campaigns. The public relations course deals with the free distribution of media information, with the support of press releases, editorial material, and advertising of the very same.

Course Objectives

To take the students through the role and scope of PR in management, its various tools, and its emerging importance of discipline in varying areas. Students enrolled in the Public Relations Program will be immersed in critical thinking, analysis, and writing opportunities to refine their understanding of major concepts and theories associated with Public Relations trends and initiatives.

Course Outcomes (COs):

On completion of this course, the students will be able to

- Describe the communication discipline and its central questions.
- Employ communication perspectives, principles, and concepts.
- Engage in communication inquiry and influence public discourse.
- Create messages appropriate to the audience, purpose, and context.
- Demonstrate the ability to accomplish communicative goals.
- Apply ethical communication principles and practices.
- Utilize communication to embrace difference.

Modules	Blooms level*	Number of hours
Module I: Understanding Public Relations Brief History of Public Relations, Concepts, Definitions, Role, Scope, Functions, New Emerging Trends. Difference between In-house PR and a PR Consultancy, Types of PR	**L1, L2, L3**	15
Module II: Public Relations and Media The Role and Importance of Media Relations in Public Relations, Public Relations as a Source of News, Tools of Media Relations, Tools & Techniques of Public Relations, Present and future of Public Relations in India,	**L1, L2, L3**	15
Module III: Public Relations Theory and Practice Growth of PR in the world and India, Propaganda, Public Opinion and publicity, Public Relations: catalyst, persuasion and motivation, Communication theories	**L2, L3, L4, L5, L6**	15

Prof. (Dr.) Anil Kumar

DJRN2802	NEW JOURNALISM : CONCEPTS AND PRACTICE	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course focuses on different aspects of New Journalism such as digital reporting, content editing, and the study of digital technology for modern media. Theoretical and practical training of page layout and designing for different online platforms. The course concentrates on New Journalism Practices along with online media contents to enhance the knowledge of students.

Course Objectives

This course is designed to enable students to have a conception of digital media and enable them to understand potential and limitations of Digital Media. The student shall recognise and participate on Digital Media. Students shall be encouraged to produce media messages using variety of digital tools. This course shall introduce students to various career opportunities in New Media.

Course Outcomes (COs):

On completion of this course, the students will be able to

- Explain the uses of online media for journalistic purpose and the trends in online reporting and ethics.
- Examine the applications of online tools for communication.
- Create and design web stories, blogs, podcasts etc.
- Understand changing media scenario.
- Evaluate new media technologies to raise ethical concerns.

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I- Basics of New Journalism Media Convergence and Digital Divide, Information Communication Technology (ICT): An Overview, New Media: Definition, Characteristics, Scope and Revenue Models, New Media Platforms: Networking, ISP, Browsers, WWW, Types of Websites (according to content), Characteristics of Digital Media, Understanding Credibility of Digital Media, Credibility Building Process, Net Neutrality, Mobile Revolution, Digital Literacy, Emerging Trends and Technologies.	**L1, L2**	10
Module II: Online Communication Management Introduction to CMS, Components and Features, How Does CMS Work, Types of CMS - Open source & Commercial CMS, Characteristics and Advantages of Open-Source CMS, How to Build a Website with a CMS software Introduction of Mobile Journalism- Workflow & Skills Required, Tools & Apps for Mobile Journalism, Challenges of Mobile Journalism, social media and Social Networking Sites & Mobile Journalism, E-governance, Citizen Journalism etc.	**L1, L2, L3**	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module III: Media Convergence and Audience Artificial Intelligence and Convergence, Social Media Platforms on Web and Mobile, Understanding Audiences, Characteristics of Audiences, Types of Audiences, Passive, Active and Participatory Audience, Audience Autonomy-free or controlled content creators, Basics of Digital Audiences, Search Engine Strategies for Digital Audience Acquisition, Social Media Campaigns and Engagement, Digital Audience Research and Behaviour, Digital Audience Analytics, Digital Audience Management, Webcasting, Podcasting, Blogs etc., Website Audience Measurement (WAM)	**L2, L3, L5, L6**	8
Module IV: Designing Online Content: Planning and Execution The Importance of Website Planning, Beginner's Guide to Build, produce and publish a website, design a Website: planning and execution using open sources, Rewriting & Reconstruction of News, Photo & Video Editing, Timeline creation for digital news, Editing and uploading content on Web, Tools and Techniques for Online Journalism (Mapping, Timeline, Infographics, Podcasts, Explainer Videos, etc.), Audio Basics, Audio Streaming Server & its use, saving sound files & podcast on Web, Tips for writing for Audio, Tools and Techniques for Voice Over, Podcasting: Formats, Planning, Scripting, Recording a Show, Podcast Production, Terms and Tools. Application for Journalists: Blogs, Portals, Websites, Social media platforms, Wikis, etc., Journalistic use of social media, Social Media Collaboration, Citizen Journalism, Streaming Servers: News Aggregators & SEO, SMO Elements of Digital Multimedia applied for news stories, Content Generation, Dos & Don'ts during traditional journalism vis a vis the multimedia journalism, tips, tools, and best practices of online storytelling.	**L2, L3, L4, L5, L6**	15
Module V: Ethical Concerns in Digital Age Digital Media Laws; Issues in Cyber Security: Piracy, Copyright, Open Sources, Digital Archives, Digital Content and Intellectual Property: Paid & Unpaid Digital Contents (News, Advertisements, etc.), Ethical concerns of writing for digital media, Cyber Piracy, Digital Media Effects: Cybercrime, Privacy, Hate Speech, Surveillance, Case studies.	**L1, L2, L3,**	5

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

SPECIALIZATION-II (CHOOSE ANY ONE)

- Print Media
- Advertising
- Still Photography
- Electronic Media (TV/Radio)
- Event Management
- Digital Media
- Media Literacy and Fact Checking

Course Objective:

This subject is an attempt to inculcate professional writing skillsand knowledge in flowering buds of the media department. The subject will give hands on experience on different aspects of media writing to the students. The students may choose the option of this subject from their concentration electives.

To give an in-depth exposure to the area of specialization, in order to make the students "industry ready" immediately after the programme

Course Contents:

Project Outlines

The students can opt for any of the following specialized area:

- Print Media
- Advertising
- Still Photography
- Electronic Media (TV/Radio)
- Event Management
- Digital Media
- Media Literacy and Fact Checking

Project details and Topics can be chosen in consultation with the concerned faculty

DJRN2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing	L1, L2, L3, L4	20 hours

SEMESTER-I

DANI2151	INTRODUCTION TO DESIGN AND GRAPHICS	L	T	P	FW/ Proj	C
Version	**2023**	2	0	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This unit is designed to initiate the student into the rudiments of design and application of design in life that we see around us. After briefly introducing basic principles of design to the student, it will focus more narrowly on design principles that are peculiar or unique to the field of gaming, animation, 3D modeling (both interior and exterior) and character animation.

The student will learn as well as imbibe important typographic principles, use of fonts and fontography, use of color, color harmonies, color mixing, color palettes and tonal balance.
The important role that symmetry, balance, images –both vector as well as bitmaps, play in synchronously creating a harmonious and aesthetically appealing composition will all be explained with real world examples of practical design being implemented in myriad media fields such as advertising, mass communication, gaming, and animation. The second part of the unit will be software intensive, with both popular bitmap as well as vector software taught from beginner to intermediate level.

Course Objectives:

The objective of this course is to:

- Enable the students to comprehend principles of design and graphics using a blended learning approach.
- To familiarize students with all aspects of software, both at the beginner as well as at an intermediate level
- To integrate seamlessly both theoretical as well as practical aspects of design such that the learner is able to instantly identify as well as appreciate design principles incorporated in the physical realm, be it print, net, web, film, or television.
- To attain more than a level of familiarity with popular commercial as well as open-source software so that s/he can instantly start designing the moment a project is assigned.

Course Outcomes:

On completion of this course, the students will be able to:

S.No	Expected Outcome	Bloom's Taxonomy level
1	Be able to visualize and conceptualize layouts for print, web, video and Multimedia	**L1, L2**
2	Completely proficient with all aspects of three to four design software, notably Adobe Photoshop, Illustrator, Affinity Photo and Affinity Designer. They will also be taught fundamentals of Corel Draw or InDesign, at a beginner level	**L1, L2,L3**

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

3	Be proficient at delivery of design projects, both at a conceptual level and at the execution stage.	**L3, L4, L5**
4	Be able to work in a team delegating different aspects of production to team members and also work at a peer-to-peer level, so that professional quality work can be produced and exported.	**L3, L4, L5, L6**

Syllabus / Topics to be covered

Modules	Blooms level*	Number of hours
MODULE1: Design Concepts – traditional and digital Differences between traditional design, primarily for print as compared to designing for the web, the internet, and for television and film will be compared and contrasted, and how these inherent differences can be optimized for a specific media will be explained and elaborated upon. A broad overview imparted to each software with its distinguishing features and also reasons will be emphasized why a particular software is more suitable for a design project over others. The importance of maintaining inter-software compatibility as well as with market employed software will also be highlighted	L1,L2	4
MODULE2: What is Design? This module focuses exclusively on Design Elements, Design Principles and Aesthetics. How elements and principles help Indesign. Where, how and in which situation, these elements and principles are applicable. How do different design elements combine and mesh together to create an overall 'look' and feel for the published output – be it a web page, a mobile app or graphics for a social media video.	L2,L3	6
MODULE3: Typography and Introduction to Illustrator & Designer History of fonts, Sizes of fonts, Classification of fonts, True Type and OpenType. Breakdown of a word into typographical elements and ligatures, designing a custom font from scratch, all form part of this particular module. Each concept that is explained is generously illustrated with practical examples drawn from mixed media.	L2,L3	6
MODULE4: Hardware and Software From more theoretical concepts like Typography and design principles we move to the more practical aspects of implementing design on the ground through use of immersive technologies. Important aspects of hardware, notably the computer and accessories like printers, scanners and other input/output devices are explained. The student is also taken through the gamut of design software that exist that take full advantage of the computers' multitasking and multi-threading capabilities. In this module, an overview of Digital Publishing software is given. In the next two modules, the most popular design software are explained at length.	L2, L3, L4	6
MODULE5: Fundamentals of Design Software Editing of images, making selections and cropping, integration of text with graphics, as well as the importance of resolution, image size, pixel depth, and the different sizes and formats for print, web, broadcast and internet mediums such as Youtube are all covered in this module. Also the different image file formats such as jpg, png, tiff etc along with transparency and scaling are also	L3,L4, L5, L6	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

explained. From technical definitions we move on to the software itself, covering all basic aspects of industry standard software like Photoshop, Illustrator, Corel Draw and Adobe InDesign. An overview of the Affinity range of products like Designer and Photo is also covered so that the student can compare and contrast the differences and know which software to use in a given workplace situation.		
MODULE6: Design Software–Intermediate level This module covers the above software in more detail and depth with overlying emphasis being given to integration of practical projects that employ all the theoretical knowledge imparted. Once a set of topics is taught, application of the same is demonstrated through several practical exercises that are not only structured but also graded in terms of complexity and applicability. Latest developments in the software being taught are covered and also new plugs in that radically extend the functionality of the software (like AI plugins for example) are also enumerated.	L3,L4, L5, L6	6

DANI2102	BASICS OF ART HISTORY AND SKETCHING AND DRAWING	L	T	P	FW/ Proj	C
Version	**2023**	1	0	2	0	2
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course will cover the fundamentals of drawing and will address line, tone, volume, space, scale, proportion and artistic expression. An emphasis on "process" will direct the momentum of this course. The course considerably emphasizes on the concept of Illustration techniques and visualization power.

Course Objectives

The objective is to teach students about different forms of Art. Art is a form of communication, it is an interaction between the elements and principles of art help artists to organize sensorially pleasing works of art while also giving viewers a framework within which to analyze and discuss aesthetic ideas. This course will help students in building basic drawing and sketching skills which is essential part of animation process.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
1. Know the basic concepts of art with Shapes, Lines and Forms to sketch from Memory and live action.	L1, L2, L3
2. Learn about Lights, Shades, Tone and Colors and to increase thought on Shading in different angles of pencil strokes, simple shapes of geometrical shapes.	L2, L3, L4, L5
3. Understand the Basic concepts on Rhythm, Consistency and Balance.	L3, L4, L5
4. Gain the Knowledge on basic drawing of Organic, Living and Non-Living objects and skills for Human Anatomy.	L3, L4, L5
5. Apply the aesthetic value and observation techniques on further complete Composition.	L2, L3
6. To develop the concept and impart knowledge of Pose to Pose drawing and Rapid Sketching Techniques.	L3, L4, L5

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Art History & Drawing Basics • Basic Timeline of Art Movement & Contemporary Art • Understanding the Significance of Art in Human Culture • Simple Geometrical shapes • Elements of Art- Line, Shape, Form, Color, Texture, and Space • Important Principles of Art and Drawing - Balance, Proportion, Rhythm, Harmony, and Contrast • Perspective in Drawing • Perspective in lines in landscapes	**L1, L2, L3**	14

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

• Concept of Human Anatomy • Understanding Character Design Anatomy & Proportions • Idea of Different Head Shapes and Characters		
Module II: Understanding Light, Shadow and Color • What is Light & Shadow? • Basics of Color Theory • How to prepare a composition • Shading in different angles of pencil strokes Attitude • Formatting in different textures with pencil • Concept of Lighting and Shading technique	**L2, L3, L4, L5**	12
Module III: Sketching for Animation • Basic Introduction to Acting, Modelling and Sketching • Concept of Sketching from live models • Rapid sketching from live models • Rapid Sketching techniques • Action Analysis • Frame by Frame Sketching Technique • Pose to Pose sketching technique • Background Art and Environments	**L2, L3, L4, L5**	14

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2101	FUNDAMENTALS OF CLASSICAL ANIMATION	L	T	P	FW/ Proj	C
Version	**2023**	1	0	2	0	2
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course is designed to provide the students with an understanding of fundamentals of animation, treatment, terminology, principles and various concepts required for Animation. Students will have hand-on practice on several concepts of classical animation.

Course Objectives

The objective is to teach students about different concepts involved in Animation, which will help them to apply these entire concepts practically.

This course provides students the fundamental skills to produce traditional style animation as well as introduce them to modern animation as well. Students will also be exposed to different principles of animation on which subsequent courses could be built upon. Students can also apply skills learned in this class in other areas including motion graphics, stop motion and basic traditional animation.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
Understand the traditional and computer-generated animation.	L1, L2, L3
Define and explain the 12 Principles of Animation, different concepts and styles, its importance and uses in animation process.	L2, L3, L4, L5
Analyze and Work with both inanimate objects as well as animated objects (human beings, animals) to create simple animation.	L3, L4, L5
Define, make & build assets for Background, Acting, Modeling, Voice over and dialogues from non-live models, etc.	L3, L4, L5
Able to relate to software designed to create 2D animation more easily.	L2, L3

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: History of Animation • Definition of Animation • Early History of Animation • Genres in Animation • Evolution of Walt Disney • Success of Fleischer Brothers • Traditional forms & Non-Traditional forms • Anime in Japan • Animation in different parts of world • Contemporary developments • Famous studios around the world	**L1, L2**	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Principles of Animation • The 12 Principles of Animation • Importance & Uses of Principles of Animation • Fundamentals of Animation Styles • Exaggeration • Attitude • Silhouettes • Boundary breaking exercises • Acting in Animation	**L1, L2, L3**	10
Module III: Concepts & Styles of Animation • Concept of Illusion • The phi phenomenon • Persistence of Vision • Unity of Motion • Classical forms of Animation • Types of Traditional animation styles • Cel Animation • Different techniques like, Flip Book, Pixilation, Hyperlapse, Sand Animation, Puppetry, Shadow Puppetry, etc • Experimental Animation • Rotoscope Animation • Concept of wide range of commercial, movies, projects and experimental works produced throughout the world	**L2, L3, L4, L5**	10
Module IV: Basic Animation Terminology • What are Layers, Frame and Composition? • Aspect Ratio • Frame Rate • Voice Over • Storyboard • Camera Movement- Panning & Tilting • Blocking • Frame by Frame Animation Technique • Pose to Pose Animation Technique • Onion Skinning • Transitions • Model Sheet • Rigging • Jump Cut • Walk Cycle & Lip sync	**L1, L2, L3, L4**	8
Module V: Stop Motion Animation • What is Stop Motion? • Stop-motion basic technique • Shooting and Editing Stop Motion • Using Stop Motion Softwares like DragonFrame, etc • Elements of Stop Motion • Claymation & Papercut Animation • Sets, models, characters, backgrounds in Stop Motion • Slow Motion, Fast Motion, and Reverse Shot • Lighting and Cinematic techniques	**L2, L3, L4, L5**	14

**Bloom's Level:*

L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

SEMESTER-II

DANI2201	2D ANIMATION	L	T	P	FW/ Proj	C
Version	**2023**	1	0	2	0	2
Pre-requisites/Exposure	Basic Computer Skills					
Co-requisites	Improving the Sketching Skills					

Catalog Description
This course introduces students to the art and concept of two dimensional or 2D computer animation. 'D' stands for dimension and refers to animation, which is conducted on a two-dimensional plane, unlike the real world where everything is seen and experienced on a three-dimensional plane. This course primarily focusses on the theoretical aspects of two-dimensional animation and is reinforced though many hours of hands-on lab training designed to right from the start, train the students to be industry ready.

Course Objectives
The objective of this course is to:

- Enable the students to comprehend principles of animation using a field-based approach.
- To familiarize students with all aspects of software, both at the beginner as well as advanced level.
- To instill in the students such a level of confidence that they can tackle projects at a near professional level by having a holistic knowledge of all software related to 2D animation.

Course Outcomes (COs):
On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
Completely proficient with all aspects of at least two 2D animation software, notably Adobe Animate CC (now Animate) and Adobe After Effects	L1, L2, L3
Be able to visualise, script, storyboard and create smart and relevant 2D animations	L2, L3,
Be able to produce quality motion graphics for the Television Industry using a variety of 2D animation tools and third-party plug-ins.	L3, L4
Be able to work in a team delegating different aspects of production to team members and exchange notes and monitor each other's work, so that professional	L3, L4, L5

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Fundamentals of Animation What is animation? How is 2D animation different from other forms of animation. How are Animate CC and After Effects different from drawing and 3D packages? • The Animate CC Interface • Animate CC tools and menu commands • Animate CC and Photoshop – an integrated workflow • Frame-by-frame animation in Animate CC • Onion skinning – why it is needed. • Exploring the Timeline	**L1, L2**	15

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

• Animating through action script • Motion tweening in Animate CC		
Module II: Introduction to After Effects This Unit moves out from the Animate CC interface tools, and dialogues into the domain of After effects. Since this package is used heavily by the Television Industry, many examples from this medium will be used to illustrate hard-to-grasp concepts. Various components of After Effects that will be taught in this module are: • The After Effects interface: Moving about and navigation in After Effects • AE tools and panels; how to customize and optimize them. • Keyboard shortcuts - how to use and customize. • Creating your first composition • The Timeline - navigation, panels, and scope of the timeline • Project windows and assets • Moving assets from project to timeline • Use of keyframes to create simple animations. • Principles of animation • Frame rates, speeding up and slowing down of animation. • Rendering and compression concepts. • Different kinds of movie formats • Exporting your first animation. • Settings and how they can be tweaked.	**L1, L2, L3**	15
Module III: 2D Animation Post-Production In this module very little theory is imparted. Students are expected to prepare a comprehensive AnimateCC and After Effects project each, which is closely monitored and supervised by the faculty in charge. The goal is to get the students as industry ready as possible and to ensure that at least one professional-looking project in both software packages is designed and executed.	**L2, L3, L4**	10

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2251	POST-PRODUCTION	L	T	P	FW/Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

Post-Production for Animation using DaVinci Resolve is a comprehensive course that covers the essential aspects of post-production in animation projects. Students will learn how to use DaVinci Resolve, a powerful and widely used post-production software, to enhance their animated creations. This course includes audio editing, applying transitions and effects, color grading of RAW videos, and various aspects of video exporting. Through practical exercises and projects, students will gain hands-on experience in applying these techniques to produce videos.

Course Objectives

- Understand the post-production workflow and its significance in post-production.
- Utilize DaVinci Resolve effectively for video editing, audio editing, and applying transitions and effects.
- Enhance the visual appeal and storytelling through color grading techniques for RAW videos.
- Comprehend various RAW video formats and the process of exporting videos for different platforms.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
Proficiency in DaVinci Resolve: Students will gain a thorough understanding of DaVinci Resolve and its various tools and features. They will be proficient in using the software for video editing, audio editing, applying transitions and effects, color grading of RAW videos, and exporting.	L1, L2, L3
Enhanced Animation Projects: With the knowledge and skills acquired in post-production, students will be able to significantly enhance the quality of their animation projects. They will be able to edit animated sequences effectively, add transitions and effects to improve visual flow, and apply color grading techniques to create visually appealing and compelling animations	L2, L3, L4, L5
Immersive Audio Experience: Students will be capable of editing and manipulating audio tracks in DaVinci Resolve, incorporating sound design principles to create an immersive audio experience that complements the animation's narrative and enhances audience engagement.	L3, L4, L5
Professional-Grade Color Grading: Understanding color theory and utilizing DaVinci Resolve's advanced color grading tools, students will be able to perform professional-grade color grading on RAW videos. This skill will allow them to set the mood, tone, and atmosphere of their animations effectively	L3, L4, L5
Portfolio of Post-Production Work: Through practical exercises and projects, students will build a portfolio showcasing their post-production skills and the final animations they have enhanced using DaVinci Resolve. This portfolio will be an asset for future job opportunities in the animation industry.	L2, L3

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Introduction to Post-Production in Animation and DaVinci Resolve • Understanding the role of post-production in animation projects. • Overview of the DaVinci Resolve interface and workspace. • Importing and organizing animated sequences for editing.	**L1, L2**	8
Module II: Video Editing and Audio Editing in DaVinci Resolve • Techniques for precise video editing, timing, and transitions. • Applying transitions and effects to enhance animation sequences. • Working with audio tracks and applying sound design principles to create immersive audio experiences.	**L1, L2, L3**	10
Module III: Color Grading of RAW Videos in DaVinci Resolve • Introduction to RAW videos and their advantages for animation. • Understanding color theory and its impact on animation storytelling. • Utilizing DaVinci Resolve's advanced color grading tools for RAW videos.	**L2, L3, L4, L5**	10
Module IV: Exporting Videos for Various Platforms • Understanding different video formats and codecs for exporting. • Optimizing settings for web, broadcast, and cinema delivery. • Exploring options for exporting videos with multiple audio channels.	**L1, L2, L3, L4**	8
Module V: Workflow Optimization and Best Practices • Tips for streamlining the post-production process for efficiency. • Collaboration with animation teams and other post-production professionals. • Case studies of successful projects with notable post-production techniques.	**L2, L3, L4, L5**	14

DANI2202	SCRIPTING AND STORYBOARDING	L	T	P	FW/ Proj	C
Version	**2023**	1	0	2	0	2
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

In this course, students learn the rudiments of scripting and storyboarding as well explore the differences between the different script formats. They are introduced to conceptualizing a treatment and style for a film, scripting for feature films, documentaries and Animation. Students will also acquire knowledge about screenplays, storyboards and Animatics.

Course Objectives

This course equips the learner with skills in three distinct areas. Firstly, to polish their writing styles, structures and grammar so that the student can write in a lexically and grammatically correct manner. Secondly, to build a sound theoretical foundational of filmic elements so that the learner can translate prose elements into visual narratives. Thirdly, to enable the learner to conceptualize, visualize and translate these abstract ideas into a concrete text in the form of storyboards and scripts. The entire course takes the advantage of a huge repository of good audio-visual material so that every theoretical construct can be supplemented and illustrated with examples drawn from filmic and broadcast domains.

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Have improved writing styles and will be able to write quickly effectively and well in a variety of styles.	L1, L2, L3
Have a sound foundational structure of film grammar so that they can translate filmic elements into narrative structures and visualize scenic elements with ease.	L1, L2
Be able to write creative and cohesive scripts in a variety of programme formats such as fiction, animation and documentaries.	L2, L3, L4
Be proficient at every aspect of writing for fiction and non-fiction. They will be able to translate abstract ideas into shootable scenes.	L4, L5
Be able to make storyboards and animatics for different production.	L3, L4, L5

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Pre- Production, Concept and Treatment This unit focuses essentially of all aspects of pre-production. Methods of research, scouring for sources of material, collating and compiling material. And understanding requirements before production. 1. What is Pre-Production? 2. Why is Research needed? 3. Types of Productions	**L1, L2, L3**	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

4. Concept of Recce 5. Importance and role of Budgeting, Permissions and Auditions. 6. Characterization and its significance. 7. Concept of Shot Division and Continuity 8. Format of Floor Plan and Continuity sheet 9. Different Transitions and its meaning. 10. Concept of Kuleshov Effect and its phenomenon.		
Module II: Fundamentals of Film Grammar This is very important module which introduces the fundamentals of constructing and deconstructing a film as well as techniques developed by the great masters of documentary and cinematic narrative. 1. What is Visual Grammar? 2. Concepts and use of semiotics. 3. Subliminal messaging 4. Auteur 5. Suspension of disbelief 6. Ambiguity in storytelling. 7. Creating different types of Narratives 8. Ellipsis 9. Diegetic and Non-Diegetic 10. Film Genres 11. What are Compositions, Line of Action and Magnification? 12. Uses of Montages 13. Concept of Rashomon Effect	**L1, L2**	10
Module III: Writing a Script This module explains and teaches the actual writing process. How all the different ingredients of pre-production research, visualization, film grammar and principles come together to form a compelling narrative. 1. What is an idea? 2. Synopsis 3. Writing different kinds of Story 4. Slug line 5. Script Formats 6. Writing Dialogues and its importance 7. Soliloquy 8. Mise-en-scène 9. Format of a typical script 10. Writing a sample script 11. Writing a Script for PSA's 12. Writing a Script for Documentaries	**L2, L3, L4, L5**	12
Module IV: Screenplays and Storyboarding This is almost a completely practical unit, where students are taken through the entire process of writing a script and have to prepare on an individual basis scripts and storyboards in a variety of formats. And later make proper animatics with sound design. 1. What is a Screenplay? 2. Screenplay Formats	**L2, L3, L4, L5**	15

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

SEMESTER-III

DANI2301	UI AND UX DESIGN	L	T	P	FW/Proj	C
Version	**2023**	2	0	2	0	3
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The UI/UX Design brings a design-centric approach to user interface and user experience design, and offers practical, skill-based instruction centered around a visual communications perspective, rather than on one focused on marketing or programming alone. Students will learn to summarize and demonstrate all stages of the UI/UX development process, from user research to defining a project's strategy, scope, and information architecture, to developing sitemaps and wireframes. You'll learn current best practices and conventions in UX design and apply them to create effective and compelling screen-based experiences for websites or apps.

User interface and user experience design is a high-demand field, but the skills and knowledge you will learn in this Specialization are applicable to a wide variety of careers, from marketing to web design to human-computer interaction.

Course Objectives

1. To teach about the UX design & Frameworks
2. To train the basic elements of User-centric design
3. Learn the visual elements of User Interface Design
4. To teach the tools of prototyping and user-testing.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
To teach about the UX design & Frameworks: Students will gain a comprehensive understanding of the key principles and frameworks in UX design, including popular methodologies like Design Thinking and the Double Diamond model.	L1, L2, L3
To train the basic elements of User-centric design: Students will be able to apply user-centric design principles to real-world problems, ensuring that products and services are developed with the end-users' needs and preferences in mind.	L2, L3, L4, L5
Learn the visual elements of User Interface Design: Students will learn the visual elements of user interface design, including color theory, typography, layout, and iconography, and apply these principles to create visually appealing and user-friendly interfaces.	L3, L4, L5
To teach the tools of prototyping and user-testing: Students will learn to create interactive prototypes that simulate user interactions, providing a realistic representation of the final product and allowing for usability testing.	L3, L4, L5
Portfolio of UI/UX Designs: Through practical exercises and projects, students will build a portfolio showcasing their Interface design skills and the final protypes they have made using Figma. This portfolio will be an asset for future job opportunities in the Design industry.	L2, L3

Modules	Blooms level*	Number of hours
Module 1: Introduction to UI/UX Design • Introduction to UI and UX design concepts • Historical overview of UI and UX design • Importance of user-centered design • Role of UI/UX designers in product development • Overview of the design process	**L1, L2**	8
Module 2: User Research and Information Architecture • Conducting user research (interviews, surveys, observations) • Creating user personas and user stories • Information architecture principles • Card sorting and user flow diagrams. • Wireframing and prototyping tools and techniques	**L1, L2, L3**	10
Module 3: Visual Design and Interaction Design • Principles of visual design (color theory, typography, layout) • Visual hierarchy and composition • Creating mood boards and style guides • Interactive design principles • Designing for multiple devices (responsive design)	**L2, L3, L4, L5**	10
Module 4: Usability Testing and Evaluation • Introduction to usability testing • Planning and conducting usability tests. • Analyzing user feedback and data • Iterative design based on user testing results. • A/B testing and its role in design optimization	**L1, L2, L3, L4, L6**	8
Module 5: Design Tools and Industry Best Practices • Overview of design tools (Figma) • Collaborative design and prototyping • Design handoff to developers • Ethical considerations in UI/UX design • Industry best practices and emerging trends in UI/UX	**L2, L3, L4, L5, L6**	14

DANI2351	3D FUNDAMENTALS	L	T	P	C
Version	**2023**	2	1	2	4
Pre-requisites/Exposure	Basic understanding of computer and software interface				
Co-requisites	None				

Catalog Description

This course is the introduction to the 3d computer graphics. In this course students will get to know about the possibilities of the 3d art and design. Student will start from the very basics of creating sphere, box, circle, line… etc and then creating 3d interiors and 3d models with textures and shaders. Student will get an introductory look at the processes of 3d lighting. Student will use a project-based approach as we cover the virtual 3D lighting system, look at commonly used attributes and properties of various light, and talk about some time-saving tips and techniques gleaned from production experience.

Course Objectives

The objective of this course is to

- To give a basic understanding of 3D visualization and to understanding how to start with 3D interface.
- To give hands on experience of 3D modeling, texturing, shading, and create a foundation for the advance 3d visualization.
- To provide a detailed understanding of 3d modeling.
- To train the 3D lighting uses various lights available in 3Ds Max lighting and mental ray including shaders.
- To teach the realistic rendering process of scene which used for film or any other Advertisement.
- To visualize the lighting mood for given story and their scenes and shots and then getting output in terms of video or stills using rendering techniques.

Course Outcomes

On completion of this course, the students will be able to

Expected Outcome	**Bloom's Taxonomy level**
CO1. Understand how 3d software interface work.	L1, L2, L3
CO2. Learn various ways of modelling the objects.CO3. Understand how character mesh flow help while animating and designing a character. CO3. Put light for exterior, interior or any kind of scene using fill light, main light and back light.	L1, L2
CO4. Get realistic output in the form of video or still using mental ray, software, and hardware rendering.	L2, L3
CO5. Develop the proper realistic shader effect, given them glow effect, high quality render in HD format	L4, L5

Course Content

Modules	Blooms level*	Number of hours
Module 1 Introduction to Blender 3d, Interface of Blender 3d, Basics of Blender 3d Modeling, Texturing, Shading, Lighting, Using the menus. Floating and docking, Using drag and drop feature, Introduction to different workspaces. Geometry, sub objects, Extruding, welding, bridging etc. Recognizing the workspaces.	L1, L3	24
Module 2 Introduction to modifiers and modifier gizmos. Familiarity with common modifier like Subdivision Surface, Solidify, Array, Boolean, lathe Mirror etc.	L1, L3	12
Module 3 This module focuses on the development of 3D interiors and environment. Use of different modelling techniques like sculpting and polygon modelling are explained with many real-world references. Also, how to use background images as references objects for creating the 3D model and will be demonstrated in this module. This module also covers coloring, texturing and shading of 3d objects.	L1, L3	12
MODULE 4: Lighting tools in 3D software; 3D lighting tutorial, different types of 3D lights (Point, Sun, Spot and Area light) found in 3D application, and methods for easily aiming and controlling lights, specialized attributes found in certain light types, different types of shadows available in 3D software, how depth can be added for mood to our scenes through the use of volumetric light rays, as well as many other lighting tools and concepts that will help you establish a solid foundation in 3D lighting.	L1, L2	16
MODULE 5: The core rendering tools and features of 3D lighting that every rendering artist needs to be familiar with. Foundational knowledge of rendering in 3D software lighting by talking about many of the key tools, features and concepts. Demonstrate how to resolve some rendering-related issues that student may encounter, strong workflow practices that will be extremely beneficial to them as an emerging render artist.	L4,L6	22

DANI2302	SOUND DESIGN	L	T	P	FW/Proj	C
Version	**2023**	0	0	2	0	1
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course provides students with a comprehensive understanding of sound editing principles and techniques used in various media production contexts, including film, television, video games, and multimedia projects. Students will explore the tools and software used for sound editing, as well as the creative and technical aspects of the craft. Through hands-on exercises and real-world projects, students will gain practical experience in recording, editing, and mixing sound to enhance storytelling, create immersive experiences, and produce high-quality audio content.

Course Objectives

The objective of this course is-

- Understand the fundamental principles of sound editing and its role in media production.
- Utilize industry-standard software tools for sound editing and post-production.
- Acquire skills in recording, editing, and manipulating audio for various media formats.
- Develop proficiency in sound design, including creating and manipulating sound effects.
- Apply sound editing techniques to enhance storytelling and convey mood and emotion.
- Collaborate with visual media creators to integrate sound seamlessly into projects.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
Introduction to Sound : Sound, Digital sound files, different sound formats, midi & digital audio, creating digital audio files, sound producing, sound extracting, Advantages and disadvantages of midi &digital, choosing between midi and digital audio.Sound for the World Wide Web, adding the sound to your multimedia project, production tips, audio recording, keeping track of your sound, testing and evaluation.	L2, L3
Using Audition: Sound recording, editing digital recording, trimming, splicing and assembly, volume adjustments, format conversion, re sampling or downloading, fade-ins and fade outs, equalization, time stretching, digital signal processing, reverting sound, making midi audio, audio file formats	L1, L2, L4
Adding SFX and recording Foley sounds: Adding effect automation enveloping, adding a volume envelop, adding a panning envelop, previewing effect automation, applying effect automation, adjusting envelope, adding envelop points, flipping a envelop points, setting fade properties, cutting, copying, pasting, envelope points, adding mirror and wave hammer, pan to left , pan to right, dry out, wet out, convert mono to stereo, looping, making the remix sound track with using all the special FX from the software. Exporting the files in diff formats, save in wav, mp3 etc.	

Syllabus / Topics to be Covered.

Modules	Blooms level*	Number of hours
Module 1: Fundamentals of Sound Editing with Adobe Audition • Introduction to sound editing and its role in media production. • Overview of Adobe Audition interface and essential tools • Importing, organizing, and managing audio files • Basic audio editing techniques, including cutting, copying, and pasting • Working with multitrack sessions for audio projects • Applying fundamental effects and filters to enhance audio quality • Hands-on exercises: Basic audio editing and project setup in Adobe Audition	**L2, L3**	8
Module 2: Advanced Sound Editing Techniques and Sound Design • In-depth exploration of audio formats and quality considerations • Advanced editing techniques, such as time-stretching and pitch-shifting • Noise reduction and audio restoration methods • Equalization (EQ) and frequency spectrum analysis for precise adjustments • Creation and manipulation of sound effects for sound design • Foley recording and synchronization with visual media • Practical exercises: Applying advanced editing techniques and sound design with Adobe Audition	**L1, L2, L4**	10
Module 3: Fluid Simulations with PhoenixFD • Understanding the art of audio mixing and mastering • Balancing sound elements and creating audio depth in multitrack projects • Mastering audio for various media platforms and distribution channels • Utilizing compression, limiting, and normalization for audio enhancement • Exporting audio files for professional and distribution purposes • Analyzing and critiquing sound editing in real-world media examples • Collaborative work with visual media creators and integrating sound into projects • Preparing a final sound editing project, including mixing and mastering • Presentation and critique of student projects • Industry insights and potential career opportunities in sound editing	**L2, L3, L4, L5**	10

**Bloom's Level:*

SEMESTER-IV

DANI2401	RIGGING AND ANIMATION	L	T	P	C
Version	**2023**	1	0	2	2
Pre- requisites/Exposure	Basic understanding of computer interface.				
Co-requisites	None				

Catalog Description

In this course we will take an introductory look into rigging and animation tools and techniques in 3d software.

Course Objectives

The objective of this course is to

1. To impart working knowledge of Rigging in Blender 3d and automate the basic rigging system.
2. To impart knowledge of Animation in Blender for Humanoid and non-organic objects.
3. To Impart Knowledge of Animation techniques in Blender 3d.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	**Bloom's Taxonomy level**
CO1. Create detailed Rigging system of Humanoid and non-organic objects for animation	L1, L2
CO2. Create Animation using Keyframes and Rigging system for smooth and effective lopping animations i.e. Walk cycle, Run Cycle and more.	L2, L3
CO3. To use animation timeline and create Ease-in & Ease-Out using graph editor.	L4, L5

Modules	**Blooms level***	**Number of hours**
MODULE 1 Introduction to rigging systems and methods. Vertex weighting and skinning techniques. Understanding the basics, which include everything from how to establish solid naming conventions to how to utilize 3d bone and IK handle tools. Cover more complicated topics like setting up a enhanced IK rig, using tools to create a counter twist rig that preserves volume. Also learn how 3d software interface can be customized to work faster.	L1, L3	24

MODULE 2 Animation in 3d application. Fundamental key frame animation, repeating animation over time, Hierarchical linking, Key frame, Parameters, Setting Animation Keys, Animating the rotation of the dummy object, Creating a continuously looping animation.	L1, L3	12
MODULE 3 Advanced animation: The Fundamentals of Hierarchical Linking, Animation controllers, Ease curves, Controllers, Constraints, Graph editors.	L1, L3	12

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6- Evaluation

DANI2451	BASICS OF DIGITAL COMPOSITING & VFX	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

In this course, students will learn the different concepts involved in digital compositing and VFX which will help them to apply this entire knowledge practically. They will explore the world of Node-Based Compositing which Industry standard both in Bollywood and Hollywood.

Course Objectives

The objective of this course is to

1. To impart working knowledge of basics Image & video Compositing & Color correction
2. To impart knowledge into Image tracking and stabilization for seamless composting.
3. To Impart knowledge of basics of Node Based Compositing techniques.
4. To impart knowledge of Rotoscoping, matting & chroma keying.

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Do Node based digital compositing of Images & video.	L1, L2, L3
Create match move composites for seamless chrome key effects and 3d camera tracking.	L1, L3, L4
Do basic rotoscoping and create clean plate for different composites.	L1, L2, L3, L4
Be proficient at creating alpha mattes and extracting mattes.	L1, L4, L5
Identify and describe various video Formats, Aspect Ratio, color depth bits, & film formats.	L1, L2

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Evolution Digital Compositing This unit focuses essentially on all aspects of core compositing techniques. Creative use of Jump cuts, multiple exposure, background projection, dissolve, split screen, aspect ratio is often utilized to make basic composites. Also, the evolution and concepts given by the father of compositing George Méliès will be key knowledge here to understand the general techniques.	**L1, L2, L3**	8
Module II: Introduction to Nuke Interface This is a very important module which introduces the interface of Nuke. It is a Node based industry standard software for compositing. How to import files, save files, make projects and settings, Noise removal, connect different nodes, viewer and its uses, channels, etc. in node-based software like nuke will be focused.	**L1, L2, L3**	10

Module III: Tracking, Stabilization and Rotoscoping This module will focus upon Rotoscoping techniques along with some other topics like tracking an Element into a Plate, Choosing the Feature to Track, Using Tracking Curves Manually, Tracking Multiple Points, Stabilizing a Plate, Camera tracking, Timelines, Curve Editors.	**L2, L3, L4, L5**	15
Module IV: Matting & Multiple Exposure This module explains the need of mattes where students are taken through the entire process of creating alpha mattes for different videos and images. And later they will explore the most commonly used compositing technique that is multiple explore in the practical form.	**L3, L4, L5**	15
Module V: Chroma Keying This is the most important unit for compositing (layering) two or more video streams together. Students will learn the technique to remove a background and green screen from the subject of a photo or video. And then seamlessly replace the different background and composite shot with proper lighting, color, hues, luminance, and edge blending.	**L3, L4, L5, L6**	15

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2402	DESIGN THINKING	L	T	P	FW/ Proj	C
Version	**2023**	1	0	2	0	2
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course will teach students an overview of design thinking and work with a model containing four key questions and several tools to help you understand design thinking as a problem-solving approach. We also look at several stories from different organizations that used design thinking to uncover compelling solutions.

Course Objectives

The objective of this course is to

1. To impart working knowledge of what design thinking is and when to use it.
2. To impart knowledge to use design thinking for generating innovative ideas.
3. To Impart Knowledge of to prepare to see and take action when opportunity arises

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Create the process of using design thinking to generate and test ideas	L1, L2, L3
Understand how to use design thinking to generate innovative ideas	L1, L3, L4
Identify and describe various design thinking process and methods.	L1, L2, L3, L4
Build prototype of some innovative designs that solves problem	L2, L3, L6

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: What is Design Thinking? Students will begin by unpacking what we mean by design thinking and why it is more effective than traditional methods when the goal is innovation. We'll also examine what kinds of challenges are best suited for design thinking and learn about the Visualization tool, which helps bring ideas to life. By the end of this module, you'll have a better understanding of what we mean by design thinking, when to use it, and how to use the Visualization tool.	**L1, L2, L3**	5
Module II: Design Thinking Phases and Ethics This is a very important module which introduces the five phases of design thinking. That is Empathize, Define, Ideate, Prototype, Test. And final students will learn about the ethics in design, Copyright, Trademark and Patent in designs.	**L1, L2, L3**	5
Module III: Experimentation In this module students will go through different activities and exercises which will help them to generate innovative ideas. They will experiment and build designs on SDGs and provide something innovative and present	**L3, L4, L5, L6**	20

in form of prototypes of Logo Design, Character Design, Comic Strip Design, Poster Design, Game Prototype, UI/UX.		

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

SEMESTER-V

DANI2501	INTRODUCTION TO GAME DESIGN & DEVELOPMENT	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

Students will learn to build the skills necessary to design and develop games. The Introduction to Game Development focuses on both the theory and practice of game making. From a technical standpoint, students create game projects in the stable Unity Game Engine, including a 2D Shooter, 2D Platformer, First-Person Shooter, and 3D Platformer. Students will learn to import 3D models with texture & Materials from 3D software. Also practice and learn the basics of programming with C# or C++ for interactive games.

Course Objectives

The objective of this course is to

1. To impart working knowledge of Importing 3D assets into the game engine.
2. To impart knowledge into unity 3D scripting using C#.
3. To impart Knowledge of publishing from Unity 3D for multiple devices.
4. To impart Knowledge of Game Logic and Game Design.

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Create & assemble 2D & 3D assets into Unity 3D game engine.	L1, L2, L3
Create word-based games with Classical C# in Visual Studio	L1, L3, L4
Create C# scripts for the 2D & 3D interactions in Game Engine	L1, L2, L3, L4
Be able to Build and publish games for different platforms	L2, L3, L6

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Introduction to C# Programming Students will begin by unpacking the basics of classical C# scripting in Visual Studio. They will get to know about the programming basics, naming conventions, code readability, working with variables, converting variables, operators, console input, random numbers, If/else case, loops functions and arrays. By the end of this module, students will have a better understanding about programming and will be equipped with proper mindset for game development.	**L1, L2, L3**	5
Module II: Basics of Unity 3D In this module students will be introduced to the Interface of Unity 3D. They will get to know the Unity Editor, Project Dialog and Unity 3D Interface. They will explore the Built-In 3D Objects and see the process of Importing Models and building Textures, Shaders, and Materials. Some	**L1, L2, L3**	5

other topics that could be covered in this module will be Lights and Cameras, Rigidbodies, Collision & Colliders, Prefab Basics, Animation in Unity, Different Animation poses like Idle & jumping, States and Blend Trees, Build Settings & Game Settings.		
Module III: Essentials of Unity Scripting In this module students will be introduced to C# Scripting inside Unity. Focus will be on Creating & Attaching a Script, Anatomy of a Basic C# Script in Unity, The Using Section, The Class Declaration Section, The Class Contents, Variables, Creating Variables, Variable Scope, if / else Statement, the if / else if Statement, Methods, Anatomy of a Method, Writing Methods, Using Methods, Input Basics & Scripting.	**L1, L3, L4, L5**	20
Module IV: Introduction to Visual Scripting In this module students will get know the Visual scripting in Unity as helps to create scripting logic with visual, drag-and-drop graphs instead of writing code from scratch. They will get to know about the script graphs, state graphs, flow machine, Scripting Events, Macros, etc.	**L3, L4, L5, L6**	20

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2502	ANIMATION PRODUCTION	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course is designed for students to work in a team just like in Animation Studios and build skills necessary to design and develop one animated movie. Animation Production focuses on the practice of Animation Making. From a technical standpoint, students will produce one 2D or 3D animated movie in this course. Plus, they will also go through the entire process of making animated movies from ideation to post-production and finally complete an entire movie project.

Course Objectives

The objective of this course is to

1. To impart working knowledge of Animation Studios.
2. To impart knowledge and importance of time management for a project.
3. To impart knowledge of Animation Production.
4. To impart knowledge of working in a team and delivering a project.

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Encouraged and create new ideas for Animated films.	L1, L2
Be able to visualize their ideas in form of stories.	L1, L2, L4
Be able to understand the entire animation production process.	L1, L2, L3
Create one animated movie in a team.	L2, L3, L6

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Ideation & Storyboard Students will begin by brainstorming interesting ideas and sequence of thoughts in a team, from the original concept to implementation using scripting and storyboard creation. They will learn the importance of concept development and scriptwriting, character designs and world-building for Animated Movies. Some important topics covered are: • Ideation & Concept Development • Scanning and digitizing your art • Anatomy and proportions for character art • Character turnaround sheets and model sheets • Designing objects and props that fit the animation's world. • Creating consistent design language • Storyboarding the concept and idea	**L1, L2, L3**	10

Module II: Pre-Visualization for Animation This module introduces students to the art and techniques of previsualization, an essential aspect of the animation production process. Students will learn how to plan and visualize animation sequences, which is crucial for creating compelling and well-structured animated content. Some important topics covered are: • Creating clear shot compositions • Blocking out characters, scenes, and camera angles • Communicating storytelling through visuals • Transforming storyboards into animatics • Incorporating sound and dialogue • Planning character movements and actions • Emotion and expression in previsualization • Incorporating visual effects and CGI elements • Exporting previsualizations	**L1, L2, L3**	10
Module III: Production Process This module focuses on the creation of visual assets as per the storyboard and pre-viz for animation, including digitized character designs, background art, environment, and props. Final frames and shots as storyboards will be prepared and made ready. Students will learn essential art principles and develop their artistic skills to effectively contribute to the animation production process. Some important topics covered are: • Background Art and Environment Design • Creating immersive and visually appealing backgrounds • Environmental storytelling through art • Digital painting techniques for backgrounds • Color psychology and symbolism in animation • Color theory and harmony • Making shot wise final frames & assets for post-production.	**L1, L3, L4, L5**	20
Module IV: Post-Production Process This module is most important as it explores the critical post-production stages of animation filmmaking, including animating artwork, characters and background elements and frames. Besides that editing, sound design, visual effects, and final rendering will also be focused. Students will gain the skills and knowledge necessary to bring their animated projects to life through the power of post-production. Some important topics covered are: • Animating assets, shots, and frames. • Preparing final animation sequences for rendering • Understanding render settings and quality optimization • Post-production compositing and color correction • Exporting final animation sequences • The art of editing in animation	**L2, L3, L4**	25

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2551	MAYA FUNDAMENTALS	L	T	P	FW/Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course introduces students to the foundations of character/object modeling & texturing which is the process of adding mesh and controls to a character that allows a creative model to animate it in a proper manner. The course is prepared to candidates for an advanced work in 3-D modeling & Texturing. In this section, students will get an introductory look at the processes in Maya. Students will use a Project-based approach as we cover the fundamentals of Maya looks at commonly used tools, and talk about some time-saving tips and techniques gleaned from production experience.

Course Objectives

The objective of this course is-

- To train the proper knowledge of surfaces which are used for modeling in TV serials, films and other commercials.
- To train the basic mesh flow system in modeling.
- To teach the tools of modeling, merit and demerit of modeling and designing.
- To guide the visualize the story and their character, assets and other part of design and then impart it in modeling through various tools of Maya software.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
Introduction to Maya: Hotkeys. Using the spacebar. Manipulating a view. Creating objects. Simple primitives. Lights, cameras, selecting objects, types of selection, single selection, adding and subtracting selection, edit menu selection options. Marquee selection, Lasso selection, selection mask	L2, L3
Create and design the required models for a Project: Students will be able to create and design 3D models and apply appropriate color schemes for use in advertisement projects and various commercial applications.	L1, L2, L4
Develop and represent the 3D models and environment on their own visualized story: Students will gain the ability to independently create and represent 3D models and environments that align with their own visualized narratives and stories.	L2, L3, L4, L5
Introduction to Materials and Textures: Using hyper shade, relationship editor, hyper graph and outliner. The channel box. Duplicating objects, pivot points, introduction to snapping-2D snapping and 3D snapping. Using layers. Introduction to textures and materials..	L3, L4, L5
Make any final Scene or a self-thought Character: Students will learn to create a proper Environment or a Scene. They will also create a final self-designed character which will include ideas from a character Sheet .	L3, L4, L5

Syllabus / Topics to be Covered.

Modules	Blooms level*	Number of hours
Module 1: Introduction to Maya Interface and Basic Operations • Overview of Maya's interface • Introduction to essential hotkeys • Using the spacebar for navigation • Manipulating views and viewports • Creating 3D objects, including simple primitives • Introduction to lights and cameras • Selecting objects in Maya • Types of selection (single selection, adding, subtracting) • Edit menu selection options • Marquee selection and Lasso selection • Selection mask	**L2, L3**	8
Module 2: Create and design the required models for a Project • Creating 3D models for advertisement and commercial projects • Applying appropriate color schemes • Texturing and shading for models • Rendering considerations for advertisements • Real-world applications and case studies	**L1, L2, L4**	10
Module 3: Develop and represent the 3D models and environment on their own visualized story • Developing 3D models and environments • Aligning 3D creations with personal narratives and stories • Creating a visual storytelling project • Incorporating storytelling elements in 3D design • Presenting and sharing 3D visual stories	**L2, L3, L4, L5**	10
Module 4: Introduction to Materials and Textures • Exploring the HyperShade editor • Using the Relationship Editor, HyperGraph, and Outliner • Understanding the Channel Box for object manipulation • Duplicating objects and managing pivot points • Introduction to 2D and 3D snapping • Working with layers for organization • Introduction to textures and materials for 3D objects	**L3, L4, L5**	8
Module 5: Final Scene and Character Creation • Creating a complete 3D environment or scene • Designing a self-thought character • Utilizing character sheets and concept art for character design • Bringing the character into the final scene • Presentation and critique of final projects • Preparing a portfolio of work for showcasing to potential employers or clients	**L3, L4, L5**	14

DANI2651	BASICS OF AR/VR	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

Students will learn how to design, develop, troubleshoot, and publish their own mobile AR and VR applications through Unity for iOS and Android devices. Using the very latest techniques recommended by Unity's VR engineers and Augmented Reality, or AR, will transform how we see and interact with the world. And the hardware that makes AR possible is the smartphone that you may already have in your pocket. You'll learn about the features offered by Unity's AR Foundation, and about additional features in ARKit and ARCore. Plus, they will be introduced to Vuforia Engine SDK for AR App Development.

Course Objectives

The objective of this course is to

1. To impart working knowledge of basics of AR, VR and Metaverse.
2. To impart knowledge into Image tracking and ground plane tracking using AR Foundation.
3. To Impart knowledge of basics of gaze control, Recasting, & lean touch controls.
4. To impart knowledge of app development using Vuforia Engine.

Course Outcomes (COs):

On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Create sample AR Applications for iOS & Android	L1, L2, L3
Create VR environment with Interactions for Google Cardboard.	L1, L3, L4
Identify and describe Mixed Reality & its applications.	L1, L2, L3, L4
Build and Run the app for AR Supported mobile devices	L2, L3, L6

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Introduction to XR In this module Students will be introduced to the concept of Virtual Reality, Augmented Reality, Mixed Reality and Metaverse. Get will get to know about the different types of modern VR/AR experiences and its uses, API SDK, its history, hardware requirement like AR supported mobile devices and & software like Unity, Lens kit, Meta studio, AR Foundation and Vuforia Engine. They will also unpack the Interaction fundamentals which will boost the knowledge about the concept further.	**L1, L2**	5
Module II: Introduction to Unity AR Foundation In this module students will learn process of installing and using AR Foundation package into Unity 3D. Some important topics includes importing models for AR App, Setup the Unity 3D for AR App, Creating UI and Application Functions, Implementation of ARKIT for IOS,	**L1, L2, L3**	5

Implementation of ARCORE for IOS, Publish App from Unity3D for IOS & Android and working on Marker based AR app.		
Module III: Introduction to Vuforia Engine This module is about Vuforia Engine that offers tracking a variety of objects and spaces that can be categorized as Images, Objects, and Environments. Image Targets, Barcode Scanner, Object tracking, Multi target feature, VuMark and building Markerless AR, etc.	**L1, L3, L4, L5**	20
Module IV: VR for Google Cardboard In this module students will unpack the process of making environment and making basic VR App in Unity, enabling VR Support, hardware and software recommendations for VR development in Unity, Camera setup for VR, Head track input and head mounted input, scene controllers, controlling objects, Interaction using Gaze and VR inputs, Animations in VR, Advanced texturing and modelling in Unity 3D through Probuilder and Shader Graph.	**L3, L4, L6**	20

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

Text Books

- Complete Virtual Reality and Augmented Reality Development with Unity: Leverage the power of Unity and become a pro at creating mixed reality applications (2019), United Kingdom: Packt Publication

DANI2602	MAYA RIGGING AND ANIMATION	L	T	P	C
Version	**2023**	2	1	2	4
Pre- requisites/Exposure	Basic understanding of computer interface				
Co-requisites	None				

Catalog Description

Student will also learn how Maya's interface can be customized to work faster. By the end of the section, student will be comfortable enough to utilize Maya's rigging features to rig their own objects and characters. Students will have a good understanding of animating objects and characters in Maya.

Course Objectives

The objective of this course is to

- To impart working knowledge of Rigging in Autodesk Maya and automate the basic rigging system.
- To impart knowledge of Animation in Autodesk Maya for Humanoid and non-organic objects.
- To understand and able work with Dope Sheet & Graph Editor in Maya.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	**Bloom's Taxonomy level**
CO1. Create detailed Rigging system of Humanoid and non-organic objects for Cinematic animations	L1, L2
CO2. Create Animation using Keyframes and Rigging system for smooth and effective lopping animations i.e. Walk cycle, Run Cycle and more. And effectively use of graph editor & Dope sheets for ease-in & ease-out animations.	L1, L3

Modules	Blooms level*	Number of hours
MODULE 1 Student will also learn how Maya's interface can be customized to work faster. By the end of the section, student will be comfortable enough to utilize Maya's rigging features to rig their own objects and characters.	L1, L3	24
MODULE 2 The intuitive and fun animation tools of Maya. How to set up animation preferences and create key frames, to learning how animation can be modified from Maya's Timeline and Graph Editor. Learn how to animate objects along a path, how to work non-linearly and non-destructively with the help of the Trax Editor andanimation layers. Animate with constraints and even cover helpful tips on how to improve your productivity.	L1, L3	24

**Bloom's Level:*

DANI2601	ADVANCED COMPOSITING & VFX	L	T	P	FW/ Proj	C
Version	**2023**	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description
This course will take you through the advanced concepts of VFX & Compositing in Nuke. The course is focused both on the 2D & 3D aspects of compositing. It introduces CGI Compositing, Deep Compositing and Particle System in Nuke. Students will also learn how to Render CGI in passes, footage, and all the elements necessary to composite a CG shot.

Course Objectives
The objective of this course is to
1. To impart working knowledge of Advance VFX, Rotoscoping & CGI Compositing
2. To impart knowledge into Compositing of 3D Passes and 3D motion tracking
4. To impart Knowledge of Particle System in Nuke
5. To impart Knowledge of Deep Compositing

Course Outcomes (COs):
On completion of this course, the students will

Expected Outcome	Bloom's Taxonomy level
Be able to create 2D compositing using Advanced Rotoscoping	L3, L4, L5
Be able to create different Multi-pass CG compositing	L1, L3, L4
Use particle system in nuke for different effects and simulations.	L1, L2, L3, L4
Be proficient at Nuke 3D interface	L1, L2
Understand and use basic deep compositing system in Nuke	L1, L2, L3

Syllabus / Topics to be Covered.

Modules	Blooms level*	Number of hours
Module I: Advanced 2D Compositing & Rotoscoping This unit focuses essentially on all aspects of 2D compositing techniques. Students will understand and revise the Additive color theory, 2D Tracking, Rotopaint and Rotoscoping, Keyframe animation, Chroma Keying / Greenscreen removal, Camera traits (Lens distortion, grain, sensor noise), Process of Cleanplate.	**L1, L2, L3, L6**	15
Module II: Lighting & CGI Compositing This module will introduce CG Compositing that happens after 3D rendering, as seen in a typical CG pipeline flow, which is the most expensive phase of CG filmmaking. Essential topics that are covered here will be Matching color tones, darks, highlights of an image, Compositing elements / FX into a shot, integrating	**L1, L2, L3**	15

Registrar
Amity University Haryana
Manesar Gurgaon-122413

a CGI (Computer Generated Image) render into a real scene, how to use the normal AOV to fine tune CG, Use ID passes to correct different geometries.		
Module III: Introduction to Particle system in Nuke This module will focus upon the Particles nodes (NukeX and Nuke Studio only). These nodes deal with Nuke's built-in particle system, often used for creating effects like fog, smoke, rain, snow, and explosions. Some nodes that students will learn include ParticleEmitter, ParticleBounce, ParticleCurve, ParticleSettings, ParticleDirectionalForce, ParticleWind, ParticleMerge, etc.	**L2, L3, L4, L5**	15
Module IV: Basics of Deep Compositing This module introduces the basics of Deep Compositing and Deep Data. Students will learn the basic process to read in your deep image with the DeepRead node, Merge deep data with the DeepMerge, generate holdout mattes from a pair of deep images using the DeepHoldout node, Flatten deep images to regular 2D or create point clouds out of them, Crop, reformat, and transform deep images, learn to use the DeepCrop, DeepReformat and DeepTransform nodes.	**L1, L2 L3**	15

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

DANI2603	WEB DESIGN AND DEVELOPMENT	L	T	P	C
Version	**2023**	2	1	2	4
Pre-requisites/Exposure	Basic understanding of computer interface.				
Co-requisites	None				

Catalog Description

This course will help students understand the importance of the web as a medium of communication and understand the principles of creating an effective web page, including an in-depth consideration of information architecture. Also, to become more familiar with graphic design principles that relate to web design and learn how to implement these theories into practice.

Course Objectives

The module is structured for the students to learn the basic layout making process of Webpage. They will be able to understand the process of making a layout, Principle of Web page design elements. Understanding the proper Fonts for the contemporary web pages, knowledge about the design edition tools like WordPress. Understanding the basics of HTML and CSS.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	Bloom's Taxonomy level
CO1: Understand Web designing process for a professional website.	L1, L2, & L3
CO2: Understand the aesthetic sense of WordPress and web development technique.	L1, L2
CO3: Develop the process of content writing as well as the proper Font style setup.	L2, L3
CO4: Use the HTML and CSS to create the beautiful layouts.	L4,
CO5: Create a website with professional design.	L3,

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Web Design and Development Workflow that Works Whether or not you are new to website design and development, Comprehend the overall picture. Understand the workflow process and best practices for design. learn the software and technology; and maintain a site that competes and communicates effectively on the Web.	L2, L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

Manesar Gurgaon-122413

MODULE 2: WordPress Creating a dynamic website students will be able to learn how to set-up a WordPress website and develop the site to include a menu system with navigation bars, widgets for posts and comments, theme, calendar, and interactive forms. Use of templates for faster workflows. Creating a full website using WordPress templates.	L2, L3	8
MODULE 3: HTML and CSS (Basics) Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS) are inseparable languages that together describe the structure and display of pages on the World Wide Web! This course introduces you to the syntax and explores techniques using both languages to create and format headings, body text, hyperlinks, images, tables, forms and more. You'll also learn to control the format and layout of elements on web pages using CSS stylesheets. Toward the end of the class you'll do several multi-column page layouts with an embedded video element.	L2, L3	8
MODULE 4: Creating Website Students will learn to create website using WordPress or Using HTML coding for simple website. Understanding the layout of a website. Managing the content based on the goal of website.	L3, L4	12

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation

SEMESTER-VII

DANI2701	FILM MAKING PROCESS	L	T	P	FW/ Proj	C
Version	2023	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

In media today, unlike earlier, there are a plethora of options to choose from. Filmmaking has scaled down and video is a strong contender to film. This module encapsulates the entire film making process and students are introduced not only to the theoretical and practical aspects of film production, but to subtle nuances as well of editing and camerawork. The course is a balanced mix of aesthetics of cinema as well as the actual pre, production and post-production process that filmmaking entails

Course Objectives

The objective of the course is to impart a well rounded education of all aspects of film making – theoretical as well as practical and even delves briefly in the psychological aspects of filmmaking and how each shot can impact the viewer at a subconscious level. At the end of this course, students will be able to visualize, ideate and produce films in a variety of formats, image sizes and treatments

Course Outcomes (COs):

The objective of this course is to:

- Enable the students to understand the historical context of the film making process
- Inculcate team spirit by training students to work in small and large teams
- Understand the real meaning of film appreciation and why it is vital to critically understand and deconstruct quality films
- Grasp production techniques so thoroughly that they can produce both short and long films independently or in small teams

Syllabus / Topics to be covered

Modules	Blooms level*	Number of hours
Module I: Evolution of Cinema as a Medium of Communication. The Lumiere brothers and the birth of modern cinema. The invention of cinema; Cinema as a medium of communication. Rise of the feature film and the "Star System"; birth of the "Nickelodeon" theatre; Vaudeville and its influence on theatre and film; Growth of cinema in Europe and Italy; The French "Avant Garde" movement; Italy's gravitation towards Neo-realism; Realistic cinema in India and the films of Satyajit Ray	**L1, L2**	15
Module II: The Syntax and Grammar of Film Genre of cinemas; Shot breakdowns – the syntax of Cinema; Image and Fame sizes; Static images versus moving images; Movement within the frame and without; Camera angles and compositions; The importance of perspective; Vital importance of continuity in cinema; Role of lighting in creating moods and atmosphere; moving from scripts to treatments and screenplays; Editing in	**L1, L2, L3**	15

Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

cinema as an art form; Time-space concepts; Parallel editing; Continuity and Montage editing		
Module III: Non-fiction film making: Reordering of form and content. The rise of the documentary film. The films of Griffith and John Grierson; The filmmaking process: Pre-production, production and post-production; The importance of research in documentary film making. Recording bites, narration and sound tracks and editing them altogether. Other non-fiction formats: The news bulletin; the educational film; Promotional and Ad films. Pros and Cons of different audio-visual formats	**L1, L2, L4**	15
Module IV: Practical techniques of video and film making In this Module, students learn and practice the entire process of filmmaking moving from ideation to scriptwriting and treatment of the film. Then they practice Camera shots and Camera movements; Breakdown of the film into shots, sequences and segments. In the final stage, the film is put together in the editing table using different editing software like Adobe Premiere Pro or Final Cut Pro	**L3, L4, L5**	15
Module V: The future of the audio-visual medium This is a short module showcasing the future potential and market for film. Moving from cinema theares to OTT Platforms; New age distribution and viewing of created content. The increasing use of fantasy, visual effects and animation in film and video. Creation of video avatars; increasing use of AI in video and film making and possible new immersive experiences in cinema	**L4, L5, L6**	15

Version	**2023**	2	2	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course delves into the powerful world of Maya particles and dynamics, providing students with the knowledge and skills to create stunning visual effects, simulations, and animations. Through a hands-on approach, students will explore various techniques and tools in Autodesk Maya to understand and control the behavior of particles, simulate realistic physics-based motion, and craft dynamic animations for a wide range of applications. From fluid simulations and particle systems to rigid body dynamics and cloth simulations, this course equips students with the expertise to produce engaging and dynamic visual content.

Course Objectives

The objective of this course is-

- Understand the fundamental concepts of particles and dynamics in Maya.
- Create and manipulate particle systems for visual effects and animation.
- Simulate realistic physics-based motion for objects and characters.
- Implement fluid dynamics, such as smoke, fire, and liquid simulations.
- Master rigid body dynamics for object interactions.
- Develop cloth simulations for realistic fabric behavior.

Course Outcomes (COs):

On completion of this course, the students will be able to

Expected Outcome	**Bloom's Taxonomy level**
Upon completion of this course, students will have a comprehensive understanding of the fundamental concepts related to Maya particles and dynamics, allowing them to create visually engaging and dynamic animations.	L2, L3
Students will be able to create and manipulate particle systems effectively, demonstrating the ability to craft a wide range of visual effects, including rain, snow, explosions, and more	L1, L2, L4
By the end of the course, students will possess the knowledge and skills to simulate realistic physics-based motion, enabling them to create dynamic animations for objects, characters, and environmental elements in a 3D scene.	L2, L3, L4, L5
Students will demonstrate proficiency in implementing fluid dynamics, including smoke, fire, and liquid simulations, giving them the capability to produce realistic and visually appealing effects in their projects.	L3, L4, L5
Upon completion of the course, students will master rigid body dynamics, allowing them to accurately simulate object interactions, collisions, and physical responses within their 3D scenes.	L3, L4, L5

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Students will be able to create cloth simulations to depict realistic fabric behavior and interactions, enhancing the level of detail and realism in their 3D animations and visual effects.	L4, L5

Syllabus / Topics to be Covered.

Modules	Blooms level*	Number of hours
Module 1: Introduction to Maya Dynamics and Bifrost • Overview of Maya Dynamics • Introduction to the Bifrost Graph Editor • Creating particle systems and emitters with Bifrost • Controlling particle behavior and attributes • Forces and fields: Gravity, wind, turbulence • Particle collision with objects and surfaces • Dynamic instancing with Bifrost • Practical exercises: Creating simple particle-based animations using Bifrost	**L2, L3**	8
Module 2: Advanced Particle Systems and Bifrost Simulations • Particle expressions and scripting • Fluid simulations with Bifrost • Introduction to Bullet physics for rigid body dynamics • Creating dynamic environments with Bifrost • Combining particle systems with rigid bodies • Realistic smoke and fire simulations • Practical exercises: Building complex dynamic scenes with Bifrost and Bullet	**L1, L2, L4**	10
Module 3: Fluid Simulations with PhoenixFD • Overview of fluid dynamics and simulation • Introduction to PhoenixFD in Maya • Creating realistic water, fire, and smoke simulations • Customizing fluid properties and settings • Interactions with rigid bodies and particle systems • Practical exercises: Simulating complex fluid dynamics using PhoenixFD	**L2, L3, L4, L5**	10
Module 4: Cloth and Soft Body Simulations with nCloth • Understanding nCloth and soft body dynamics • Creating and simulating cloth objects • Adjusting cloth properties and constraints • Interactive cloth design and collision handling • Using nCloth for character clothing and other fabrics • Combining nCloth with other dynamic systems • Practical exercises: Designing and animating cloth and soft body simulations	**L3, L4, L5**	8
Module 5: Real-world Applications and Project Integration • Exploring real-world applications of Maya dynamics and simulations • Case studies in film, gaming, and advertising • Integrating Maya dynamics with production pipelines	**L3, L4, L5**	14

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

DANI2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

SEMESTER-VIII

DANI2801	MOTION GRAPHICS	L	T	P	FW/ Proj	C
Version	2023	2	1	2	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

In media today, there is perhaps not a single course which is untouched by motion graphics. Keeping this widely used tool in mind, this course covers the latest in concepts and techniques in the creation and production of motion design animation using software designed specifically for this purpose such as Animate CC and Adobe After Effects. The course will cover different kinds of motion designs, concepts and storyboard and computer generation of motion design sequences. The course will be profusely illustrated from scenesand sequences employing heavy use of motion graphics, both from the Hollywood as well as Bollywood Motion Picture Industry.

Course Objectives

The objective of this course is to:

- Enable the students to comprehend principles of animation using a field-based approach.
- To familiarize students with all aspects of software in motion graphics.
- To instill in the students such a level of confidence that they can tackle projects at a near professional level by having a holistic knowledge of all software related to motion graphics.

Course Outcomes (COs):

The objective of this course is to:

- Enable the students to comprehend principles of motion design using a judicious mix oftheory and practical work
- To familiarize students with every aspect of motion design software, both at thebeginner as well as advanced level
- To instill in the students such a level of confidence that they can tackle projects at a professional level by having a basic knowledge of all software related to Motion Designsoftware, and intensive knowledge of some selected software such as After Effects.

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Fundamentals of Graphics, Animation and Motion Graphics What is Motion Graphics? How is it different from other forms of animation. 2D and 3D animation software. Importance of animation in present day	**L1, L2**	15

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

industry. Packages currently being used in the industry and advantages and disadvantages of each. Deconstruction of scenes from movies (Hollywood, Bollywood and International), explanation of how certain effects were created and demonstrating in the computer lab a scaled down version of certain selected effects.		
Module II: After Effects: General Motion Graphics tool This Unit moves out from creative and conceptual dialogues into the domain of After effects. Since this package is used heavily by the Television Industry, many examples from this medium will be used to illustrate hard-to-grasp concepts. Various components of After Effects that will be taught in this module are: • The After Effects interface: Moving about and navigation in AfterEffects • AE tools and panels; how to customise and optimise them • Keyboard shortcuts - how to use and customize • Creating your first composition • The Timeline - navigation, panels and scope of the timeline • Project windows and assets; moving assets from project to timeline • Use of keyframes to create simple animations • Illustration of first principles of animation - ease in/out & easy ease • Frame rates, speeding up and slowing down of animation - using theGraph editor. • Rendering and compression concepts; Different kinds of movieformats • Outputting your first movie; Settings and how they can be tweaked	**L1, L2, L3**	15
Module III: Compositing and Match moving in After Effects This unit is a continuation of the earlier unit. Here we go into greater depth of the various tools, filters effects and presets that can be used. Round tripping between After Effects and Editing software such as Premiere and/or Final Cut Pro, this unit talks about green screen, chroma keying, masks and mattes for compositing stills and videos. Common problems encountered such as fast moving footage or color fringing are discussed and creative solutions offered. Also compositing is demonstrated in softwaresuch as After Effects, Nuke and/or Fusion, and the reason why a particular software is chosen for a particular task is explained. In this unit, also match moving, locking still image or animation on a target, using 2D and 3D cameras, as well as planar tracking software like Mocca are covered in detail.Again to make the students industry, common problems encountered when using these highly specialized software are discussed, examined andstudents are encouraged to come up with creative solutions to fix these problems. A case study approach rather than classroom rote learning will be adopted both in this as well as the next unit.	**L2, L3, L4, L5**	15
Module IV: Rotoscoping, Particle Animation. Liquid and Pyrotechnics In this Module, very specific effects used in films like particle effects, rotoscoping, liquid effects, dynamic simulations using soft and rigid bodies, as well as pyrotechnics – fire and smoke effects as well as explosion effects are dealt with at length. This unit is almost completely practical and theory is only used to augment and strengthen student's knowledge, rather than it being a substitute for imparting practical skills. Figuring out how to deal with	**L3, L4, L5, L6**	15

Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

hardware and exporting issues when rendering heavy and complex scenes is also discussed and explained.		
Module V: Assembling effects This module, although slightly different is the sense that it is more focused on editing, brings all the skills learnt in the previous modules onto the editing platform. Students learn how to combine and compile sequences, the different editing codecs, how to export both high quality videos as well as compressed videos and how to addmusic and sound effects to their sequences to maximize impact of the visual effects that they have created using a single or combination of different software.	**L3, L4, L5, L6**	15

DANI2802	FX AND SIMULATION	L	T	P/ FW	C
Version	**2023**	2	1	2	4
Pre-requisites/Exposure	Nil				
Co-requisites	Nil				

Catalog Description

The birth of new tools in Artificial Intelligence, the increased use of Augmented Reality (AR) and Virtual Reality (VR) as well as the spurt in Gaming and associated technologies; all have led to inclusion of visual effects and simulation in every area of animation. This module deals with exciting field of visual effects, its usage in the industry; the tools and techniques that need to be mastered in order for them to be utilized in video and film industries. This course is highly practical driven, with practical effect and simulation exercises in equal proportion to imparting of theoretical input.

Course Objectives

This course is designed in such a way that students are trained to be industry ready and can begin delivering professional quality work from the very first day. Hence there are a lot of lab exercises, careful supervision and monitoring of projects and submissions and lectures incorporate the latest developments in technology. The intention is to update the student in intermediate as well as advanced animation and simulation techniques, where they learn not only to deliver quality work, but also to meet deadlines.

Course Outcomes (COs):

The objective of this course is to:

Enable the students to comprehend principles of VFX and simulation through a carefully designed mix of theory and practical classes.

- To familiarize students with all aspects of animation, visual effects and dynamic simulation so they can implement these with ease.
- To inculcate in the students a keenness to be updated with all the latest developments in the field as well as learn quickly what client requirements are and produce work that is relevant.

Syllabus / Topics to be Covered

Modules	Blooms level*	Number of hours
Module I: Fundamentals of Animation and VFX This module essentially provides an overview of the multiple components that make up a animation and VFX course. It also introduces the students to new concepts in the field of VFX and simulation such as gaming and gaming engines such as Unreal. Virtual Reality and Augmented reality and other elements are	**L1, L2**	10

Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

briefly covered in this introductory module.		
Module II: Compositing, Match Moving and Rotoscoping This module covers basics of green screen keying and compositing and the software used in the industry to achieve these effects. Initially motion graphics and VFX software such as After effects and using keylight and external plugin. Later, more complex softwar such as Nuke and Fusion and other node-based software are introduced. Basics of Match Moving, Motion Capture and Motion tracking are introduced. Software used will be mostly After Effects but planar tracking in packages like Mocca are also taught. As well as linked modules in Da Vinci Resolve. • 2D and 3D camera tracking • Rotoscoping: 2D and 3D. Manually and using software • Tracing live action footage frame-by-frame	**L1, L2, L3**	15
Module III: Digital Image Processing; Matte Painting; Paint FX and Dynamics using Maya and Blender Students are introduced to: • Basics of Digital Image Processing. Modifying and Altering still as well as video material. • Texturing for creation of Matte Paints as well as for creating surface maps for 3D objects • Plugs in software such as Keyshot and Substance Painter are covered here	**L2, L3, L4, L5**	10
Module IV: Fire (Pyrotechnics), Liquid and Particle Animation This module is completely focused on the creation of special effects particularly organic VFX like fire, smoke, liquid and particle animation. Software used for this module will be Maya, After Effects; Real Flow; Cinema 4D and Some modules of SideFX Houdini Students are taught to create realistic and organic simulations using core animation software as well as plugins like for example Red Giant's particle generator system	**L4, L5, L6**	15
Module V: Dynamic Simulation (Rigid and Soft body and Collidor Objects) This module is completely focused on creation of realistic dynamic simulation in Maya, Cinema 4D and 3DS Max. Real life Physics and interaction of objects with each other for collisions, fracturing and transformation are used to create realistic simulation of different objects interacting with each other. Blending of simulation into existing 3D animations is also an essential part of this last and completely practically focused module	**L3, L4, L5, L6**	15

DANI2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

	Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization; Introduction to statistical inference and various univariate tests by using SPSS; Analysis of Variance (One Way ANOVA, Two Way ANOVA and ANCOVA); Correlation, Simple and Multiple linear Regression Analysis; Principal Component Analysis and Factor Analysis		
2	**Module-2: VOS Viewer** **Web of Science, Scopus, Dimensions, Lens, and PubMed.** Co-authorship networks, citation-based networks, and co-occurrence networks can be created based on data downloaded from Web of Science, Scopus, Dimensions, and Lens. Co-authorship networks and co-occurrence networks can also be created based on PubMed data. **Crossref, Europe PMC, and OpenAlex**. Networks can also be created based on data retrieved through the APIs of Crossref, Europe PMC, and OpenAlex, These APIs can be queried interactively in VOS viewer. **Semantic Scholar, Open Citations, and Wiki Data.** For a given set of DOIs, networks can also be created based on data retrieved through the APIs of Semantic Scholar, Open Citations and Wiki Data.	L1, L2, L3, L4	10 Hours
3	**Faculty of Management Studies & Behavioural Sciences** **Module 3: Domain Specific Software** **- Structural Equation Modelling** **Smart PLS** Introduction to Structural Equation Modelling (SEM), Introduction to the software's AMOS and SPSS, SMART PLS, Testing of Statistical assumptions, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), common method bias (CMB) test, Measurement Model Assessment, Discussing Fit Indices, Reliability and Validity Testing, Structural Model Assessment identifying multivariate outlier, Construct Validity: Convergent and Discriminant Validity, Measurement Model & Structural Equation Modelling, Mediation and Moderation Effects, Multi-Group Analysis.	L1, L2, L3, L4	30 Hours

JRN4103	MEDIA ARTS-I: RADIO & TV	L	T	P	C
Version	2021	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

Today broadcasting media is one of the most ruling media in day to day life. TV and Radio plays a very vital role in dissemination of the information and to communicate with the masses not only to cover the national issues but also to go for parachute coverage. This course outline helps students to develop the basic concepts and fundamentals for the broadcasting media not only textual but also hands on practice for the Television as well as Radio.

Course Objectives

The objective of this course is to

- Impart knowledge of basic working of Radio and TV as a medium of mass communication, also to apply knowledge of basic anatomy and working of the Radio and TV in India as well as in global domain.
- Apply knowledge and skills required to know about the different broadcasting instruments in Television and Radio broadcasting Industry.
- Engage in life-long learning and hands on technical expertise in handling the Basics of Camera, Light, Sounds and other equipment's .

Course Outcomes

On completion of this course, the students will be able to

CO1. Describe the different characteristics of Sounds – in film productions for both fiction and Non-fictions.

CO2. Identify and describe various concepts and instruments used for the capturing of Sound in broadcasting media.

CO3. Equipping the students with skills to be able to work on the lighting part- to understand the aesthetical approaches of lighting and different kinds and functions of lighting in the varied environment.

CO4. Analyze the different dimensions and applications of editing for making the raw footage to the finished one.

CO5. Demonstrate hands-on experience on anatomy of Video Camera, different kinds of video productions equipments and to learn the rules of the compositions.

CO6. Analyze the different approaches and aesthetical approaches in Film making and TV Productions.

Course Contents:

Modules	Blooms level*	Number of hours
MODULE 1: Audio and Sound: The Characteristics The basic attributes: Loudness, Frequency, Intensity, Pitch, Amplitude, and Timbre, Sound Aesthetics- Spatial Hearing, Sound Isolation, Sound perspective (mono and stereo), Importance of speech in broadcast media, Sound and its functions, Functions of sound in relation to picture, Acoustics and psychoacoustics.	L1, L2	6
MODULE 2: Sound and Technical Approaches	L1, L4	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Types of microphones, Directionality and pick-up patterns, Cardioid, Omni directional, super-cardiod and hyper-cardiod, Quadraphonic and surround sound, Construction of mikes- dynamic mics and condenser mics, Positioning of mics- floor stand, hidden mics, camera mics, wireless mics.		
MODULE 3: Lighting: The Fundamentals Nature, quality, lighting for TV, Colour temperature, Lighting instruments, Three point lighting, Creative additions to lighting for different genres.	L1, L2,	6
MODULE 4: Editing techniques Editing; principles and techniques, Continuity and non-continuity editing, Linear and non-linear editing	L1, L2, L3,	6
MODULE 5: Anatomy of Video Camera The basic structure of a Video Camera, Working mechanism and basic parts of camera, Types of camera, Camera Mounts.	L1, L3	6
MODULE 6: Broadcast: Rules and Approaches Camera movements & angles, shots, Composition principles, TV as a Medium of close ups, Role of sound / voice over in TV programs, TV as a medium of glamour, immediacy, democratizing, Infotainment.	L1, L2, L5	6

JRN4104	ADVERTISING: CONCEPTS AND PRINCIPLES	L	T	P	C
Version	2021	2	1	0	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The course will focus on basics concepts of advertising, its role & functions. The purpose of this course is to offer cutting-edge thinking on Advertising and explain how advertising works in the real world. The elaborative content will provide strong knowledge base to the students about Advertising and will enhance their critical and creative skills.

Course Objectives

The objective of this course is to:

- Equip the students with advertising environment by understanding, identifying and analyzing important concepts.

Course Outcomes (COs):

On completion of this course, the students will be able to
CO1: Comprehend role and functions of advertising.
CO2: Identify various types of advertising and structure with in advertising agency.
CO3: Analyze role of various department of agency and making of a campaign.
CO4: Comprehend the role of Segmentation, Targeting and position in campaign planning

Course Contents:

Modules	Blooms level*	Number of hours
MODULE 1: Introduction Definition and key concepts of advertising, Advertising Types, Role and Functions	L1, L2	10
MODULE 2: Advertising as a tool of marketing The Marketing Planning ,Relationship of Marketing with Advertising ,Situation Analysis to the Marketing Mix, Market Share, Target Segment, Positioning, Developing Advertising from Marketing Objectives	L1, L3	7
MODULE 3: Understanding advertising agencies Advertising Agencies, Types of Advertising Agencies, Advertising agency structure, Functions of various departments, Workflow in An Agency, Pitching , Account Planning, Media Planning, Copy Writing	L1,L2,L4	7
MODULE 4: Segmenting, Targeting and Positioning (STP) strategy Market Segmentation, Markets, market segments and niches, Meeting editorial needs, Basis for segmenting consumer markets, Targeting strategies, Undifferentiated targeting, Differentiating targeting, Niche targeting, Various positioning strategies, Benefit	L1,L2,L3	11

JRN4106	DESIGN SOFTWARE	L	T	P	C
	2021	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This unit is designed to initiate the student into the rudiments of design and application of design in all walks of life that we see all around us. The student will learn and imbibe important typographic principles, use of fonts and fontography, use of color, color harmonies and tonal balance. The vitally important role that symmetry, balance, images – both vector as well as bitmaps, play in creating a harmonious and aesthetically appealing composition will all be explained with real world examples of practical design being implemented in advertising and mass communication.

Course Objectives:

The objective of this course is to:

- Enable the students to comprehend principles of design using a blended learning approach
- To familiarize students with all aspects of software, both at the beginner as well as at an intermediate level
- To integrate seamlessly both theoretical as well as practical aspects of design such that the learner is able to instantly identify design principles incorporated in the physical realm, be it print, net, web, film or television.

Course Description

This course covers all aspects of designs from the traditional orthodox straightforward design principles to contemporary design principles and application. Not only are the traditional fields such as print and broadcast design covered but also newer areas like UI/UX and game design also are briefly covered in this course. By and large however, it is meant to teach print design and layout basics through a well interwoven thought out course that embeds practical constructional projects at every stage of theoretical information imparted. Students are taught to think critically and question traditional concepts as well as come up with their own models and ideas.

Course Outcomes:

On completion of this course, the students will be

CO1. Completely proficient with all aspects of at least three print design software, notably Adobe Photoshop, Illustrator and In Design. They will also be conversant with Corel Draw, at a basic level.

CO2. Be able to visualise and conceptualise layouts for Print, Web and Multimedia.

CO3. Be proficient at delivery of design projects, both at a conceptual level and at the execution stage.

CO4. Be able to work in a team delegating different aspects of production to team members and also exchange notes and monitor each others work, so that professional quality work can be outputted and exported.

Course Contents:

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Manesar Gurgaon-122413

Modules	Blooms level*	Number of hours
MODULE 1: Manual and Computer Aided Design Differences between traditional design, primarily for print as compared to designing for the web, the internet, and for television and film will be compared and contrasted, and how these inherent differences can be optimized for a specific media will be explained and expounded upon. The importance of computer as a design tool as well as the different software currently prevailing in the industry are also highlighted and a broad overview imparted of each software with its distinguishing features	L1, L2	4
MODULE 2: What is Design? Design Elements, Design Principles. How elements and principles helps in design. Where and how these elements and principles are applicable. How do different design elements combine and collaborate together to create an overall 'look' and feel for the published output – be it a web page, a brochure or a billboard hoarding.	L2, L3	6
MODULE 3: Typography History of fonts, Sizes of fonts, Classification of fonts, True Type and Open type. Breakdown of a word into typographical elements and ligatures, designing a custom font from scratch, all form part of this particular module. Each concept that is explained is generously illustrated with practical examples drawn from mixed media	L2, L3	6
MODULE 4: Hardware and Software From more theoretical concepts like Typography and design principles we move to the more practical aspects of implementing design on the ground through use of immersive technologies. Important aspects of hardware, notably the computer and accessories like printers, scanners and other input/output devices are explained. The student is also taken through the gamut of design software that exist that take full advantage of the computer's multitasking and multi-threading capabilities. In this module, only an overview of Digital Publishing software is given. In the next two modules, the most popular design software are explained at length	L2, L3,	6
MODULE 5: Fundamentals of Design Software The Editing of images, selection and cropping, integration of text with graphics, as well as the importance of resolution, image size, pixel depth, and the different sizes for print, web, broadcast and internet mediums such as Youtube are all covered in this module. Also different image file formats such as jpg, png, tiff etc along with transparency and scaling are also explained. From technical definitions we move on to the software itself, covering all basic aspects of industry standard software like Photoshop, Illustrator, Corel Draw and Adobe InDesign	L3, L4	8
MODULE 6: Design Software – Intermediate level This module covers the above software in more detail and depth with overlying emphasis being given to integration of practical projects that employ all the theoretical knowledge imparted. Once a set of topics is taught, application of the same is demonstrated through several practical exercises that are not only structured but also graded in terms of complexity and applicability.	L3,L4	6

JRN4202	PRINT DESIGN AND VISUALISATION	L	T	P	C
Version	2021	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
This course prepares the students for a career in the print industry. It comprises of modules that move from theoretical concepts like page sizes, resolutions etc to using software to craft print publications for newspapers and the advertising industry.

Course Objectives:
The primary objectives of this course are to:

- Introduce students to design concepts like layout, use of positive-negative space etc.
- Familiarize them with the juxtaposition of fonts, images and text to create compelling print material for publication
- Teach them how to effectively use software to create advertisements, banners and magazine layouts for printing and publication

Course Description
This course moves seamlessly from the definition and description of layout and design theoretical concepts to the actual realization of these concepts in print. Various concepts and jargon used by the print industry are explained and demonstrated, culminating in the use of software to translate design concepts into visually appealing printed material. Fundamentals of advertising and media campaigns are also an integral part of this course

Course Outcomes:
On completion of this course, the students will be able to:
CO1. Describe various style sheets for print media.
CO2. Comprehend how images, text and fonts interact to create pleasing layouts.
CO3. Use different design software to edit and accomplish print related tasks
CO4. Use design skills and knowledge of software to create one or more professionally designed projects.

Course Contents:

Modules	Blooms level*	Number of hours
MODULE 1: Module I: House Styles What is style sheet? How to create style sheets? Style guide: examples from newspapers, magazines; own guide produced for new publication. Styles: choice of typeface and masthead, choice and use of images and color, positioning of articles and images on the page, use of headlines in an appropriate font, point size, number of lines etc., text manipulation, juxtaposition of text/images/advertising, Typography.	L1, L2	8
MODULE 2: Comparison in newspapers and magazines What is the difference between Newspaper & Magazine layouts? What needs to be taken care when creating layouts for Fashion	L2, L3	6

Manesar Gurgaon-122413

feature or Business articles or News pages. Which software is to be used - for making layouts, creating vector graphics and raster images? Proper utilization of design elements and principles in layouts.		
MODULE 3: Advertising concepts Corporate Identity: Usage of Types & Fonts, Color schemes, Punch line, Orientation. Corporate Stationary: Logo, Letterhead design, Business Cards, Envelopes, Catalogues, Brochures, Digital Posters, Calendar Design. Communicating through multiple media: Digital and print	L2, L3	6
MODULE 4: Relevant software to design advertisements Advertising campaigns: Developing advertising campaigns from concept to creation, from creative to presentation. Photoshop, PageMaker, Corel Draw, Illustrator and their relevant usage in creating different forms of design for advertisements and campaigns.	L2, L3	8

JRN4203	SPECIALIZED REPORTING AND FEATURE WRITING	L	T	P	C
Version	2021	2	-	2	3
Pre-requisites/Exposure	Print Journalism – Reporting & Editing				
Co-requisites					

Catalog Description

After introducing the basics of newspaper reporting and editing in the first semester, this course describes the issues of specialization in news. The course introduces the concepts of beat reporting and also deals with the subtle differences between reporting on politics, business, sports, crime etc. The course also describes the nuances of investigative reporting with discussion on relevant case studies.

Course Objectives

The objective of this course is to

- Introduce beat reporting and discuss the finer points of specialized writing.
- Explain how reporting is different for various beats like crime, health, education, politics etc.
- Provide knowledge regarding investigative reporting and its tools.
- Provide understanding for different types of journalistic writing.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1: Describe differences and similarities between different journalistic beats.
CO2: Describe and apply various concepts of beat reporting.
CO3: Explain investigative reporting in depth; especially sting operations.
CO4: Apply conceptual knowledge to write different types of features and reviews.
CO5: Argue if sting journalism is a healthy practice in a democracy.

Course Contents:

Modules	Blooms level*	Number of hours
MODULE 1: Beat Reporting Covering a news beat, coverage of various beats: crime, education, health, civic affairs and local government, political reporting(political structure in India, covering political parties/events/rallies/elections), parliament reporting (parliament structure, reporting on legislature), covering the government (PIB, ministries), legal reporting (Structure in jurisdiction of courts, reporting court hearings, precautions)	L1, L2	12
MODULE II: Business and Sports reporting Basic business knowledge and business bodies, corporate reporting, covering economic policy (Ministry of Commerce, Finance, Industry, Company Affairs, and other infrastructure ministries), stock market coverage, how to develop good sports writing skills, covering local, national internal level events, entertainment and lifestyle reporting	L2, L3	8
MODULE III: Investigative Reporting	L1, L5	9

JRN4207	ADVANCED PHOTOGRAPHY	L	T	P	C
Version	2021	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

This course describes how to develop a unique photographic vision using a combination of aesthetics and technology. Using both practical's and theoretical teaching methods and blending traditional processes with current digital technologies, the photographic curriculum provides aspiring photographers with the breadth of experience and knowledge required to succeed in today's market place

Course Objectives

After Being exposed to the basics of photography in the first semester, the students will be eager to try their hands in the comparatively new area of digital photography and imaging. They will be able to start maintaining their portfolios and will be required to make digital presentations and undertake practical assignments.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1: Demonstrate Lighting essentials for creating incredible images, their importance and purpose of the main light in Photography.

CO2: Analyse aesthetics for various genres of photography.

CO3: Describe concepts of digital photography and imaging.

CO4: Apply techniques of Photo manipulation.

CO5: Produce portfolio in the genre of their choice.

Course Contents:

Modules	Blooms level*	Number of hours
Module I: Advanced lighting and Composition Lighting and its control (source, Contents & Direction of light) Electronic Flash & Its synchronization One, Two- & Three-Point Lighting Working on the subject (Changing proximity, varying angle, tightly framing subjects)	L1,L2	8

JRN4306	DIGITAL MEDIA PRODUCTION	L	T	P	C
Version	2021	1	0	4	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description:
This course introduces the students to the vast field of digital media production. Not only does it provide an overview of all aspects of production, but it also introduces them to the new formats of digital and mobile media, the apps associated with them and how to produce the best possible videos in the shortest possible time.

Course Objectives:
The primary objectives of this course are to:

1. Introduce students to concepts of pre, production and post-production
2. Cover all aspects of scripting as well as hardware and software related to production
3. Synthesize traditional production methods with new digital formats and optimal use of this new format for seamless audio visual production

Course Outcomes:
On completion of this course, the students will able to:
CO1. Describe all aspects of media production
CO2. Explain various format of animation; stop motion, go-motion, 2D, 3D etc.
CO3. Apply macromedia flash 5 for creating animations
CO4. Use sound editing techniques for producing animations

Course Contents:

Modules	Blooms level*	Number of hours
MODULE 1: Module I: Concept of Graphics and Animation Understanding graphics. Types of Graphics. Understanding animation. Difference between graphics and animation. Conventional aspects of graphics and animation, new forms of animation/recent trends.	L1, L2	8
MODULE 2: Formats Stop Motion and Go animation, different forms of animation, 2D, 3D, Cell, Clay (Making sets), etc. Concept definition and Uses.	L1, L2	6
MODULE 3: Applications of Macromedia Flash Keyframe Onion Skinning Importing BMP and JPG images Multi-layering Importing sound	L2, L3	4
MODULE 4: Fundamentals of Sound editing Types of Sound formats- WAVE, MP3 Mixing of Stereo, Mono and Multi-track sound Mixing the composed sound with the animation	L2, L3	8

JRN4308	COMMUNICATION RESEARCH	L	T	P	C
Version	2021	2	0	2	3
Pre-Requisites/ Exposure					
Co-Requisites					

Catalog Description

This course is designed to introduce students to social research methods in the Communication discipline so that they can read, conduct and analyze empirical research. They will be able to understand and apply different principles and techniques of research methods. They will have a better understanding of research process and its importance in various fields. Students will be able to develop hypothesis related to communication studies and statistically analyze data. The course emphasizes on both quantitative and qualitative research methods.

Course Objectives

The objective of this course is to

- Understand the importance and research and application of different types of research methods.
- Describe various techniques of data collection and data analysis.
- Understand and apply the research report writing methods.
- Describe Media Research Ethics.

Course Outcomes

On completion of this course students will be able to

CO1: Understand and critically analyze research studies.
CO2: Understand and create research design and apply different research methods.
CO3: Explain different methods of data collection and analyze dataset.
CO4: Develop research problem and Hypothesis and apply statistical operations to analyze.
CO5: Write a research report in a systematic format and understand research ethics.

Course Contents:

Modules	Bloom's Level*	Number of hours
Module 1: Introduction to Communication Research Concept and definition of Research; Process of Research; Approaches to research Problem, qualitative and quantitative approach to research, quantitative approach-scientific/ hypothetic-Deductive methods, Experimental Design, Exploring a population; qualitative approach, Ethnography, Phenomenology; Mixed Methodology; Areas of Communication Research; Research Design and its types; Formulation of Research problem; Scope of Communication Research	L1,L2	12
Module 2: Research Methods Types of Research Methods: Census, Case study, Content analysis, Focused Group studies, Survey, Observation, interviews, research tools, schedule, questionnaire; field work; Sampling- Probabilistic sampling and non-probabilistic sampling; Sources and methods of data collection: coding, classification, tabulation, Minimizing errors in recording source data	L1, L2	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

JRN4335	SUMMER INTERNSHIP EVALUATION	L	T	P	C
Version	2021	-	-	-	6
Pre-requisites/Exposure	All courses studied in the previous semesters				
Co-requisites					

Catalog Description

After the second semester, all students of MAJMC are required to undertake an internship which is evaluated in the third semester. While internship introduces the students to the professional world of media, this course aims at providing an opportunity the students to showcase their learnings during internship in a professional manner.

Course Objectives

The objective of this course is to

- Provide an opportunity to the students to discuss their learnings.
- Evaluate the learning experience of the students during internship.
- Enable the students to share the skills acquired during the course of internship.
- Enable the students to understand nuances of formal report writing.

Provide hands on learning experience to the students.

Course Outcomes (COs):

On completion of this course, the students will be able to
CO1: Recognize the expectations of the media industry.
CO2: Assess his/her suitability in his/her desired areas of specialization.
CO3: Have firsthand experience regarding how the media industry functions.
CO4: Explain and understand the latest technology being used in the media industry.

Course Contents:

Modules	Blooms level*	Number of hours
All students of MA J&MC shall be required to undergo a practical training in a media organization for 4-6 weeks after the second semester. The students are required to undergo training in the various areas of the media organization concerned. The work done by the student during the training period shall be submitted in the form of a report in the third semester. The last date of the receipt of the internship report in the department shall be at least 15 working days before the commencement of the end term exams. **Guidelines for Internship** Duration of Internship: 4-6 Weeks There are certain phases of every intern's professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience	L3, L4, L5, L6	No Contact hours

working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or an institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal classroom situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc. The primary objectives of internship are: • To provide an out-of-the classroom training environment for the students and provide opportunities for them to apply the knowledge and skills that they have learnt in real life working environment. • To enable the students to be exposed to more real life work situations and prepare them for their career. The students will submit their **Internship Reports** at least 15 working days before the commencement of the end term exams (as per the date decided upon by the HoI in consultation with the Programme Co ordinator). The Internship Report aims to encourage students to keep a personal record of their learning and achievement throughout the training. It can be used as the basis for lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development. The Internship report will assess the student's analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization. The Internship report submission will be followed by a PowerPoint Presentation on their internship experience as per the date decided by the HoI in consultation with the Porgramme Co ordinator. The **layout guidelines** for the Internship File: • A4 size Paper • Font: Arial (10 points) or Times New Roman (11 points) • Line spacing: 1.5 • Top and Bottom margins: 1 inch/2.5 cm; left and right margins: 1.25 inches/ 3 cm The Internship report should include 1. Title Page 2. Table of Contents 3. Internship Experience Certificate 4. Acknowledgements

5. Main Body 6. Appendices The **Main Body** will have **different sections/chapters** and will include the following items which will be evaluated for the final assessment:- An analysis of the company/stream in which the student has interned Student's expectations from internship Student's work profile/assignments handled during the course of internship A research report that the student has prepared on a project assigned to him/her by the organization (if applicable) Skill set (technical skills & soft skills) learnt during the internship Overall internship experience **Guidelines for Evaluation** • All students are required to undertake internship report writing under the supervision of a teacher and to submit the same following the guidelines stated below. • Language of the report and presentation & viva-voce examination should be English. The internship report must be typed and hard bound. • Failure to submit the report or failure to make the presentation followed by viva-voce examination will be treated as absence in the examination. The student shall submit the report and make a PowerPoint Presentation followed by appear viva voce examination in the subsequent years (within the time period as per University Rules). • No marks will be allotted for the report unless the student appears for the presentation and the viva-voce examination. Similarly, no marks will be allotted for presentation & viva voce examination unless the student submits his/her report. • Evaluation will be done jointly by one internal expert and one external expert with equal weightage, i.e. average marks of the internal and external experts will be allotted to the student.

JRN4402	MEDIA ARTS – IV: CYBER MEDIA	L	T	P	C
Version	2021	2	0	2	3
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

No aspect of today's world has been able to escape the influence of the World Wide Web. Journalism has also been revolutionized with the inclusion of the Internet for newsgathering and news dissemination. The students are made familiar with online organization, process and strategies as well as Internet tool kits, servers and other aspects of the virtual world. The scope of this subject is too vast to merit a detailed or in depth analysis, so a broad overview of the various issues and aspects related to the subject are discussed. Furthermore, since it is a core subject, we go deep into the subject and provide an empirical knowledge to students about the increasing use of digital and online media in all kinds of media industries today.

Course Objectives

The objective of this course is to

- Impart knowledge of basic concepts of Cyber Media. Difference between media as traditionally understood and the Digital platform.
- Apply knowledge of basic principles related to online media. Some myths that exist about Blogging and Online Reading Platforms to be demystified as well as the difference highlighted.
- Impart knowledge and details about how online media Industry functions and to understand various ways of generating revenue via use of cyber media.

Course Outcomes

On completion of this course, the students will be able to

CO1. Identify and describe various online organization, process and strategies as well as various components of Internet as revenue generation tool kits, servers and other aspects of the virtual world and analyze the difference between traditional and New Media platforms.

CO2. Develop the various formats of writing for cyber media e.g. writing online, blog writing, writing for advertisements and online publishing mediums vis a vis traditional styles of writing also equipping the student with the knowledge of media laws in principles and applications as well.

CO3. Demonstrate hands-on experience as content marketers using journalistic and digital techniques for designing a website with the help of various design patterns, HTML and Dreamweaver.

Course Contents:

Modules	Blooms level*	Number of hours
Module I: (Introduction to Internet) Internet-history and development, WWW, W3C, revenue generation Internet tool kits - server, IP address, URL, ISP, networking, browsers, Search Engine, Domain, Domain name, home page, hyperlinks, etc	L1, L2, L3	10

JRN4437	DISSERTATION/ PROFESSIONAL PROJECT	L	T	P	C
Version	2021	-	-	-	7
Pre-requisites/Exposure	All courses studied in the previous semesters				
Co-requisites					

Catalog Description

By the final semester, students have learnt about all the aspects of mass communication. This course aims at providing an opportunity to put this knowledge to use in a professional manner. The course introduces the students to the professional world of media and research. The course provides an option to the students to either work on a dissertation or undertake a professional project under the supervision of a senior faculty member.

Course Objectives

The objective of this course is to

- Provide hands on learning experience to the students.
- Provide a platform to the students to hone their skill sets.
- Provide students a learning experience where they get to work on either an industry-oriented professional project or a research project and learn the 'tricks of the trade.'
- Provide an out-of-classroom training environment to the students.

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1: Recognize the expectations of the media industry.
CO2: Assess his/her suitability in his/her desired areas of specialization.
CO3: Have firsthand experience regarding how the media industry functions.
CO4: Explain and understand the latest technology being used in the media industry.
CO5: Describe and apply various steps to be followed for undertaking a professional project.

Course Contents:

Modules	Blooms level*	Number of hours
Every student of MA J&MC shall be required to undertake either a hands on project or a scholarly research under the guidance of an assigned supervisor. **Dissertation:** The student shall be required to undertake a research based scholarly project under the guidance of a supervisor, who shall be assigned by the institution. The last date of the receipt of the report in the department shall be at least ten working days before the commencement of the end term exams. **Guidelines for Dissertation** The primary purpose of dissertation is to introduce the final semester students to the processes of scholarly research and writing under the guidance of an assigned supervisor. Through this research experience involved in the process of dissertation, students gain exposure to research methodology and its various tools & techniques. It usually requires the use of advanced concepts with a sound understanding of theoretical underpinnings.	L3, L4, L5, L6	No Contact hours

Prof. (Dr.) Anil Kumar

Manesar Gurgaon-122413

Developing the media strategy, including the communication mix Developing the creative strategy Creative strategy to follow a complete campaign creative presentation. This will include development of TV Commercials, print ads, radio ads and POP material. *PUBLIC RELATIONS* **Course Objective:** PR specialization can be undertaken in these different areas Crisis case studies PR in Non- Governmental organizations Cross- cultural PR Internal PR department in corporate situation *PHOTOGRAPHY* **Course Objective:** Student can choose any two subjects for Specialization: Photojournalism Travel Photography Portrait Photography Product & Table-top Photography Glamour Photography Wildlife Photography DEVELOPMENT COMMUNICATION The focus of the professional project will be an approach to communication for social change that has people controlling the means and content of the communication process. Any topic that is chosen will be to highlight the utilization of power of communication as a catalyst for social development. 1) Students to plan a Communication Design and Implementation strategy for projects that bring about change in society. You could work on any one of the UN sustainable Development Goals towards 2030. **Or** 2) Volunteering your time with a NGO (governmental or private); Intern with CSR department and prepare a report based on a theoretical perspective studied in class or look at the participatory approach that has been adopted for the programmes being implemented. **Or** 3) Make a documentary on an NGO, Community Radio Station, Skill Development center, ASHA workers. DIGITAL MEDIA Students can work on different aspects of digital media such as Cyber Security & E-governance Fake News Creating blogs & vlogs on different online platforms

ANIMATION

Syllabus - Semester First

ANI2152	INTRODUCTION TO MULTIMEDIA & ITS APPLICATION	L	T	P	C
Version	2021	2	-	2	3
Pre-requisites/ Exposure	Basic computer skills				
Co-requisites	None				

Catalog Description

Students will learn the basic concepts and skills required to develop effective graphics for the Web and various business publications. Students will learn the basic tools used in Adobe Photoshop/Illus-trator to create and edit images. Students will learn how to optimize images and save images in properfile formats. Students will learn color selection and conversion as it relates to both Web and business publications. Techniques of digital image capture and photo retouching will also be explored.

Course Objectives

The objective of this course is-

- To teach the idea about screen resolution, picture assembling and color combination.
- To train the basic element which are used in creating a design/logo/creative work
- To teach the tools of image editing, drawing and special effects.
- To guide the logic behind imagination or visualization of creative ideas and graphics usingAdobe Photoshop & Illustrator.

Course Outcomes

On completion of this course, the students will be able to

CO1. Create poster, leaflets, logo or design the given reference object or self-visualize poster for Visual Communication.

CO2. Create advertisement for digital and print media.

CO3. Develop their graphic designs and desk-top publishing.

CO4. Manipulate professional photographs and images.

Course Content

Modules	Blooms level*	Number of hours
MODULE 1: Graphics using line, Graphics by combining basic shapes. Make a perfect crop-ping of some images using Photoshop. Prepare a cut-out of images using Pho- toshop; use back ground for images. Colour adjustment of images. Convert a B & W image into colour.	L1, L2	12

MODULE 2: Vector Graphics (Designing, Color Theory, Vector Designing & Editing, TextFormatting): Interface**:** working with menus, toolbars, Dockers. Document Setup: Setting Page Size& Orientation, Document Navigation Rulers & Guide- lines: Status Bar. Text: Formatting, Text Layout, Skewing and rotating, Creating drop shadow, Text to Path, Extruding text. Objects: Grouping & locking objects, Combining & breaking apart, Transforming & Shaping, Cutting objects apart, Trim, weld & Intersection of objects. Lines & Curves: Using freehand & Bezier tool, Line properties, Arrowheads Eraser & artist media tools Nodes & Paths. Color& Fills: Solid Color, Color Palettes, Eyedropper & Paint bucket, Foun- tain, Fills, Patterns, Texture Fills, Interactive Mesh Fill. Special effects: Enve- lopes, Blends, Perspective, Shadow Objects, Power clip Command, Transpar- ency, Distortion, Contour, Lens Docker. Complex Shapes: Polygon & Stars Spirals Printing Menu.	L3	18
MODULE 3: Raster Graphics (Designing, Color Theory, Raster Designing & Editing, text Formatting: Adobe Photoshop, Colour modes, Colour, Using the tools, Select-ing and using a tool from the toolbox, Using the tool options bar and other palettes, Customizing the workspace, Using Photoshop Help, Viewing and ed-iting files in Adobe Bridge, Embedding information for easy identification, Au-tomating routine tasks, Resolution and image size, Straightening and cropping an image, Making automatic adjustments, Manually adjusting the tonal range, Replacing colors in an image, etc.	L4, L6	18

Syllabus - Semester Second

ANI2252	CREATING 2D ANIMATION	L	T	P	C
Version 1	2021	2	-	2	3
Pre- requisites/Exposure					
Co-requisites					

Catalog Description

This course introduces students to the art and concept of two dimensional or 2D computer animation. 'D' stands for dimension and refers to animation which is conducted on a two- dimensional plane, unlike the real world where everything is seen and experienced on a three dimensional plane. This course primarily focusses on the theoretical aspects of two dimensional animation and is reinforced though many hours of hands-on lab training designed to right from the start, train the students to be industry ready. The intention of thiscourse is to provide a gradual introduction to animation concepts which are further refined in semester III, when the students will delve into 3D animation

Course Objectives:
The objective of this course is to:

- Enable the students to comprehend principles of animation using a field basedapproach
- To familiarize students with all aspects of software, both at the beginner as well asadvanced level
- To instill in the students such a level of confidence that they can tackle projects at anear professional level by having a holistic knowledge of all software related to 2D animation.

Course Description
This course covers all aspects of two-dimensional animation, normally known as '2D' animation in industry jargon. Beginning from first principles of animation like scaling, exaggeration, squash and stretch etc., they move on to first becoming familiar with different graphical interfaces as well as learning an eclectic mix of software that equip them with tools needed to create the kind of creative content that they wish to create.

The course is graded in terms of intensity as well as complexity and considerable emphasisis placed on design and typographic basics that form building blocks of good animation.

Course Outcomes:
On completion of this course, the students will be
CO1. Completely proficient with all aspects of at least two 2D animation software, notably Adobe Animate CC (now Animate) and Adobe After Effects
CO2. Be able to visualise, script, storyboard and create smart and relevant 2D animations
CO3. Be able to produce quality motion graphics for the Television Industry using a variety of 2D animation tools and third party plug-ins.
CO4. Be able to work in a team delegating different aspects of production to team members and also exchange notes and monitor each others work, so that professional quality work can be outputted and exported.

Course Content

Modules	Blooms level*	Number of hours
MODULE 1: Fundamentals of Animation What is animation? How is 2D animation different from other forms of animation. How are Animate CC and After Effects different from drawing and 3D packages? The various components that will be covered in Module Iare: • The Animate CC Interface • Animate CC tools and menu commands • Animate CC and Photoshop – an integrated workflow • Frame-by-frame animation in Animate CC • Onion skinning – why it is needed • Exploring the Timeline • Animating through action script • Motion tweening in Animate CC	L1, L2	8
MODULE 2: After Effects: The Industry package This Unit moves out from the Animate CC interface, tools and dialogues intothe domain of After effects. Since this package is used heavily by the Television Industry, many examples from this medium will be used to illustrate hard-to-grasp concepts. Various components of After Effects that will be taught in this module are: • The After Effects interface: Moving about and navigation in AfterEffects • AE tools and panels; how to customise and optimise them • Keyboard shortcuts - how to use and customize • Creating your first composition • The Timeline - navigation, panels and scope of the timeline • Project windows and assets; moving assets from project totimeline • Use of keyframes to create simple animations • Illustration of first principles of animation - ease in, out and easyease • Frame rates, speeding up and slowing down of animation - usingthe Graph editor • Rendering and compression concepts; Different kinds of movieformats • Outputing your first movie; Settings and how they can be tweaked	L2, L3	5

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: After Effects and Animate – Intermediate This unit is a continuation of the earlier unit. Here we go into greater depthof the various tools, filters effects and presets that can be used. Round tripping between After Effects and Animate as well as importing assets fromvarious different format types (Photoshop as well as Illustrator Files) are discussed and explained. Since After Effects is known as a 2.5 type animation, this concept is explained; how After Effects although it is a straight 2D package, can simulate 3D and the illusion of 'fake depth' by usingcameras, lights and third party effects such as Element 3D. Students are expected at the end of this unit to design their own logos and animate themin this software package	L2, L3	8
MODULE 4: Post-Production In this Module, all the salient features of both Animate and After Effects arerecapped and similarities and differences discussed. In this module very little theory is imparted. Students are expected to prepare a comprehensiveAnimateCC and After Effects project each, which is closely monitored and supervised by the faculty in charge. The goal is to get the students as industry ready as possible and to ensure that at least one professional looking project in both software packages is designed and executed.	L3, L4	6

Syllabus - Semester Third

ANI2352	3D MODELING & TEXTURING	L	T	P	C
Version	JULY 2021	1	-	4	3
Pre-requisites/Exposure	Basic understanding of computer and software interface				
Co-requisites					

Catalog Description

This course is the introduction to the 3d computer graphics world. In this course students will get to know about the possibilities of the 3d art and design. Student will start from the very basics of creating sphere, box, circle, line… etc

Course Objectives

The objective of this course is to

- To give a basic understanding of 3D visualization and to understanding how to start with Blender interface.
- To give hands on experience of Blender and create a foundation for the advance 3d visualization.
- To provide a detailed understanding of 3d character modeling.

Course Outcomes

On completion of this course, the students will be able to

CO1. Understand how 3d software interface work.

CO2. Learn various ways of modeling the objects.

CO3. Understand how character mesh flow help while animating and designing a character.

Course Content

Modules	Blooms level*	Number of hours
Module 1 Introduction to Blender 3d, Interface of Blender 3d, Basics of Blender 3dModeling, Exporting, Using the menus. Floating and docking, Using dragand drop feature, Introduction to different workspaces. Geometry, sub objects, Extruding, welding, bridging etc. Recognizing the workspaces.	L1, L3	24
Module 2 Introduction to modifiers and modifier gizmos. Familiarity with commonmodifier like bend, editpoly, Xform wave, lathe symmetry etc.	L1, L3	12
Module 3 This module focuses on the development of 3D interiors and environment. Use of different modelling techniques like sculpting and polygon modellingare explained with many real world references. Also how to use backgroundimages as references objects for creating the 3D model are explained and demonstrated in this module	L1, L3	12

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis,L6-Evaluation

ANI2452	MAYA MODELING & TEXTURING	L	T	P	C
Version	JULY 2021	1	-	4	3
Pre-requisites/ Exposure	Basic skills of computer				
Co-requisites					

Catalog Description

Course introduces students to the foundations of character/object modeling & texturing which is the process of adding mesh and controls to a character that allows a creative model to animate it in a proper manner. The course prepared to candidate for an advanced work in3-D modeling & Texturing. In this section, student will get an introductory look at the processes in Maya. Student will use a Project-based approach as we cover the fundamentalsof Maya looks at commonly used tools, and talk about some time-saving tips and techniquesgleaned from production experience.

Course Objectives

The objective of this course is-

- To train the proper knowledge of surfaces which used for modeling in TV serials, filmsand other commercials.
- To train the basic mesh flow system in modeling.
- To teach the tools of modeling, merit and demerit of modeling and designing.
- To guide the visualize the story and their character, assets and other part of design andthen impart it in modeling through various tools of Maya software.

Course Outcomes

On completion of this course, the students will be able to

CO1. Model or design the given reference object or character for TV episodes and films.

CO2. Create and design the required models and color for advertisement project or any other commercials.

CO3. Develop their own show reel in 3D including modeling, coloring and texturingappropriate shading network.

CO4. Develop and represent the 3D models and environment on their own visualize story.

CO5. Manage and make any big project management in terms of man power requirementalong with budgeting of big animation film project.

Course Content

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to the interface of Maya. Hotkeys. Using the spacebar. Manipulating a view. Creating objects. Simple primitives. Lights, cameras, selecting objects, types of selection, single selection, adding and subtracting selection, edit menu selection options. Marquee selection, Lasso selection, selection mask	L1, L2	24
MODULE 2: Using hyper shade, relationship editor, hyper graph and outliner. The channel box. Duplicating objects, pivot points, introduction to snapping-2D snapping and 3D snapping. Using	L3, L6	15

layers. Introduction to textures and materials.		
MODULE 3: Modeling a 3D character, understanding edge flow of face and body in order to achieve a smoother bends while animating, unwrapping and texturing the characterand understanding use of Photoshop while creating realistic textures.	L3, L6	12

Syllabus - Semester Fifth

ANI2552	SCRIPTING AND STORYBOARDING	L	T	P	C
Version 1	2021	1	1	2	3
Pre- requisites/Exposure					
Co-requisites					

Catalog Description
In this course, students learn the rudiments of scripting and storyboarding as well explore the differences between the different formats. They are introduced to the meaning of conceptualizing a treatment and style for a film, the differences between scripting for Ads and short films as compared to scripting for feature films as well as the different types of scripts like treatment, script, shoot and edit scripts, screenplays and finally meticulously prepared scripts which are better known as storyboards

Course Objectives:
The objective of this course is to:

- Help students improve their writing style, especially with reference to film, video andInternet
- Enable students to write creative and cohesive scripts in a variety of programmeformats such as News bulletins, Ads, PSAs, promos, fiction and documentaries
- To build a sound foundational structure of film grammar so that they can translate filmic elements into narrative structures and visualise scenic elements with ease

Course Description
This course equips the learner with skills in three distinct areas. To polish their writing styles, structures and grammar so that the student can write not only well but also in a lexically and grammatically correct manner. The second objective is to build a sound theoretical foundational of filmic elements by deconstruction of popular scenes from films and expound on the principles behind the success of these scenes, so that the learner can translate prose elements into visual narratives. The third objective is to enable the learner to conceptualise, visualise and translate these abstract ideas into a concrete text in the form of storyboards and scripts – both shooting as well as edit scripts. The entire course takes the advantage of a huge repository of good audio visual material so that every theoretical construct can be supplemented and illustrated with examples drawn from filmic and broadcast domains.

Course Outcomes:
On completion of this course, the students will be
CO1. Able to write quickly effectively and well in a variety of styles
CO2. Be able to translate abstract ideas into shootable scenes
CO3. Be able to understand client briefs and producer requirements
CO4. Proficient at every aspect of writing for fiction and non-fiction

Modules	Blooms level*	Number of hours

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 1: Pre-Production Research This unit focuses essentially of all aspects of pre-production. Methods of research, scouring for sources of material, collating and compiling material. Research indoors as well as outdoors. Preparing and completing a "rekky", techniques of preliminary interview of people. Understanding the requirements of the documentary or film are also covered in this module	L1, L2	6
MODULE 2: Concept & Treatment In this module, students learn all about conceptualizing an idea, abstract concept, trying new and novel methods of treatment; Soliloquy; integrating one comprehensive document out of several different text material, and writing client specific briefs form the core of this module	L2, L3	4
MODULE 3: Fundamentals of Film Grammar This very important module unravels the mysteries of film shooting and filmic editing. The fundamentals of shot composition, camera angles, cameraaesthetics, constructing and deconstructing a film. Dialogue creation; creative use of sound and optimizing the use of the sound studio, as well as techniques developed by the great masters of documentary and cinematic narrative, all form the backbone of this vitally essential module	L2, L3	8
MODULE 4: Writing the Script This module explains and teaches the actual writing process. How all the different ingredients of pre production research, visualization, film grammarand principles come together to form a compelling narrative. Students learnabout writing prose, writing scene and shot descriptions, development of a character, plot points, digetic and non-digetic sound, meaning of clima, anti-climax and other structural elements that make up a well interwoven script	L2, L3, L5	8
MODULE 5: Screenplays and Storyboarding This is almost a completely practical unit, where students are taken through the entire process of writing a script and have to prepare on an individual basis scripts and storyboards in a variety of formats. Thus they have toprepare a script for a news bulletin; a storyboard for an Ad; A storyboard for a PSA; a script for non-fiction short film and one for a short documentary. Some of the exercises will be test exercises while others will be assessed andgraded	L3, L4, L6	4

Syllabus - Semester Sixth

ANI2652	VFX	L	T	P	C
Version	2021	2	-	2	3
Pre- requisites/ Exposure					
Co-requisites					

Catalog Description

This VFX course will take you through the fundamental concepts of VFX Compositing in Nuke, and how to learn nuke the interface. The course is focused primarily on the 2D & 3D aspects of compositing to get you started. It involves replacing a background, color correcting and blending the foreground and background, motion tracking the background to the foreground, and seamlessly bringing it all together. And learn how to Render CGI in passes, footage, and all of the elements necessary to compositea CG shot.

Course Objectives

The objective of this course is to

- To impart working knowledge of Advance VFX & Compositing
- To impart knowledge into Compositing of 3D Passes and 3D motion tracking
- To Impart Knowledge of Rotoscoping & Color grading techniques

Course Outcomes (COs):

On completion of this course, the students will be able to

CO1. Create an Multi-pass CG compositing

CO2. Create 2D compositing using Rotoscoping.

CO3. Identify and describe VFX & Compositing.

Course Contents

Modules	Blooms level*	Number of hours
MODULE 1 – 2D Compositing & Rotoscoping • Additive color theory • Image formats / resolutions / colors • 2d Tracking • Rotopaint and Rotoscoping • Keyframe animation • Introduction to Chroma Keying / Greenscreen removal • Camera traits (Lens distortion, grain, sensor noise) • Cleanplating and removal	L1, L2, L3	20

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana

JOURNALISM

Syllabus - Semester First

PRINT MEDIA – REPORTING AND EDITING

Course Code: JRN2151 **Credit Units : 03**

Course Objective:
This unit is aimed at introducing the students to the world of journalism- news and its handling in context of print media. It deals with basic news elements, news structure as also the newsroom set up. The student is to be taught about agency and magazine journalism. Editing is an integral part of this unit.

Course Contents:

Module I: History of Journalism
Journalism in pre-independence era in India
Role of English and vernacular press during freedom struggle
Growth of journalism post independence

Module II: Growth and development of press
Emergence of newspapers, magazines and publication houses
Emergence and growth of Indian news agencies

Module III: The newsroom Set-up
Various departments in Editorial set-up
Hierarchy in the Newsroom
Qualities and responsibilities of a reporter
Sources and beats

Module III: News Reporting
What is News, News Value and Sources of News
Basic elements of News
Writing a News Report
Types of leads & Body text
Interviewing skills required for reporting
Types of Reporting

Module IV: Editing News
Role and functions of desk
Role of copy editor
Electronic Copyediting
Rewriting
Writing Headlines and captions
Understanding the importance of style guides
Newspaper design & Layout

Syllabus - Semester Second

BASIC PHOTOGRAPHY

Course Code: JRN2251 **Credit Units: 03**

Course Objective:
This unit introduces to the basic techniques of photography and it's applications in Mass Media with specialization in specific area. This course gives an opportunity to the student to get accustomed to this universal language of expression and communication and exhibit their skills to explore, understand the significance and utility of photographs as an effective medium of communication.

Course Contents:
Module I: Introduction to photography
Brief History of photography
Uses of Photography
Principles of light
How photography works

a. image capturing
b. film processing
c. print processing

Module II: Camera
Elements of a Camera (Introduction) – view finder, lens, iris, shutter, film chamber, light metre
Camera Designs –

a. pinhole camera,
b. view camera,
c. compact camera,
d. T L R
e. S L R,
f. Instant/Polaroid camera,
g. digital camera

Exposure control in camera

Module III: Films & Camera Accessories
Film formats & their use
Lenses - prime &zoom lens

a. angle of view
b. Aperture & f-no.
c. Depth of field, how depth of field works
d. Depth of focus
e. Lens care

Camera accessories

Module IV: Photography & Darkroom Practicals
Outdoor Photography Assignments
Introduction to Darkroom Equipments and their uses
Developing & Printing B&W Films

Syllabus - Semester Third

TV JOURNALISM

Course Code: JRN2351 **Credit Units: 03**

Course Objective:
Students will move further into broadcast journalism in India. The unit will cover the process of how news develops and is moulded into essentials of any medium (Radio or TV) over a chain of processes. The basic attributes and skill set needed to pursue a journalistic path will also de debated and discussed. The unit will encourage students to identify the similarities and differences between key processes in both the mediums. The organizational set up will also be communicated for a better understanding of the functioning of a broadcast media organization.

Course Contents:

Module I: Basics of TV journalism
Qualities of a journalist
Developing sources of news gathering
Process of a report from the idea till its final implementation
Essentials during reporting
Live reporting and presenting the final story
Different styles of functioning for different beats
Basic Interview Skills: different types of interviews, approach, arrangements, research
Stages of production: pre, shoot and post.

Module II: Functioning of a TV organization
Hierarchy of a TV set up
Television Personnel – director, floor manager, audio technician, controller, cameraman
Role of a producer
Technical Process of news from initial stages to telecast.
Working process involved during live bulletin and recorded programme
Role/ contribution of each department and personnel
Hierarchy of a news organization
Professional terminologies

Module III: Outdoor production
Basic shooting according to shooting script
Team members and their role
*P*recautions and safety features while shooting
Single and multi-camera shoot
Shooting for fiction
Shooting for non-fiction
Building a sequence in the camera and without external editing
Process and elements of EFP (Electronic Field Production) and ENG (Electronic News Gathering)
OB (Outdoor Broadcast) Van
Satellite Phone

Syllabus - Semester Fourth

TV PRODUCTION AND PRESENTATION

Course Code: JRN2451 **Credit Units: 03**

Course Objective:
The module is structured for the students to move further into TV journalism. It shall explore strategies to *handle* key areas within broadcast journalism.
The skill for anchoring and presentation will be honed after explaining the nuances and essentials of the task. This module will also familiarize them with all that is needed for outdoor production and the role of important departments on location. From this unit onwards, they will be exposed to essentials of specialized coverage in the field of current affairs, sports, business etc.

Course Contents:
Module I: Anchoring and presentation
Qualities of an anchor
Role of styling (makeup techniques)
Anchoring according to program formats
News anchoring, Entertainment, current affairs, magazine shows etc
Anchoring techniques: live shows & recorded programmes
Discussing different news anchors of the industry
Using the teleprompter
Piece to camera

Module II: Editing (Post-production)
Basic FCP (Final Cut Pro) Tools of Editing
Basic Transitions (cut, dissolve, fade, wipe)
Sequencing shots
Concept of montage
Continuity vs. non continuity
Linear vs. non linear editing
Role of the editor
Ingest and digitize
Overlay and underlay of sound
Ethics involved in editing
Importance of File footage and archival footage
From finished product to broadcasting

Module III: Specialized coverage I
Current Affairs
Documentaries and Features
Business and stock market reporting
Sports coverage
Legal reporting and Judiciary
Psephology and election based coverage
Political & parliamentary coverage

Syllabus - Semester Fifth

NEW MEDIA

Course Code: JRN2551 **Credit Units: 03**

Course Objective:
Apart from discussing specialized coverage, *the concept of* convergence will be explored in this semester. The power of the Internet has penetrated every nook and cranny of life. Journalism has also been revolutionized with the inclusion of the World Wide Web for newsgathering and news dissemination. Aspiring journalists today need to be familiar with cyber journalism and the basics of web designing. The course curriculum has been designed, keeping this end in view

Course Contents:

Module I: Specialized coverage – II
Disaster & crises coverage
Science and technology
Environment, Poverty, and Gender

Module II: Convergence
What is convergence?
Emergence of convergence and its effects on broadcast media
Language, structure and technology of new media
Creative, Business, Technical Skills in Convergence Media Programming

Module III: Cyber Media
Cyber Journalism: History of Internet
Comparison of cyber media with Print, TV, Radio.
Writing for Web Media
Online as a publishing medium
Online as an advertising tool
Why Print & Electronic Media networks are going on the Net?
Impact of Web Journalism on reading habits of people and media industry.
Analysis of important Indian news-based websites
Impact of globalization on Web Journalism
Cyber Laws and debates
Concept of e-governance & e-learning
Finding information on the World Wide Web
Writing for blogs

Bachelor of Arts (Honors/ Honors with Research) in History

Overview

Shaping the future needs proper knowledge of the past. Bachelor of Arts in History is a four-year undergraduate/ programme that explores history pertaining to human evolution, development, and social interaction. It focuses on developing critical thinking among students about the various phasesof history, both in Indian and world. The students will discover about political processes, socio- economic changes, cultural and intellectual life, war and society, and aspects of gender including theresearch work in fourth year.

This programme helps students to develop many skills like logic and theoretical analysis, written andoral expression, and construction of narratives. The programme structure includes theoretical and practical sessions allowing them to explore and expand their interests in ancient, medieval, early modern, and modern cultures and civilisations. The programme helps to foster and demonstrate competency in vital skills like the historical explanation, discernment, and synthesis.

This programme allows students to explore an incredibly diverse range of historical events and the contexts in which they occurred. The study of history is excellent preparation for careers in many fields including law journalism business and finance education politics and public policy social activism and the arts. The said programme structure caters the needs of students who pursues New Education Policy from the 2023 onwards, it is accordingly in line with the NEP 2020, it focuses on Research and methodology.

Programme Objectives

After completing BA Programme, the students will be able to:

- PO1.Critical Thinking: Take informed actions after identifying the assumptions that frameour thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decisions (intellectual, organizational, and personal)from different perspectives.
- PO2.Effective Communication: Speak, read, write and listen clearly in person and throughelectronic media in English and in one Indian language, and make meaning of the world by connecting people, ideas, books, media and technology.
- PO3. Social Interaction: Elicit views of others, mediate disagreements and help reachconclusions in group settings.
- PO4. Effective Citizenship: Demonstrate empathetic social concern and equity centered national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
- PO5. Ethics: Recognize different value systems including your own, understand the moraldimensions of your decisions, and accept responsibility for them.
- PO6. Environment and Sustainability: Understand the issues of environmental contextsand sustainable development.
- PO7. Self-directed and Life-long Learning: Acquire the ability to engage in independentand life-long learning in the broadest context socio-technological changes

Programme Specific Skills (PSO)

PSO 1: The course seeks to provide the students with an analytical overview of the developments ofsociety, economy, and politics in the ancient, medieval, modern, and contemporary periods of Indianhistory.
PSO 2: It aims at developing a contact with students about the critical analysis and observations of the historical facts scattered in the world, for instance in Europe, Japan, China, Africa, and the USA.
PSO 3: It aims at creating a general awareness about the historical past and its correlation with thepresent and future by developing the tendency of self-learning and life-long learning.

PSO1 The course seeks to provide the students with ananalytical overview of the developments in the ancient,medieval, modern, and contemporary periods of Indian history.		PSO2 It aims at developing a nuanced understanding among students about the various historical trends in the world, for instance in Europe, Japan, China, Africa, and the USA.		PSO3 It aims at creating a general awareness about the historical past and itscorrelation with the present and future. Lessons from the past are useful not onlyfor interpreting the past but also as guidelines for future course action.

Course Code: DHIS2101	SOCIAL FORMATIONS AND CULTURAL PATTERNS OF THE ANCIENT WORLD	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description
The course is designed to provide in-depth knowledge about the historical processes of the ancient world. Some key components of the course include evolution of humankind, the Neolithic phase, Bronze Age civilizations, and the history of Ancient Greece. The course will give an insight into the socio-cultural and political factors which impacted the historical process in the world during the ancient period.

Course Objectives:
After completion of this course, students will be able to

- Introduce students to the evolution of humankind
- Develop critical thinking in students regarding the early historical phases-Paleolithic and Mesolithic periods
- Equip students with relevant historical information regarding early economic processes such as food production, beginnings of agriculture, and animal husbandry
- Introduce students to the institutions of the Bronze Age Civilization
- Develop critical thinking in students about the Egyptian Civilization
- Develop critical thinking in students about the Mesopotamian Civilization

Course Outcomes
On the completion of the course, the student will be able to:
CO 1: Define and explain the basic knowledge about reconstructing Early Indian notions of History
CO 2: Describe and summaries the Paleolithic cultures and Mesolithic cultures
CO 3: Interpret and identify the socio-cultural and religious patterns of the Harappan Civilization
CO 4: Defined and explained various urban features of the Indus Valley Civilization

Course Content:

Course Code: SHIS2301	AN INTRODUCTION TO ARCHAEOLOGY (SEC)	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	3	0	0	0	3
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description:
This course provides an in-depth exploration into the field of archaeology, focusing on its emergence as a distinct discipline and its methodologies. Students will be introduced to the historical development of archaeology and will engage in critical thinking about various types of archaeological evidence. Emphasis will be placed on the critical examination of evidence from explored sites and understanding the importance of excavated sites in India. By the end of the course, students will have developed a nuanced understanding of the chief features and methods used in archaeological studies.

Course Objectives:
After completion of this course, the students will be able to:

- Introduce students about the emergence of branch of archaeology
- Develop critical thinking about the variety of archaeological evidence
- Critically examine the various evidence about the explored sites
- Introduce students about the importance of excavated sites in India
- Develop critical thinking about the chief features of the sites in India
- Develop critical understanding about understanding of methods of archaeology

Course Outcomes (COs):
On completion of this course, the students will be able to
CO 1: Discuss the emergence and development of archaeology as a distinct discipline
CO 2: Interpret a variety of archaeological evidence
CO 3: Explain the significance of major excavated sites in India
CO4: Discuss and understand the chief features and methods used in their study

Course Content:

Modules	Blooms level*	Number of hours
Module I: Defining archaeology; understanding its origins and development Definition of the term and its implications, Description of Archaeology as Science	**L1, L2, L3**	16
Module II: The variety of archaeological evidence Early Study of the site and collection of evidence techniques, Expiations about various archaeological method and techniques, The Science of archaeology in action and its implementation, The unearthing of different sites and its implications on World history, Application of Archaeological evidences in reconstruction of history, Explorations of the sites in India and its impact	**L1, L2, L3**	16

Course Code: SHIS2401	UNDERSTANDING CULTURE, HERITAGE AND TOURISM (SEC)	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	3	0	0	0	3
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course provides a comprehensive understanding of India's rich heritage, focusing on art, architecture, and the diverse elements that contribute to the country's historical and cultural landscape. Students will begin by defining heritage and exploring an overview of Indian art and architecture. The course will delve into various aspects of built heritage, including detailed studies of stupa architecture with a focus on Sanchi, temple architecture through case studies of specific temples or temple complexes, Indo-Persian architecture encompassing forts, palaces, and mosques in Delhi, and colonial architecture in Delhi. Additionally, the course will cover the different facets of tourism, emphasizing tourism management and the development of tour packages. An integral part of the course is a field visit to a historical site or museum, allowing students to experience heritage firsthand and apply their theoretical knowledge in a practical context.

Course Objectives

After completion of this course, students will be able to

- Understand and define the concept of heritage, with a comprehensive overview of Indian art and architecture.
- Analyze and appreciate various forms of built heritage in India, including stupa, temple, Indo-Persian, and colonial architectures.
- Develop skills in tourism management and create effective tour packages that highlight India's historical sites and heritage.
- Gain practical experience and insights through visits to historical sites or museums, applying theoretical knowledge to real-world contexts.

Course Outcomes

On completion of this course, the students will be able to

CO 1: Define and discuss the concept of heritage and provide an overview of Indian art and architecture.

CO 2: Analyze and evaluate various forms of built heritage in India, including stupas, temples, Indo-Persian structures, and colonial architecture.

CO 3: Develop and apply skills in tourism management, including the creation of comprehensive tour packages that emphasize India's historical and cultural sites.

CO 4: Demonstrate practical knowledge and appreciation of heritage through firsthand experiences and insights gained from visits to historical sites or museums.

Course Content:

SEMESTER-V

Course Code: DHIS2551	HISTORY OF USA	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course has been introduced to acquaint students with the major trends in the history of United States of America. By focusing on the political, constitutional, economic, and socio-cultural history of the USA, this course will help in developing a spirit of inquiry in students. Events such as the American Revolution and the American Civil War will help the students in understanding the revolutionary trends in American history. A study of the institution of slavery and women's rights will be useful in providing deeper insight into the learning of social trends in America. Students will be able to relate to these institutions and draw a link between the institution of slavery in the Islamic world and the issue of women's rights in other countries.

Course Objectives

After completion of this course, students will be able to

- Understand the historical background of the people of America
- Grasp the ideals behind the American Revolution and interpret its importance in shaping ideas across the world.
- Comprehend and critically analyze the black movements.

Course Outcomes

On completion of this course, the students will be able to

CO 1: Describe the formation of the American Republic.
CO 2: Define and explain the evolution of American democracy.
CO 3: Define and explain the practice of slavery in the USA and the functioning of slave society.
CO 4: Describe the foreign policy which shaped the history of America.

Course Content:

Modules	Blooms level*	Number of hours
MODULE-I: Making of the Republic and Evolution of American Democracy Revolutionary trends- Sources of conflict, Revolutionary groups and ideology, The War of Independence and its historical interpretations, Processes and Features of Constitution making debates and historical interpretations, Federalists: Jeffersonianism and Jacksonians, Rise of political parties (from 1840-1960), Judiciary-role of the Supreme Court, Expansion of the Frontier: Turner's Thesis, Marginalization, displacement and decimation of native Americans- Case histories of Tecumseh and Shawnee Prophet	**L1, L2, L3**	16
MODULE-II: Slave Society Culture and Ante Bellum Foreign Policy Agrarian South: Plantation economy, Slave Society and Culture: Slave resistance, War of 1812, Monroe Doctrine, Manifest Destiny	**L1, L2, L3**	14

Course Code: DHIS2501	HISTORY OF USSR	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course has been designed in order to acquaint students with the processes which shaped the history of USSR. The course includes key components such as the Russian Revolutions, the Civil War, the New Economic Policy, and the period of Soviet industrialization. The course is aimed at introducing students to the history of the Soviet Union and enhancing their learning abilities.

Course Objectives

After completion of this course, students will be able to

- Understand the Dual power that existed in Russia
- Understand the establishment of Provisional government in Russia.
- Understand how the Civil War had unfolded and how it impacted the Russian history
- War Communism and the economic system that came along with it
- The establishment of the trade unions
- Formation of USSR
- Debates surrounding different aspects of Soviet Industrialization.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe and explain the events of the Russian Revolutions and forms of governance.
CO2: Describe the impact and role of Civil War and the War of Communism.
CO3: Define and explain new economic policies and debates over trade and politics.
CO4: Describe the process of Soviet Industrialization and its effect.

Course Content:

Modules	Blooms level*	Number of hours
MODULE-I: The Russia Revolutions of February and October 1917 Dual Power, Provisional government, The establishment of soviet Power, Nationalities question	**L1, L2, L3**	14

Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Course catalog:
This introductory course acquaints students with key themes in the historical relationship between human societies and the natural environment, particularly concerning the acquisitionof food, energy, and raw materials. It explores the enduring changes in how states have organized and managed nature, encompassing aspects such as energy production, the transfer of plants and animals, the circulation of commodities and people, as well as the processes of urbanization and industrialization. Through this exploration, students will gain insights into the ecological dimensions of social inequalities, including those related to class, gender, ethnicity, caste, and nationality. By emphasizing the global interconnectedness of ecological systems, the course aims to provide students with the tools to analyze the politics of nature, recognizing extremes such as poverty in fertile plains, urban development and its associated environmental degradation, energy scarcity near dams and mines, and inequalities arising from carbon-energy regimes.

Course Outcome
On the completion of the course, the student will be able to:

CO 1: Examine environmental issues through the lens of a social and political (or socialscientific) framework.
CO 2: Analyze the impact of social inequality on understanding the global to local environmental crisis, considering unequal distribution and access to environmental resources.
CO 3: Investigate the intricacies of resource distribution and disparities in resource utilization within specific social contexts, using case studies on water rights and forest rights.
CO 4: Locate solutions to environmental problems within a framework that emphasizes the democratization of resource use.

Course Content:

Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course has been introduced in order to acquaint students with the major trends in the history of Modern India. By focusing on the political, constitutional, economic, and socio-cultural history of Modern India course will help in developing a spirit of inquiry in students. Events such as the Drain of wealth, British revenue policies and the social-cultural reforms movement, and the rise of Gandhian politics will help the students in understanding the nationalists' trends in Modern Indian History. A study of the Revolutionary movement, peasant movements, and women's rights movement will be useful in providing deeper insight into the learning of social trends in Modern India. Students will be able to relate to these institutions and draw a link between the institution of Autocracy in British India and the issue of civil rights in other colonial countries.

Course Objectives

After completion of this course, students will be able to

- Understand the historical background of India's backward economic development in the colonial period
- Understand the ideals behind the Gandhiji role and interpret its importance in shaping ideas against British Imperialism.
- Understand and critically analyze Nationalism in India.
- Define and discuss the freedom struggle During the 20th century in India

Course Outcomes

On completion of this course, the students will be able to

CO 1: Describe and explain the developments in the field of economy under British rule in India.

CO 2: Explain the key components of the cultural changes and religious reform movements during the British period

CO 3: Explain the early trends in nationalism and Gandhian nationalism

CO 4: Discuss the Socio-religious Reform Movements

Course Content:

Course Code: DHIS2603	HISTORY OF MEDIEVAL INDIA	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course aims to provide the students with an analytical overview of the developments in medieval India. Thus, it aims at developing a critical understanding of the development of the Indian society in the medieval age. The enlightened student community would, hence, be able to contribute towards a better present and future.

Course Objectives

After completion of this course, students will be able to

- Learn about the key historical sources from the Medieval period and the circumstances leading to the arrival of the Turks and Babur in India.
- Understand the consolidation of Sultanate and Mughal power through conquests and the evolution of administrative institutions like Zabt, Zamindari, and Mansabdari.
- Analyze the religious policies of the Delhi Sultans and Mughals, and their relations with the Rajputs.
- Investigate the decline of the Delhi Sultanate and Mughal Empire, recent historiographical trends, architectural developments, and economic changes impacting society and the state.

Course Outcomes

On completion of this course, the students will be able to

CO 1: Describe and explain the basic knowledge about the Delhi Sultanate and Mughal Empire, the rise and fall of it.

CO 2: Discuss and interpret different aspects of Alauddin Khilji and Akbar's rule.

CO3: Define the reasons for the downfall of the Delhi Sultanate and Mughal empire.

CO 4: Discuss the administrative and military changes brought about by the Delhi Sultans and the Mughals.

Course Content:

Course Code: DHIS2604	EXPLORING REALMS: NARRATIVES OF URBAN AND RURAL INDIA THROUGH FICTION, FIELDWORK, FILM & HISTORY	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Course catalog:
This course delves into a myriad of portrayals depicting urban and rural life in India, as presented by novelists, anthropologists, folklorists, filmmakers, and historians. The curated selection comprises two timeless novels offering insights into life in 19th and early 20th century Delhi, three varied perspectives on village life from both North and South India, excerpts (along with their cinematic adaptations) from the works of Rajasthani folklorist KomalKothari and Vijay Dandetha.

Learning Outcomes:
The course is aimed at enhancing the analytical skills of students while understanding how socio-cultural, political and historical changes shape our society and perspectives. The learningoutcomes can be defined as follows:

- Exhibit a comprehensive understanding of the relationship between history and orality,highlighting the ways in which oral traditions contribute to historical narratives.
- Analyse the historical context of Delhi during the 19th and 20th century, identifying key events, societal transformations, and their impact on the cultural fabric of the region.
- Explore the intricate relationship between memory, history, and identity, understandinghow individual and collective memories shape historical narratives.
- Analyse how literary and cinematic works reflect and influence societal perceptions ofmarginalized communities, considering the impact on cultural understanding

Course Outcomes
On the completion of the course, the student will be able to:
CO 1- Analyze and critically assess the various portrayals of urban and rural life in India,as depicted by novelists, anthropologists, folklorists, filmmakers, and historians.
CO 2- Investigate the historical and cultural nuances embedded in two classic novelsfocused on life in 19th and early 20th century Delhi.
CO 3- Evaluate the significance and impact of the works of Rajasthani folklorist KomalKothari and Vijay Dan Detha.
CO 4- Examine the ways in which the subaltern is represented in fiction, fieldwork andfilm.

Catalog Description

Microsoft Excel is a very popular business productivity application for the management and manipulation of data. With the right training and understanding of Excel, businesses and individual users can unlock the world of opportunities that this powerful business application offers. This course will provide all the tools necessary to create and use basic and advanced spreadsheets.

Course Objectives

On the completion of the course, the student will be able to:

1. Demonstrate a nuanced understanding of the terms 'World' and 'Global' in the context of history, recognizing and articulating the distinctions between these conceptualframeworks
2. Analyse the role of the environment in shaping historical developments on a globalscale, exploring how environmental factors have influenced societies, cultures, and historical events.
3.Critically examine the role of gender in shaping historical narratives on a global scale, identifying how societal norms, power structures, and cultural contexts have influenced the experiences of individuals based on gender.

Course Outcomes

On the completion of the course, the student will be able to:

CO 1- Demonstrate a nuanced understanding of the terms 'World' and 'Global' in the context of history, recognizing and articulating the distinctions between these conceptualframeworks

CO 2- Analyse the role of the environment in shaping historical developments on a globalscale, exploring how environmental factors have influenced societies, cultures, and historical events.

CO 3- Critically examine the role of gender in shaping historical narratives on a global scale, identifying how societal norms, power structures, and cultural contexts have influenced the experiences of individuals based on gender.

CO 4- Explore the historical significance of food as a lens through which to understandglobal historical developments, examining how food production, consumption, and tradehave influenced societies across different time periods

Course Code: DHIS2702	HISTORY OF BORDERLANDS	L	T	P	FW/ Proj	C
Version	1.2 (2023)	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Course catalog:
This course will explore societies residing at the peripheries of the colonial empire in India, investigating the evolution of these transitional and liminal spaces throughout the nineteenth and the first half of the twentieth century. Emphasizing distinctive modes of resistance prevalent in these margins, the course will scrutinize the responses to governmental technologies employed to govern these regions. Key themes of resistance, including mobility,insurgency, 'agricultures of escape,' ethnogenesis, orality, and collective memory, will be examined to gain insights into the multifaceted nature of opposition within these marginalizedspaces.

Course Objectives:
1. Explore the dynamics of peripheral practices
2. Examine how marginalized spaces within historical contexts have developed unique and distinctive practices that reflect their position in societal structures

Course Outcomes (COs): Course Outcomes
On the completion of the course, the student will be able to:
CO 1- Explore the dynamics of peripheral practices, examining how marginalized spaceswithin historical contexts have developed unique and distinctive practices that reflect their position in societal structures.
CO 2- Examine the historical implications of power dynamics, governance structures, and the experiences of communities existing on the fringes.
CO 3- Analyze the impact of national policies, border dynamics, and the formation of national identity on communities situated at the frontiers of nations
CO 4- Explore how environmental factors influence cultural practices and identity formation, and analyse the historical implications of these connections on the communities residing at the peripheries.

Course Content:

Course code: DHIS2704	HISTORY OF BRITISH RULE IN INDIA-II	L	T	P	FW/ Proj	C
Version	1.2 (2023)	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Course catalog:
This course has been created to acquaint the students with the history of the British rule in India. The key components of the course include the cultural changes and religious reform movements during the British period, early trends in nationalism, Gandhian nationalism, communal politics, and the partition of India. The course will help in enhancing the awarenessof students about the history of the freedom movement in India.

Course Objectives
After completion of this course, students will be able to

- Understand that the freedom movement was much beyond a movement against the British Government. It was accompanied by social and cultural movements. Such movements were responsible in shaping the present day India.
- Recognize the different phases of the freedom struggle and important events like theJallianwala Bagh massacre, Chauri Chaura tragedy etc.
- Understand the terms like communism, communalism and movements associated with them.
- Acknowledge the Moderate and Extremists, their point of contention and the role ofrevolutionaries in the freedom struggle.
- Acknowledge the role of Mahatma Gandhi and the INC in the freedom struggle against theBritish.

Course Outcomes
On the completion of the course, the student will be able to:
CO 1: Describe and explain the developments in the field of economy under British rule in India.
CO 2: Explain the key components of the cultural changes and religious reform movementsduring the British period
CO 3: Explain the early trends in nationalism and Gandhian nationalism
CO4: Discuss the partition of India

Course Content:

Course Code: DHIS2705	MIGRATION AND HISTORY	L	T	P	FW/ Proj	C
Version	2023	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description:
This course provides a comprehensive exploration of the Indian diaspora, tracing its origins from the era of indentured labour to its contemporary manifestations in a globalized world. Through four distinct modules, students will delve into the historical dynamics of migration, displacement, and the interconnectedness of the modern world system. The focus then shifts tothe diasporic experience in the United Kingdom, examining religious life, cultural expressions, and community dynamics. The course further investigates the challenges and achievements ofdiasporic communities in their struggle for rights, addressing the preservation of cultural identity and engagement in political advocacy. Finally, students analyze the intricate interplaybetween the politics of the nation-state and long-distance nationalism, emphasizing the relationship between cultural affiliation and national identity within diasporic contexts.

Course Objectives
1.After completion of this course, students will be able to
2.Critically analyze the role of migration in the context of the modern world system, exploring patterns of displacement and migration.
3.Explore the cultural expressions, traditions, and community dynamics of Indians inthe United Kingdom.
4.Understand the ways in which diasporic communities engage in political mobilization and advocacy for their rights, exploring the impact of these efforts on both local and global political landscapes.
5.Examine how diasporic communities manage and impact national identities while being geographically distant from their homeland.

Course Outcomes
On completion of this course, the students will be able to
CO 1: Gain a thorough understanding of the historical context, motivations, and consequences of indentured labor migration, examining its impact on the formation of the modern Indian diaspora.
CO 2: Explore the religious practices, institutions, and dynamics within the Indian diasporic communities in the United Kingdom.
CO 3: Evaluate strategies employed by diasporic communities to preserve and adapt their cultural identity.
CO 4: Examine the intricate relationship between cultural affiliation and national identity in the context of long-distance nationalism.

Course Code: DHIS2706	READING AMBEDKAR, GANDHI AND SAVARKAR	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course offers a comprehensive exploration of key figures and ideologies that shaped thelandscape of Indian nationalism during the pivotal period leading to independence. Divided into four modules, each segment delves into the distinct contributions and perspectives of influential figures, examining their roles in the quest for independence

Course Objectives

The learning outcomes can be defined as follows:

- Gain insight into Savarkar's perspectives on Indian nationalism and his engagementwith Congress politics, discerning the nuances of his contributions.
- Analyse key events such as the Rowlatt Satyagraha, Jallianwala Bagh massacre, non-cooperation, civil disobedience, provincial autonomy, Quit India, and the INA in the context of mass nationalism.
- Familiarity with Ambedkar's seminal work, "The Annihilation of Caste," and itsimplications for social and political change.
- Cultivate a nuanced comprehension of the varied ideologies and movements that significantly influenced the course of Indian nationalism, shaping its trajectory towards independence.

Course Outcomes

On completion of this course, the students will be able to

CO1- Gain an in-depth comprehension of the evolution of revolutionary ideology and itsinfluence on the nationalist discourse.

CO2- Acquire a comprehensive understanding of Gandhi's pivotal role in the massnationalism movement, examining his principles and strategies.

C03- Delve into Ambedkar's perspectives on the caste question, critically assessing hiscritiques of the prevailing social structure.

C04- Reflect on the enduring legacies of Gandhi, Ambedkar, and Savarkar, discerning theirrespective impacts on the path to Indian independence.

Course Content:

Modules	Blooms level*	Number of hours

DHIS2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Content :

SEMESTER-VIII

Course Code DHIS2801	THE POPULAR CULTURE	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Course catalog:
This course has been created to acquaint the students with the history of popular culture in India. The key components of the course include folklore, oral tradition, food history and pilgrimage and practices. The course will help in enhancing the awarenessof students about the various cultures in India.

Course Objectives
After completion of this course, students will be able to

- Understand folk culture and various popular dance forms.
- Important pilgrimage and pilgrimage practices.
- Major culinary cultures and food cultures.
- Folk lore and oral traditions.

Course Outcomes
On completion of this course, the students will be able to
CO1: Describe the features of different folk cultures.
CO2: Demonstrate their understanding of food and culinary cultures.
CO3: Illustrate the narratives of oral traditions.
CO4: important pilgrimages and pilgrimage practices.

Course Content:

Modules	Blooms level*	Number of hours
MODULE-I: Define popular culture Theatre-folk, tales, songs and dances	**L1, L2, L3**	14
Modules II: Folklore and oral traditions of kathas, narratives, legends Festivals, fair and rituals.	**L1, L2, L3**	16
Modules III: Pilgrimage and pilgrim practices The religious sanctity of the pilgrims and rituals	**L3, L4, L5**	14
Module IV: Food cultures of India The major culinary practices as prevalent in India, A visit to a cultural event/ exhibition/performance is part of this course.	**L3, L4, L5**	16

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evaluation*

Course Code: DHIS2802	GENDER AND HISTORY	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The role played by gender dynamics in shaping historical processes has not been paid much attention especially at the under-graduate level. This course is developed keeping in mind the need for students to be sensitized to the issue of gender through the prism of historical movements. This course seeks to provide a deeper understanding to the students about the roleof gender in history, and how has played a significant role over a period.

Course Objectives

After completion of this course, students will be able to:
The course is aimed at enhancing the learning skills of students regarding the gender and history, which altered the course of human social history to a large extent. The learning outcomes canbe defined as follows:
Introducing students to the gender and history by explaining critical concepts.
1. Developing critical understanding among students regarding the gender and history.
2. Developing the learning ability of students about the gender and history.
3. Introducing students to the historiography related to these theme

Course Outcomes

On the completion of the course, the student will be able to:
CO 1-Define and explain the finer nuances of gender and its association with culture andhistory.
CO 2- Describe and define the historicity of gender and feminist history.
CO 3- Define and explain the critical understanding of historical perspectives on women.
CO 4- Describe and explain the role of women in contemporary word

Course Content:

Course Code: DHIS2803	HISTORY OF THE WORLD FROM MID 20TH CENTURY TO THE 21ST CENTURY	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description:
This course has been designed to make the students aware of the major political developmentsthat shaped European history and world history in general in the 20th century. Thetwo world wars were a turning point in the history of humanity not only in terms of its political, economic and social consequences but also in terms of the aftermath of the wars which left an indelible mark on the history of human civilization. Many lives were lost, and much was learntfrom these two wars that were fought. The inter-war period and the historical processes that shaped this period are also significant in terms of various political institutions that came up during this time and brought Europe on the brink of the Second World War.

Course Objectives
After completion of this course, students will be able to
The course is aimed at enhancing the learning skills of students with regard to the history of the two World Wars which altered the course of human history to a large extent. The learningoutcomes can be defined as follows:

- Introducing students to the history of the World Wars by explaining critical conceptsrelated to both the wars
- Developing critical understanding among students regarding the various events of thetwo wars
- Developing the learning ability of students about the political institutions whichdeveloped in the inter-war period (Fascism and Nazism)
- Introducing students to the historiography related to these themes

Course Outcomes:
On the completion of the course, the student will be able to
CO 1: Define and explain the causes and consequences of the First World War.
CO 2: Describe the developments that occurred in the inter-war period.
CO 3: Define and explain the rise of totalitarian regimes in Europe – Fascism in Italyand Nazism in Germany – and the impact these regimes had on the rest of the world.

Course code: DHIS2804	HISTORY OF CONTEMPORARY WORLD	L	T	P	FW/ Proj	C
Version	1.2 (2023)	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description:

This course aims to acquaint students with the significant trends in politics, society, and cultureduring the latter half of the twentieth century and the early years of the twenty-first century. Itendeavours to familiarize students with the historical processes that facilitated the dismantlingof established powers and the establishment of new political and cultural regimes. Central to the course are the examination of emerging social movements that challenged these regimes and the global shift towards unipolarity by the conclusion of the 20th century. The objective ofthe course is to cultivate a critical understanding of globalization, encouraging students to engage critically with various themes, including environment, social movements, art, digital media, and more, thereby exploring the diverse implications of globalization across continents.

Course Objectives:

After completion of this course, students will be able to

The course focuses on the various social, cultural and environmental issues in the worldafter 1945. On the completion of the course, the student will be able to:

- Exhibit advanced analytical skills in comprehending and evaluating diverse social movements and cultural trends, enabling a thorough understanding of the complex dynamics inherent in the socio-cultural landscape of contemporary global contexts.
- Critically analyse the historical and ecological dimensions of various environmental disasters and protests, fostering an awareness of the environmental challenges, human responses, and the interconnectedness between human activities and the natural world.
- Attain a comprehensive understanding of the history of social movements, delving intothe intricacies of livelihood concerns, students' perceptions, and civil rights movements
- Explore cross-cultural influences in music, offering students an in-depth examination of how musical expressions have transcended cultural boundaries. Furthermore, analyse the intricate relations between food and globalization, enabling students to grasp the cultural dynamics inherent in the global culinary landscape.

Course Outcomes

On completion of this course, the students will be able to

CO 1- Develop the ability to analyze the dynamic evolution of global polities, societies,and cultures, gaining insight into the multifaceted changes that have characterized the latter half of the twentieth century and the early twenty-first century.

CO 2- Acquire the analytical skills necessary to examine and understand diverse social movements and cultural trends, fostering a nuanced comprehension of the complexities inherent in the socio-cultural fabric of contemporary global contexts.

CO 3- Conduct a comprehensive analysis of the processes of decolonization and the political dynamics during the Cold War era, gaining insight into the geopolitical shifts and power transitions that shaped the global landscape during this pivotal period.

CO 4- Develop the ability to draw inferences and articulate the inter-connectedness of various cultural facets, including but not limited to sports, music, cinema, and other formsof cultural expression, thereby elucidating the intricate relationships that contribute to the global cultural tapestry.

Course Code: DHIS2805	GENDER IN INDIAN HISTORY	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

The course delves into the nuanced understanding of 'Gender,' emphasizing that it transcends mere biological distinctions, instead highlighting its role as a socially and culturally constructed unequal relationship. It provides context to the involvement and influence of women in both courtly culture and domestic settings. The course explores inquiries and discussions surrounding law, education, social distinctions, and partition, challenging the concepts of patriarchy and delving into the intricacies of historical gender dynamics. Additionally, the course seeks to historicize and analyse family institutions and norms of manhood. A critical overview is offered to students, unravelling the complex paradigms that categorize women as both victims and agents, and as objects and subjects.

Course Objectives

After completion of this course, students will be able :

- Acquaint students with the theoretical frameworks surrounding gender and patriarchy,illustrating how these concepts serve as analytical tools for understanding historical phenomena
- Critically analyse the prevailing gender stereotypes associated with women in Early Modern India. Also, foster a more contextual and nuanced comprehension of how historical and gendered frameworks surrounding spaces, institutions, and norms contributed to the formation of sensibilities in Early Modern India.
- Examine law and education within the context of the "women's question" by delving into the interconnectedness of gender with diverse social identities and conducting a thorough examination of gender histories within print and popular culture. Explore and reflect upon the intricate relationship between women and the partition, examining the roles played by the state, community, and family in shaping their experiences.

Course Outcomes

On completion of this course, the students will be able to

CO 1- Critically assess the theories and concepts related to gender studies

CO 2- Analyze the key surrounding gender and power dynamics in the context of bothEarly Modern and Modern Indian history.

CO 3- Examine in-depth the challenges, debates, and transformations related to the'women's question' during the modern period of Indian history.

CO 4- Understand the impact of partition on women and analyze gender-related issuesduring the post-partition period in the construction of the independent state.

Course Code: DHIS2806	GLOBAL ECOLOGICAL HISTORIES	L	T	P	FW/ Proj	C
Version	**1.2 (2023)**	4	0	0	0	4
Pre-requisites/Exposure	Nil					
Co-requisites	Nil					

Catalog Description

This course will systematically analyse the intricate interplay between society and naturespanning from prehistoric eras to contemporary times. By incorporating perspectives from environmental studies, political ecology, historical geography, and gender studies,the curriculum aims to familiarize students with the fundamental concepts, methodologies, and theories underpinning global ecological histories. Departing from conventional approaches confined to regional and national scopes in the examination of historical phenomena, the ensuing course units will elucidate the worldwide interconnectedness inherent in socio-ecological histories.

Course Objectives

After completion of this course, students will be able to

The course is aimed at developing the critical skills of students to assess the relationship shipbetween environment, history and polity. The learning outcomes can be defined as follows:

- Evaluate the interactions between humans and nature, particularly focusing onactivities influenced by human agency.
- Understand how colonialism gave rise to novel consumption patterns by leveraging global resources and fossil fuels for industrial purposes, contributing to the creation ofan interconnected yet unequal global order.
- Gain a historical outlook on the growing disparities in access to natural resources for women and the economically disadvantaged, both within their local contexts and on aglobal scale.

Course Outcomes

CO 1- Examine environmental concerns within a socio-political context.

CO 2- Investigate the impact of social inequality, specifically the unequal distribution and access to environmental resources, to comprehend the global and local dimensions of the world's environmental crisis.

CO 3- Analyse the intricacies surrounding the distribution of resources and disparities intheir utilization, contextualizing these within specific social frameworks.

CO 4- Critically assess the concept of an idealized historical past characterized by a purported harmonious equilibrium between human societies and nature during pre- modern eras.

Modules	Blooms level*	Number of hours
MODULE-I: **Political Ecologies and Societies** • Global Interconnectedness in Ecological Contexts and Historical Narratives • Critiques of Anthropocentrism in Historical Perspectives	**L1, L2, L3**	14

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

DHIS2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization;	L1, L2, L3, L4	20 hours

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Manesar Gurgaon-122413

	Introduction to statistical inference and various univariate tests by using SPSS; Analysis of Variance (One Way ANOVA, Two Way ANOVA and ANCOVA); Correlation, Simple and Multiple linear Regression Analysis; Principal Component Analysis and Factor Analysis		
2	**Module-2: VOS Viewer** **Web of Science, Scopus, Dimensions, Lens, and PubMed.** Co-authorship networks, citation-based networks, and co-occurrence networks can be created based on data downloaded from Web of Science, Scopus, Dimensions, and Lens. Co-authorship networks and co-occurrence networks can also be created based on PubMed data. **Crossref, Europe PMC, and OpenAlex**. Networks can also be created based on data retrieved through the APIs of Crossref, Europe PMC, and OpenAlex, These APIs can be queried interactively in VOS viewer. **Semantic Scholar, Open Citations, and Wiki Data.** For a given set of DOIs, networks can also be created based on data retrieved through the APIs of Semantic Scholar, Open Citations and Wiki Data.	L1, L2, L3, L4	10 Hours
3	**Faculty of Management Studies & Behavioural Sciences** **Module 3: Domain Specific Software** **- Structural Equation Modelling** **Smart PLS** Introduction to Structural Equation Modelling (SEM), Introduction to the software's AMOS and SPSS, SMART PLS, Testing of Statistical assumptions, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), common method bias (CMB) test, Measurement Model Assessment, Discussing Fit Indices, Reliability and Validity Testing, Structural Model Assessment identifying multivariate outlier, Construct Validity: Convergent and Discriminant Validity, Measurement Model & Structural Equation Modelling, Mediation and Moderation Effects, Multi-Group Analysis.	L1, L2, L3, L4	30 Hours
	Faculty of Arts **N Vivo** 1. Import text, audio, video, emails, images, spreadsheets, online surveys, web content, and social media from various sources into a simple, intuitive interface.		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

	2. Create and NVivo project, import and organise qualitative and quantitative data 3.Manage a literature review in NVivo 4. Autocode structured data deductively and identify themes inductively 5. Generate and falsify hypotheses 6. Combine data in sets for analysis 7. Seek patterns and identify relationships across codes and cases 8. Present findings using visualisations 9. Export data out of NVivo 10. Coordinate teamwork.		
	Faculty of Science Engineering and Technology **Faculty of Health & Allied Sciences** **R programming / Python/ MATLAB** **R Programming-** Introduction to R, Variables and datatypes in R, Dataframes, Recasting and joining of dataframes, Arithmetic, logical and matrix operations in R, Functions in R, Control structure in R, Data visualization in R. **Python Programming-** Basics of programming, data structure and algorithm using Python, Strings, lists, control, functions, manipulating lists, loops, arrays, selection sort, insertion sort, recursion, sorting, dictionaries, exception handling, file handling, string processing, data analysis using Python **MATLAB Programming-** Introduction, basic features, managing workspace, mathematical functions, basic plotting, Matrices, array operations and linear equations, MATLAB programming- M files script, M-file functions, control flow and operations.		

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

SEMESTER-I

Course code: DPOL2151	INDIAN NATIONALISM	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	-				
Co-requisites	-				

Catalog Description
In this course, the instructor will seek to provide the student with a basic yet meaningful understanding of the political scenario that led to the struggle for India's independence. It would endeavour to cover the entire duration of the growth of nationalism in India till the attainment of independence in 1947.

Course Objectives
The objective of this course is to:
1. Educate the nuances of Indian freedom struggle.
2. Provide the role played by different sections of society in the freedom movement.

Course Outcomes
On completion of this course, the students will be able to
CO1: To explain the evolution of nationalism in 19th century India.
CO2: To describe discourses of nationalism given by Partha Chatterjee, AshisNandy, Tagore, Gandhi, Bayly etc.
CO3: To discover functioning of moderates and extremists.
CO4: To recall the various factions of political orientations that dominated the narrative of nationalist struggle.

Modules	Blooms level*	Number of hours
Module 1: Origin and meaning of nationalism. Origin and development of nationalism in the world, the concept of nation, central elements of nationalism, Different approaches to study Indian nationalism.	L1, L2	10
Module 2 Emergence of nationalism in India Agrarian Society and Peasant Discontent, The New Middle Class and the Emergence of Nationalism, Causes of nationalism in India, Foundation of the Indian National Congress, The moderate Congress: objectives and methods	L1, L2	10
MODULE 3: Early Nationalism: Discontent and Dissension The Moderates and Economic Nationalism**,** Hindu Revivalism and Politics, Muslim Politics and the Foundation of the Muslim League.	L1, L2	5
MODULE 4: Roots of extremism The Swadeshi Movement in Bengal- 1905-1908, War and Indian politics, Bhagat Singh, Surya Sen and the Revolutionary Terrorists	L1	6
MODULE 5: The Age of Gandhian Politics	L1	10

Course code: DPOL2101	BRITISH COLONIALISM	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
In this course, the instructor seeks to enable students to study colonialism in India from different perspectives that reveal different facets of colonialism in India: social-economic, political, religious, legal, and educational.

Course Objectives
The objective of this course is to:
1. Educate about India's colonial past.
2. Provide them with political institutions and ideas, social and economic structures that are central to politics in India today.

Course Outcomes
On completion of this course, the students will be able
CO1: To define the imperialist approach and its liberal version and its conservative version.
CO2: To explain the growth of constitution and administration under British rule.
CO3: To describe the working of Indian economy under Colonial Rule
CO4: To explain the civilizing mission role and understand politics of census.
CO5: To recall the history of the growth and development of Education in India.

Modules	Blooms level*	Number of hours
MODULE 1: Imperialism and colonialism Brief History of Global and Indian imperialism; Major Perspectives on Colonialism – Liberalism, Marxism, Post-colonialism	L1, L2	8
MODULE 2: Foundations of Colonial Rule in India Consolidation of British power in India; Police and Civil Administration; Legal Foundations of the Colonial State; Issues related to the sovereignty and relations with British Parliament and major constitutional developments	L1, L2	8
MODULE 3: Economy and Society Impact on Agriculture, land relations and ecology; the 'Deindustrialization' Debate	L1, L2	8
MODULE 4: Religion and Society Colonial Ideology of Indian Improvement 'civilizing mission': Orientalists and the Anglicists (Utilitarians and Missionaries); Shaping Communities: Census and Enumeration; Colonialism and the Gender question	L1, L2	8
MODULE 5: Education Teaching the Colonial Subject: Education; The New Middle Class	L1, L2	8
MODULE 6: Early Indian Responses Peasant and Tribal Uprisings; The 1857 Rebellion	L1, L2	8

SEMESTER-II

Course code: DPOL2251	POLITICAL THEORY	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
In this course, the instructor seeks to introduce the concepts and concerns that are of key significance to philosophical thought and practice.

Course Objectives
The objective of this course is to:
1. Educate the meaning, need and approaches to political philosophy.
2. Outline the political philosophies of notable philosophers like Plato and Aristotle in reference to early Greek settings.

Course Outcomes
On completion of this course, the students will be able to
CO1: To explain the basic conceptual elements of political theory as a discipline.
CO2: To describe the contribution of political theory to the development and growth of discipline of Political Science.
CO3: To define the early Greek social and political setting.
CO4: To recall the contribution of political philosophers to enrich our understanding of human society.
CO5: To explain the concepts of justice, liberty and democracy.

Modules	Blooms level*	Number of hours
MODULE 1: An Introduction to Political Theory Meaning of 'Political', Key elements of 'Political Theory', Aim and Scope of Political Theory, Classification of Political Theories, Relevance	L1, L2	8
MODULE 2: Democracy: Origin and Development of the concept; Different types of Democracy, Active Citizens and Democracy; The Issue of Minority in Democracies	L1, L2	10
MODULE 3: Liberty Meaning and Significance of Liberty; Positive and Negative Liberty, Freedom and the Limits of Government.	L1, L2	10
MODULE 4: Justice Meaning and Need of Justice; The Significance of Procedure; Procedural and Social Justice theories, John Rawls' Theory of Justice and Critique.	L1, L2	10
MODULE 5: Greek Political Thought and Practicum Greek Political Legacy; Plato; Aristotle; Machiavelli; A Study of Current Trends in Political Thought and Practicum.	L1, L2	10

Course Code: DPOL2201	GLOBAL THEMES IN DEVELOPMENT	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description
In this course, the students will get an insight into key global issues in order for them to understand future development and events.

Course Objectives
The objective of this course is to:
1. Educate them about major issues in ransacking the major powers of the global order.
2. Interpret the main cause of concerns that plague the development journey of developing and underdeveloped countries.

Course Outcomes
On completion of this course, the students will be able to
CO1: To explain the cause of concerns affecting developed and developing nations.
CO2: To define the impact of the forces of refugees and terrorism.
CO3: To examine the interactions between developed north and underdeveloped south.
CO4: To explain the system of global governance and regime of human rights.
CO5: To examine the many international movements like disarmament and food security.

Modules	Blooms level*	Number of hours
MODULE 1: Development History of international development, Theories and concepts of international development, international development in practice.	L1, L2	6
MODULE 2: Disarmament History and definition of disarmament, Nuclear Disarmament, India and disarmament.	L1, L2	6
MODULE 3: Food security Need for food security, Challenges to achieving global food security, Risks to food security.	L1, L2	4
MODULE 4: Fair trade Theories of fair trade, The WTO and fair trade, Basics of the fair-trade system.	L1, L2	6
MODULE 5: Governance Need for global governance, Concepts and themes in global governance, regional views.	L1, L2	4
MODULE 6: Human Rights Philosophy of human rights, international protection of human rights, Violation of human rights, Substantive rights.	L1, L2	6
MODULE 7: Peace and Security Ethnic conflict and international security, international cooperation, Rule of Law.	L1, L2	4

Course Code	Course Name	L	T	P	Credits
SPOL2401	BASICS OF DEBUNKING FAKE NEWS & DISINFORMATION	3	0	0	3

Course Objectives:

- By enhancing their critical thinking abilities, participants will be better equipped to evaluate the accuracy and reliability of news and information they encounter.
- By understanding the tools and techniques, students will be able to recognize patterns and characteristics that can help them identify misleading or deceptive content.
- Participants will learn how to navigate fact-checking resources, employ digital verification techniques, and communicate their findings to others in a clear and persuasive manner.

Course Outcomes:

- Students will be equipped with the necessary tools to critically evaluate news sources, assess credibility, and identify potential red flags, thereby enhancing their ability to make informed decisions based on accurate information.
- Students will be able to employ fact-checking techniques, utilize reliable verification tools, and effectively communicate their findings.
- Students will have the knowledge and skills to protect themselves and others from falling victim to fake news and disinformation, fostering a culture of critical thinking, fact-checking, and responsible sharing of information.

Course Contents	Weightage
Module I: MEDIA LITERACY & ITS IMPORTANCE	**10 %**
Developing critical thinking, understanding bias, difference between fake news, misinformation and disinformation	
Module II: Fact Finding from the Images	**20 %**
Understanding images & metadata, Error Level Analysis (ELA), Digital Forensics	
Module III: Fact Finding from the Videos	**20 %**
Understanding videos & metadata, video verification, YouTube Data viewer	
Module IV: Basics of Social Media	**10 %**
Understanding social media, study of digital media algorithms, knowledge of digital media tools	
Module V: Detection Software & Tools	
Open Source Intelligence Software

SEMESTER-VI

Course code: DPOL2651	COMPARATIVE GOVERNMENT AND POLITICS	L	T	P	C
Version 1.1	Date of Approval:	3	1	0	4
Pre-requisites/Exposure					
Co-requisites					

Catalog Description

The core objective of the course is to impart an understanding of comparative forms of government and politics in countries with parliamentary as well as presidential forms of government. At the end of the course the student will be able to distinguish between forms and nature of governments in various countries and draw comparisons between political systems.

Course Objectives

The objective of this course is to:

1. Explain the evolution of Comparative Politics as a discipline and drawing a distinction between Comparative Politics and Comparative Government.
2 Discuss the nature and scope of Comparative Politics.
3 Explain the approaches and models of comparison: systems analysis; structural functionalism; and institutional approach.
4. Discuss the features of a liberal democratic and socialist political system with focus on the UK, USA and the People's Republic of China.

Course Outcomes

On the completion of the course the student will be able to:

CO1: Describe different political systems like democracy, authoritarianism etc. and to explain theoretical approaches like structural functionalism and system analysis.

CO2: Discuss the concept of political culture plays in comparative politics. It outlines the concept's premises, insights and recent progress. Political participation covers a wide range of activities, from turning out to vote, to giving money to a campaign, to outright violence in the streets. It also outlines the logic of the comparative study of political communications.

CO3: Interpret a variety of rules under which elections are held and examine the consequences of this variation.

CO4: Explain institutions comprising a political system. It also focuses on understanding the working of institutions like legislature, executive and bureaucracy.

CO5: Describe policy processes and methods informing the functioning of a successful political systems.

Course Code: DPOL2605	RELIGION AND POLITICS IN INDIA	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites / Exposure					
Co-requisites					

Catalog Description

The course would attempt to provide the students with quality understanding of the interstices of religion and politics in modern India, with the roots of the current issues lying firmly in movements, events as well as processes witnessed during the colonial period. It would also inculcate in the student an appreciation of the various ways in which politics interacts with religion in Indian society.

Course Objectives

The objective of this course is to:

- Educate students about the various issues relating to religion and politics In India.
- Enable students to trace the intricate link between politics and religion in India.
- Discuss the major religious philosophies.
- Explain the persisting religious conflicts and polarisation in India.

Course Outcomes

On completion of this course, the students will be able:

CO1: Define the problems in defining and delimiting "religion" and "politics." working knowledge of the world's religious traditions, political ideologies, and political institutions.

CO2: Discuss the major trends and themes in the interrelationship between religion and politics: human rights, violence, peace and reconciliation, globalization, etc.

CO3: Interpret the most important political actors that shape religious policy and conversely, the most important religious actors that influence politics.

CO4: Describe the religious and political diversity of the modern world and the methods adopted to manage these diversities.

Modules	Blooms level*	Number of hours
Module I : Introduction to the Study of Religion and Politics Introduction, what is Religion? What is Politics? Introduction to major religious traditions, Religion violence and the Clash of Civilizations.	L1, L2	12
Module II: Secularism in a Religious Society Definitions and theories of secularism ; Historical Evolution of Secularism in India ; India as a secular state ; Functioning of Indian Secularism.	L1, L2	12
Module III : Hindu Nationalism	L1, L2	12

SEMESTER-VII

Course Code: DPOL2701	DEBATES IN POLITICAL THEORY	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites / Exposure					
Co-requisites					

Course Objective:
This course aims to
1. This course proposes to build on a prior understanding of the nature and value of theoretical inquiry in politics.
2. Political theory begins with a few fundamental questions that have a bearing on the good life, and the ways in which we seek to collectively secure it. It does not claim to have any final answers to such questions and instead acknowledges disagreements.
3. Our basic disagreements on how we must constitute our collective life are part of our evaluations that we make on a continual basis of the political and social order we inhabit.

Course Outcome
CO1: Evaluation usually entails an intense engagement with the political context within which we live, the nature of our values and political institutions,
CO2: Clarification and analyses, together with weighing the necessity of just institutions and values.
CO3: The activity of evaluation lays bare a wide range of arguments that are used in political discourse sharpening thereby our political judgment.
CO4: It is imperative to evaluate, argue and judge and then raise for the consideration of justification our existing or appropriate political practices, decisions, policies and institutions.
CO5: This course seeks to explore and understand some of the major debates that contemporary political theory is engaged in, and hopes thereby to enrich our skills of analysis and judgment.

	Bloom's Level	Credit hours
Module I: Introduction		
a. What is Political Theory? b. Disagreements and Debates in Political Theory c. Normative judgments in a Political Context	2	10
Module II: The Political Context d. Understanding Power e. The Faces of Power (Steven Lukes) f. Ideology and Power (Althusser) g. Class Power h. Power and the Subject: Foucault i. On the Colonial State in India (Naoroji, Dutt and Gandhi)	*2*	*20*

Course Code: DPOL2702	COMPARATIVE POLITICAL ANALYSIS	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites / Exposure					
Co-requisites					

Course Objective:

The objectives of the course are:

- To enrich students with analytical skills associated with comparative politics.
- To explain in greater detail the input and output functions of a political system.
- To inform students of the Eurocentric biases concerning academic discourses.
- To discuss the various theories of development and origins of the state.

Course Outcome

CO1: When applied to specific fields of study, comparative politics may be referred to by other names, such as for example comparative government (the comparative study of forms of government) or comparative

CO2; Foreign policy (comparing the foreign policies of different States in order to establish general empirical connections between the characteristics of the State and the characteristics of its foreign policy).

CO3: Sometimes, especially in the United States, the term "comparative politics" is used to refer to "the politics of foreign countries." This usage of the term, however, is often considered incorrect.

CO4:"Comparative political science" as a general term for an area of study, as opposed to a methodology of study, can be seen as redundant.

CO5: A study of a single political entity, whether a society, subculture or period, would show the political as simple brute reality without comparison with another society, subculture, or period.

Modules	Bloom's Level	Credit Hours
Module I: Comparative Methods and Approaches Approaches to Comparative Political Analysis; Formal – Institutional, Political Systems and Structural Functional Approach, Culture-centric, Political Economy, New Institutionalism	L1	12

Course Code: DPOL2703	THEORIES OF INTERNATIONAL RELATIONS	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites / Exposure					
Co-requisites					

Course Objective:

The objectives of the course are:

- To enable students to establish the linkages between global history and chronological progression of the discipline of IR.
- To introduce graduate students to diverse traditions of theoretical contributions to the study of International Relations as they have evolved around the world.
- The purpose of the course is to provide a thorough background in all schools of IR theory and the debates between them regarding their perspective on the nature of international politics and how it is to be conceptualized, understood and judged, bearing in mind their geo-cultural specificities.
- To provide greater insights into the Indian and Chinese traditions of thinking in international politics, diplomacy and warfare.

Course outcome

CO1 and **CO2**: The study and practice of international relations in today's world is valuable for many reasons. International relations promote successful trade policies between nations.

CO3: International relations encourage travel related to business, tourism, and immigration, providing people with opportunities to enhance their lives.

CO4: International relations allow nations to cooperate with one another, pool resources, and share information as a way to face global issues that go beyond any particular country or region. Contemporary global issues include pandemics, terrorism, and the environment.

CO5: International relations advance human culture through cultural exchanges, diplomacy and policy development.T he practice of international relations is valuable in a wide array of settings.

Course Code: DPOL2704	POLITICS IN INDIA	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites / Exposure					
Co-requisites					

Course Objective

This course focuses on societal dynamics and their impact on political processes. It identifies specific themes which are significant for the study of politics in India, explores the way in which these themes have acquired salience, and how their changing forms have impacted upon the nature and course of Indian politics. It seeks in particular to understand how state and politics are informed by social processes and political mobilizations, historically and in contemporary contexts.

Course Outcomes

CO1: How has India's politics changed over the last five years? This is as important for setting the agenda of the new government as it is for assessing the performance of the incumbent one.
CO2 : To know the structures of the government and legacies which is being carries forward.
CO3: The political discourse has coarsened is self-evident. There is greater intrusion of the media into public and private life, & a lot of what they serve up is degrading, rather than enlightening or redemptive.
CO4: How religion and Language play an important role in Indian Politics.
CO5: Understanding the development strategies in the era of liberalization and Globalization

Module 1: Approaches to Indian Politics Historical, cultural, legal and political economy perspectives	**Bloom's Level** 1	**Credit hours** 10
Module 2: State in India Democratic, developmental and coercive dimensions		8
Module 3: Class, Caste, Tribe and Gender The changing nature of class dominance in India Politics and social mobilizations Issues of equality and representation	2	10
Module 4: Religion, Region and Language Communalism and secular politics Region and language: issues of recognition, autonomy and secession	2	10

DPOL2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Content :

Module	Topic	**Blooms level***	Hours
1	**Research Methodology** Understanding the research process: From research questions to conclusions	L1, L2	10

SEMESTER-VIII

Course Code: DPOL2801	ADMINISTRATIVE THEORY	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure					
Co-requisites					

Course Objective:
The focus of this course is on the theories that have shaped the emergence of modern systems of governance and their related structures and processes. These include Western and Non-Western traditions. The course has a clear normative thrust inasmuch as it seeks to clarify what can be the prerequisites for promoting effective and just administration at the local and national levels.

Course outcome
CO1 and 2: To explore the theoretical underpinnings those have shaped the practice of public administration.
CO3: To understand the nature of public administration
CO4: To comprehend different theoretical frameworks guiding public administration as a field of study and practice
CO5: Explain opportunities and challenges that the micro and macro environments of public administration unveiled to public administrators

Module 1 :Evolution of the Discipline of Public Administration a Western Traditions b Non-Western Traditions	**Bloom's Level** 2	**Credit Hours** 10
Module 2: Classical Schools a. The Scientific Management School b. The Classical Theory of Management/Administrative Management Theory c. The Ideal organization: Max Weber. d. Human Relations: Elton Mayo. e. Behavioural and Systems approaches i. Argyris, Maslow, McGregor: the behavioural approach ii. System Approaches: open/closed systems	*2*	*10*
Module 3: Contextual Public Administration a. Ecological Approach: Fred Riggs b. Rational Decision-Making Approach: Herbert Simon c. Development Administration Approach i. Political Economy Approach ii. Marxist Approach	*3*	*10*

Course Code: DPOL2803	THEMES IN WORLD POLITICS AND INTERNATIONAL POLITICAL ECONOMY	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure					
Co-requisites					

Course Objective:

1.The twin objectives of this course are to familiarize the graduate students with certain key concepts for analyzing world politics and, the core theoretical issues and empirical explanations in the field of International Political Economy (IPE).

2.International political economy addresses issues relating to distribution of power, wealth and resources among nations. The course debates key issues pertaining to the relationship between security and economic affairs, the tensions between the 'national' and 'international' loci for decision making on matters of global economic governance and, politics of international trade, finance and labour. The centrality of North-South conflict in several domains especially that of global environmental governance and the role of global social movements in resisting pressures of globalization are also discussed at length.

Course outcome

CO1:Demonstrate understanding basic facts about the world
CO2: Demonstrate capacity to theorize or explain political outcome
CO3: Demonstrate familiarity with current political debates
CO4: Demonstrate skills in critical thinking
CO5: Demonstrate knowledge of social scientific inquiry norms and standards

Course Code: DPOL2804	KEY TEXTS IN POLITICAL PHILOSOPHY	L	T	P	C
Version 1.1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure					
Co-requisites					

Course Objective:

1.The objective of this course is to introduce students to select classical texts in Western Political Philosophy through two methods (i) an intensive reading of selected parts of the text, and (ii) by making them familiar with different interpretations of the texts.

2.The idea is to instill in students an interest in reading original works, in the desire to closely follow the debates around the work, and become aware of the different ways in which a text can be read.

A detailed study of any **Four** texts from the given list will be offered in an academic session.

Course Outcome

CO1: Students will demonstrate knowledge of key thinkers and concepts
CO2: Students will compare thinkers on similar concept
CO3: Students will use concepts to analyze new situations
CO4: Students will explain the nature and value of normative thinking
CO5: Students can forsee Critical gaps.

	Bloom's Level	Credit Hours
Module 1: Introduction a. Why study the History of Ideas? b. What is Interpretation? c. Problems in Interpreting Data d. Theories of Interpretation e. Meaning and Context f. The Importance of Language	**L1, L2**	**10**
Module 2: Texts *1.* **Plato**: *The Republic* *2.* **Aristotle**: *The Politics* *3.* **Machiavelli**: *The Prince* *4.* **Hobbes**: *Leviathan* *5.* **Locke**: *The Second Treatise of Government* *6.* **Rousseau**: *Social Contract* *7.* **Kant**: *Groundwork of the Metaphysic of Morals* 8. **Hegel**: *Philosophy of Right* (excerpts) 9. **Marx & Engels** *10.* **Mill**: *On Liberty*	**L1, L2**	38

Bloom's Level

DPOL2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Bachelor of Arts (Honors/ Honors with Research) in English

OVERVIEW

The BA English program aims to introduce a wide range of literatures in English. The programme intends to discuss wider socio-cultural issues in relation to contemporary English Literature. The programme focuses on the major areas of English literature ranging from 14th Century to the 20th Century poetry, prose, drama and novels. The courses included in the programme delve deep into literary analysis, critical thinking, and written and oral communication skills through a rigorous curriculum.

A BA English degree opens up job opportunities in various fields ranging from government to private sector jobs. BA English students also prefer to join many professional courses like editing, , script writing B.Ed etc. Proficiency in English gives the students a cutting edge in competitive exams and in corporate job markets.
For a majority of students, Masters of Arts (MA) English is a preferred choice.

Program Outcomes (POs)

- PO1.**Critical Thinking**: Take informed actions after identifying the assumptions that frame our thinking and actions, checking out the degree to which these assumptions are accurate and valid, and looking at our ideas and decisions (intellectual, organizational, and personal) from different perspectives.
- PO2.**Effective Communication**: Speak, read, write and listen clearly in person and through electronic media in English and in one Indian language, and make meaning of the world by connecting people, ideas, books, media and technology.
- PO3. **Social Interaction**: Elicit views of others, mediate disagreements and help reach conclusions in group settings.
- PO4. **Effective Citizenship**: Demonstrate empathetic social concern and equity centred national development, and the ability to act with an informed awareness of issues and participate in civic life through volunteering.
- PO5. **Ethics**: Recognize different value systems including your own, understand the moral dimensions of your decisions, and accept responsibility for them.
- PO6. **Environment and Sustainability**: Understand the issues of environmental contexts and sustainable development.
- PO7. **Self-directed and Life-long Learning**: Acquire the ability to engage in independent and life-long learning in the broadest context socio-technological changes

Program Specific Outcomes (PSOs)

PSO 1. Develop an understanding of the evolution of English literature from the Age of Chaucer up to the 20th century.
PSO 2. Demonstrate an appreciation and understanding of literary theory and criticism.
PSO 3. Apply critical and theoretical approaches to the reading and analysis of literary and cultural texts in multiple genres.

Course Code	Course Title	Credit	Structure			
			L	T	P	Total
DENG2151	**HISTORY OF ENGLISH LITERATURE**	04	4	0	0	04
Pre-requisite / Exposure						
Co- requisite						

Catalog Description

In this course, History of English Literature, the purpose is to get the students acquainted with the wide and deep history of English literature so that they may get the vision of the past and for the future which would help to increase their intellectual ability.

Course Objective

- To provide an insight into the major literary canons, the sequence of interlinked works, with their characteristics, trends and genres with major literary authors and texts.
- To interpret the knowledge of history of writing from the Anglo-Saxon and the early Christian period up to the contemporary time.
- To explain a perception of English poetry, drama and fiction through the prescribed texts..

Course Outcome

After completing this course, the students will be able to:

CO1: demonstrate awareness of major issues in the given historical period of literary genre and learn how to engage critically with other periods of English Literature

CO2: describe historical analysis of ancient texts with proficiency in English language.

CO 3: interpret key features of the origin and growth of English literature through the various ages.

CO 4: To describe a range of texts with an analytical knowledge of some aspects of English literature and culture.

Modules	Blooms level*	Credit Hours

DENG2101	**ENGLISH POETRY FROM CHAUCER TO BLAKE**	04	04	0	0	04
Pre-requisite / Exposure						
Co- requisite						

Catalog Description

In this course English Poetry from Chaucer to Blake, the purpose is to acquaint the students with a wide range of English poetry which covers the time span from Chaucer to Blake so that they may develop the aesthetic taste for literature and nature as well.

Course Objective

1. To provide knowledge of English poetry from Chaucer of the later Middle Age to the Age of Transition.
2. To interpret a broad and sublime perspective of the important periods of English Poetry and different genres of poetry
3. To analyze social, political and cultural aspects of Literature from Chaucer to Blake

Course Outcome

After completing this course, the students will be able to:

CO1- Explain Chaucer's literary works, to describe the connection between Chaucer's literary works and his life and culture

CO2- Describe the philosophy of John Donne's life and summarize the characteristics of metaphysical poetry.

CO3- Interpret Milton's *Paradise Lost* and compare with literature of later time periods, gaining a broader knowledge of one of the most important periods in English literature.

CO4 Identify imagery used in Blake's Poems and describe William Blake's life and vision, understand Blake's unique pattern of work.

CO5- Define various forms of poetry in different eras.

Course Content

Course code	Course Title	Credit	Structure			
			L	T	P	Total
DENG2701	**CONTEMPORARY LITERATURE**	04	3	1	0	04
Prerequisite / Exposure						
Co- requisite						

Catalog Description
Contemporary literature aims to bring students closer to thinking prevalent in present times. Students should be able to utilize and articulate in English language of current times. Intellectual flexibility would allow full reign to creative power of students. Students should be able to learn and use knowledge gained from these texts in their practical life.

Course Objective

- To analyze key aspects, including: colonial and post-colonial experience; national, cultural, and racial identity; voice; language; political writing; gender and colonization; exile; and imperialism.
- To explain texts in their historical and cultural contexts,
- To explain and give to students both a broad knowledge of Contemporary literature and in-depth understanding of specific texts and issues.

On the completion of the course students will be able to:
CO-1 Explain the question of identity and racial conflict in Derek Walcott's poetry.
CO-2 Elucidate Garcia Gabriel Marquez's fiction and use of magical realism
CO-3 Describe Ngugi wa Thiongo's writings, techniques and style.
CO-4 Explain the feminist impulse in Margaret Atwood's poetry.

DENG2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Code	Course Title		Structure			
			L	T	P	C
DENG2804	**MODERN ENGLISH NOVEL**		4	0	0	4
Prerequisite / Exposure						
Co- requisite						

Catalog Description

This course discusses different characteristics of the twentieth century English novels with the help of a few representative modern novels.

Course Objectives

- To enable the students understand the evolution and growth of modern English novels
- To provide awareness of the new literary styles and techniques used by the different novelists in their novels.
- To enable students to understand the shift and major themes in the different 20th century novels.

Course Outcomes

After completing this course, the students will be able to:

CO1: Describe the historical, political and socio-cultural aspects of novels based on working class and explore the psychological perspectives of modern novels – Freudian psychoanalysis.

CO2: Define the emergence of the figure of adventurer and traveler and his role in sustaining European supremacy and to compare and contrast Lord Jim and Heart of Darkness.

CO3: Define this novel as a bildungsroman and Kunstler Roman and to summarize Joyce's stream of consciousness technique

Modules	Blooms'Level	Credit Hours
Module-I: D. H. Lawrence- Sons and Lovers Important characteristics of the 20th Century novels, Oedipus Complex, Gertrude as a major character in the novel. Problems and tension in the novel. killing of Mrs Morel by her son Paul Morel. The problems beings faced by Paul and the significance of the murder of Mrs Morel	L1, L2	20
Module-II: Joseph Conrad- Lord Jim Joseph Conrad as an important novelist and Lord Jim as a representative novel of the 2oth Century, characterization, message, symbols and themes	L1, L2	20
Module-III: James Joyce - Portrait of an Artist as a Young Man *Portrait of an Artist as a Young Man*, a major shift from the traditional novels, new experiment, and a new approach in writing a novel ,major themes of the novel, structure of the novel, the unique quality of the novel	L1, L2	20

DENG2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization; Introduction to statistical inference and various	L1, L2, L3, L4	20 hours

RESEARCH METHODOLOGY-I

Course Code: ENG4206 **Credit Units: 01**

Course Objective:
This paper proposes to introduce student to the philosophy and mechanics of research, to train them in the use of language, style and discourses suitable for dissertation writing, to help them acquire both a theoretical thrust and hands-on experience in writing research proposals before they embark on the execution of the thesis proper.

Module-I: The Philosophy of Research
The Philosophy, Meaning and Definition of Research
The nature of inquiry in Physical Sciences, Social Sciences and Humanities.
The relationship between Scholarship, Criticism and Research.
Interpretation
Textual Criticism
Literary History

Module-II: Project Proposals: Theory and Practice
The Identification of a Research Problem / Research Gap
The problems faced by a Research Scholar.
Parts of a Project Proposal
Preparing Minor Project Proposals

Examination Scheme:

SUMMER PROJECT EVALUATION

Course Code: ENG4335 **Credit Units: 03**

Summer Project is primarily a research work. It involves academic reading of several sources and writing on a particular topic relating to the core course or courses of the program. It is a scholarly inquiry into academic problems or issues. It should involve a systematic approach to gathering and analysis of information/ideas, leading to production of a structured report. The research topic should hold significant academic value commensurate with level of the Program.

GUIDELINES FOR SUMMER PROJECT REPORT

Topic

The topic of the paper will be of the student's choice with consent of the Supervisor. It must be relevant to the content of the course, but it should be treated in greater depth than it is covered in class. Focus is of the utmost importance. Too broad a topic will either lead to superficial treatment or an unnecessarily long paper; too narrow a topic will lead to a lack of source material and redundancy. Make sure the subject focuses on one question or topic so that the paper has a definite purpose. Composing an introduction and conclusion can be a good test of the cohesiveness of the subject. The domain can include Literature, Linguistics, Applied Linguistics, English Language Teaching and other related areas.

Synopsis of Summer Project Report

A Synopsis of the Summer Project Report should be submitted to the Board of Studies of the Institute. The Board, after deliberation, will suggest changes and modifications and will assign a supervisor from amongst the teaching faculty of the Institute. The synopsis should include the following –

1. Title of Summer Project Report
2. Introduction
3. Problems of Research
4. Objectives of Research
5. Tentative Chapter Division
6. Suggested readings

Source Material and References

Presenting your own ideas in a Summer Project Report is acceptable and even encouraged. However, the paper must be based on facts and opinions from authoritative sources and these sources must be given proper credit. A minimum of three published sources is required, and ten or more is typical. Direct quotes must be placed inside quotation marks or in indented sections and should be used sparingly. Paraphrasing is better in most cases.

There are two popular ways to cite references. One is to place superscripted numbers in the text with corresponding footnotes at the bottom of the page or endnotes at the end of the paper. More typical of scientific papers is to place the author and year in parentheses (Heaton, 1984). In either case you need a bibliography of all cited sources at the end of the paper with author(s), year, title, publication or publisher, volume, and pages. These should be in alphabetical order by name of the primary author. Preference however should be given to MLA Style Sheet.

Be sure to find source materials that are specific to your topic, either books or journal articles. Textbooks are usually too general and should be avoided. The libraries have published and computerized indexes that can be used to find relevant sources. See the Supervisor or a reference librarian if you are unfamiliar with these resources.

Plagiarism is the presenting of someone else's wording or ideas as one's own and is a violation of university policy. If you use someone else's words or ideas, you must give them proper

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

credit. You must also obtain permission from the Supervisor before using your Summer Project Report for more than one course.

Length and Format

Length is not important; 40 to 60 pages of 1.5 spaced text is a good target. The title, author, course, and date should be typed onto a cover sheet.. Illustrations are not required but are often useful in explaining graphical concepts and in giving the paper character. The bibliography should be the last section of the paper. The entire report has to be submitted in two spiral bound copies.

Grading

Students are required to make two submissions: a first draft and a final draft prior to final submission. The first draft is *not* to be a "rough" draft; it should be a completed, typed paper like you would ordinarily submit. I will read it carefully, offer suggestions for improvement, give it a grade, and return it to you promptly. The final draft, which is worth a larger share of the points, is your chance to respond to the suggestions and submit an improved paper. This, I hope, will make the writing of a Summer Project Report more of a learning experience. We strongly suggest using a word processor so that the final draft can be created by editing rather than complete retyping.

Grading is based on both research content and presentation. Your paper should demonstrate that you have a gained a level of expertise in the subject by studying the relevant literature. Your presentation should be clean and convincing with proper use of paragraphs, complete sentences, and correct grammar, spelling, and punctuation. Make your Summer Project Report look and sound professional.

Evaluation of Project Work

Sl. No.	Evaluated by	Criteria	Marks
1	Institution	✓ Quality ✓ Depth & Breadth of analysis, ✓ Coverage, ✓ Scope and content ✓ Project fulfillment ✓ Data collection ability in the field (if any) ✓ Scope of Implementation.	50
2	Board of Examiners	Viva-voce Examination	50
3		**Total**	**100**

Project Schedule

1. **Registration**

   First week of the last academic month

   Allotment of Faculty Guide takes place in accordance to the area of interest / stream chosen by the student at the time of registration.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

2. **Approval Of Project Topic**
   Week following the 'week of registration'

3. **Submission Of Synopsis To Faculty Guide**
   Prior to the completion of End -Term Examination. The synopsis could be submitted any time after the allotment of project topic but certainly must be before completion of last examination.

4. **Duration of Project**
   The project stretches for the full duration of the Semester break

5. **Submission of Report**
   First Draft – After 20 Days from the commencement of the project
   Second Draft – 20 days after submission of the first draft.
   The first and second reports could be submitted through e-mail or any other medium as per the consent of faculty guide.
   Final Draft – Within second week of rejoining of institution

LITERARY THEORY

Course Code: ENG4401 **Credit Units: 05**

Course Objective:
This course will familiarize students with the study of major twentieth-century theories and applications. In this course, Historical, formalist, archetypal, psychoanalytic, Marxist, reader-response, New Historicist, feminist, postcolonial perspectives will be dealt. The course will enable students to comment on various theories and apply them to works of literature and aspects of contemporary culture.

EUROPEAN COMEDY

Course Code: ENG4403 **Credit Units: 05**

Course Objective:
The course will introduce trends and issues related to European drama through study of the prescribed texts; develop critical arguments of local issues in relation to wider structures of individual plays and to generically structured theatre. The students will also be encouraged to make critical understanding of national and cross-national concepts of dramatic practice and identify the relationships between drama and wider philosophical, cultural and political issues.

Text:

ANCIENT GREEK AND LATIN LITERATURE IN TRANSLATION

Course Code: ENG4407 **Credit Units: 05**

Course Objective:
Identify texts, contexts, and authors—and thematic, genre-based and stylistic hallmarks of those texts and authors within the early literary traditions. Understand, discuss and interpret key texts, ideas, themes, and aesthetic modalities and explain how the texts, ideas, themes and modalities arose within a given cultural or historic context. Recognize and discuss significant genre and stylistic aspects of those texts. Relate their knowledge of ancient texts and belief systems to enduring issues and values in contemporary societies, including their own.

Text:

Homer	:	The Iliad
Sophocles	:	Oedipus Rex
Aristophanes	:	The Frog
Ovid	:	Metamarphoses – Story of Phateon (Book II); The Rape of Proserpine (Book V) Story of Pygmalion the Statue (Book X); The region of Augustus in Which He Flourished (Book XV)
Marcus Aurelius	:	The Meditations – Book I to V

20TH CENTURY INDIAN ENGLISH LITERATURE

Course Code: ENG4404 **Credit Units: 05**

Course Objective:
This course will attempt to explore issues of contemporary Indian English. The aim is to open the students to the varieties of social and literary provocation at work in the texts prescribed and at the same time trace the changes in style, themes and its ideologies in the contemporary Indian English Writings. Students will be encouraged to - appreciate the sheer linguistic vitality of Indian English Writings; understand how the Indian subcontinent has been imaginatively reworked in recent Indian English writing and assess the cross-cultural impact of such reinvention.

Text:

Raja Rao	:	Kanthapura
Anita Desai	:	In the Lighthouse
Amitav Ghosh	:	The Glass Palace
Salman Rushdie	:	Midnights Children

LINGUISTICS AND ENGLISH LANGUAGE TEACHING

Course Code: ENG4406 **Credit Units: 05**

Course Objective:
This paper aims to provide the learner the basic knowledge of Linguistics. This course will introduce the intricacies of language and linguistics to the students focusing on the application of linguistic knowledge in language teaching. The focus of the paper is also to introduce the learners with difference in language learning and language acquisition.

Introduction: What is language? Characteristics of human language; Linguistics: Definition and explanation; Importance and applications of linguistics; Levels of language study.

Phonetics and Phonology: Difference between Phonetics and Phonology; Classification of sound system; Articulation and Production of sounds; Tone, Accent and Stress.

Sociolinguistics: Language; Dialect; Registers; Bilingualism; Multilingualism.

Language Acquisition: Theories of language acquisitions; Stages of language acquisition; Problems of language acquisition.

Methods of Language Teaching and Learning: Grammar Translation; Audio – Visual; Immersion (Total and Partial); Direct Method; Communicative Language Teaching.

Examination Scheme:

Components	TP	Sessional	Presentation	EE
Weightage (%)	10	10	05	70

DISSERTATION

Course Code: ENG4437 **Credit Units: 03**

GUIDELINES FOR DISSERTATION

The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Selecting the Dissertation Topic

It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialization.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between 'dissertation topic' and 'dissertation title'. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:

- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

Planning the Dissertation

This will entail following:

- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The Dissertation plan or outline

It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan

- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

Keeping records
This includes the following:

- Making a note of everything you read; including those discarded.
- Ensuring that when recording sources, author's name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
- Make clear what is a direct a direct quotation and what is your paraphrase.

Dissertation format
All students must follow the following rules in submitting their dissertation.
- Front page should provide title, author, Name of degree/diploma and the date of submission.
- Second page should be the table of contents giving page references for each chapter and section.
- The next page should be the table of appendices, graphs and tables giving titles and page references.
- Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: **Executive Summary.**
- Next is the 'acknowledgements'.
- Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
- Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
- After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

  Draper P and Pandyal K. 1991, The Investment Trust Discount Revisited, Journal of Business Finance and Accounting, Vol18, No6, Nov, pp 791-832.

  For books, the following details are required:
  Levi, M. 1996, International Financial Management, Prentice Hall, New York, 3rd Ed, 1996

- Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

The Layout Guidelines for the Dissertation:
- A4 size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

Guidelines for the Assessment of the Dissertation
While evaluating the dissertation, faculty guide will consider the following aspects:

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

1. Has the student made a clear statement of the objective or objective(s).
2. If there is more than one objective, do these constitute parts of a whole?
3. Has the student developed an appropriate analytical framework for addressing the problem at hand.
4. Is this based on up-to-date developments in the topic area?
5. Has the student collected information / data suitable to the frameworks?
6. Are the techniques employed by the student to analyse the data / information appropriate and relevant?
7. Has the student succeeded in drawing conclusion form the analysis?
8. Do the conclusions relate well to the objectives of the project?
9. Has the student been regular in his work?
10. Layout of the written report.

Assessment Scheme:

Continuous Evaluation:	40%
(Based on Abstract, Regularity, Adherence to initial plan, Records etc.)	
Final Evaluation: Based on,	60%
Contents & Layout of the Report,	25
Conceptual Framework,	10
Objectives & Methodology and	10
Implications & Conclusions	15

Master of Arts Political Science

Learning Outcomes

After completing MA Program, the students will be able to:
PO1. Build on the discipline from undergraduate to masters level
PO2. Equip the learners with in depth knowledge of the subject.
PO3. Make them capable of grabbing the opportunities of higher education, research and other professional development.
PO4. Demonstrate proficiency in empirical research.
PO5. Develop a command on academic and professional writing with an emphasis on the abilities to organize and present materials in a cohesive manner.
PO6. Understanding the nature and developments in national and international politics
PO7. Analyzing the Indian constitutional provisions, major legislations and reforms.
PO8. Critical evaluation of social, economic and political variables for a proper understanding of the plurality of Indian society
PO9. Building overall consciousness regarding national political history, international relations and present Indian and Western political thinkers.
PO10. Encouraging a comprehensive, comparative understanding of specific world constitutions such as UK, USA, China, Russia, Switzerland and France.
PO11. Developing knowledge of administrative studies with special reference to Indian administrative structures and practices.
PO12. Examining India's foreign relations with her neighbours and great powers.

Program Specific Skills (PSO)

PSO1- **Political Science and Society:** understanding the inter relationship between policy decisions and its effects on society. This is achieved through a comprehensive teaching of the practice of public administration in India.

PSO2- **Critical thinking:** the ability to analyze and predict socio political phenomena based on the study of existing socio economic determinants and past experiences. This goal is achieved by training students in the different methods and tools of investigation such as empirical research methods, survey research and data analysis of subject responses.

PSO3 **- Effective citizenship**: the course curriculum inculcates among students a basic understanding of the rights and duties of citizenship and thereby to act as responsible citizens through the observation of important days such as Independence Day, Republic Day and also spreading awareness in society through street plays based on specific socio political issues such as domestic violence, disillusioned youth of the materialistic world etc.

SEMESTER-I

DEBATES IN POLITICAL THEORY

Course Code: POL4101 **Credit Units: 05**

Course Objective:
This course aims to:
1. This course proposes to build on a prior understanding of the nature and value of theoretical inquiry in politics.
2. Political theory begins with a few fundamental questions that have a bearing on the good life, and the ways in which we seek to collectively secure it. It does not claim to have any final answers to such questions and instead acknowledges disagreements.
3. Our basic disagreements on how we must constitute our collective life are part of our evaluations that we make on a continual basis of the political and social order we inhabit.

Course Outcome
CO1: Evaluation usually entails an intense engagement with the political context within which we live, the nature of our values and political institutions,
CO2: Clarification and analyses, together with weighing the necessity of just institutions and values.
CO3: The activity of evaluation lays bare a wide range of arguments that are used in political discourse sharpening thereby our political judgment.
CO4:It is imperative to evaluate, argue and judge and then raise for the consideration of justification our existing or appropriate political practices, decisions, policies and institutions.
CO5:This course seeks to explore and understand some of the major debates that contemporary political theory is engaged in, and hopes thereby to enrich our skills of analysis and judgment.

Debates will relate to concepts:

	Bloom's Level	Credit hours
Module-I: **Introduction**		
a. What is Political Theory?	2	10
b. Disagreements and Debates in Political Theory		
c. Normative judgments in a Political Context		
Module-II: **The Political Context**	2	20
d. Understanding Power		
e. The Faces of Power (Steven Lukes)		
f. Ideology and Power (Althusser)		
g. Class Power		
h. Power and the Subject: Foucault		
i. On the Colonial State in India (Naoroji, Dutt and Gandhi)		
Module-III: **Debates on freedom**	3	10
j. Ancient vs. Modern Liberty		
k. Freedom as autonomy (Kant, Mill)		
l. Negative vs. Positive Liberty (Berlin, MacCallum)		
m. Freedom and the market (Libertarians)		
n. Republican Conception (Skinner)		
o. Freedom as Development (Sen)

COMPARATIVE POLITICAL ANALYSIS

Course Code: POL4102 **Credit Units: 05**

Course Objective:
Each topic is to be studied with reference to concepts, theories and the historical experiments of developing countries as well as advanced industrialized countries. A central concern of the course is to discern the Eurocentric bias in the field of comparative politics, and to identify the processes of de-centering which have reconfigured the field in significant ways.

Course Outcome
CO1: When applied to specific fields of study, comparative politics may be referred to by other names, such as for example comparative government (the comparative study of forms of government) or comparative
CO2; Foreign policy (comparing the foreign policies of different States in order to establish general empirical connections between the characteristics of the State and the characteristics of its foreign policy).
CO3: Sometimes, especially in the United States, the term "comparative politics" is used to refer to "the politics of foreign countries." This usage of the term, however, is often considered incorrect.
CO4:"Comparative political science" as a general term for an area of study, as opposed to a methodology of study, can be seen as redundant. The political only shows as political when either an overt or tacit comparison is being made.
CO5: A study of a single political entity, whether a society, subculture or period, would show the political as simple brute reality without comparison with another society, subculture, or period.

Module-I: Comparative Methods and Approaches	**Bloom's Level**	**Credit Hours**

POLITICS IN INDIA

Course Code: POL4103 **Credit Units: 05**

Course Objective:
This course focuses on societal dynamics and their impact on political processes. It identifies specific themes which are significant for the study of politics in India, explores the way in which these themes have acquired salience, and how their changing forms have impacted upon the nature and course of Indian politics.
It seeks in particular to understand how state and politics are informed by social processes and political mobilizations, historically and in contemporary contexts.

Course Outcome:
CO1: How has India's politics changed over the last five years? This is as important for setting the agenda of the new government as it is for assessing the performance of the incumbent one.
CO2 : To know the structures of the government and legacies which is being carries forward.
CO3:The political discourse has coarsened is self-evident. There is greater intrusion of the media into public and private life, & a lot of what they serve up is degrading, rather than enlightening or redemptive.
CO4: How religion and Language play an important role in Indian Politics.
CO5: Understanding the development strategies in the era of liberalization and Globalization

Module-I: Approaches to Indian Politics	Bloom's Level	Credit hours
Historical, cultural, legal and political economy perspectives	1	15
Module-II: State in India		
Democratic, developmental and coercive dimensions		
Module-III: Class, Caste, Tribe and Gender		
The changing nature of class dominance in India	2	10
Politics and social mobilizations		
Issues of equality and representation		
Module-IV: Religion, Region and Language	2	20
Communalism and secular politics		
Region and language: issues of recognition, autonomy and secession		
Module-V: Development Process	3	15
Concept, strategies, policies, and critiques		
Poverty alleviation programmes		
Globalization and impact on the weaker sections		

Bloom's LevelL1: Knowledge; L2: Comprehension; L3:Application L4: analysis ; L5 : synthesis, L6 : evaluation

THEORIES OF INTERNATIONAL RELATIONS

Course Code: POL4104 **Credit Units: 05**

Course Objective:

1. This course introduces graduate students to diverse traditions of theoretical endeavors in the International Relations as they have evolved around the world. It will cover both explanatory and normative paradigms in international relations theory and give a brief overview of the state of the art of IR to students.

2. The purpose of the course is to provide a thorough background in all schools of IR theory and the debates between them regarding their perspective on the nature of international politics and how it is to be conceptualized, understood and judged, bearing in mind their geo-cultural specificities.

Course outcome

CO1 and 2: The study and practice of international relations in today's world is valuable for many reasons. International relations promotes successful trade policies between nations.

CO3: International relations encourages travel related to business, tourism, and immigration, providing people with opportunities to enhance their lives.

CO4:International relations allows nations to cooperate with one another, pool resources, and share information as a way to face global issues that go beyond any particular country or region. Contemporary global issues include pandemics, terrorism, and the environment.

CO5: International relations advances human culture through cultural exchanges, diplomacy and policy development.

The practice of international relations is valuable in a wide array of settings

SEMESTER-II

ADMINISTRATIVE THEORY

Course Code: POL4201 **Credit Units: 05**

Course Objective:

The focus of this course is on the theories that have shaped the emergence of modern systems of governance and their related structures and processes. These include Western and Non-Western traditions. The course has a clear normative thrust inasmuch as it seeks to clarify what can be the prerequisites for promoting effective and just administration at the local and national levels.

Course outcome

CO1 and 2: To explore the theoretical underpinnings those have shaped the practice of public administration.
CO3: To understand the nature of public administration
CO4: To comprehend different theoretical frameworks guiding public administration as a field of study and practice
CO5: Explain opportunities and challenges that the micro and macro environments of public administration unveil to public administrators

Module-I: Evolution of the Discipline of Public Administration	Bloom's Level	Credit Hours
a Western Traditions	2	10
b Non-Western Traditions		
Module-II: Classical Schools	2	10
a. The Scientific Management School		
b. The Classical Theory of Management/Administrative Management Theory		
c. The Ideal organization: Max Weber.		
d. Human Relations: Elton Mayo.		
e. Behavioural and Systems approaches		
i. Argyris, Maslow, McGregor: the behavioural approach		
ii. System Approaches: open/closed systems		
Module-III: Contextual Public Administration	3	15
a. Ecological Approach: Fred Riggs		
b. Rational Decision-Making Approach: Herbert Simon		
c. Development Administration Approach		
i. Political Economy Approach		
ii. Marxist Approach		
Module-IV: Contemporary Developments	3	15
a) New Public Administration		
a. Non-Weberian perspectives		
b. Value questions		
c. Clientele perspective

THEMES IN INDIAN POLITICAL THOUGHT

Course Code: POL4202 **Credit Units: 05**

Course Objective:

The purpose behind this course is to introduce students to the richness and variety of the tradition of Indian Political Thought, a tradition that spans centuries if not millennia culminating in the various present day understandings of Indian society.

Course Outcome

CO 1- Tracing the evolution of Indian political thought from ancient India to modern India.
CO 2- Analyzing the nationalist thought of Mahatma Gandhi
CO 3- Assessing the nationalist thought during post colonial period and Hindutva
CO 4- Discussing the nationalism of Gandhi, Reformist and Socialism
CO 5- Explaining the formation of the Congress in 1885.

Module-I: Perspectives	Bloom's Level	Credit Hours
a. Classical and Shramanic	2	10
b. Islamic and Syncretic		
c. Contemporary Theories: Liberal, Marxist, Gandhian, Post colonial, Hindutva		
Module-II: Theories and Practices of Knowledge	2	10
d. Classical and Shramanic		
e. Colonial		
Module-III: State	2	15
f. Monarchical		
g. Colonial and Post Colonial		
Module-IV: Conception and Forms of Community	2	15
h. Community in pre-modern and modern times		
i. Forms of Community: Janapada, Sangha, Jati, Quam, Samaj		
Module-V: Critical Perspectives on Indian Society	1	10
j. Shramanic		
k. Syncretist		
l. Reformist		
m. Socialist		
n. Gandhian

THEMES IN WORLD POLITICS AND INTERNATIONAL POLITICAL ECONOMY

Course Code: POL4203 **Credit Units: 05**

Course Objective:

1.The twin objectives of this course are to familiarize the graduate students with certain key concepts for analyzing world politics and, the core theoretical issues and empirical explanations in the field of International Political Economy (IPE).

2.International political economy addresses issues relating to distribution of power, wealth and resources among nations. The course debates key issues pertaining to the relationship between security and economic affairs, the tensions between the 'national' and 'international' loci for decision making on matters of global economic governance and, politics of international trade, finance and labour. The centrality of North-South conflict in several domains especially that of global environmental governance and the role of global social movements in resisting pressures of globalization are also discussed at length.

Course outcome

CO1:Demonstrate understanding basic facts about the world
CO2: Demonstrate capacity to theorize or explain political outcome
CO3: Demonstrate familiarity with current political debates
CO4: Demonstrate skills in critical thinking
CO5: Demonstrate knowledge of social scientific inquiry norms and standards

Module-I: Concepts	Bloom's Level	Credit Hours
a. State	2	10
b. Power		
c. Security		
d. Culture and Religion		
Module-II: International Political Economy	3	20

KEY TEXTS IN POLITICAL PHILOSOPHY

Course Code: POL4204 **Credit Units: 05**

Course Objective:

1.The objective of this course is to introduce students to select classical texts in Western Political Philosophy through two methods (i) an intensive reading of selected parts of the text, and (ii) by making them familiar with different interpretations of the texts.

2.The idea is to instill in students an interest in reading original works, in the desire to closely follow the debates around the work, and become aware of the different ways in which a text can be read.

A detailed study of any Four texts from the given list will be offered in an academic session.

Course Outcome

CO1:Students will demonstrate knowledge of key thinkers and concepts
CO2:Students will compare thinkers on similar concept
CO3Students will use concepts to analyze new situations
CO4:Students will explain the nature and value of normative thinking
CO5:Students can forsee Critical gaps.

a. Why study the History of Ideas?
b. What is Interpretation?
c. Problems in Interpreting Data
d. Theories of Interpretation
e. Meaning and Context
f. The Importance of Language

Texts	Bloom's Level	Credit Hours
1. **Plato**: *The Republic*		
2. **Aristotle**: *The Politics*		
3. **Machiavelli**: *The Prince*		
4. **Hobbes**: *Leviathan*		
5. **Locke**: *The Second Treatise of Government*		
6. **Rousseau**: *Social Contract*		
7. **Kant**: *Groundwork of the Metaphysic of Morals*		
8. **Hegel**: *Philosophy of Right* (excerpts)		
9. **Marx & Engels**		
10. **Mill**: *On Liberty*		

Bloom's LevelL1: Knowledge; L2: Comprehension; L3:Application L4: analysis ; L5 : Synthesis, L6 : evaluation.

Note: Whichever four text student chooses all have to be given equal importance in terms of credit hours. So credit hours stands equally divided between all four text choosen. In Bloom's level it should be both a combination of Knowledge and Comprehension.

FOREIGN POLICY OF MAJOR POWERS

Course Code: POL4304 **Credit Units: 05**

Course Objective: This is the only paper that as its title states, takes up the task of exploring the foreign policies of the major continental and world powers namely, US, Russia, China, Germany and Japan. The value of this course is self-evident.

Course Outcome:

Upon successful completion, students will have the knowledge and skills to:

CO1: Understand how the Foreign Policy Analysis (FPA) subfield relates to the broader discipline of International Relations;

CO2: Demonstrate a strong grasp of the history, key texts, and research priorities of FPA;

CO3: Show an awareness of the pressures, constraints and incentives that affect foreign policy decision-makers;

CO4:Display and ability to critically assess the concepts, debates, and key issues of FPA and effectively communicate their thinking on these issues.

Module-I: Concept and Bases of Power.	**Blooms level**	**Course credit**
a. Framework of Analysis	1	10
b. Determinants of the Foreign Policies of U.S., Russia, China, Germany and Japan		
Module-II: U.S. Foreign Policy	**2**	**20**
e. Main Features		
f. Policy of continuity and change		
g. U.S. threat perceptions and security interests		
h. Foreign Economic Policy		
Module-III: Foreign Policy of Russia	**2**	**10**
i. Main Features		
j. Continuity and change; Russia's threat perceptions and security interests		
l. Foreign Economic Policy		
Module-IV: Foreign Policy of UK	**2**	**10**
m. Main Features		
n. Relations with Regional and Major Powers		
o. Foreign Economic Policy of Germany		
Module-V: Foreign Policy of China	**1**	**10**
p. Main Features		
q. Relations with Regional and Major Powers		
r. Foreign Economic Policy.

SUMMER PROJECT EVALUATION

Course Code: POL4335 **Credit Units: 03**

Objective:
The aim of the project is to provide the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:
Chapter 1: Introduction – 10 marks
Chapter 2: Brief Review of Literature – 25 marks
Chapter 3: Research Findings and Analysis – 25marks
Chapter 4: Conclusions– 10marks
Chapter 5: Bibliography – 05marks

Components of a Project Report

The outcome of Project Work is the Project Report. A project report should have the following components:
1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
4)Body of the Report: The body of the report should have these four logical divisions

a)*Introduction:* This will cover the background, rationale/ need / justification, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b)*Brief Review of Literature*: (relating to the topic of the Project).

c) *Research Findings and Analysis* ☹ using the tools and techniques mentioned in the methodology).

d)*Conclusions:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
6) Annexures: Questionnaires (if any), relevant reports, etc.
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

The Steps of a Project Report

STEP I : Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic
- Relevance of the topic
- Time available for completion
- Feasibility of data collection within the given time limit
- Challenges involved indata collection (time & cost involved in the data collection, possibility of getting responses, etc.)

STEP II: Finalisation of the Topic and preparation of Project Proposal in consultation with the Supervisor

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

STEP III: Collection of information and data relating to the topic and analysis of the same
STEP IV: Writing the report dividing it into suitable chapters, viz.,

Chapter 1: Introduction,
Chapter 2: Brief Review of Literature
Chapter 3: Research Findings and Analysis
Chapter 4: Conclusions
Chapter 5: Bibliography

STEP V: The following documents are to be attached with the Final Project Report.

- Approval letter from the supervisor (Annexure-IA)
- Student's declaration (Annexure-IB)
- Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.

Guidelines for evaluation:

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate. The evaluation scheme shall be as follows:

Project Report	**Power Point Presentation & Viva**
75 marks	25 marks

SEMESTER-IV

SOCIAL EXCLUSION: THEORY AND PRACTICE

Course Code: POL4401 **Credit Units: 05**

Course Objective: Social exclusion is a process that deprives individuals as well as groups from their due share in an unequal social order. Social categories of exclusion have become heterogeneous over the years. No longer are class and caste the only social cleavages. Issues like religion, gender, alternative sexuality have occupied an important space in the debates on exclusion.

Course Outcome:
CO1: In these circumstances it becomes imperative to study, understand and explain social exclusion in its various dimensions.
CO2: No linear understanding will do justice to the process of explaining exclusion. What is required is an understanding of the intersection of various social categories and their interdependence on each other.
CO3: The purpose of introducing this paper to students is to familiarize them with the concept of social exclusion having dimensions ranging from the social to the political, economic and cultural. This paper would also look critically at the exclusion located of time and space.

	Bloom's level	**Credit hours**
Module-I: Social Exclusion: Theoretical Premises	**1**	**10**
a. Origin, Concept, Dimensions		
b. Theories, Debates		
c. Issues and Challenges		
Module-II: Dimensions of Social Exclusion in India	**2**	**20**
d. Socio- Cultural		
e. Political

DISSERTATION

Course Code: POL4437 **Credit Units: 03**

Course Objective:
The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree. The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks
Chapter 2: Conceptual or Theoretical Framework – 25 marks
Chapter 3: Presentation, Analysis & Findings -- 25 marks
Chapter 4: Conclusions -- 10 marks
Chapter 5: Bibliography-- 5marks

The Components of a Dissertation
A Dissertation should have the following components:

1) Cover Page: This should contain the title of the dissertation, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the work and name of the University.

2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.

3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.

4) Body of the Report: The body of the report should have these four logical divisions

a)*Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.

b)*Conceptual Framework*: (relating to the topic of the Dissertation).

c) *Presentation of Data,Analysis and Findings*:(using the tools and techniques mentioned in the methodology).

d)*Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

5) Bibliography or References: This section will include the list of books and articles which have been used in the work, and in writing the report.

6) Annexures: Questionnaires (if any), relevant reports, etc.

(The main text of the Dissertation should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

Steps of the Dissertation Work

Step I: Selection of the topic should be made keeping the following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

Step II: Finalisation of the Topic and preparation of Dissertation Proposal in consultation with the Supervisor.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Step III: Collection of information and data relating to the topic and analysis of the same.
Step IV: Writing the dissertation dividing it into suitable chapters, viz.,

Chapter 1: Introduction,
Chapter 2: Conceptual and Theoretical Framework
Chapter 3: Analysis & Findings
Chapter 4: Conclusions

Step V: The following documents are to be attached with the Dissertation:

1) Approval letter from the supervisor (Annexure-IA)
2) Student's declaration (Annexure-IB)
3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Dissertation Work in any Organisation / Institution.
Annexures,
References / Bibliography

Guidelines for evaluation:

- Each of the students has to undertake a topic individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Dissertation and Viva-Voce Examination has to be English. The Dissertation must be typed and hard bound.
- Failure to submit the Dissertation or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Dissertation and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Dissertation unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Dissertation.
- Evaluation of the Dissertation to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Dissertation separately, obtaining a minimum marks of 40 (Dissertation and Viva-Voce taken together) in paper 3.5.
- Marking Scheme for Dissertation and Viva-Voce Examination:

Dissertation	Power Point Presentation & Viva
75 marks	25 marks

RESEARCH METHODOLOGY

Course Code: POL4402 **Credit Units: 03**

Course Objective: Research methodology is a way to systematically solve the research problem. It may be understood as a science of studying how research is done scientifically. In it we study the various steps that are generally adopted by a researcher in studying his research problem along with the logic behind them. It is necessary for the researcher to know not only the research methods/techniques but also the methodology.

Course Outcome:
CO1:Understand some basic concepts of research and its methodologies
CO2: Identify appropriate research topics
CO3:Select and define appropriate research problem and parameters
CO4:Prepare a project proposal (to undertake a project)
CO5: Organize and conduct research (advanced project) in a more appropriate manner

Module-I: Introduction to Research:	**Bloom's level**	**Credit hours**
a) What is Research b) Research Concepts c) Research Ethics and Integrity d) Types of Research-Observational, Correlational and Experimental e) Debate around Methods in Social Science	2	10
Module-II: The Scientific Method and Political Science	**3**	**10**
a) How Scientific is Political Science? b) Philosophy of Social Sciences c) Thomas Kuhn &ImreLakatos d) Theory and Hypothesis		
Module-III: Quantitative/Empirical Methods	**2**	**20**
a) Designing Quantitative Research b) Introduction to Statistics c) Descriptive & Inferential Statistics d) Scales of Measurement e) Sampling Methods f) Game theory g) Social Choice		
Module-IV: Qualitative/Interpretive Methods	3	15
a) Designing Qualitative Research b) Interviews c) Participant/Direct Observation d) Ethnography e) Case Studies f) Focus Groups g) Historiography h) Archival Research i) Content Analysis j) Discourse Analysis and Reading Texts k) Hermeneutics l) Phenomenology		
Module-V: Mixed Methods	**1**	**5**

STATE AND SOCIETY IN US

Course Code: POL4403 **Credit Units: 05**

Course Objective: The US is the world's oldest democracy and has provided to a greater or lesser extent a model of emulation and learning for later democracies including India. Given that the US is and will remain for some time the world's single most dominant power, it is important to study its state and the social institutions that have shaped its political trajectory which is what this course seeks to do.

Course Outcome:
To understand the basic concepts in US and their fundamental theoretical interrelations, such that students will be able to define, give examples, show interrelationships, and demonstrate the relevance of the following:

CO1:Culture and social change in US
CO2: Socialization and Startification in US
CO3: Social Structure in US
CO4: Political Institutions in US
CO5: Social differentiation by race/ethnicity, gender, sexuality, age, and class.

	Bloom's Level	**Credit Hours**
Module-I: American Political tradition	**2**	**10**
a. Nature		
b. Stages of Evolution.		
Module-II: Ideological and socio-economic Foundations of the US policy	**1**	**10**
c. Ideas		
d. Socio-economic determinants.		
Module-III: Institutional framework	**1**	**10**
e. Structure and Dynamics		
f. Trends in Institutional Functioning		
Module-IV: Nature of the federal polity	**2**	**10**
g. Issues		
h. Debates		
Module-V: Character of the party system	**2**	**20**
i. Ideological and Regional dimensions		
j. Relationship with Interest Groups		
k. Role in Presidential and Congressional elections

RELIGION, REFORM AND RELIGIOUS NATIONALISM

Course Code: POL4404 **Credit Units: 05**

Course Objective: The paper will examine the ways in which religion has been imbricated in movements of reform and nationalism. It will study new areas and modes of religious thought. Individual thinkers will be seen as points of anchorage to explore more general issues. The list of suggested readings is designed to generate critical thought about the large issues and not to limit the paper to the study of discrete thinkers alone.

Course outcome

CO1: Identify some common characteristics of religious and social reform movement;

CO2: Explain the role played by Raja Rammohan Roy and his Brahmo Samaj in bringing about religious reforms;

CO3: Recognise the Prarthana Samaj as an institution that worked for religious as well as social reform;

CO4:Explain the ideology of Bankim Chatterjee, Vivekananda and Savarkar. the and its contributors to social and religious reforms;

	Blooms level	**Credit hours**

STATE AND POLITICS IN INDIA

Course Code: POL4405 **Credit Units: 05**

Course Objective: Politics in each state has its own internal dynamics, and it is different from others, multifacetdly. It has undergone significant transformation over the decades since the formation of states in terms of social structure, their power relations, electoral participation on the one hand and political governance and economic development on the other. This course attempts to examine the commonalities, diversities and perspectives to study state politics in India. It also seeks to examine the changing role of caste, class and community and their impact on state politics, particularly in the context of global market economy.

Course outcome

CO1: The study of the Indian political system is a window to understanding politics in society. The course will present you about the way Indian political system has been working and the way it shapes institutions in India.

CO2: This course is not about legal provisions and technical details of in Indian constitution. It is about how institutions are shaped through interaction with actual politics. CO3: The course will introduce you to the idea of political system and the account of the making and working of constitutional institutions.

CO4: This course responds to the curiosity about why a particular arrangement in the constitution was adopted and why not some other, how the institutions grow in the company of actual politics**.**

COLLABORATIVE GOVERNANCE

Course Code: POL4406 **Credit Units: 05**

Course Objective: In the context of the growing popularity of governance as a new paradigm of public administration, collaborative governance has gained salience in contemporary discourse. The objective of this course is to acquaint the students with the basic idea of what constitutes collaborative governance and its complex manifestation in various parts of the globe. Conceptually, this is not a new design because public administration is itself a collaborative endeavour; what is apparently new is the package in which it has been presented as part of the wider governance of both public and private institutions. India is a unique case study since despite being appreciative of collaborative governance, Indian administration continues remain committed to some of the fundamental precepts of Weberian hierarchical bureaucracy in which collaboration seems to be an anathema. The course will thus be a footstep towards understanding the connect between bureaucracy and other institutions in a context when governance needs collaboration for being effective.

Course outcome:

CO1: Provides students with a foundation in collaborative governance:

CO2: The underlying theories that support it; how it is practiced in various policy arenas; and the recent findings from research to improve its use.

CO3: Students will critique the use of collaborative governance in different case studies; apply principles of practice to simulated contexts,

CO4Develop alternative collaborative approaches to hypothetical or contemporary governance challenges.

	Bloom's Level	**Credit hours**
Module-I: Collaborative government: Meanings, Dimensions, Drivers and Outcomes	2	20

ENVIRONMENTAL POLICIES & POLITICS

Course Code: POL4407 **Credit Units: 05**

Course Objective: The course will equip the students with theoretical perspectives of understanding of the challenges posed by nature from a developing country and livelihoods perspective. It will also equip them to understand the emerging political and policy issues related to the environment as well as various social and economic dimensions due to environmental degradation.

Course Outcome

Environmental Politics & Policy" explores the workings of environmental policymaking in the India

CO1: Students will be able to know what are the big issues facing environmental policy

CO2: How did we end up with the policies we have today?

CO3: Why does it take a crisis to move environmental policy forward?

CO4: Why do political factors - economic interests, social and political values, bureaucratic styles, ideologies, elections, etc. - always seem to overwhelm sound scientific and engineering judgment in determining policy outcomes?

CO5: Case studies ranging from cleaning up toxic waste pollution to endangered species protection probe the clashes between science and politics at local, state, and central levels.

	Bloom's Level	**Credit Hours**
Module-I: Environmental Philosophies, Politics and Ethics	1	10
Module-II: Environment, Institutions and Governance: State, Market, Community & Local Governments:	2	20
a. State: Hardin and the Tragedy of the Commons

DFRE2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description
This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives
The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes
On completion of this course, the students will be able to
CO1. Define criteria of good research, steps in research process, and data collection.
CO2. Identify different types of sampling and its purpose.
CO3. Conduct hypothesis testing for different types of samples and interpret the results.
CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Content :

Module	Topic	**Blooms level***	Hours
1	**Research Methodology** Understanding the research process: From research questions to conclusions	L1, L2	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

	Types of research: Qualitative and quantitative research Exploratory, descriptive, experimental, and correlational studies Scientific Thinking: Subjective Vs. Objective Thinking Logical Reasoning: Inductive Vs. Deductive Reasoning Formulating research hypotheses and objectives Purpose of a good research, Criteria of good research		
2	**Descriptive Statistics** Data, Types of Data, Methods of data collection, Benefits and drawbacks, Graphical representation of data and interpretation. Measures of Central Tendency: Arithmetic Mean, Median, Mode, Measures of Dispersion: Range, Standard Deviation, Variance, Coefficient of Variation.	L1, L2, L3	15
3	**Inferential Statistics** Sampling: Basic concepts, Process of Sampling, Sample Size, Types of Samples, Sampling and non- sampling errors, Statistics and Parameters, Sampling Distribution of Means and Proportion, **Hypothesis Testing**, steps in testing of hypothesis, errors in hypothesis testing, z test and t test.	L1, L2, L3	15
4	**Research Ethics** Plagiarism, Fabrication, Falsification, Ethics with respect to human and Animal Research	L1, L2	5
5	**Communication** Characteristics of a good Research paper, Systematics Literature Review (choosing a topic, preparing outline, gathering authentic & appropriate references, avoiding plagiarism, use of reference management systems), Writing a good literature review, Structure of report (Introduction, Methodology, Analysis, Results, Discussions, Conclusions, Recommendations), Writing Quality Research Paper, Publishing Research Work in Quality Journals, Reference Management Software	L1, L2, L3	15

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination

Components	A	CT	Sessional Exam	End Term Examination
Weightage (%)	5	10	15	70

Project based assignment: Student teams (2-3 students per team) will write a literature review on a topic of choice, in consultation with the teacher.

SEMESTER-VIII

INTRODUCTION TO MEDIA STUDIES

Course Code: DFRE2801 **Credit Units: 04**

Course Objectives:

- To introduce students to different types of media in France viz. print media,audio-visual media, and social media.
- To acquaint students with basic theory and tools of media analysis to enable themto understand and analyze different forms of media in a holistic perspective.
- To empower them to analyze different facets of media and incorporate them in theirunderstanding of role of media in daily life.

Course Content:

Module 1 : L'introduction aux médias en France.
Apprendre à propos de différents types de médias qui existent en France aujourd'hui.

Module 2 : La presse écrite en France
Apprendre et discuter les différents types de presse écrite en France, par exemple, lesjournaux quotidiens, les magazines, les hebdomadaires etc.

Module 3 : Les médias audiovisuels
La typologie des médias audio-visuels comme la télé et la radio. Apprendre à distinguer lamodalité de leur fonctionnement et analyser leur enjeu dans la vie quotidienne.

Module 4 : Les nouveaux-médias et les réseaux sociaux
Comprendre les différents types de nouveaux-médias et de réseaux sociaux. Apprendre à appréhender et analyser leur fonctionnement et impact dans la vie quotidienne de nos jours.
Critique/ appréciation des films

Examination Scheme:

Components	CT	Att.	C	P
Weightage (%)	40	5	30	25

*****There is no end-term examination. There is continuous assessment.

THEORY & CRITICISM

Course code: DFRE2802 **Credit Units: 04**

Course Objectives:
Study of the major theoretical and critical approaches to literature and culture. The student will become familiar with the different literary and cultural theoretical approaches. The student will be trained in the theoretical tools of analysis. By the end of this course, the students will be able to

- Remember critical thinkers or philosophers.
- Understand the significance of major critical theories.
- Analyze the themes and structure of major critical works.
- Evaluate a literary work using a theoretical framework.

Course Content:

Module 1: Structuralism

1. The Scope of Structuralists,
2. What Structuralist Critics do
3. Post-structuralism and Deconstruction

Module 2: Feminist and Marxist Criticism

1. Feminist Criticism
2. Marxist Criticism

Module 3: Post-Modernism and Psychoanalytic Criticism

1. Post Modernism
2. Psychoanalytic Criticism

Module 4: Post-Colonial Criticism

1. New Historicism and Cultural Materialism
2. Post Colonial Criticism
3. Ecocriticism

Examination Scheme :

CULTURAL HISTORY OF FRANCOPHONE COUNTRIES

Course Code: DFRE2803 **Credit Units : 04**

Course Objectives:

- To understand colonial history of France and its overseas expansion from its foundations to the present day and to understand the links as to why French languageis spoken across the world.
- To understand the impacts of French language and culture on native populations andvice-versa.
- To understand post-colonialism.

Course Contents:

Module 1 – Understanding how the French language spread out in the world
This module explores the historical context and factors that contributed to the global dissemination of the French language. It covers the spread of French through colonization, diplomacy, trade, and cultural exchanges, examining how the language extended its influencein various regions.

Module 2 – Knowing the situation of the French language in Africa
Focusing on Africa, this module delves into the impact of colonial history and the role of French in the diverse linguistic landscape of African countries.

Module 3 – The presence of the French language in Asia & North America
This module broadens the scope to explore the presence and evolution of the French languagein both Asia and North America.

Module 4 – Decolonization
Focusing on the aftermath of the World Wars, this module studies the decolonization processes, the liberation movements, and the after-effects of colonial legacy.

Examination Scheme:

TRANSLATION: THEORY & PRACTICE-2

Course Code: DFRE2804 **Credit Units: 04**

Course Objectives:

- To familiarize students with the different theoretical approaches to Translation Studies
- To train students in the practical aspects of translation of different types of texts.

Course Contents:

Module 1
Technical translation and Literary translation
Types of Translation according to Roman Jakobson (illustrating the subject matter translationstudies)

Module 2
Translation of specific text types (French/English, English/French) and some theoreticalapproaches.

Module 3
Text (source text, target text, texts in print/audio/video, texts through words and images), analysis of text (identifying difficulties in text-unknown words, technical terms, expression specific to the context, deciphering meaning, finding equivalent terms/expressions in Target language etc), practice translating texts, phenomenon of untranslatability and skewed translation

DFRE2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization; Introduction to statistical inference and various univariate tests by using SPSS; Analysis of Variance (One Way ANOVA, Two Way	L1, L2, L3, L4	20 hours

Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

	ANOVA and ANCOVA); Correlation, Simple and Multiple linear Regression Analysis; Principal Component Analysis and Factor Analysis		
2	**Module-2: VOS Viewer** **Web of Science, Scopus, Dimensions, Lens, and PubMed.** Co-authorship networks, citation-based networks, and co-occurrence networks can be created based on data downloaded from Web of Science, Scopus, Dimensions, and Lens. Co-authorship networks and co-occurrence networks can also be created based on PubMed data. **Crossref, Europe PMC, and OpenAlex**. Networks can also be created based on data retrieved through the APIs of Crossref, Europe PMC, and OpenAlex, These APIs can be queried interactively in VOS viewer. **Semantic Scholar, Open Citations, and Wiki Data.** For a given set of DOIs, networks can also be created based on data retrieved through the APIs of Semantic Scholar, Open Citations and Wiki Data.	L1, L2, L3, L4	10 Hours
3	**Faculty of Management Studies & Behavioural Sciences** **Module 3: Domain Specific Software** **- Structural Equation Modelling** **Smart PLS** Introduction to Structural Equation Modelling (SEM), Introduction to the software's AMOS and SPSS, SMART PLS, Testing of Statistical assumptions, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), common method bias (CMB) test, Measurement Model Assessment, Discussing Fit Indices, Reliability and Validity Testing, Structural Model Assessment identifying multivariate outlier, Construct Validity: Convergent and Discriminant Validity, Measurement Model & Structural Equation Modelling, Mediation and Moderation Effects, Multi-Group Analysis.	L1, L2, L3, L4	30 Hours
	Faculty of Arts **N Vivo** 1. Import text, audio, video, emails, images, spreadsheets, online surveys, web content, and social media from various sources into a simple, intuitive interface. 2. Create and NVivo project, import and organise qualitative and quantitative data 3.Manage a literature review in NVivo 4. Autocode structured data deductively and identify themes inductively 5. Generate and falsify hypotheses 6. Combine data in sets for analysis 7. Seek patterns and identify relationships across codes and cases 8. Present findings using visualisations 9. Export data out of NVivo 10. Coordinate teamwork.

SEMESTER-I

WRITTEN EXPRESSION-1

Course Code: DGER2151 **Credit Units: 04**

Course Objectives:
To furnish the linguistic tools

- to introduce oneself and others, to ask and give personal information.
- to describe ones family and surroundings
- to name and count things and to talk about likes and dislikes.
- to describe ones house and give opinions
- to tell time and date and to talk about daily routine and activities.
- to talk about leisure time and hobbies
- to talk about events in the past
- to describe professions
- to talk about weather
- to ask directions and advices, to ask for help

Course Contents:
Lektion 1 : Guten Tag. Mein Name ist…
Themen
Jemanden begrüßen, sich verabschieden, nach dem namen fragen, sich und andere vorstellen, Heimatland erfragen und nennen, über Sprachkenntnisse sprechen, Alphabet, Telefongespräch : nach jemandem fragen, Visitenkarten lesen, Formular ausfüllen.

Lektion 2 : Meine Familie
Themen
Nach dem Befinden fragen, Befinden ausdrücken, Familienmitglieder vorstellen, den wohnort nennen, zählen, Fragen zur eigenen person, einfache informationen verstehen

Lektion 3 : Essen und Trinken
Themen
Nach einem Wort fragen, Vermutungen äußern, Mengen benennen, Einkaufszettel schreiben, Preise und mengenangaben nennen und verstehen, einen Prospekt verstehen, Gespräche beim Essen verstehen, über das Lieblingsessen berichten, ein einfaches Rezept lesen

Lektion 4 : Meine Wohnung
Themen
Zimmer benennen, Häser uand Wohnungen beschreiben, Möbelstücke, elektrogeräte und Farben benennen, Gefallen und Missfallen ausdrücken, bis eine Million zählen, Wohnungsanzeigen relevante Informationen entnehmen, einen Text über Möbel lesen, Möbel beschreiben

Lektion 5 : Mein Tag
Themen
Über Aktivitäten und Vorlieben sprechen, nach der Uhrzeit fragen und die Uhrzeit angeben, Wochentage benennen, über die eigene Woche sprechen, Angaben zur tageszeit verstehn und machen, über den Tagesablauf berichten, Schilder/Telefonansagen : öffnungszeiten verstehen, eine Internetseite verstehen

Lektion 6 : Freizeit
Themen

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Den Wetterbericht verstehen, nach dem Wetter fragen und darüber sprechen, einfache Gespräche am Imbiss führen, zustimmen, verneinen, über Freizeit aktivitäten sprechen, einen Personenporträt verstehen, eine Reisebrochüre vertsehen, Interviews über Hobbys verstehen

Lektion 7 : Lernen- ein Leben lang
Themen
Möglichkeiten und Fähigkeiten ausdrücken, Absichten ausdrücken, seinen willen äußern, von Ereignissen und Tagesabläufen in der Vergagenheit berichten, über Aktivitäten in der Vergangenheit erzählen, Häufigkeit ausdrücken, Tipps fürs Sprachenlernen, Wichtigkeit ausdrücken

Grammatik :

- W-Frage
- Personalpronomen
- Verbkonjugation
- Posessivartikel
- Indefiniter Artikel
- Plural
- Ja-/nein Fragen
- Nullartikel
- Definiterartikel
- Lokale adverbien : hier, dort
- Prädikatives Adjektiv
- Negation
- Trennbare Verben
- Präposition
- Akkusativ
- Modalverb
- Perfekt mit haben und sein

Evaluation Pattern:

ORAL EXPRESSION-1

Course Code: DGER2101 **Credit Units: 02**

Course Objectives:
To provide the students with the know-how

- to understand the German phonetic system
- to develop strategies of listening comprehension
- to pass from written to oral, from oral to written easily
- to be sensitized to nuances of speech, dialectical variations.
- to overcome the fear of speaking a foreign language and take position as a foreigner speaking German.

Course Content:
Listening exercises and speaking tasks (imagining dialogues, role plays, telephone conversations) of:

- Niebisch, Daniele, Specht, Franz et al. (2016): Schritte international Neu 1, Niveau A1/1, Deutsch als Fremdsprache, Kursbuch und Arbeitsbuch, 1. Auflage, München: Hueber Verlag

INTRODUCTION TO GERMAN HISTORY AND CULTURE

Course Code: DGER2102 **Credit Units: 02**

Course objectives:

- This course is designed to give students an overview of the history of Germany. It gives an insight into the various historical and political developments of Germany.
- The course will highlight how the current Germany came into existence.

Course Content: Material compiled by the department.

Module I

Introduction (1500-1648): The German Reformation, Peasant's Movement, Thirty Years War

Module II

The age of Absolutism and Industrialization (1648-1918): Rise of Prussia, Religion, Culture and Enlightenment, The impact of the French Revolution, The revolution of 1848, Unification of Germany, Germany under Bismarck, First World War

Module III

Democracy and Dictatorship (1918-1945): Weimar Republic, Collapse of Weimar democracy, Second world war, The consolidation of Hitler's Power, Holocaust, resistance and defeat

Module IV

The two Germanies (1945-1990): The creation of two Germanies, Politics, economy and society in West Germany, Politics, economy and society in East Germany, The revolution of 1989 and the Unification of Germany

Evaluation Pattern :

Components	CT	Att.	H	EE
Weightage (%)	20	5	5	70

SEMESTER-II

WRITTEN EXPRESSION-2

Course Code: DGER2251 **Credit Units: 04**

Course Objectives:

- to name body parts and describe appearances
- to give advices and instructions
- to describe modes of transports
- to ask directions and understand itinerary
- to convey information in written and verbally
- to describe clothes and express
- to express preferences and choice
- to narrate events and to congratulate in written and verbally
- to accept and refuse invitations

Course Contents:

Lektion 8: Beruf und Arbeit

Themen

Berufe bennenen und erfragen, üer die berufliche Situation sprechen, private und berufliche Informationen über Vergangenheit und gegenwart austauschen, von Ereignissen und Aktivitäten in der Vergangenheit berichten, Anziegen verstehen, Telefongespräch: Informationen zu einer Praktikumstelle erfragen.

Lektion 9: Unterwegs

Themen

Abläufe im Alltag erklären, Aufforderungen verstehen und Anweisungen geben, üer Erlaubtes und verbotenes sprechen, eine Informationsbroschüre verstehen, Angebote verstehen, ein Buchungsformular ausfüllen, Gespräche an der Hotelrezeption verstehen

Lektion 10: Gesundheit and Krankheit

Themen

Körperteile bennenen, über das Befinden sprechen, Anweisungen und Ratschläge verstehen und geben, Anzeigen verstehen, eine Anfrage schreiben, Telefongespräche zu Terminvereinbarungen verstehen, eine Termin vereinbaren, ändern oder absagen.

Lektion 11: In der Stadt unterwegs

Themen

Nach dem Weg fragen und den Weg beschreiben, Verkehrsmittel benennen, Ortsangaben machen, Orte und Richtungen angeben, Durschsagen verstehen, am Schalter: um Auskunft bitten, Fahrplänen Informationen entnemen

Lektion 12: Kundenservice

Themen

Zeitangaben verstehen und machen, Tagesabläufe beschreiben, zeitliche Bezüge nennen, um Serviceleistungen bitten, höfliche Bitten und Aufförderungen ausdrücken, Mailboxnachrichten verstehen und formulieren, Service-Anzeigen verstehen, Telefongespräch: Reparaturservice

Lektion 13 : Neue Kleider

Themen

Kleidungsstücke benennen, Gefallen/Missfallen ausdrücken, Vorlieben und Bewertungen ausdrücken, vorlieben erfragen, eine Auswahl treffen, um Hilfe/Rat bitten

Manesar Gurgaon-122413

Angebote eines Bahnunternehmens verstehen, ein Problem beschreiben und sich beraten lassen, Informationen zu Vereinen in deutschsprachigen Ländern verstehen, über persönliches Engagement sprechen, über Vorbilder sprechen, über Gewissensfragen sprechen und einen Standpunkt vertreten

Lektion 13: Auf Politik und Geschichte
Themen:
Über Biografien sprechen, etwas bewerten und vergleichen, seine Meinung sagen, Verbesserungsvorschläge machen, Zeitungsmeldungen verstehen und Zusammenfassen, deutsche Geschichte nach 1945 verstehen, die Geschichte eines Landes präsentieren

Lektion 14: Alte und neue Heimat
Themen:
über regionale Spezialitäten sprechen, ein Fest planen, eine Reportage zum Thema verstehen, über Heimat sprechen, über Europa und die Europäische Union sprechen, über den eigenen Deutschlernweg sprechen, über Pläne und die Zukunft sprechen

Grammatik:

- Konjunktion (falls, während, nachdem, bevor, als-ob, je-desto, sowohl-als auch, weder-noch, da, seit, seitdem, bis, indem, ohne dass, ohne zu)
- Relativsatz mit Präpositionen
- Adjektiv als Nomen
- Relativsatz mit wo und was
- Partizip Präsens als Adjektiv
- Futur I
- Präposition außer + Dativ
- Passiv Perfekt
- Passiv Präteritum
- Adjektivdeklination mit Komparativ und Superlativ

BUSINESS GERMAN

Course Code: DGER2601 **Credit Units: 4**

Course Objective:
The Program's objective is to familiarize students with the current terminology used in German business contexts and building an extensive active and passive Business German vocabulary.

Course Content: Unternehmen Deutsch (Course Book) and the material compiled by the Department.

Module I
Herzlich Willkommen:
Gäste, Besucher begrűßen, sich vom Gastgeber verabschieden, Wűnsche , Bitten im Hotel vortragen, Besuchs und Besichtigungprogramme planen, sich nach Veranstaltung erkűndigen Speisen und Getränke empfehlen und bestellen.

Rund um die Firma
Űber Branchen und Produkte sprechen, Wirtschaftbereiche benennen, Schaubilder und Diagramme beschreiben, Unternehmenstrukturen erläutern, die Geschichte einer Firma darstellen, ein Unternehmen vorstellen.

Am Arbeitsplatz
Abteilung im Betrieb und ihre Aufgaben darstellen, Betieblicher Arbeit, neue Mitarbeiter vorstellen,űber Krankenheiten,Schmerzen und Beschwerden sprechen,Fragen beim Arzt beantworten, Krankversicherungssysteme vergleichen.

Von Haus zu Haus mit…
Planen und organisieren, auf Aufträge erteilen und reagieren, passende Mittel in der Geschäftkommunikation wählen.

Das perfekte Mietsystem
Abläufe beschreiben: Was wird von wem gemacht? űber Vereinbarung und Verpflichtung informieren, Ursachen fűr Störungen im geschäftlichen Ablauf ermitteln, Verschiedene Zahlungsweisen unterscheiden und benutzen.

Grammatik
- Reflexivpronomen und Verben
- Genitiv-Atribut
- Possessivartikel
- Verben mit Präposition
- Satzbau: Dativ-und Akkusativ
- Adjektivendung
- Relativsatz und pronomen
- KII-Gegenwart und Vergangenheit: wűrde+Infinitiv, hätte/ware+Partizip
- Passiv
- Indirekte Fragen mit Ob und dass Sätze

SPECIALISED STUDY OF AN AUTHOR- GEORG BÜCHNER

Course Code: DGER2602 **Credit Units: 04**

Course Objective:

- To enable students to do a detailed study of a literary work- *„Woyzeck''* **von Georg Büchner**
- To understand a work in relation to the author and in relation to the other works of the author
- To provide a broad perspective of the thoughts and philosophy of the period, of the contemporary works

Course Contents:

Module 1

Studie des Drama**„Woyzeck'' von Karl Georg Büchner**

Module 2

Der Autor, Biographie, literarische Werke

Module 3

Die Zeitwende, zeitgenössische Autoren und Ihre Werke

Module 4

Schreibstil des Autors (dramatische Technik der szenischen Darstellung und Episierung)

Evaluation Pattern:

INTRODUCTION TO TRANSLATION

Course Code: DGER2603 **Credit Units: 04**

Course Objective:
To introduce to students

- basic concepts and theory of translation
- methods and procedures

Course Contents:

Module I
What is translation, the concept of source text and target text, the concept of original audience and target audience, text internal and text external factors, types of dictionaries and references, using parallel text and background text.

Module II
Introduction to methodology and theories of translation, equivalence and adequacy in translation, skopus theory, about various pioneers of translation and their theories.

Module III
Grammatical and lexical aspects of translation, stylistic variations in language, various text types.

Evaluation Pattern:

SEMESTER-VII

WOMEN'S WRITING IN GERMAN SPEAKING COUNTRIES

Course Code: DGER2701 **Credit Units: 04**

Course Objectives:

The course will focus on a selection of texts by women writers, locating and analyzing major trends, issues, themes and debates in the light of various critical perspectives formulated by the gender studies.

Course Learning Outcomes

- The student will develop an understanding of women writers and major trends
- The student will become familiar with the works of major women writers
- The student will be able to analyze the literary texts in the light of various perspectives of gender theory.

INTRODUCTION TO FILM & MEDIA STUDIES

Course Code: DGER2702 **Credit Units: 04**

Course Objectives:
The course will introduce the representational and communicative practices developed in different forms of the media, i.e.cinema/electronic and print media.

Course Learning Outcomes

- The student will develop an understanding of the evolution of the various forms of the media
- The student will become familiar with the print media practices.
- The student will become familiar with the electronic media and cinema.

STUDY OF A GENRE (SHORTER NARRATIVE FORMS)

Course Code: DGER2704 **Credit Units: 04**

Course Objectives:

Study of various shorter narrative forms such as Novelle, Erzählung, Kurzgeschichte, Märchen, Fabel, Sage, etc

Course Learning Outcomes

1. Provides knowledge about the various shorter narrative forms.
2. Develops knowledge about the leading writers of these forms and their specificity.

Gives an overview of the evolution of these genres across various centuries up to the contemporary period

Suggested authors:

Goethe, the Grimm Brothers, HeinrichvonKleist, GottfriedKeller, TheodorStorm, FranzKafka, post war and contemporary writers.

DGER2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Content :

Module	Topic	**Blooms level***	Hours
1	**Research Methodology** Understanding the research process: From research questions to conclusions	L1, L2	10

DGER2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization;	L1, L2, L3, L4	20 hours

	Introduction to statistical inference and various univariate tests by using SPSS; Analysis of Variance (One Way ANOVA, Two Way ANOVA and ANCOVA); Correlation, Simple and Multiple linear Regression Analysis; Principal Component Analysis and Factor Analysis		
2	**Module-2: VOS Viewer** **Web of Science, Scopus, Dimensions, Lens, and PubMed.** Co-authorship networks, citation-based networks, and co-occurrence networks can be created based on data downloaded from Web of Science, Scopus, Dimensions, and Lens. Co-authorship networks and co-occurrence networks can also be created based on PubMed data. **Crossref, Europe PMC, and OpenAlex**. Networks can also be created based on data retrieved through the APIs of Crossref, Europe PMC, and OpenAlex, These APIs can be queried interactively in VOS viewer. **Semantic Scholar, Open Citations, and Wiki Data.** For a given set of DOIs, networks can also be created based on data retrieved through the APIs of Semantic Scholar, Open Citations and Wiki Data.	L1, L2, L3, L4	10 Hours
3	**Faculty of Management Studies & Behavioural Sciences** **Module 3: Domain Specific Software** **- Structural Equation Modelling** **Smart PLS** Introduction to Structural Equation Modelling (SEM), Introduction to the software's AMOS and SPSS, SMART PLS, Testing of Statistical assumptions, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), common method bias (CMB) test, Measurement Model Assessment, Discussing Fit Indices, Reliability and Validity Testing, Structural Model Assessment identifying multivariate outlier, Construct Validity: Convergent and Discriminant Validity, Measurement Model & Structural Equation Modelling, Mediation and Moderation Effects, Multi-Group Analysis.	L1, L2, L3, L4	30 Hours
	Faculty of Arts **N Vivo** 1. Import text, audio, video, emails, images, spreadsheets, online surveys, web content, and social media from various sources into a simple, intuitive interface.

SEMESTER-VI

INTRODUCTION TO SPANISH LITERATURE

(Introducción a la literatura española)

Course Code: DSPA2651 **Credit Units: 04**

Course Objective:
To introduce the students to Spanish literature through extracts of texts selected from different literarygenres of various authors across the centuries

Course Content:
Novelas
Miguel de Cervantes
Benito Pérez Galdós
Camilo José Cela

Teatro
Pedro Calderón de la Barca
Fernando de RojasLope de Vega José Zorrilla
Antonio Buero Vallejo

Poesía
Luis de Góngora Francisco de Quevedo
Gustavo Adolfo Bécquer
Rosalía Castro

INTRODUCTION TO TRANSLATION
(Introducción a la Traducción)

Course Code: DSPA2601 **Credit Units: 04**

Course Objective:
To introduce the students to

- Basic concepts and theory of translation
- Methods and procedures
- Translation of commercial correspondence, such as brochures, handouts, agreements,contracts. from Spanish to English and vice versa.

Course Contents:

Module I

What is translation, the concept of source text and target text, the concept of original audience, text internal and text external factors, types of dictionaries and references, using parallel text and background text.

Module II

Introduction to methodology and theories of translation, equivalence and adequacy in translation, Skopos theory, about various pioneers of translation and their theories.

Module III

Grammatical and lexical aspects of translation, stylistic variations in language, various text types.

Module IV

Theory and problems of Translation: Commercial, Economic, Journalistic and Technical Texts.

BUSINESS SPANISH
(español para los negocios)

Course Code: DSPA2602 **Credit Units: 04**

Course Objective:
To familiarize the students with the essentials of professional Spanish.To enable the students;

- to take an appointment
- to enquire and give information about different cities of Spain
- to talk about work habits and preferences (verbs like to want/ prefer)
- to present Spanish companies, prepare their CVs, and to face interviews

Course Contents:
Intermedio Unidad 6-9 pp. 56-95

Contenidoléxico: Unidad: 6: Lugares para trabajar, lugares para vivir

- Características de un piso
- Objetos de oficina
- Instalaciones y servicios de un hotel

Unidad 7: Agenda de trabajo

- Actividades cotidianas
- Las partes del día
- Los días de la semana
- Proponer y concertarunacita
- Rechazar una propuesta, justificarse, plantear una alternativa, expresar consejo
- Curriculum vitae

Unidad 8: Citas y reuniones

- Hábitosalimentarios
- Platostípicos
- Los ingredientes de un plato.

Unidad 9: Productos y proyectos

- Colores, materiales, tamaño de los productos.
- Estaciones del año.

Tarea Comunicativa:

- Hablar de acciones habituales y del horario.
- Expresar gustos y preferencias de trabajo
- Proponer y rechazar una cita a compañeros del trabajo o invitar a unos clientes.
- Conversación entre un camarero y dos clientes.
- Expresarobligación y consejo
- Enfrentar la entrevista de trabajo: presentar a si mismo, estudios, practicas, experiencia profesional, preparación para entrevista, simulación de entrevista.
- Describir los productos: material, color, función, precio.

SEMESTER-VII

INTRODUCTION TO SPANISH CINEMA

Course Code: DSPA2701 **Credit Units: 4**

Course Objective:

- This course will explore Spanish history and culture through different genres of film.
- To explore the main historical and cultural issues of contemporary Spain.
- To familiarize students with the main film directors of Spain (Pedro Almodovar, Guillermo,Carlos Saura, Alejandro González Iñárritu, Fernando Trueba etc.
- To have a better command of all linguistic skills, especially listening comprehension, fluencyand accuracy in their speech.
- To communicate and participate in regular discussions on diverse topics.
- To have the capacity for close analysis of visual material and comparative analysis.

Course Content:

Module 1: Historical films

- El Cid,1961
- *El Laberinto del Fauno*
- *Mujeres al borde de un ataque de nervios*
- *Todosobre mi Madre*
- ¡Ay, Carmela!
- Amores Perros
- La lengua de las mariposas
- La niña de tus ojos
- La mala educación
- El calentito

Module 2: Science fiction

- Abre los ojos
- Autómata
- Tres Días
- La piel que habito
- Eva

Module 3: Comedy

- Campeones
- Perfectos desconocidos
- Ochoapellidosvascos
- Tenemos que hablar

Module 4: Thrillers

- Los ojos de Julia
- Mirage
- El cuerpo
- Que Dios nosperdone
- Palmerasen la nieve
- Perdida

ADVANCED HISPANIC MEDIA STUDIES

Course Code: DSPA2702 **Credit Units: 4**

Course Objective:

- To facilitate students to scrutinize media and value the application of modern communication techniques.
- To equip students to comprehend essential media theory and cultural history.
- To qualify students in mastering the basic skills of reading, writing, and analyzing articles for various types of media and introduce them to the aspects of journalism that are practiced in the Hispanic world.
- To enable students to understand and become sensitive to the visuals and sounds used across media.
- To introduce students to the New Media.

Course Content:

Module 1: Introduction to Media Theories with Culture and Communication
This module will give an insight into the introduction of mass media and theories. And its relation to society, the influence of various social movements on media, and the future of media. It also focuses on the evolution and power of mass media and the importance of media in the 21st century.

Module 2: Hispanic Print Media
The module will begin with an introduction to what print media is and what are the different phases ofHispanic Journalism. It will also cover the general ethics of newspapers and familiarize learners with the different kinds of Hispanic newspapers and magazines (El País, El mundo, El Dia, La Nueva España, La Vanguardia, Clarín, El Diario, El espectador, El Mercurio, El Universal, La Nación El comercio) etc. It also acquaints students with the Spanish language of newspaper reporting.

Module 3: Audio-Visual Media
It serves as an introduction to varieties of audiovisual media and their functions in mass media. It focuses on the basic theoretical as well as practical nuances of the following themes: visual communication theory, images and understanding, creation of images and sound, society and visuals, ways of hearing and seeing, and the building in of narrative principles. Its principal aim is to introducelearners to Hispanic radio, television programs, news channels, films, etc.

Module 4: New Media
This module will enable students to learn about the New Media, its role, and the evolution of internet.

TRANSLATION: THEORY & PRACTICE-I

Course Code: DSPA2703 **Credit Units: 4**

Course Objective:

- To familiarize students with the process of translation.
- To familiarize students with different theories of translation.
- To enable students to differentiate between the process of literary and non-literary translation.
- To provide students with an understanding of translation in the field of cinema and media.

Course Content:

Module 1: Translation: Meaning and Significance
Exploration of fundamental aspects of translation as a process and its purpose and importance.

Module 2: Translation: Historical Overview
Overview of the history and development of translation as a discipline.

Module 3: Theories of Translation
Exploration of key theories of translation (e.g., functionalism and equivalence).

Module 4: Literary and Non-Literary translation
Discussion on the following and related topics with reference to the assigned texts and handouts: Challenges and techniques associated with the translation of different types of texts.
The impact of form and style in the translation of literary texts. The role of cultural context in the translation of literary texts. The concept of cultural adaptation in translation.
Accuracy and precision required in technical translations. Terminology management and specialized knowledge.

Module 5: Exploring Translation in Cinema and Media
Discussion on the following and related topics with reference to the assigned texts and handouts: Importance of translation for the audience across the globe.
Subtitling and dubbing.
Translation in media content: advertisement, online content, etc. Adaptation for different media platforms.

SPANISH SHORT NARRATIVE TRADITIONS: FROM CLASSICS TO CONTEMPORARY WORKS

Course Code: DSPA2704 **Credit Units: 4**

Course Objective:

- This course aims to introduce the students to the origin and significance of shorter narrativeforms in literature such as fable, legend, short story etc.
- To provide students insights of Hispanic literature through the short narrative texts/poems ofselect authors.
- To enable students to gain a profound cultural and historical understanding of Hispanic worldthrough select literary texts.
- To develop students critical and analytical skills in the interpretation and evaluation of literarytexts.

Course Content:

Module 1: History and evolution of narrative genres
This module will familiarize the students with the brief history and the origin of short narrativegenres.

Module 2: Medieval Narrative
Students will have an overview of medieval literary narratives: The Jarchas texts, Mester de Clerecia,Mester de Juglaria, Cantar de mio Cid, El conde Lucanoretc

Module 3: Narratives of the Golden age
This module aims to abreast learners about the select narratives of Spanish Golden Age.

Module 4: Short stories of 18th to 20th Century
This module highlights short stories to 18th-20th Century.

DSPA2739	BASICS OF RESEARCH METHODOLOGY, ETHICS, AND RESEARCH COMMUNICATION	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	NIL				
Co-requisites					

Catalog Description

This course aims to provide students with a comprehensive understanding of conducting ethical research, utilizing proper research methodologies, and effectively communicating research findings. The course includes a final project where students will write a Literature Review on a topic chosen in consultation with the teacher(s).

This course is designed to equip students with essential skills and knowledge to conduct ethical research, employ proper research methodologies, and effectively communicate scientific information (with focus on writing a literature review). The course will cover topics such as research design, data collection and analysis, research ethics, and science communication strategies. Through a combination of lectures, discussions, case studies, and practical exercises, students will develop a deeper understanding of the research process and its ethical implications.

Course Objectives

The objective of this course is to impart knowledge about various stages of research process, research ethics and different ways of research communication.

The aim of this course is to impart research skills to the beginners and help to improve the quality of research by the existing researchers. It also encompasses the understanding and application of appropriate research design, statistics, and the use of the computer for reference management, report writing, research paper writing and presentation. The course also introduces the key conceptual issues of each research method, as well as giving practical guidance. It covers the series of research methodology contents: from problem formulation, to design, to data collection, analysis, reporting and dissemination. The course has the dual aims of equipping students with conceptual understandings of current academic debates regarding different methods, and the practical skills to put those methods into practice.

Course Outcomes

On completion of this course, the students will be able to

CO1. Define criteria of good research, steps in research process, and data collection.

CO2. Identify different types of sampling and its purpose.

CO3. Conduct hypothesis testing for different types of samples and interpret the results.

CO4: Learn the importance of literature review, write research paper/thesis, use reference management software.

Course Content :

Module	Topic	**Blooms level***	Hours
1	**Research Methodology** Understanding the research process: From research questions to conclusions Types of research: Qualitative and quantitative research Exploratory, descriptive, experimental, and correlational studies Scientific Thinking: Subjective Vs. Objective Thinking Logical Reasoning: Inductive Vs. Deductive Reasoning Formulating research hypotheses and objectives Purpose of a good research, Criteria of good research	L1, L2	10

2	**Descriptive Statistics** Data, Types of Data, Methods of data collection, Benefits and drawbacks, Graphical representation of data and interpretation. Measures of Central Tendency: Arithmetic Mean, Median, Mode, Measures of Dispersion: Range, Standard Deviation, Variance, Coefficient of Variation.	L1, L2, L3	15
3	**Inferential Statistics** Sampling: Basic concepts, Process of Sampling, Sample Size, Types of Samples, Sampling and non- sampling errors, Statistics and Parameters, Sampling Distribution of Means and Proportion, **Hypothesis Testing**, steps in testing of hypothesis, errors in hypothesis testing, z test and t test.	L1, L2, L3	15
4	**Research Ethics** Plagiarism, Fabrication, Falsification, Ethics with respect to human and Animal Research	L1, L2	5
5	**Communication** Characteristics of a good Research paper, Systematics Literature Review (choosing a topic, preparing outline, gathering authentic & appropriate references, avoiding plagiarism, use of reference management systems), Writing a good literature review, Structure of report (Introduction, Methodology, Analysis, Results, Discussions, Conclusions, Recommendations), Writing Quality Research Paper, Publishing Research Work in Quality Journals, Reference Management Software	L1, L2, L3	15

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination

Components	A	CT	Sessional Exam	End Term Examination
Weightage (%)	5	10	15	70

Project based assignment: Student teams (2-3 students per team) will write a literature review on a topic of choice, in consultation with the teacher.

TRANSLATION: THEORY & PRACTICE-2

Course Code: DSPA2802 **Credit Units: 4**

Course Objective:

- To enable students to demonstrate the application of theories and protocols of translation.
- To enable students to demonstrate the role of culture in translation.
- To enable students to understand the ethical aspects of the process of translation.

Course Content:

Module 1: Analysis of Translation Theories in Practice

Discussion on the following and related topics with reference to the assigned texts and handouts.Real-world examples of the application of different translation theories
The impact of theory on translation choices.

Module 2: Practical Application of Protocols

Discussion on the following and related topics with reference to the assigned texts and handouts. Common protocols in translation (terminology management, quality assurance, revision processes).The importance of following industry standards.

Module 3: Cultural Dimensions in Translation

Discussion on the following and related topics with reference to the assigned texts and handouts.The impact of culture on translation.
Cultural sensitivity and the challenges of preserving cultural nuances.

Module 4: Ethical Considerations

Discussion on the following and related topics with reference to the assigned texts and handouts.Ethical considerations related to the application of theories and protocols.
Ethical dilemmas in translation (case study).

DSPA2839	DATA ANALYSIS & VISUALISATION USING SOFTWARE	L	T	P	C
Version 1	Date of Approval:	4	0	0	4
Pre-requisites/Exposure	Class X Mathematics				
Co-requisites					

Catalog Description

The implosion of available data has made visualization more critical but also more challenging. Data analysis and Data Visualization are essential tools for business analysis, engineers, policymakers, and decision-makers. Developed originally for "small data", visualization techniques have been met with varied success in the past centuries and decades. There are a few well-known visualizations that are very effective in capturing the essence of the data, and of course, there are many infamous negative examples of poor visuals. An effective visual is critical for decision making it, but it also requires a lot of work, customization, attention to detail, and refinements.

Course Objectives

The course is designed to help students develop skills and knowledge in the following area(s):

- Develop an understanding of what is a good visualization for a given purpose
- Learn visualization theory & techniques
- Build a substantial data analytic project
- Apply data analysis and visualization with Excel, SPSS, R, Python, NVivo and MATLAB

Course Outcomes

On completion of this course, the students will be able to

CO1. Students will be able to articulate meaningful lines of inquiry that might be explored through the collection, organization, visualization, and analysis of data in a context associated with their primary field of study using (as appropriate) numerical, textual, spatial, and/ or visual data.

CO2. Student will understand what data are, how they are collected, and how to assess the quality/ reliability of data.

CO3. Students will demonstrate intermediate proficiency in the visualization of data to communicate information and patterns that exist in the data.

CO4: Students will be able to use at beginning level of proficiency the tools of statistics and machine learning to ask questions of and explore patterns in data.

Course Content :

Module	Topics Covered	Blooms Level	Contact Hours
1	**Module-1: Introduction to Excel** Data Analysis using Excel, Curve fitting, Correlation, Linear Regression, Multiple regression, Principal Component Analysis and Factor Analysis, Hypothesis testing **Introduction to Excel and SPSS** Introduction to SPSS and Types of Data, Importing, exporting and data handling in SPSS; Exploratory data analysis using SPSS and data visualization; Introduction to statistical inference and various univariate tests by using SPSS; Analysis of Variance	L1, L2, L3, L4	20 hours

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

	(One Way ANOVA, Two Way ANOVA and ANCOVA); Correlation, Simple and Multiple linear Regression Analysis; Principal Component Analysis and Factor Analysis		
2	**Module-2: VOS Viewer** **Web of Science, Scopus, Dimensions, Lens, and PubMed.** Co-authorship networks, citation-based networks, and co-occurrence networks can be created based on data downloaded from Web of Science, Scopus, Dimensions, and Lens. Co-authorship networks and co-occurrence networks can also be created based on PubMed data. **Crossref, Europe PMC, and OpenAlex**. Networks can also be created based on data retrieved through the APIs of Crossref, Europe PMC, and OpenAlex, These APIs can be queried interactively in VOS viewer. **Semantic Scholar, Open Citations, and Wiki Data.** For a given set of DOIs, networks can also be created based on data retrieved through the APIs of Semantic Scholar, Open Citations and Wiki Data.	L1, L2, L3, L4	10 Hours
3	**Faculty of Management Studies & Behavioural Sciences** **Module 3: Domain Specific Software** **- Structural Equation Modelling** **Smart PLS** Introduction to Structural Equation Modelling (SEM), Introduction to the software's AMOS and SPSS, SMART PLS, Testing of Statistical assumptions, Exploratory Factor Analysis (EFA), Confirmatory Factor Analysis (CFA), common method bias (CMB) test, Measurement Model Assessment, Discussing Fit Indices, Reliability and Validity Testing, Structural Model Assessment identifying multivariate outlier, Construct Validity: Convergent and Discriminant Validity, Measurement Model & Structural Equation Modelling, Mediation and Moderation Effects, Multi-Group Analysis.	L1, L2, L3, L4	30 Hours
	Faculty of Arts **N Vivo** 1. Import text, audio, video, emails, images, spreadsheets, online surveys, web content, and social media from various sources into a simple, intuitive interface. 2. Create and NVivo project, import and organise qualitative and quantitative data 3.Manage a literature review in NVivo 4. Autocode structured data deductively and identify themes inductively 5. Generate and falsify hypotheses 6. Combine data in sets for analysis		

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

	7. Seek patterns and identify relationships across codes and cases 8. Present findings using visualisations 9. Export data out of NVivo 10. Coordinate teamwork.		
	Faculty of Science Engineering and Technology **Faculty of Health & Allied Sciences** **R programming / Python/ MATLAB** **R Programming-** Introduction to R, Variables and datatypes in R, Dataframes, Recasting and joining of dataframes, Arithmetic, logical and matrix operations in R, Functions in R, Control structure in R, Data visualization in R. **Python Programming-** Basics of programming, data structure and algorithm using Python, Strings, lists, control, functions, manipulating lists, loops, arrays, selection sort, insertion sort, recursion, sorting, dictionaries, exception handling, file handling, string processing, data analysis using Python **MATLAB Programming-** Introduction, basic features, managing workspace, mathematical functions, basic plotting, Matrices, array operations and linear equations, MATLAB programming- M files script, M-file functions, control flow and operations.		

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination

Components	A	CT	Sessional (Theory/ Practical)	End Term Examination
Weightage (%)	5	10	15	70

SYLLABUS - COMMUNICATION SKILLS- COURSES BEING OFFERED IN VARIOUS PROGRAMMES

SYLLABUS-UNDERGRADUATE-4 YEAR PROGRAMMES

Syllabus - First Semester

ENGLISH-I

Course Code: CSS2152 **Credit Units: 1**

Course Objective:
The course is intended to give a foundation of English Language. The literary texts are indented to help students to inculcate creative & aesthetic sensitivity and critical faculty through comprehension, appreciation and analysis of the prescribed literary texts. It will also help them to respond form different perspectives.

Course Contents:
Module I: Vocabulary
Use of Dictionary
Use of Words: Diminutives, Homonyms & Homophones

Module II: Essentials of Grammar - I
Articles
Parts of Speech
Tenses

Module III: Communication
The process and importance
Principles & benefits of Effective Communication

Module IV: Spoken English Communication
Speech Drills
Pronunciation and accent
Stress and Intonation

Module V: Short Stories
Of Studies, by Francis Bacon
Dream Children, by Charles Lamb
The Necklace, by Guy de Maupassant
A Shadow, by R.K.Narayan
Glory at Twilight, Bhabani Bhattacharya

Prof. (Dr.) Anil Kumar

ENGLISH-II

Course Code: CSS2252 **Credit Units: 1**

Course Objective:
The course is intended to give a foundation of English Language. The literary texts are indented to help students to inculcate creative & aesthetic sensitivity and critical faculty through comprehension, appreciation and analysis of the prescribed literary texts. It will also help them to respond form different perspectives.

Course Contents:

Module I: Essentials of Grammar - II
Sentence Structure
Subject -Verb agreement
Punctuation

Module II: Communication Skills-I
Developing listening skills
Developing speaking skills

Module III: Communication Skills-II
Developing Reading Skills
Developing writing Skills

Module IV: Written English communication
Progression of Thought/ideas
Structure of Paragraph
Structure of Essays

Module V: Poems

All the Worlds a Stage	Shakespeare
To Autumn	Keats
O! Captain, My Captain.	Walt Whitman
Where the Mind is Without Fear	Rabindranath Tagore
Psalm of Life	H.W. Longfellow

Examination Scheme:

Components	Written	CAF	V/P	GD/Extempore	A
Weightage	40	25	20	10	5

CAF- Communication Assessment File, **V/P**- Viva/Presentation, **GD**- Group Discussion, **A**- Attendance

Syllabus – Third Semester

EFFECTIVE LISTENING

Course Code: CSS2151 **Credit Units: 1**

Course Objective:
To develop a deep understanding of the fundamentals of communication, and to improve communication skills by appreciating the importance of listening and learning essential techniques to improve the same.

Course Contents:

Module I: Fundamentals of Communication
Role and purpose of communication: *7 C's of communication*
Barriers to effective communication
Forms of Communication: one-to-one, informal and formal

Module II: Listening Skills
The process, importance and types of listening
Effective Listening: Principles and Barriers

Module III: Enhancing Listening Skills
Paraphrasing
Summarizing
Guidelines to increase listening
Activities to enhance listening

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

CAF- Communication Assessment File, **V/P**- Viva/Presentation, **GD**- Group Discussion, **A**- Attendance

Text & References:

Syllabus – Fourth Semester

PRESENTATION SKILLS

Course Code: CSS2251 **Credit Units: 1**

Course Objective:
To develop good presentation skills by learning the essential steps for its planning and preparation, and effective use of verbal & non-verbal communication for delivering a business presentation.

Course Contents:

Module I: Social Communication Skills
Conversational English
Appropriateness
Building rapport

Module II: Context Based Speaking
In general situations
In specific professional situations
Discussion and associated vocabulary
Simulations/Role Play

Module III: Non Verbal Communication
Relevance and effective usage
Para language
Chronemics
Haptics
Proxemics
Body language
Object language

Module IV: Business Presentation
Audience Analysis
Preparing effective PowerPoint presentation
Delivering of presentation
Handling questions

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

CAF- Communication Assessment File, **V/P**- Viva/Presentation, **GD**- Group Discussion, **A**- Attendance

Syllabus - Fifth Semester

READING AND COMPREHENSION

Course Code: CSS2351 **Credit Units: 01**

Course Objective:
To facilitate development of good reading & comprehension skills by deepening vocabulary, and refining academic language proficiency

Course Contents:

Module I: Effective Reading
Process, types and reading rate adjustment
Tips for improving reading skills
Reading Comprehension

Module II: Business/Technical Language Development
Advanced Grammar: Syntax, Tenses, Voices
Advanced Vocabulary skills: Jargons, Terminology, Colloquialism

Module III: Business Communication
Reading Business/ Technical press
Researching for Business /Technology

Module IV: Activities
News reading
Picture reading
Review of a book/journal

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

CAF- Communication Assessment File, **V/P**- Viva/Presentation, **GD**- Group Discussion, **A**- Attendance

Syllabus – Sixth Semester

CORPORATE COMMUNICATION

Course Code: CSS2451 **Credit Units: 01**

Course Objective:
To develop competencies to form written communication strategies necessary in the workplace, and to execute them for effective communication

Course Contents:
Module I: Introduction to Writing Skills
Effective Writing Skills
Avoiding Common Errors
Paragraph Writing
Note Taking
Writing Assignments

Module II: Letter Writing
Types
Formats
Module III: Official Correspondence
Memo, Notice and Circulars
Agenda and Minutes
Module IV: Report Writing
Purpose and Scope of a Report
Fundamental Principles of Report Writing
Project Report Writing
Summer Internship Reports

Module V: Social Networking
Advantages
Opportunities
Making Contacts

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

CAF- Communication Assessment File, **V/P**- Viva/Presentation, **GD**- Group Discussion, **A**- Attendance

Syllabus – Seventh Semester

EMPLOYABILITY SKILLS

Course Code: CSS2551 **Credit Units: 01**

Course Objective:
To enhance employability skills of the learners by enabling them to write effective resume and face the interview with confidence.

Course Contents:
Module I
Introduction to Public Speaking
Business Conversation
Effective Public Speaking
Art of Persuasion

Module II: Interviews
Types of Interview
Styles of Interview
Facing Interviews-Fundamentals and Practice Session
Conducting Interviews- Fundamentals and Practice Session
Mock interview sessions

Module III
Resume Writing
Covering Letters
Interview Follow Up Letters

Module IV
Assessment through employability score card

Module V: Business Etiquette
Introduction
Dressing up
Exchanging Business card
Shaking hands
Dining etiquette

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

Syllabus – Eighth Semester

WORKPLACE COMMUNICATION

Course Code: CSS2651 **Credit Units: 01**

Course Objective:
The course is designed to empower students to carry out day to day communication at work place by adequate understanding of various types of communication and use of technology to facilitate efficient interpersonal communication.

Course Contents:
Module I:Dynamics of Group Discussion
Introduction,
Methodology
Role Functions
Mannerism
Guidelines

Module II: Communication through Electronic Channels
Introduction
Technology based Communication Tools
Video Conferencing
Web Conferencing
Selection of the Effective Tool
E-mails, Fax etc.

Module III: Professional Skills
Negotiations
Meetings
Email writing
Telephonic Skills

Examination Scheme:

Components	Written Test	CAF	V/P	GD/Extempore	A
Weightage (%)	40	25	20	10	5

SYLLABUS – UNDERGRADUATE- 4 YEAR NEP PROGRAMMES

Syllabus – First Semester

GENERAL BUSINESS COMMUNICATION- FOUNDATION

Course Code : AECS2101 **Credit Unit: 01**

Course Objective:
The objective of this course is to enhance LSRW (Listening, Speaking, Reading and Writing) skills of the learners.

Course Contents:

Module I: Introduction to Verbal and Non-Verbal Communication
- Understanding Importance and Usage of English and Effective Communication
- Understanding Body Language for Effective Communication

Module II: Effective LSRW Skills
- Techniques and activities to develop Listening skills
- Techniques and activities to develop Speaking skills
- Techniques and activities to develop Reading Skills
- Techniques and activities to develop Writing Skills

Module III: Sentence Formation and Common Errors in English
- Sentence Types and Functions
- Subject Verb agreement, Parallelism, run on sentence, fragment sentence
- Semantic relations: synonymy, antonymy, hyponymy, meronymy, homophones, homonyms, homographs

Module IV: Spoken English Communication
- Pronunciation of English speech sounds
- Word stress and sentence Intonation
- 25 Sentence structures (Tense, Conditionals)
- Collocations - I
- Situational dialogues

Examination Scheme:

Components	LT	ST	RT	WT	A
Weightage (%)	10	50	10	25	5

Listening Test- 30 minutes, Speaking Test-60 minutes, Reading and writing Test- 90 minutes
A- Attendance

Note: Module I, II and III will be delivered in Lecture and tutorial forms. Module IV will

Syllabus – Second Semester

GENERAL BUSINESS COMMUNICATION- INTERMEDIATE

Course Code: AECS2201 **Credit Unit: 01**

Course Objective:
The objective of this course is to enhance LSRW (Listening, Speaking, Reading and Writing) skills of the learners.

Course Contents:

Module I: Introduction to Verbal and Non-Verbal Communication
- Understanding Importance and Usage of English and Effective Communication
- Understanding Body Language for Effective Communication
- Techniques and Activities to develop LSRW Skills

Module II: Sentence Formation and Common Errors in English
- Sentence Types and Functions
- Subject Verb agreement, Parallelism, run on sentence, fragment sentence
- Semantic relations: synonymy, antonymy, hyponymy, meronymy, homophones, homonyms, homographs

Module III: Spoken English Communication
- Pronunciation of English speech sounds
- Word stress and sentence Intonation
- 25 Sentence structures (Tenses, Conditionals)
- Collocations - I
- 12 Situational dialogues

Examination Scheme:

Components	LT	ST	RT	WT	A
Weightage (%)	10	50	10	25	5

Listening Test- 30 minutes, Speaking Test-60 minutes, Reading and writing Test- 90 minutes
A- Attendance

Syllabus – Second Semester

GENERAL BUSINESS COMMUNICATION- ADVANCED

Course Code: AECS2202 **Credit Unit: 01**

Course Objective:
The objective of this course is to master professional communication for different walks of life.

Course Contents:

Module I: Personality Development
- Soft Skills
- Human Values

Module II: Mastering Speaking and Writing Skills
- Techniques and activities to develop Speaking skills
- Techniques and activities to develop Writing Skills
- Mechanics of Academic Writing
- Creative writing and Stylistics

Module III: English for Specific Purposes
- Sentence Structures (21-60)
- Situational Dialogues (10)
- Collocations - II
- Public Speaking

Examination Scheme:

Components	LT	ST	RT	WT	A
Weightage (%)	10	50	10	25	5

Listening Test- 30 minutes, Speaking Test-60 minutes, Reading and writing Test- 90 minutes
A- Attendance

Syllabus – Third Semester

WORKPLACE COMMUNICATION

Course Code : AECS2301 **Credit Unit: 01**

Course Objective:
To equip students with the skills and knowledge required to formulate written communication strategies essential in the workplace and also to empower them to proficiently implement these strategies to achieve impactful and effective communication outcomes.

Course Contents:

Module I: Essential Writing Skills
- Effective Writing Techniques
- Avoiding Common Errors
- Paragraph Writing

Syllabus – Fourth Semester

PUBLIC SPEAKING

Course Code : AECS2401 **Credit Units: 01**

Course Objective:
To provide a comprehensive exploration of the art and science of effective communication. From mastering foundational public speaking principles to adapting to diverse audiences, integrating multimedia, and employing advanced presentation techniques, participants will develop the skills needed to captivate and connect with any audience.

Course Contents:

Module I: Establish Foundational Public Speaking Competencies:
- Define and understand the importance of public speaking.
- Explore historical perspectives on public speaking.
- Develop introductory icebreaker speeches for self-introduction.

Module II: **Master Public Speaking Fundamentals**
- Understand rhetoric and its four elements.
- Identify the three purposes of public speaking.
- Explore the four contexts of public speaking.
- Introduce and apply artistic proofs: ethos, logos, pathos, and Kairos.

Module III: **Audience Analysis and Adaptation**
- Identify and analyze target audiences for effective communication.
- Adapt communication style to diverse audience needs.
- Engage in group exercises to practice audience analysis.

Module IV: **Utilize Visual Aids and Technology**
- Design effective slides and visual aids.
- Utilize presentation software (PowerPoint, Prezi).
- Integrate multimedia elements seamlessly.
- Deliver presentations with visual aids for maximum impact.

Module V: E**nhance Delivery Skills**
- Master non-verbal communication techniques (gestures, posture, eye contact).
- Improve articulation and pronunciation.
- Address and overcome speech anxiety.

Module VI: Advanced Presentation Techniques
- Adapt presentations to diverse audiences and professional contexts.
- Incorporate storytelling, analogies, and rhetorical devices.
- Integrate multimedia effectively into presentations.
- Facilitate interactive and constructive Q&A sessions.

SANSKRIT

OBJECTIVES OF THE PROGRAM

AMITY CENTRE FOR SANSKRIT AND INDIC STUDIES under the aegis of Amity School of Liberal Arts (ASLA) offers **SANSKRIT** as of the **Open Elective Courses**. This course intends to make the learners aware of the fact that Sanskrit is the gateway of the ancient Indian wisdom and is a perennial source of inspiration for national integrity and universal brotherhood.

This course aims to improve the Reading, Writing, Speaking and Listening skills in Sanskrit learners. It also aims to enable them to appreciate different forms and genres of Sanskrit literature and to become aware of the rich intellectual tradition of India.

Note: The medium of instruction and examination for the course would be Hindi, Sanskrit and English.

PERFORMING ARTS

OBJECTIVES OF PROGRAM

AMITY CENTRE FOR PERFORMING ARTS Amity School of Liberal Arts offers **Open Elective Course in PERRFORMING ARTS** . This open elective course in Performing Arts is envisioned for students who have a flair for dance/music/theatre and are looking for structured intervention at the UG level. The course hopes to give a strong platform for our students to develop a passion for the Arts, sharpen their artistic skills and broaden their theoretical base.

The course attempts to transcend the definition of art across content and context while reaching out to individuals and communities. While the focus will be predominantly within the parameters of dance, music and theatre.

The primary aim of the course is not to make students experts in one art form or the other, but introduce them to the possibilities with art and to help them get an integrated sense of art. It is desirable that every student continues to work under an artist/group in one art form or the other outside the curriculum, toward long term development.
Note : The medium of instruction and examination for the course would be Hindi and English.

Objectives:-

- To address a spectrum of art concerns
- To give a base in dance, music and theatre
- To stimulate a composite sense of art
- To foster a blend of practical and theoretical understanding and practice in the arts
- To enable identification and growth opportunities in chosen field of dance/music/theatre

Syllabus - Semester Third

STATE POLITICS IN INDIA

Course Code: POL2351 **Credit Units: 03**

Course Objectives:
The course will seek to define historical legacies and current themes in the development of politics in the states of India. It would provide the student within-depth understanding of the democratic processes in practice in various states and encourage them to understand the politics of states better. A study of politics and political processes in states also pertains to the exigencies of coalition politics at the centre.

Course Contents :

Module-I : Regions and Regionalism
Regional cultures in Indian Civilization ; States Reorganization Commission ; Integration and ethnic conflict ; Movements for state autonomy : Jharkhand and Uttarakhand

Module-II : Political Parties and Electoral Politics in the States
Congress Party in Uttar Pradesh ; BJP's expansion and coalition strategies ; Regionalization of Indian Politics ; Telugu Desam Party in Andhra Pradesh ; Changing Nature of Tamil Nadu ; Asom Gana Parishad in Assam ; Politics of the left in West Bengal

Module-III : Social Movements and Politics in the States
Decline of Backward Caste Politics in North India ; Bahujan Samaj Party and Subaltern Mobilization in Uttar Pradesh ; Ethnic Minorities in Majoritarian Indian Polity

Module-IV: Economic Reforms and Indian Politics
India's federal economy ; Globalization and State Disparities in India ; India's special economic zones : protest politics and growth patterns ; Reforms and economic growth in Indian states

Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A :** Attendence ; **P :** Presentation ; **A/TP :** Assignment/Term Paper ; **CT :** Class Test ; **EE :** External Examination)

Syllabus - Semester Fourth

POLITICS AND MEDIA

Course Code: POL2451 **Credit Units: 03**

Course Objectives:

To provide students with an overarching perspective on the various processes at play in the manner in which the media – print and visual – transform into vehicles of politics. The course will, through exploration of several case studies pertaining to various types of media, encourage the students to critically analyse media messages, both print and visual.

Course Contents :

Module-I : Theories of the mass media
Ageda Setting Theory ; Cultivation Theory ; Dependency Theory ; Hypodermic Needle Theory ; Knowledge Gap ; Media Richness Theory ; Medium Theory ; Spiral of Silence ; Two Step Flow Theory ; Uses and Gratifications Approach ; Priming ; Framing

Module-II : Print media and politics
Brief history of newspapers in India ; Growth of print media in India ; print media and Indian political parties ; democratic processes and print media

Module-III : Television news media and politics
Brief history of television media in India ; Growth of Television news media in india ; democratic politics and television media : perspectives and trends

Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

Syllabus - Semester Fifth

SOUTH ASIA: POLITICAL PERSPECTIVES

Course Code: POL2551 **Credit Units: 03**

Course Objectives:

The course would attempt to inculcate understanding of the various political processes at work in South Asia, particularly states like Pakistan, Bangladesh, Sri Lanka and Nepal. It will supplement the South Asia unit from the core paper on post-colonial states and their development after independence. This course will focus primarily on two countries in South Asia – Pakistan and Sri Lanka.

Course Contents :

Module-I : Institutions and Political Processes in South Asia
Development of post-colonial institutions ; historical development and current debates in democracy in South Asia ; role of military in post-colonial societies in South Asia

Module-II : State and Polity in Pakistan
Democracy and electoral process ; Islamization and cultural change ; the army and its role in political process ; Pakistan's foreign policy ; issues of internal security and terrorism

Module-III : State and Polity in Sri Lanka
Democratic institutions and their functioning ; role of the military ; the Tamil issue ; internal security and terrorism ; Sri Lanka's foreign policy

Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

(**A :** Attendence ; **P :** Presentation ; **A/TP :** Assignment/Term Paper ; **CT :** Class Test ; **EE :** External Examination)

Syllabus - Semester Sixth

POST-COLD WAR WORLD POLITICS

Course Code: POL2651 **Credit Units: 03**

Course Objectives:
To provide a theoretical understanding of politics as it developed in the post-Cold War scenario particularly with regard to the politics of the United States of America vis-a-vis the rest of the world, the shifting of the power blocks, and the growth of anti-American sentiment in certain parts of the world. The course would also encourage students to read contemporary literature on emerging international political scenarios.

Course Contents :

Module-I : Overview of the post-Cold War decade
Historical background of US foreign policy ; US relations with EU ; brief history of US interventions in West Asia, South East Asia and the Middle East

Module-II : Post-Cold War American Politics
Key institutional players ; lobbies and their importance in American politics ; media and public opinion in US ; America's position in a globalized economy

Module-III : America and the Arab/Muslim World
Historical development of politics of the Arab/Muslim world ; why the Arabs/Muslims hate America? US intervention and international war against terrorism

Examination Scheme

Components	A	P	A/TP	CT	EE
Weightage (%)	5	10	5	10	70

TAGORE STUDIES

PREAMBLE

Tagore Studies will be a mainly Activity, Presentation and Seminar-based **Learner-Centric** Course that will offer the option of taking it up as a Minor Discipline (all six courses for 18 Credits) or One-at-a-time Course (3 Credits) under Open Elective Choice where the participants would be able to engage themselves in

- *Making a Choice, as to which Course/Courses to opt for* (for instance, someone from Fine Arts and Aesthetics background may like to opt for 'Tagore as a Culture Icon with special reference to his Painting' or 'Tagore and Mass Media,' whereas a Literature candidate may like to go for 'Tagore as a Poet' and 'Tagore as a Fiction Writer.' Students enrolled in Mass Media and Communication may love to get connected to 'Tagore and Mass Media' as well as 'Tagore as a Fiction Writer.' Those from the History orientation may like to opt for the 'Cultural History' area under 'Tagore as a Cultural Icon' module).

- *Collaboration* within or across disciplines to create a joint appraisal/critique/text which could then be presented before the class for internal evaluation – by the faculty and remaining students together – in a peer review mode together.)

- *Communication* would be tested on the oral or ppt presentations that a participant may like to make on any aspect of Tagore in a Colloquium model where one person communicates and the others on the panel comment, agree, differ or substantiate etc where their performance is evaluated.

- *Critical thinking* with respect to the issues raised by Tagore in the areas on Religion, Societal Practices, Nation Building, or Politics (especially in ENG2652) on which a participant may like to write an end-semester Term Paper.

- *Creativity* in performing a text, or putting up a play for the larger University community, or writing a sequel to or a new text/story/poem/essay creatively – or translating Tagore into one's own language based on his English versions.

COURSE OVERVIEW

It is expected that students cutting across disciplines should be interested in ENG2152 as an Open Elective course, just as students in History would like to opt for ENG2252 as well as ENG2352. Students under Mass Media and Communication may like opting for ENG2652 module whereas the students in Literature programme may find all or at least ENG2352, ENG2452 and ENG2552 to be attractive.

TAGORE STUDIES

Syllabus - Semester First

RABINDRANATH TAGORE IN THE 21ST CENTURY

Course Code: ENG2152 **Credit Units: 03**

Theme:

The face of the world is changing, and as time passes, the changes are visible with a lot of disturbing images. But each time one feels an element of doom and despair, one's faith is rekindled to see that there are thinkers and doers like Tagore who firmly believed that ultimately the truth and beauty would prevail. It is not surprising to see Einstein sharing the same beliefs as the doyen of Indian literature, Rabindranath Tagore (1861-1941). Einstein had said: 'The ideals which have lighted my way, and time after time have given me new courage to face life cheerfully have been kindness, beauty, and truth." The progress of mankind is crucially dependent on this realization. In exchanges with Einstein, Tagore had commented: "The progress of our soul is like a perfect poem. It has an infinite idea which once realized makes all movements full of meaning and joy. But if we detach its movements from that ultimate idea, if we do not see the infinite rest and only see the infinite motion, then existence appears to us a monstrous evil, impetuously rushing towards an unending aimlessness." No amount of personal loss could make Tagore deviate from his own trajectory of working for his own country, his own times and for his own mother tongue – Bangla, or Bengali that holds together two nations, India and Bangladesh. He knew that after the dark comes light, as he said: "Clouds come floating into my life, no longer to carry rain or usher storm, but to add color to my sunset sky." Tagore's relevance today will be focused under this course.

Course Coverage:

Module-1: Contributions of Tagore and Relevance of Tagore Today

- The current economic recession and financial crises in the world, and the continuing problems of religious polarization, militarism and hostilities – Tagore's warning and predictions
- Compassionate humanism and Composite Culture in India
- Nationalism and Internationalism.
- Tagore and Education at all levels

Module-2: Tagore's works – An Introduction to the range and variety

- Number of works: A Chronological Account
- The genre of publications and the range
- Variations of the same works and the *Bichitra Variorum*

Module-3: Translation and Dissemination of Tagore's works

- Tagore's own Translations
- Authentic Translation of Tagore by others
    - Multiple Translations of Tagore

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- Other Indian Languages & Foreign Languages Translation – A brief account

Module-4: Tagore and International Personalities

- Tagore, Yeats and Rothenstein
- Tagore and Einstein
- Tagore and Romain Rolland
- Tagore and Leonard Elmhirst
- Tagore and Victoria Ocampo

Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)
Through this course, we are made aware as to why Tagore was critical of the de-humanizing economic systems, which, supported by educational methods based principally on competitions and rote-learning, fail miserably in generating creative and sensible individuals ready to think beyond the texts. Tagore's own practical project was to show the way for a modernized and less restrictive form of society that does not shun or abandon traditional values, but one that comprise networks of self sustaining groups, villages, or communities, where children and young people are encouraged to develop their natural curiosity and creativity, and to express themselves freely with body and mind. Tagore's approach to education and rural reconstruction, if implemented widely as he intended, could lead to a radical redesign of society, a turning of the world upside down. For both planners and thinkers, it is important to see the relevance of Tagore's arguments beyond his own time.

At the end of the course students will be able to: (Definitive Outcomes)
(i) Understand the text used,
(ii) Talk about the text,
(iii) Think about issues raised by Tagore through his writings,
(iv) Work with his ideas, and
(v) Raise new issues in the changing contexts to see the relevance of Tagore's messages.

Syllabus - Semester Second

TAGORE- AUTOBIOGRAPHIES AND BIOGRAPHICAL SKETCHES

Course Code: ENG2252 **Credit Units: 03**

Theme:
In this section, we shall first look into Tagore's 1912-work *Jibansmriti*, the English translation of which, *My Reminiscences*, was published by Macmillan in 1917 under Surendranath Tagore's translation. Here Tagore describes the early years of his life; his experiences of loneliness, love, and loss. Tagore's emergence as a poet could also be read about here. In this work, he introduces his family circle and describes his experience with the formal education against which he rebelled. In a published lecture, titled "My School" (*The Modern Review*, 1931), Tagore speaks of his mission to revolutionize education by rearing young minds in harmony with nature. His autobiographical texts capture a child's-eye view of a mysterious, fascinating world in which fantasy blends seamlessly with reality. In a portion, he also describes his first encounters with death, the poignancy.

Tagore's book - *Talks in China* (1925) which was largely autobiographical, contextualizing his life in relation to the broad historical trends of the time, came up after he was invited by Liang Chi-Chao, president of the University Lecture Association of Beijing in April–May 1924. This will also be touched upon.

Tagore's *Chhelebela* (*Boyhood Days*) was published in 1940, in response to a request to write something for young readers, where Tagore embarked on this delightful account of his childhood and adolescence.

When Rabindranath Tagore passed away in 1941 he left behind thousands of pages of poetry, prose, plays, essays, letters, humorous pieces, autobiographical writings, and travel literature. An astonishing number of these works remain of interest to us even today. In a letter in *Chhinnapatra* (*Torn Leaves*, 92), Tagore confesses that though poetry has been for him "a kind of secret and forbidden delight," he has also found pleasure in writing short fiction, writing "in the form of a diary or some such genre," as well as producing polemical pieces. He affirms that it is "very important to cross swords with our people on social issues," although this offers him a pleasurable dilemma: "I don't want to disappoint any of my Muses." His growing awareness of and talent for theater and performing arts, including music and dance were all discussed here.

Finally, in *Atmaparichay* (*Self-Recognition*, 1943), a collection of six introspective essays published posthumously, Tagore reveals some other aspects of himself – when he says: "It is not easy to know oneself. It is difficult to organize life's various experiences into a unified whole."

Course Coverage:
Module-1: The Childhood days – Growing up and De-schooling (1861-78)

- Prince Dwarkanath Tagore, Raja Rammohun Ray & Bankimchandra
- Debendranath Tagore and the Jorasanko Family
- Early Childhood, Loss of Mother and the influence of elder brothers
- Giving up Schooling and Self-education

Prof. (Dr.) Anil Kumar

Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module-2: Tagore and his says of the Youth – Creative Urge (1878-1889)

- Tagore's "education" in England
- Begins to write and publish poetry
- Marriage, Children and Death in the family
- In Eastern Part of Bengal and Contacts

Module-3: Tagore as an Administrator and Institution Builder (1890-1913)

- Tagore's Management of Estate and Rural reconstruction
- Moves to Santiniketan to set up a School
- Tagore as an essayist and participation in nation building
- Spurt in poetic creativity and Short Stories
- The Nobel Prize

Module-4: Tagore's Discovery of the Self (1914-1941)

- Establishment of 'Sriniketan' and the experiments
- Tagore and Gandhi relationship
- Numerous travels abroad and Belles letters
- Tagore's influence over the contemporaries
- Tagore's philosophy

Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)

There could be several reasons as to why one benefits immensely from reading biographies and autobiographies. These texts help us see where we are going and where we need to go to because they allow us to *stand on the shoulders of giant scholars and performers.* Sir Isaac Newton wrote in a letter (in 1670) to his friend Robert Hooke, "If I have seen further, it is by standing on the shoulders of giants" That is exactly what reading biographies can do for you – allow you to see further. Then, George Santayana had warned us in 1905, "Those who cannot remember the past are condemned to repeat it." Therefore, the best way of taking advantage from others is by reading about their lives. There may not be a direct lesson as you will have to discover for yourself as to what lessons are there to learn. It is therefore a way of promoting 'self-help' based on the stories and experiences of others. It is, as if, Tagore would mentor you from a distance in finding answers to your own questions in life. It is difficult to generalize but all smart people, and all great leaders read biographies. Their personal libraries are likely to have a few biography and memoir and autobiography.

At the end of the course students will be able to: (Definitive Outcomes)

(i) Learn how to write a daily journals of their own activities and make it a habit which could be of great use in future.

(ii) Learn how to jot down great ideas for use at an appropriate time.

TAGORE AS A CULTURAL ICON - TAGORE AS A PAINTER & PERFORMER

Course Code: ENG2352 **Credit Units: 03**

Theme:
This unit will take us back to look at our cultural history – particularly at the way it unfolded itself during the last few hundred years. When we were beginning to negotiate with the western world, we lacked either the will or the vision, or perhaps both, in constructing our own cultural landscape. As a civilization in India, we had the required talent, the native intuition and appropriate knowledge to create our own pathways. But while under the British rule, we failed to communicate this wisdom and originality, because we fell into the trap of believing that we must build, promote and practice a medium of expression that should be understood by our western readers or viewers. That forced us to adopt the medium of English and its styles of expression. These we then decided to introduce in our education system that would be open only to the elites and the middle class gentry. It was not at all surprising, therefore, that along with English poetry and drama, the average neo-educated Indians began to adore the life-style and culture of their British masters, including their music, taste, dress, and even sports. We had been at an interesting cross-road of history when Tagore had emerged as an indigenous Cultural Icon that could match with the best in the west. Tagore's advent came as a boon to both civil society in India and to our cultural fields. How Tagore emerged as a Cultural Icon in a subjugated country is discussed here with copious examples from different fields of culture and literature to which he had contributed.

Course Coverage:
Module-1: Indian Cultural History and Emergence of Tagore

- 18th-19th Century Bengal and the British Indian Rule
- Cultural, Social, Intellectual and Artistic Re-awakening

Module-2: Doodling, Designs and the Brand Santiniketan

- Doodling on poetry copy-books with Hand-writing and Erasure aesthetics
- Masks, Faces and Designs
- Bringing in Designers Andre Karpeles and Stella Kramrisch (1896-1993)
- Abanindranath Tagore

Module-3: Tagore's Experiments in Painting & Creating an Arts School

- The range of Tagore's Paintings
- Painting nature and mystic landscapes
- Merger of the Familiar and the Unknown
- Dramatic Figures and Scenes

Module-4: Tagore as a Playwright and his experiments in Music and Dance

- From 'Valmiki Pratibha' (1881) to 'Visarjan' (1890) to 'The Post-Office' (1912)
    - The Sung Poetry and his own Musical experiments with fusion

Prof. (Dr.) Anil Kumar

- Dance-Drama as a genre

Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)

The fallacy in the perception that the 'Eastern' or so-called 'Oriental' Culture remains static – visibly recognizable over a long period of history began to change to become more like the 'Western' culture with the advent of the English rule and education will be clear with these lectures. The stereotype of the 'Unchanging East' and the meek acceptance of the meaning of 'Progress' or 'Development' as a move towards 'Material Culture' need to be demystified. A very practical advice that Tagore had given to those who are worried about this area could be seen in his statement: "You have to judge progress according to its aim. A railway train makes its progress towards the terminus station – it is a movement. But a full grown tree has no definite movement of that kind. Its progress is the inward progress of life. It lives, with its aspiration towards light tingling in its leaves and creeping in its silent sap." How Tagore had created a fusion of the best traditions of the west and the east in his plays and music to emerge as a Cultural Icon of our time is explained in this course.

At the end of the course students will be able to: (Definitive Outcomes)
(i) Appreciate Tagore's contribution in national reawakening that happened in the 19th Century India;
(ii) Be exposed to some of the finest musical experiments and scores where words touching one's soul and tunes appealing to one's senses get enmeshed;
(iii) How plays could be used as instruments in social awakening or in protest movements could be clear from this course
(iv) How education could change the face of our Society and Humanity will be appreaciated.

TAGORE AS A POET

Course Code: ENG2452 **Credit Units: 03**

Theme:

Noted American author, Pearl Buck wrote about Tagore's poetry: "In a very real sense he was a world poet…He spoke out of his own soul and mind and heart. To him beauty is eternal and invincible, the indispensable source of refreshment for the soul, the mind, the heart of mankind." Rabindranath began writing poems at the age of 6 and as a young boy studied the classical poetry of Kalidasa. He also studied the Upanishads, languages and modern sciences. He was sent to England in 1878 to become a barrister, but he returned by 1880 without completing his education. His marriage to Mrinalini Devi, and his later assignment to look after his family's estates in the areas now in Bangladesh, allowed him a productive period of writing poetry, plays and short stories. When he joined Santiniketan (in West Bengal) to found an ashram, which became a world school, the opportunity grew further. Tagore thus emerged as Asia's first Nobel Prize winner for literature in 1913 for his book – 'The Song Offerings: Gitanjali'. As a creative genius and a seer-poet, he also played a crucial role in the cultural renaissance of India and Bengal in the 19th and early 20th Century.

Although he was inspired by notable poet Biharilal Chakrabarty and acknowledged him as his poetry-guru, his own poetry was undeniably unique. This was evident right from his first published volume of poetry entitled "Sandhyasangeet" (or Evening Songs) which came out in 1882. When his greatest source of inspiration - his sister-in-law Kadambari Devi, a wise and brilliant woman of her time, passed away in 1885, it inflicted a deep wound on Rabindranath. This sense of loss finds expression in many of his works, from "Kori O Komal" (1886) to several others. Rabindranath also wrote "Prabhat Sangeet" (or Morning songs) soon. The poems of love in this collection also symbolized the naissance of Rabindranath's personal view of God. The history of the completion that which Rabindranath was talking of, may be found in several other anthologies - "Naivedya", "Utsarga" and "Kheya", as also in "Chitra", "Kalpana" and "Khanika" – and subsequent works of his, until 'Gitanjali' (1910). Poems of yearning for the Divine, an immense craving for the Infinite, form an integral part of the temperament of the lyrical poems of "Gitanjali". In 1913, the English edition of "Gitanjali" was published with an introduction by English poet, W. B.Yeats. The rest is history. This course will also present a glimpse of the post-Gitanjali poetic creations of Tagore which took a completely different turn.

Course Coverage:

Module-1: Early Phase of Tagore's Poetry

- The Prabhat Sangeet (1883) and the Sandhya Sangeet (1882) days
- The 'Kari o Komal' (1886), 'The Manasi' (1890) and the 'Chitra' & 'Chaitali' (1896) phase

Module-2: The 'Gitanjali' Period

- 'Kanika' (1899), 'Kshanika' (1900) and the Bengali Original 'Gitanjali' (1910)
- Making of the English Gitanjali (1912)
- The sequels – 'Gitimalya' (1914) and 'Gitali' (1914)

Prof. (Dr.) Anil Kumar

Module-3: The Poetic Plays

- The 'Chitrangada' (1892) – based on the epic story of the Maha-Bharata
- The 'Chandalika' (1938) – touching upon the issue of caste prejudices
- The Card Country, or 'Tasher Desh' (1933)

Module 4: Later Phase of Tagore's Poetry

- Punascha' (1932) and 'Parishesh' (1932)
- 'Shesh Saptak' (1935), Patraput (1936) and Shyamali (1936)
- 'Shesh Kotha' (1940) and 'Rogshajyay' (1941)
- Poetry on Paintings – 'Bichitrita' 91933)

Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)

Going through this course will make the participants appreciate the position of Tagore, namely, that since Man did not have any choice as to his origin and his state, i.e. his environ, and because the human mind is not contented with what is given, man likes to create, construct and set up himself and all that is around him in the way he likes. This works as a driving force for all in literature and art. Because man was not born complete, he wants to get over his incompletion by creativity. Yet another learning outcome will be to realize what Tagore mentions in his essay, 'The Significance of Literature.' Through his poems, Tagore makes an attempt to define the various worlds that he places before him as a thinker-author – some real, and some unreal; some approachable through 'language', and some that employ a "language that is beyond language". This Utopia expressed in his mystic poetry becomes clearer when we see him saying:

"The world becomes another world in our mind. In this world exist not only the color, shape, sound, and other attributes of the other world, but also our likes and dislikes, our fear and wonder, our pleasure and grief. Our mind, through its various processes, suffuses the outside world differently… This act of the mind enables us to individualize external reality… Through the color and shape of their mind, the external world assumes variegated shapes… This world is more precious to the imaginative individual than the outside world or the human world. The mind helps this world to become more suitable for access into people's hearts, rendering it unique for consumption… Thus there is a difference between the outside world and the human world. The human world does not inform us of what is black and white and what is large and small. It tells us of what is dear and vile, what is beautiful and ugly, and what is good and bad in different ways."
It is the nature of the human mind and the human world that get truly reflected in his poetry – which the participants will be able to discover through this course.

In particular, a few of Tagore's poems in English translation would be discussed here from 'The Fountain's Awakening' to 'The dark Night of Sorrows.' Tagore's songs (over 2500 compositions) that belong to another genre of poetry will also be presented and discussed here, since Tagore had himself declared that music being the most abstract of all the

Registrar
Amity University Haryana
Manesar Gurgaon-122413

arts, just as mathematics was in the region of science, musical expression was the purest and most unimpeded form of creative expression. And it is in his songs that the evolution of the poet from what he called a state of being into one of becoming is best captured.

At the end of the course students will be able to: (Definitive Outcomes)
(i) Comprehend the influences on Tagore by the poetic tradition of India
(ii) Read and recite a few major poems in English translation and be exposed to some fine recorded recitations of original poems
(iii) Understand the problems and nuances of poetic translation of Tagore texts – based on translations done by the poet himself and by the others
(iv) Be exposed to a variety of poems – with so much of thematic and stylistic variations

TAGORE AS A FICTION WRITER

Course Code: ENG2552 **Credit Units: 03**

Theme:

Rabindranath Tagore is a poet dramatist, novelist, actor, composer, educator, painter, and a Philosopher. In a word he is the Leonardo-da–Vinci of our Renaissance True to the Indian Tradition, his own philosophical vision was depicted is his essays, stories as well as in his fiction. Tagore's short stories emerged at a time when this genre was not so well-cultivated in India, and they have given rise to many films later. The stories often deal with apparently simple subject matter: commoners, whereas his non-fiction writings dealt with history, linguistics, and spirituality. Well-known also as travelogue writer, his *Europe Jatrir Patro* ('Letters from Europe') are a treat to read. His career as a story-teller through dramatic mode began with *Balmiki Pratibha* in 1881 but soon he came up with *Bisarjan* (1890). His later dramas such as *Dak-ghar* ('The Post Office, 1912) or *Raktakarabi* ('Red Oleanders' 1926) were more philosophical and allegorical. The dance dramas such as *Chandalika* (1938), *Shyama* (1939), and *Chitrangada* (1905) are still extremely popular. This unit will also give an introduction to Tagore's well-known novels – Chokher bali (1903), Noukadubi (1906), Gora (1910), Chaturanga (1916), Ghare Baire (1916), Jogajog (1929), Char Adhyay (1933), and Shesher Kabita (1929) etc.

Course Coverage:

Module-1: Tagore's Initial Texts leading to his 'Galpaguccha'

- 'Bou-Thakuranir Hat' (1883) and 'Rajarshi' (1887)
- The beginning of his short stories from 1891 – 'Byabadhan', 'Khokababur Pratyabartan', 'Postmaster' (1891);
- 'Dena-paona', 'Ekti Asharhe Galpo' and Kabuliwalla' (all 1891-92);
- 'Kshudhita Pashan' & 'Icchapuran' (1895)

Module-2: Selected Novella – Initial Phase

- 'Nashtanir' (1901);
- 'Chokher Bali' (1902);
- 'Noukadubi' (1906)

Module-3: Selected Novels – Later Phase

- Gora (1910)

Module-4: Poet as a Story-teller – Experiments in Fusion

- Ghare Baire (1916)
- Shesher Kavita (1929)

Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)
This course will provide a thorough and in-depth knowledge of Tagore's profound understanding of human emotions, values and social systems in nineteenth and twentieth century Bengal. More importantly, the man-woman relationships dramatized in Tagore's novels and plays will provide the learners with a glimpse of the turbulences and upheavals that in turn will enable to comprehend the larger politics of gender, sexuality and patriarchy in various guises. One will gradually have a critical acumen to realize the play of hierarchies in the past and the contemporary times. Also, a reading of Tagore's novels will make one aware of his humanist thinking that undermined the parochialism and jingoist nationalism. Tagore's broader humane worldview that repudiated ultra-nationalist excesses is very relevant for today. His plays and novels show that though he argued fiercely against the bonds of colonialism, he warned against the excesses of nationalism. For him "the idea of the nation is one of the most powerful anesthetics that man has invented." So, no wonder, going through this course one will not only revisit the colonial/ national histories, changing roles and status of women but also will grasp the working of social dynamics in different forms in the current era.

At the end of the course students will be able to: (Definitive Outcomes)
i) Appreciate Tagore's take on nationalist and colonial histories.
ii) Understand Tagore's lyrical humanism and how that is pertinent in a world of strife and conflict
iii) Explore the representation of women and how it is related to the feminist studies.
iv) Unravel how fiction can written as a mode of beauty and truth as well as to radically critique the systemic ideologies.

TAGORE AND MASS MEDIA

Course Code: ENG2652 **Credit Units: 03**

Theme:

Very few are aware that Rabindranath Tagore had himself dabbled into screenplay writing in the early days of Indian cinema. The silent era Orient Pictures film '*Balidan*' (1927) directed by Naval Gandhi and based on Tagore-play '*Bisarjan*' (known in English as '*Sacrifice*'), had its screenplay written jointly by Jamshed Ratnagar and Rabindranath Tagore. This commercially successful film was set in the fictional kingdom of Tippera, and involved clashes between a progressive-minded King and a "tradition-bound priest.

'*Natir Puja*' (*The dancing girl's worship*, 1932) - based on a recording of his 1926 dance-drama - is the only film where Rabindranath Tagore is credited as the director. Produced by B.N.Sircar of the New Theatre's Group, it was shot in four days where Tagore had himself enacted a small role. Although it was not a commercial success, the prints of the film were destroyed in a fire at the New Theatres. Though recently, attempts have been made to restore the film.

Tapan Sinha's Bengali version of Tagore-story '*Kabuliwala*' (1957) was remade in Hindi in 1961 – with the lead role being played by Chhabi Biswas in Bengali and Balraj Sahni in Hindi. Both versions were immensely successful aesthetically as well as commercially. The music was scored by Pt Ravi Shankar for the Bengali version and by Salil Choudhury for the Hindi version. It received two National Film Awards in 1956 and the Silver Bear Extraordinary Prize of the Jury in the Berlin Film Festival. The story was translated from Bangla into English by the Irish woman Margaret Elizabeth Noble, more popularly known to the world as Sister Nivedita.

Satyajit Ray's '*Teen kanya*' (literally, 'The Three Daughters') was a tribute to Tagore in his centenary year – 1961 as it was made out of three stories by the Master – 'Postmaster', 'Monihara' ("The Lost Jewels'), and 'Samapti' ('The Conclusion') – awarded as the best film at the National level and also honored at the Berlin Film Festival. The common thread seems to be three extraordinary women and their tale of love and affection.

'*Dak Ghar*', a 1912-play by Tagore, rendered into English by W.B.Yeats, and translated and performed in Spanish, French, German and Polish in Europe, was made into a Hindi film in 1965 – directed by Zul Vellani, produced by the Children's Film Society.

Many other successful films could be named – such as Kumar Shahani's 1997-film '*Char Adhyay*' produced by NFDC – based on Tagore's 1934 novel, and remade recently as a successful Bengali commercial film – '*Elar Char Adhyay*' (2012) directed by Bappaditya Bandopadhyay. In between, the same novel became the subject matter of another film – '*Chaturanga*' (2008) directed by Suman Mukherjee

There was yet another classic Tagore film that was remade – Satyajit Ray's '*Charulata*' (1964), with Soumitra Chatterji, Madhabi Mukherjee and Shailen Banerjee - remade by Agnidev Chatterji in 2012 with Rituparna Sengupta, Arjun Chakraborty and Kaushik Sen. Ray had received the Silver Bear as the Best Director in the 15th Berlin International Festival in 1965 for this film and also Golden

Manesar Gurgaon-122413

Lotus Award nationally in the same year.

There were some more movies with double versions – such as Tagore's story '*Naukadubi*' ('The Wreck') being made as '*Ghunghat*' (1960) by Ramanand Sagar under a Gemini Studio production where Bharat Bhushan, Leela Chitnis, Pradeep Kumar, Bina Rai, Asha Parekh etc acted. The film went on to get two Filmfare awards. In 2011, Rituporno Ghosh made it in Bengali under the original title – 'Noukadubi' – produced by Subhash Ghai, and it was premiered as the opening film of the *Indian Panorama* section during the 41st International Film Festival of India (IFFI), Goa on 24 November 2010, in the year that marked Rabindranath Tagore's 150th birth anniversary.

Course Coverage:
In this unit, memorable films and other performances made out of Tagore's works will be introduced, viewed and discussed, and a few documentary films on Tagore will be shown as a part of the course. Evaluation pattern will differ from the other courses under Tagore Studies.

Module-1: Satyajit Ray and Rituparna Ghosh on Tagore's Biopic plus some other Documentaries on Tagore & Discussions
Module-2: Memorable films – Charulata (Satyajit Ray 1964)
Module-3: Chokher Bali (Rituparno Ghosh, 2003)
Module-4: Ghare Baire (Satyajit Ray, 1985)
Module-5: Multiple versions of Tagore films – 'Kabuliwala', 'Char Ahyay', 'Charulata' etc.

Examination Scheme:

Components	CT/OP	AS/LC	A	EE
Weightage (%)	20	05	05	70

CT/OP: Class Test/Oral Presentation, AS/LC: Assignments/Library Consultation, A: Attendance, EE: End-Term Examination

Learning Outcomes: (of the Course)
Tagore has been a source of inspiration to generations of filmmakers and theatre performers. Be it his songs, poems, short stories, novels, or plays, his works attracted many. Even recently, a few film-directors such as Sekhar Das (Jogajog) and Suman Ghosh (Kadambari) came up with elements from tagore stories or from his life. Subhabrata Chatterjee's debut Bengali film, Monihara, based on Tagore's short story was another example. Suman Mukherjee of 'Chaturanga'-fame was working on his next film, Shesher Kabita, based on Tagore's novel of the same name. Tagore's influence on the Bengali television too can't be denied. A television series, Chokher Bali, based on Tagore's work, which was launched recently, too has found many takers.

This being the pervasive influence of Tagore on Mass Media, a student with interest in cinematography, screenplay or direction and production would be incomplete without being exposed to a course such as this. It would also bring out the best in the candidate in appreciating or critiquing film and television classics.

At the end of the course students will be able to: (Definitive Outcomes)
(i) The Social Reformist in Tagore could be understood better through this course. His political ideas would be clearer.
(ii) The stunningly contemporary elements in Tagore's stories would be possible to use in further studies and works by the candidates.
(iii) The issues of gender equality and women's emancipation would be appreciated

Prof. (Dr.) Anil Kumar

Registrar
Amity University Haryana
Manesar Gurgaon-122413

through this course.
(iv) Since Tagore's translation do not match the quality of his originals, the cinematic translations in the inter-semiotic endeavors make it easier for us to appreciate his genius.

PHYSICAL EDUCATION & SPORTS MANAGEMENT

Syllabus - Semester First

HEALTH EDUCATION AND SPORTS

Course Code: PED2151 **Credit Units: 03**

Course Objective: - The aim of the course is to teach students about the rules for the preservation and development of their physical, mental and emotional health, which will be help to improve the standard of health and fitness status of the individual/community/society.

Part-A

Module I: Health Education

1.1. Introduction of Health Education
1.2. Safety and Security (Hygiene and Precaution)
1.3. Individual and Family Health
1.4. Food and Nutrition

Module-II Physical Fitness and Wellness

2.1. Meaning and Definition of Physical fitness and wellness
2.2. Types of Physical Fitness and Wellness
2.3. Importance of Physical fitness and Wellness
2.4. Healthy diet schedule (Pre-Match-Post)

Module-III Human Posture

4.1 What is a good Posture
4.2. Posture deformities
4.3. Types of Posture deformity
4.4. Remedies of Posture deformities by exercise and Yoga

Part-B

Fitness Assessment (Practical)

Health Related

1. **Cardio-Respiratory fitness**
   -1mile run walk test
   -12 min cooper test
2. **Body Composition**
   -Body Mass Index (BMI)
   -Body Fat Percentage
   (Skin fold measurement/Body composition analyzer)
3. **Flexibility**
   -Sit & reach test (abdominal & hamstring)
   -Back stretch test (shoulder)
4. **Muscular Strength**

Skill/Sports Related

1. Agility
-Shuttle run
-Sumo agility test

2. Speed
-50 yard dash
-8 Sec dash

3. Coordination
-Eye hand coordination
-Fast Foot step test
-Skipping

4. Balance

Syllabus - Semester Second

HUMAN ANATOMY AND EXERCISE

Course Code: PED2251 **Credit Units: 03**

Course Objective: - The aim of the course is to provide the knowledge of cell, tissues, organs and systems, microscopic structure of cell, Human body and their internal system and the effect of sports or exercise on their system.

Part –A

Module -I Introduction of Various Human Systems

1.1. Meaning and concept of anatomy, need and importance of anatomy for the athlete/non-athlete
1.2. Brief introduction of various systems cell, tissues, organs and systems, microscopic structure of cell,

Module -II Effect of Exercise on various systems

1.1. Muscular System, Cardio-vascular system, Respiratory system, Nervous system, Reproductive system, Urinary system, Digestive system)

Module-III Fatigue

3.1. Concept, cause and systems of fatigue
3.2. Remedial measure to overcome fatigue
3.3. Importance of Warming-up in sports
3.4. Importance of Limber down in sports

Part-B

Fitness Assessment (Practical)

Health Related

1. **Cardio-Respiratory fitness**
   -1mile run walk test
   -12 min cooper test
2. **Body Composition**
   -Body Mass Index (BMI)
   -Body Fat Percentage
   (Skin fold measurement/Body composition analyzer)
3. **Flexibility**
   -Sit & reach test (abdominal & hamstring)
   -Back stretch test (shoulder)
4. **Muscular Strength**
   -Pull ups or pushups with weight (boys)
   -Flex arm hang (girls)
   -Grip Strength Test
   -Bench press

Skill/Sports Related

1. **Agility**
   -Shuttle run
   -Sumo agility test
2. **Speed**
   -50 yard dash
   -8 Sec dash
3. **Coordination**
   -Eye hand coordination
   -Fast Foot step test
   -Skipping

Syllabus - Semester Third

SPORTS TRAINING AND CONDITIONING

Course Code: PED2351 **Credit Units: 03**

Course Objective: - The aim of the course to provide the scientific knowledge of sports training and conditioning which help to the athlete or non athlete for develop their physical efficiency and performance.

Part-A

Module-I Introduction

1.1. Introduction of Sports Training
1.2. Meaning and Definition of Sports Training
1.3. Principle of Sports Training
1.4. Significance of Sports Training

Module-II Motor Components

2.1. Introduction
2.2. Speed
2.3. Strength
2.4. Endurance
2.5. Flexibility and Coordination

Module-III Methods to develop various motor components

3.1. Development of Speed
3.2. Development of Strength
3.3. Development of Endurance.
3.4. Development of Flexibility and Coordination.

Part-B **Fitness Assessment (Practical)**

Health Related

1. Cardio-Respiratory fitness
-1mile run walk test
-12 min cooper test

2. Body Composition
-Body Mass Index (BMI)
-Body Fat Percentage
(Skin fold measurement/Body composition analyzer)

Syllabus - Semester Fourth

BASICS OF SPORTS MANAGEMENT

Course Code: PED2451 **Credit Units: 03**

Course Objective: - The aim of this course is to provide the management and organizational skill to the students for organizes any sports/competition or events by giving the practical assignments.

Part -A

Module-I Sports management and planning in sports

1.1 Brief introduction of Sports Management
1.2 Management of Intramural and extramural competition
1.3. Types of Planning
1.4. Principle of planning
1.5. Importance of Effective Planning

Module-II Controlling

2.1. Introduction of Controlling
2.2. Definition and Nature of Controlling
2.3. Steps of Controlling
2.4 Principle of Effective Control
2.5. Importance of Controlling in Physical Education and Sports

Module-III Budgeting and Stocking in Sports

2.1. Introduction
2.2. Definition of Budget and Stocking
2.3. Principles of Effective Budget
2.4. Steps in Constructing/ Preparation of Budget in Physical Education and Sports
2.5. Presentation of Budget Maintenance of Stocks
2.6. Financial Management

Part-B

Fitness Assessment (Practical)

Syllabus - Semester Fifth

SPORTS PSYCHOLOGY

Course Code: PED2551 **Credit Units: 03**

Course objective: - The objective of this course is to facilitate the understanding of how psychological factors influence involvement and performance in sports setting. The course will explore such topics as Achievement motivation, Goal setting in sports.

Part-A

Module-I Introduction of Sports Psychology

1.1. Meaning, nature and scope of Sports Psychology in Physical Education and Sports
1.2. Importance of Sports Psychology in Physical Education and Sports

Module-II Achievement Motivation

2.1. Meaning and definition of achievement motivation
2.2. Types of Motivation
2.3. Significance of achievement motivation in the field of Physical Education and Sports

Module-III Goal Setting

3.1. Introduction
3.2. Types of Goal Setting
3.3. Significance of Goal Setting in the field of Physical Education and Sports

Part-B

Fitness Assessment (Practical)

Health Related	**Skill/Sports Related**

SPORTS MEDICINE

Course Code: PED2651 **Credit Units: 03**

Course objective: - The aim of the course is to provide scientific knowledge of sports medicine, care of sports injuries, rehabilitation process and prevention of drugs in sports. This course also enhance the visibility of athletes by provide the comprehensive, diverse and educational experience in the field of sports medicine.

Part-A

Module –I First-Aids

1.1. Basic of First-Aids
1.2. Preparing to respond to a health emergency –location and availability to your sports arena
1.3. Preparing to respond to a health emergency –location and availability to your work place

Module –II Sports Injuries & Rehabilitation

2.1. Introduction
2.2. Types of Sports Injuries
2.3. Cause of Sports Injuries
2.4. Rehabilitation of Sports Injuries
-Prevention and Management of Sports injuries by therapeutic modalities and Massage

Module –III Drug Abuse in Sports

3.1. Introduction
3.2. Meaning and Definition of Doping
3.3. Classification of Doping
3.4. Doping Method
3.5. The prevention of Doping in Sports

Part-B

Fitness Assessment (Practical)

Health Related

FRENCH STUDIES

PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- French and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

Components	Codes	Weightage (%)
Case Discussion/ Presentation/ Analysis	C	05 - 10

PROGRAMME OBJECTIVE

This programme is designed for the students who opt for French as a Minor **in addition to taking French as Foreign Language (Value-added Course).**

This programme aims at providing an understanding of the basics of French grammar and phonetics.

Students get sensitized towards different "registres de langue" and are able to distinguish formal and informal language right from the beginning and use appropriate language while communicating in the professional and business world.

Through various listening and speaking exercises this course enables the students to quickly take position as a foreigner speaking French and establish contacts and communicate in oral and written language.

This programme also provides an insight into French literature. By furnishing information on select socio-cultural aspects of France, this programme creates a backdrop for a better understanding of the language and the people.

This programme focuses on developing all four language skills of reading, writing, listening and speaking. Through training in various activities it enhances the critical/ creative thinking and encourages the learners to think spontaneously in French.

GERMAN STUDIES

PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- German and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

Components	Codes	Weightage (%)

SPANISH STUDIES

PREAMBLE

Amity University aims to achieve academic excellence by providing multi-faceted education to students.The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Value-added Course: FL- Spanish and Minor track courses), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

Components	Codes	Weightage (%)
Case Discussion/ Presentation/ Analysis	C	05 - 10
Home Assignment	H	05 - 10
Project	P	05 - 10
Seminar	S	05 - 10
Viva	V	05 - 10
Quiz	Q	05 - 10
Class Test	CT	10 - 15
Attendance	A	05
End Semester Examination	EE	70

PROGRAMME OBJECTIVE

This programme is designed for the students who opt for Spanish as a Minor **in addition to taking Spanish as Foreign Language (Value-added Course).**

This programme aims at providing an understanding of the basics of Spanish grammar and phonetics.

Students get sensitized towards different "registros de lengua" and are able to distinguish formal and informal language right from the beginning and use appropriate language while communicating in the professional and business world.

Through various listening and speaking exercises this course enables the students to quickly take position as a foreigner speaking Spanish and establish contacts and communicate in oral and written language.

This programme also provides an insight into Spanish literature. By furnishing information on select socio-cultural aspects of Spain, this programme creates a backdrop for a better understanding of the language and the people.

This programme focuses on developing all four language skills of reading, writing, listening and speaking. Through training in various activities it enhances the critical/ creative thinking and encourages the learners to think spontaneously in Spanish.

QUEBEC STUDIES

The course will be open to all the undergraduate students of AUG, especially students pursuing B.A (H) French and students learning French as FL.

Description of the Course

The **Introduction to Study of Quebec** attempts to study a society that is overwhelmingly majority francophone in an anglophone American sphere. This course will do a survey of geographical, historical, demographical, cultural, political and social developments in Québec, from the French conquest to the present. The course is intended to provide students with a broad understanding of the narrative of Quebec history and to improve their knowledge of many important issues that have defined and continue to define and redefine Quebec, including the North American Free Trade Agreement, the evolution of the Canadian constitutional debate, the reform of social programs, provincial linguistic policies, native issues, regional differences and relations between the anglophone, allophone and francophone communities (the Ottawa-Paris-Quebec triangle).

Organization of the Course

The weekly lectures (3hrs per week), learning responses, videos, clips, forum, and the weekly mandatory readings are an integral part of this course. It will also include workshop by faculty from Quebec. Movie screening and other cultural exposure will be organized in collaboration with Quebec Bureau Mumbai. The course will be spread up to two semesters.

Who can attend?

Open to all the undergraduate student of AUG. Students learning French (B.A Hons./ FL) will have additional benefit.

Why to attend?

- Quebec government has special provision of fees waiver for Indian students. The knowledge of Quebec society, its institution and education system will help students to better explore higher education opportunity and work possibility in Quebec as the knowledge of this course will add to the extra immigration point (like the knowledge of French)**.**

- Knowing about the business prospects in Quebec will help students who wants to set up their own business or expand their reach to American continent. Quebec can be helpful to penetrate US market also as they do share lot of commonalities in business culture.

KOREAN STUDIES

Course Objective:

The course is designed to give a broad geographical, historical, cultural and social background of Korea. This will give the students an insight into the major events- historical, political and cultural- of Korean society extending from pre-history era till date. This course explores how today's Korea came into existence and what role does it play in world, especially in East Asia. The course will highlight the various cultural aspects also like Korean festival, cuisine, cinema, music and theatre.

Besides this, the course brings out the various phases of contemporary Korea dealing with colonial legacy, anti-colonial movements, social, political and economic agenda; liberation and division; emerging political, economic and administrative structures; Korean war and aftermath; pace, pattern and processes of socio-economic transformation in the peninsula, Government (s) and politics in the peninsula etc. Exercises also involve practical analysis of material and articles dealing with current issues related to Korea. Texts related to economic, social, and political issues of contemporary Korea are read, analysed and discussed. Besides written examination, grading will also be based on active class discussion and participation.

Besides this, the students are also given introductory lectures on Korea's relations with its neighbours like China, Russia and Japan and also with important strategic partners like USA and India.

COMPUTER APPLICATIONS

Course Code: FST2103 **Credit Units: 02**

Course Objective:
This course introduces students with computer and its importance in the present world. Fundamentals of computers are learnt through lectures and practical assignments. Different applications of computers are used to make them skilled.

Course Content:

Module I : Overview of the working of a computer

Basic concepts in stored program execution, Input, output, storage devices, RAMS, ROM etc.

Module II : History of computers and it emergence

Module III : Working knowledge of Microsoft Word & Excel

Module III : **Working knowledge of PowerPoint and learn making presentation in PPT**

Examination Scheme:

Components	A	H	CT	EE
Weightage (%)	05	10	15	70

(**A-**Attendance**; H** -Home Assignment**; CT-**Class Test**; EE-**End Semester Examination)

PATTERN MAKING & DRAFTING-II

Course Code: FST2202 **Credit Units: 02**

Course Objective: This part of pattern making course enables to Develop an about the details of construction and understanding the patterns of kids wear and it's variation. This course gives the full knowledge of different type of collars and sleeves.

Course Content:

Module I: Collars
Drafting and adaptation of various collars - Peter Pan Collar – Flat and raised, Cape collar, Sailor's collar, Convertible collar, Mandarin collar

Module II: Sleeves
Drafting of different type of Sleeves –Plain sleeve, puff gathered top and bottom, bell sleeve, bishop sleeve, Cap sleeve. Flared Sleeve, Magyar Sleeve Balloon Sleeve, Petal Sleeve, Leg-o- mutton sleeve**,** Kimono& Raglan

Module III: Petticoat
Drafting of petticoat – A- Line, Straight, 6 panels

Module IV: Project
Kids wear Project- To develop an understanding of the fashion design process along with kids wear segments. Developing a design brief and a range of kids wear for different age groups.

Submission of Practical Work records (Compulsory)

Course Evaluation:

Components	**A**	**H**	**R**	**EE**
Weightage (%)	5	10	15	70

A: Attendance, H: Home Assignment, R: Practical work records, EE: End Semester Examination;

FABRIC ARTISTRY & EMBROIDERY

Course Code: FST2205 **Credit Units: 02**

Course Objective
The students will develop a thorough understanding of various techniques used to impart various decorative skills on fabric through practical exercises.

Course Contents:

Module I : Introduction to fabric decoration.
Embroidery - Basic stitches- Running, Back stitch, split stitch, Simple couching, Stem, Satin, Cross, Blanket and Crossed buttonhole Closed buttonhole, Framed, Buttonhole, Chain, Feather, Fly, Herring bone, French knot bullion. **Transferring and Tracing techniques of Designs -** Practical exercise.

Module II : Techniques of thread embroidery
Mirror Work - Mirror work places of India, Types of mirrors, stitches and designs. **Bead Works** – Definition, Bead work places of India, Articles, materials and stitches used for bead work. **Metal thread embroidery -** Definition, Metal thread embroidery places of India, Articles, materials and stitches used for Metal thread embroidery. **Smocking –** Definition, stitches used for smocking – Honey comb smocking.

Module III : Lace Work, Appliqué Work & Quilting
Lace Work – Types of hand and machine made laces, Attaching laces to fabrics; **Appliqué Work** - Definition and Traditional examples- Raw edge appliqué, Satin stitched appliqué, Couched appliqué, Buttonhole appliqué, Chain stitched appliqué, Lined appliqué, Patch Work. **Quilting** – Definition and Traditional examples – Kantha and Sujni – executing various designs using running stitch.

Module IV : Basic Hand Stitches
Hand Stitches - Running stitch, Basting, Gathering, Overcastting, Fagoting, and Hemming.

Module V : Basics of Fabric Embellishment. (Theory)
Constructed Artistry - Yarn design, Weave design, Knitwear design; **Dye & Print Artistry** - Tie & Dye, Batik, Stencil, Screen, Block Printing. **Indian Hand-Painted Artistry** – Pichvai of Rajasthan, Pad of Rajasthan, Kalamkari of Andhra Pradesh, Patachitra of Orissa.
Submission of practical work records - (Compulsory)

Examination Scheme:

Components	A	H	R	V	EE
Weightage (%)	05	05	15	05	70

(**A** - Attendance**; H -**Home Assignment**; R-** Practical work records**; V-** Viva voce**, EE-**End Semester Examination)

FASHION ART ILLUSTRATION AND MODEL DRAWING-III

Course Code: FST2301 **Credit Units: 02**

Course Objective: The Course enables to further enhance the designing skills of the students and help them in designing more formal and high fashion garments. The students will also be working in their own stylized form with respective themes.

Course Contents:
Module-1: Optical illusions
Module-2: Male block figures (front, side, ¾, back)
Module-3: Male flesh figures (front, side, ¾, back)
Module-4: Rendering of male Croquis with different color mediums (Staedtlers pencils, water colors, poster paints)
Module-5: Designing of casual wear for females with background
Module-6: Designing of executive wear for females with background
Module-7: Designing of sportswear for females with background
Module-8: Designing of resort wear for females
Submission of practical work records - (Compulsory)

Course Evaluation:

ADVANCE PATTERN MAKING-I

Course Code: FST2302 **Credit Units: 02**

Course Objective: The course enables students to learn about details of construction of patterns women's garments like sari blouse and its variation, kurta, salwar etc. The course gives the full knowledge of dart manipulation. The students learn to interpret design and create the patterns for that design.

Course Contents:

Module I: Master Patterns
Adult Bodice block (front & back), Plain sleeve, Skirt (front & back)

Module II: Dart Manipulation
Introduction the slash and spread technique; Suppression positions; Single dart series- common dart position and shaped darts; Two dart series;Form of suppression: dart folds, dart tucks, gathers, pleats, flares etc; Development of styles through dart manipulation –connecting darts to create seam lines; style development.

Module III: Torso, Princess line foundation

Module IV: Sari Blouse
Drafting of four dart, princess-panel, yoke band, katori cut blouses

Module V: Kurta& Salwar
Drafting of Kurtas: Straight, A-Line, Kalidar and Umbrella Kurta; Drafting of Salwar: Plain and Patiala

Module VI Project - Indian Traditional wear project
Research on market, trends, Forecasts, brands for specific Indian wear ensembles, details, trims and finishes client research. Design Realization of one chosen ensemble from a range of five.

Submission of practical work records - (Compulsory)

APPAREL PRODUCTION

Course Code: FST2306 **Credit Units: 02**

FST2306	**Apparel Production**	L	T	P	C
Version 1.1	Date of Approval: July 2021	1	-	2	2
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

Catalog Description

This course enables and builds people to understand completely about apparel production in terms of machinery and equipment. Production methodology helps to understand the concept of assembly line, garment manufacturing, and quality checkpoints in production line.

Course Objectives

- The objective of this course is to Make students aware of the methods of apparel production. Its provide knowledge regarding machinery, equipment's, production methodology, Garment cost

Course Outcomes

On completion of this course, the students will be able to

- CO1. Understand the methods of apparel production.
- CO2. Learn production planning and control, quality assurance and production methodology.
- CO3. Understand the concept of labeling and packaging in apparels.
- CO4. Write the cost sheet in terms of garment costing.

Modules	**Blooms 5level***	**Number of hours**
Modules I : Introduction to Indian Apparel Industry : Organizational structure and sectors of the garment industry, apparel product types, developments in recent years, opportunities and challenges in Indian apparel sector, over view of global apparel industry, major trends in international apparel technological concepts.	L1,	10
Modules II: Machinery and Equipment This unit includes machinery and equipment related to cutting, sewing, finishing, washing, stain removal and embellishment.	L1,L3	10

PROJECT PRESENTATION

Course Code: FST2332 **Credit Units: 03**

Guidelines for the project

The purpose of this project is to help students to learn the procedure of doing research on a subject of their interest related to fashion field and then analyse & evaluate it in a presentable manner. They will have to submit a report and will have to give presentation for the same. This project will be conducted during their summer break.

In general, the File should be comprehensive and include:

- A short account of the activities that were undertaken as part of the project.
- A statement about the extent to which the project has achieved its stated objectives.
- A statement about the outcomes of the evaluation and dissemination process engaged in as part of the project.
- Any problems that have arisen and may be useful to document for future reference.

Project Report

The project report is the final research report that the student prepares on the project he chose. Following components should be included in the project report:

- **Title or Cover Page:** Title Page should contain Project Title; Student's Name; Programme; Year and Semester and Name of the Faculty Guide
- **Acknowledgement(s):** Acknowledgement to any advisory or financial assistance received in the course of work may be given. It is incomplete without student's signature.
- **Abstract:** A good abstract should be straight to the point; not too descriptive but fully informative. First paragraph should state what was accomplished with regard to the objectives. The abstract does not have to be an entire summary of the project, but rather a concise summary of the scope and results of the project. It should not exceed more than 1000 words.
- Table of Contents
- Introduction
- Materials and Methods
- Result and Discussions
- Conclusions & Recommendations
- Implications for Future Research
- References

The Layout Guidelines for the Project File & Project Report

- A4 Size Paper
- Font: Arial (10 points) or Times New Roman (12 points)
- Line spacing: 1.5
- Top and bottom margins: 1 inch/2.5 cm; left & right margins: 1.25 inches/ 3 cm

Assessment Scheme:

Continuous Evaluation: 40% (Based on punctuality, regularity of work, adherence to plan and methodology, refinements etc.)

Final Evaluation: 60% (Based on the Documentation in the file, Final report, analysis and results, achievement of objectives, presentation/viva)

FASHION ART ILLUSTRATION AND MODEL DRAWING-IV

Course Code: FST2401 **Credit Units: 02**

Course Objective: The study of this course develops the student's ability to design for different category of people: casual and formal. This focuses on designing of a garment according to requirement of the industry keeping in mind the forecast of the season. After the students learn the draping of male figure and move to stylized sketching using different color mediums. Students will be able to work on theme boards, mood boards & color boards.

Course Contents:
Module-1: Draping of male figures.
Module-2: Uses of textures in male's apparel (leather, denim, knits etc.)
Module-3: Designing of wedding collection- males & females.
Module-4: Designing of night wear.
Module-5: Designing of uniforms- air lines, hotel staff and industries.
Module-6: Inspirational and innovative designing
Submission of practical work records - (Compulsory)

Course Evaluation:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(**A** - Attendance**; H** -Home Assignment**; R-** Practical work records**; EE-**End Semester Examination)

ADVANCE PATTERN MAKING-II

Course Code: FST2402 **Credit Units: 01**

Course Objective: The course enables students to learn about details of construction of pattern for important and most commonly worn women's garments like trousers, skirt and its variation, shirt's etc. This course gives the full knowledge of cuffs, plackets and belts. The students learn to interpret design and create the pattern for that design.

Course Content:

Module I: Basic methods and techniques
Basic yokes and cowls, Basic Bodice Contouring: Corset, Strapless Foundation.

Module II: Developing pattern for various Styles
Dresses with seam lines, co-ordinates and dresses without seam lines.

Module III: Skirt Variations
Circular Skirt, Semi Circular Skirt, Four Gore Skirt, Eight Gore Skirt, Princess Line Skirt, Skirt with Flounce, Skirt with Inverted Pleats, Skirt with Box Pleats, Skirts with Knife Pleats and Skirt with Yoke Skirt with Set in Pleats.

Module IV: Executive wear
Drafting of basic trouser block and its variation.
Drafting of shirt (basic and slim fit) with cuffs and collars.

Module V: Drafting of corporate wear and Semi Couture Women's Evening Wear Project - Research on market, trends, Forecasts, brands for specific, details, trims and finishes, client research, fabric sourcing and surface development Design Realization of one chosen ensemble from a range of five.

Submission of Practical Work records (Compulsory)

Course Evaluation:

VISUAL MERCHANDISING

Course Code: FST2408 **Credit Units: 03**

Course Objective:
Skill development in the creation of showroom or retail store window/interior displays that sell merchandise. Study of the basic techniques of store planning, mannequin dressing, alternate form design, and display space conceptualization and implementation

Course Contents:

Module I: Introduction to Visual Merchandising (VM): Introduction, Objectives, Concept of Visual Merchandising, Objectives of Visual Merchandising, Growth of Visual Merchandising, Visual Merchandising in India, Scope of visual merchandising in India, Visual Merchandising as a Support for Positioning Strategy, Prospects of Visual Merchandising, Challenges in Visual Merchandising, The common challenges, Ways to overcome the visual merchandising challenges

Module II: The Merchandise Mix: Introduction, Objectives, Concept of Merchandise Mix, Merchandise line, The Assortment of Products, Assortment strategy, Merchandise Mix of Show Off, Role of a merchandiser, Other Atmospherics in Merchandising, Colour scheme, Lighting

Module III: Store Management in Merchandising: Introduction, Objectives, Types of Stores, Location of a Store, Types of retail locations, Planning a Store Layout, Various Types of Store Layouts, Grid layout, Forced-path layout, Free-form layout, Boutique layout, Combined layout, Store Space Allocation, Heads of space allocation in a store, Managing Customer Navigation in a Store, General Rules of Customer Traffic in a Store, The Loop for Guiding the Shoppers through a Store

Module IV: Store Design and Display: Introduction, Objectives, Concept of Store Design and Display, Objectives of store design, Purpose and importance of display, Rules of display planning, Display Settings, Store Design, Exterior of a store, Interior of a store, Window displays, Merchandise Presentation Strategies, Colour blocking, Other techniques of merchandise placement, Physical materials used to support the display, Components of display, Some Useful Display Fixtures, Shelves, Gondolas, Round racks, Four ways, Saccades and fixation, Replenishes, Planogramming

Module V: Store Image & Security: Introduction, Objectives, Concept of Image Mix, Elements of Image Mix, Merchandise, Fixtures, Sound/Music, Odour, Visuals, Employees, Elements that Levy Negative Impact on Shoppers, Change of Image, Security Issues

Module VI: Managing Communication for a Retail Store Offering: Introduction, Objectives, Marketing Communication, Thematic Communication, Methods of Communication, Graphics, Signage

Module VII: The Present and Future of Visual Merchandising: Introduction, Objectives, Visual Merchandising at Different Stores, Apparel store, Furniture store, Gift store, Future Prospects of Visual Merchandising

TERM PAPER

Course Code: FST2431 **Credit Units: 02**

Objective:
The objective of this course is to judge the understanding as well as application of the knowledge gained by the students. The aim of the term paper is to provide the students with an opportunity to further enhance their knowledge in a sector of their choice by undertaking a significant practical unit of examining and analyzing various aspects of business management at a level commensurate with the learning outcomes of the various courses taken up them in the ongoing semester.

A term paper is primarily a record of intelligent reading in several sources on a particular subject. The students will choose the topic at the beginning of the session in consultation with the faculty assigned. At least one middle level or senior level person of a company from the chosen sector may be interviewed face to face

Guidelines:

1. The term paper will be related to the contemporary business issue and the topic will be given by the department.
2. The presentation of the term paper is scheduled to be held before the commencement of Semester examinations.
3. The paper will carry 100 marks that will be marked on the basis of understanding and organization of content based on the literature review. The Bibliography shall form an important part of the paper.

Examination Scheme:

Organization and relevance of content	Literature Review	Bibliography	Total
40	40	20	100

WORKSHOP

Course Code: FST2433 **Credit Units: 01**

OBJECTIVES:

A workshop is primarily an activity based academic event that is organized to provide the students a one to one and hands on experience on any aspect of their learning. The communication in a workshop has to be necessarily two ways. The trainer has to make sure that the aspects covered are practically practiced by the participants. The student will choose the option of workshop from amongst their concentration electives. The evaluation will be done by Board of examiners comprising of the faculties.

GUIDELINES FOR WORKSHOP

The procedure for earning credits from workshop consists of the following steps:

1. Relevant study material and references will be provided by the trainer in advance.
2. The participants are expected to explore the topic in advance and take active part in the discussions held
3. Attending and Participating in all activities of the workshop
4. Group Activities have to be undertaken by students as guided by the trainer.
5. Evaluation of workshop activities would be done through test and quiz at the end of the workshop.
6. Submitting a write up of at least 500 words about the learning outcome from the workshop.

METHODOLOGY

The methodology followed at the workshop could be based on any one or more of the following:

- Case Study
- Business Game
- Simulation
- Group Activity
- Role Play
- Business Planning
- Quiz

Examination Scheme:

Attendance	Active Participation	Multiple Choice Questions / Quiz	Solving the Case Assignment / Write up	Total
10	30	30	30	100

FASHION ART ILLUSTRATION AND MODEL DRAWING-V

Course Code: FST2501 **Credit Units: 02**

Course Objective: The Course helps the students design accessories for different segment of people, along with their display and story board.

Course Contents:
Module-1: Designing of range of ties and stoles.
Module-2: Designing of accessories- head gears, belts, bags etc.
Module-3: Fashion illustration with different mediums- charcoal pencils, glitters, poster colors, staedtlers, 3-d material etc.
Module-4: Fashion illustration with different techniques- tissue paper and blow Ink color.

GARMENT CONSTRUCTION-IV

Course Code: FST2502 **Credit Units: 01**

Course Objective: The course enables students to learn about details of grading in construction and its important and most commonly worn women's garments like trousers, skirt and its variation, shirt's etc. The students learn to interpret design and create the pattern for that design.

Course Content

Module I: Construction of Different Grades Garments
Basic Bodice Block, Sleeves, Skirts, Trouser, collars, jackets

Module II: Project - Research on market, trends, Forecasts, brands for specific Indian wear ensembles, details, trims and finishes client research. Design Realization of one chosen ensemble from a range of five.
Theme –

- Bridal Wear
- Formal wear
- Maternity Wear
- Beach wear

COMPUTER AIDED DESIGN (CAD)-IV

Course Code: FST2503 **Credit Units: 02**

Course Objective:
This module will make the student use Fashion studio for compilation of portfolio for Graduation Design Collection undergoing various processes.

Course Contents:

Module I : Tools Introduction and usage

Module II : Cleaning & Selection of fabric

Module III : Color Reduction

Module IV : Texture Mapping.

Module V : Mood board & Color board

Module VI : Draping

Examination Scheme:

Components	A	H	CT	EE

PATTERN DRAPING

Course Code: FST2504 **Credit Units: 01**

Course Objective:
After the students have a thorough knowledge of flat pattern-making and its application they are now introduced to the concept of three dimensional process of pattern making by draping the material on to the mannequin.

Course Contents:

Module I : **Introduction**
Equipments needed, grain, seam allowances, preparation of fabric, dress form.

Module II : **Basic patterns**
Basic bodice (front & back), Basic skirt (front & back), Basic sleeve

Module III : **Variations in necklines, armholes, waistlines, princess bodice and boned bodice**

Module IV : **Creating patterns by dart manipulations**
Multiple darts, Dart tucks, Gathers, Pleats, Flare, Style lines and control seams

Module V : **Style lines and control seams**
Use of style lines, Cowls and twists in bodice, Midriff & yoke styles

Module VI : **Variations in skirts**
Variation of the basic skirt, flared, pegged, paneled, gathered, gored and pleated, Peplums- flared and gathered

Module VII : **Collars**
The Mandarin collar, Convertible Collar, Peter Pan collar, Shawl collar, Notched Collar

Module VIII : **Sleeves - The Dolman sleeve, Raglan and Kimono sleeve**

Module IX : **The Shift**
A Line, Tent, Blouson, Use of Facings, Closures and Pockets

Module X : **Final Presentation**

Submission of practical work records - (Compulsory)

Examination Scheme:

Components	A	P	R	EE
Weightage (%)	05	10	15	70

PATTERN GRADING

Course Code: FST2505 **Credit Units: 01**

Course Objective:
After the knowledge of flat pattern making the students now learn how to increase or decrease any pattern in proportion.

Course Contents:

Module I : **Introduction to Grading**
History, Sizes & Measurement Sizes & Development, Importance of grading, Methods of grading- Stack and Track methods, Different types of grading- horizontal, vertical and diagonal

Module II : **The Master Grades**
Grading of adult bodice block- front and back, Inset and grown on sleeves

Module III : **Grading of collar s and lapels**
Tailored lapel, Tailored Collar, Shawl Collar

Module IV : **Grading of skirts**
Fitted skirt block-front and back, flared skirts, skirt variations, Grading of Sheeth Block

Module V : **Grading of Trouser Block**
Basic Block; Trouser variation

Module VI : **Grading of Jacket**
Paneled, Box and double breasted jackets

Module VII : **Computerized Grading Technology**

Examination Scheme:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(**A** - Attendance**; H** -Home Assignment**; R-** Practical work records**; EE-**End Semester Examination)

FASHION MERCHANDIZING-II

Course Code: FST2506 **Credit Units: 3**

Course Objective:
Understand the relevance in functions of merchandising process they are taught the skills related to Sourcing developing and presenting product lines vendor and customer relationship and export documentation.

Module I: Organizational Structures
Structure of export house, buying house and domestic companies, Buyer's classification and buying network in exports

Module II: Marketing and merchandising concepts: - Study of fashion principles and fashion cycle, Fad etc., Fashion movement. Study of domestic and international markets

Module III: Environment and segmentation of fashion: -Market segments and target markets,

Module IV: Developing & presenting product lines: -This includes traditional line planning contemporary line planning

Module V: Merchandising systems - Wholesaling & retailing

Module VI: Customer vendor relationship: - This includes concept of customer service role of personal selling purpose, Online & offline wholesaling & retailing system.

Module VII: Strategies and decisions: - This includes pricing strategies promotional strategies Sourcing of raw material

Module VIII: Financial aspect of merchandising

Submission of Practical work records - (Compulsory)

Examination Scheme:

Components	A	CT	S/V/Q	HA	EE
Weightage (%)	5	10	8	7	70

QUALITY CONTROL & PRODUCTION MANAGEMENT-II

Course Code: FST2507 **Credit Units: 03**

FST2507	**QUALITY CONTROL & PRODUCTION MANAGEMENT-II**	L	T	P	C
Version 1.1	Date of Approval: July 2021	2	1	0	3
Pre-requisites/Exposure	NIL				
Co-requisites	NIL				

Catalog Description

Analyse, synthesis and demonstrate the basic decision-making, production, and creative processes involved in the conversion of materials to finished textile/apparel products and be familiar with the various production systems with respect to quality and able to Identify and discuss concept of apparel machinery Conceptualize the understanding of Production management

Course Objectives

- This subject provides a detailed knowledge to students regarding the quality aspects, production, planning and control, maintenance of equipment, material handling, utilization of resources etc of a garment so that the quality and cost both are in an equilibrium.

Course Outcomes

On completion of this course, the students will be able to:

- Conceptualize the understanding of Production management
- Examine the different standards applicable to industry Learn about the workroom management.
- Identify and discuss concept of apparel machinery
- Analyse the basic decision-making, production, and creative processes involved in the conversion of materials to finished textile/apparel products and be familiar with the various production systems with respect to quality.

Course Content

Modules	**Blooms level***	**Number of hours**
Module I: Quality Control and Standards Introduction to quality control and standards: Evolution of quality, quality planning, qualitycontrol, quality assurance Quality Management System- Organizing, planning and implementation. Quality standards: importance, benefits, levels and sources of standards- ISO, AATCC, ASTM,BS, BIS, DIN.	L1, L2	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module II: Eco Management Eco management of textile and apparel industry: Global scenario, eco textiles, eco standards andcertifications - ISO 14000, Eco-mark, OekoTex 100 standards, GOTS, OHSAS, Green label,Green Seal.Eco specifications and restrictions in apparels and textiles:	L1, L2	6
Module III: Inventory Control and Cost Estimation Need and advantages of inventory control; introduction and functions of cost estimation, estimation procedure, elements of cost and ladder of costs, method of calculating depreciation, overhead expenses and distribution of overhead expenses	L1, L5	7
Module IV: Various Production Systems Study various production systems with respect to quality. Eg. Lean, Sigma, 5S etc.	L1, L2	10
Module V: Care, Labelling and Packaging **Labelling:** Introduction, labelling parameters, fibre content, care labelling and flammability,wash care labels, **Packing:** Function and scope of packing, packing methods, instructions, materials, weight, ratio,and labelling considerations for shipment by air and sea, packing marks, warehousing - assortment and storage methods	L1, L3	7

***Bloom's Level:**

L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

FASHION FORECASTING

Course Code: FST2508 **Credit Units: 03**

Course Objective:
The students are made to start their work with the collection of data regarding fashion forecasting, trend analysis and presentations. They are then made to forecast the fashion trend and dictate fashion in their very own way.

Course Contents:

Module-I : Concept of fashion forecasting (Theory)
Awareness of fashion fairs and fashion centers, Knowledge of creative writing, Reading of fashion forecast magazine, Sources of information, Role of Exhibitions and Fashion shows

Module-II : Fashion Forecasting Process (Theory)
Market Research- Consumer research, Shopping, Sales records; **Evaluating the collections**- Similar Ideas indicate fashion trends, Trends for target market; **Fashion services** – Collection reports, Trend books, consulting, Color services, Television/Video services , News letter services, Web sites, Directories and reference books, Fashion Magazines and news papers, Catalogs. **Design Sources**- Historic inspirations, Folk influences, Vintage clothing shops, Museums, Libraries and bookstores, Arts, Fabrics/Textiles, Travel, Form follows function, The street scene, The turn of the century, innovations and technologies.

Module-III : Applied Learning Assignments. (Practical)

Market Research	-	On site visits to fashion retailers and cloth markets and study the market trends and collect various cloth samples, catalogs etc.
Forecasting Exploration	-	Students will explore a variety of sources like Magazines, News papers, Internet sites and in-site, their market research reports etc. to become familiar with apparel, textile, color, style, and general culture and consumer forecasting resources. Each student will identify and report trends found to class.
Preparation of story boards	-	Students will prepare story boards for specific target.
Presentation of designs	-	Students will prepare fashion forecast for different seasons.
Final Presentation	-	Each student have to submit their Research file in a standard format guided by the faculty for the final evaluation.

CRAFT DOCUMENTATION
(ORGANIZATIONAL PROJECTS)

Course Code: **FST2535** **Credit Units: 06**

Objective

The objective of this programme is to bring about the transformational change from a practical application of the learned knowledge in real time corporate world and industry towards laying a focused and insightful planning for a strong foundation towards understanding and contributing towards Indian crafts.

Methodology

- Market Visit
- Field Trip
- Documentation and Presentation
- Scope and Final Presentation

Guidelines

- The Craft Documentation is scheduled between 4th and 5th semester.
- CD is a complete practical training programme with study of each and every aspects of the organization, and the training experience should be submitted as Organizational Project Report.
- There are two guides will be associate with CD. Faculty Guide for overall guidance and Company Guide for monitoring the SIP students in respective departments of the allocated company.
- Every student should attend the company allocated to him/her regularly and complete the project on given time lines. Disciplinary action will be initiated if any student is found to be absenting himself/herself without the permission from company guide / Faculty guide / HOS.
- Student in organizational Project (OP) / CD are the role ambassadors of Amity University Haryana (AUH). They carry the brand image of AUH and should always show high level of dignity at the work place.
- Every student is expected to carry a pen, notepad daily to the company where he/she assigned the project and should always note down the progress of him/her along with daily dosage of work schedule.
- The students in the OP/CD can be meeting the faculty guide in between the programme with prior permission from the company guide. Such cases the company guide should be inform to faculty guide/HOS
- The students by virtue of his/her carelessness fail to do the project, will not be awarded the graduation certificate and also kept out-of-placement services.

FINAL RECORD PREPARATION FORMAT
(Summery of Organizational Project Report content)

1. Cover Page
2. Inner cover page
3. Company Certificate
4. Amity University Haryana Certificate
5. Table of contents / Index
6. Acknowledgement
7. Declaration
8. Executive Summery
9. Introduction

FASHION PROMOTION

Course Code: FST2512 **Credit Units: 01**

Course objective:
This course describes various types of fashion promotion with procedures and its relation to store needs and target customers.

Course Contents:

Module I : Fashion- Sales Promotion.
Sales promotion – Objectives, Fast sales boost, Encourage Trial, Encourage repeat purchases, Simulate purchase of large stocks, Gain distribution and shelf space. **Promotion Techniques- Consumer Promotion-** Money off, Bonus packs, Premiums, Free samples, Coupons, Competitions, Draws; **Trade Promotions** – Price discounts, Free goods, Competitions, Allowances. **Evaluating sales promotion –** Pretesting research, Post testing research. **Promotional Aids** – Personal appearances, Designer Trunk shows, In-store clinics, Merchandise representatives, Videos, Image books, Display fixtures, Radio scripts and TV commercials, Glossy photographs, Hangtags. Fashions promote associations, Fashion awards.

Module II : Fashion -Advertising.
Define advertising objectives –Position the offering, Create awareness, Stimulate trail, Remind the rain force, Provide support for sales force, correcting misconceptions. **Advertising Strategy –** Identify and understand the target audience, Establish advertising spend, Massage decisions. **Advertising Media** – The term 'Media', Print Media - Types, Methods of advertising, advantages and disadvantages; Electronic Media - Types, Methods of advertising, advantages and disadvantages. **Kinds of advertising-** Image advertising, Item advertising, Promotional advertising. **Advertising Department** – Art, Copy, Production, traffic. **Advertising Agencies.**

Module III : Fashion – Public Relations.
Public relations – Introduction; **Functions of public relations** – Facilitates company's overall operations, Aids promotion, Helps tracking social and environmental issues, Ensure customer's satisfaction, Attracting and retaining talented employees, Give benefits to stake holders , Develop reputation of the organization, Responds effectively to negative publicity. **Publicity** – Task of publicity department, **Characteristics of publicity** – Credible message, No media cost, Loss of control of publication, Loss of control of content, Loss of control of timing. **Publicity Campaigns** – Press package, Individual approaches. **Special events** - Fashion shows – Formal fashion shows, Designer trunk shows, Department fashion shows, Informal fashion shows.

Module IV : Applied Learning Assignments.

1. Visit any department store and observe the various techniques of sales promotion activities and make a report.
2. Search through various news papers and magazines and analyze the coverage of advertising campaigns of different large chain store / fashion brand. Clip the stores advertisements and find the, name, trade mark, manufacturer and store specialties and locations.

THE BUSINESS OF LUXURY FASHION

Course Code: FST2513 **Credit Units: 01**

Course objective:
This course aims to give students a deeper understanding of the luxury sector & reveal the importance of the profession in the contemporary world.

Course Contents:

Module I : Introduction to Luxury Fashion.
Luxury- Concept, Definition in economics, Origins of luxury fashion, Market characteristics **Conspicuous consumption** – Definition and theory, **Socio-economic significance** - Status symbol, Consumerism, Life style and culture. **Luxury and Ethics** -Accessible luxury, Intangible luxury. Sustainable luxury: social luxury guilt-free, luxury, sweatshop-free clothing.

Module II : The Luxury Fashion Consumer & Buying Behavior
Consumer Behavior – Introduction, Models of Consumer Behavior; **Buying Behavior -** Introduction, The consumer purchase-decision process; **Cross-Cultural Behavior -** Economic, demographic and socio-cultural trends and consumer; Globalization of consumer markets and international marketing implications. Luxury consumer market indicators.

Module III : Luxury Retail Design and Atmosphere
Luxury retail - Location, Store concept, Retail extension, Product merchandizing design, New selling techniques, Designer outlet shopping. **Store planning and Design** – Store Image, Target consumers, Seasonal Visual Merchandising, Windows, Interiors, **Shopping as entertainment.**

Module IV : The Art of Creating and Managing Luxury Fashion Brands
Branding – Defining a luxury brand, Branding benefits, **Luxury fashion branding strategy development** - Brand concept, Brand identity, Brand awareness, Brand positioning, Brand loyalty, Brand equity, Brand value; **The luxury fashion marketing strategy** - The product, Pricing, The place of distribution, Promotion, The celebrity connection, People, Positioning. **Building a Brand or Designer Name** –Multi products – Secondary lines, New product divisions, Size ranges, Accessory collections; Licensing, Joint ventures, Exporters, Manufacturers as Retailers – Factory outlet stores, In-store boutiques, Catalogs, Televisions, and Internet sales. Franchising, Leased Departments, Consignment stores Jobbers.

Module V : Global Nature of Fashion Business.
Introduction to international Fashion business – Importance, Nature and scope, Modes of entry into International Business Internationalization process and managerial implications, Multinational Corporations and their involvement, Agreement on Textiles and Clothing (ATC) ; **The luxury fashion business strategy model**- Definition, The business strategy modeling process.

COUTURE DESIGN

Course Code: FST2514 **Credit Units: 01**

Course Objective:
This course offers students the opportunity to enhance their skills to the segment of the fashion industry known as the Couture /High fashion / Designer label market. This is an applied learning course and students need to experience this with concerned faculty experts.

Course Contents:

Module I : Introduction to Couture Design. (Theory)
Couture – Definition, Origin of Couture, Function of couture, Chambre Syndicale de la Haute Couture, **Couture Design Concept -** High-End Luxury, Luxury Sociology and Ceremonies, Concept of 'made-to-measure' clothing**; Designer Clothing** - Definition, Concept, Designer Label, Designer Brands. Key Concept Innovation & Development of couture design. Study of Indian couture designers and International couture designers

Module II : Couture Decorative Techniques & Embellishments. (Practical)
Expands knowledge of the couture by exploring various decorative techniques, Apply glass seed beads, sequins, pearls, and faux gems on different types of fabrics. Create embellishments such as flowers and frog closures from fabric and ribbons, hand embroider original designs, and learn the arts of quilting, cartridge pleating, and quilting

Module III : Couture Apparel Design - Advanced Illustration Techniques. (Practical)
Study the muscular and skeletal functions of the human body and their relationships to the design and creation of haute couture apparel, visualizing how anatomy and aesthetics form the basis of designing a haute couture collection. Become proficient in the translation of ideas via the fashion design sketch and further develop a personal drawing style and various apparel silhouettes.

Module IV : Couture Apparel Design - Advanced pattern Making & Sewing Techniques (Practical)
Skill development in taking body measurements; Developing custom fittings for customized patterns; In depth coverage of the process of transferring a custom body fitted canvas to a couture or designer dress form and padding it for custom sizing; The sewing techniques practiced in the finest haute couture ateliers around the world.; Learn couture techniques in couture fabric selection, proper cutting procedures, hand stitching, seam and hem finishes, pocket construction, inner construction methods pressing, and finishing.

Module V : Haute Couture Portfolio - Applied Learning Assignments.
Write a short description of a person, which include age, build, job, place of residence, interests, and lifestyle. Consider that, this person will be the typical customer. Determine the price range and style range according to the customer life style. Designing a personal collection based on a theme: determine and carry out all the stages of product development from the design to the completed prototype. Apply knowledge of the couture to design, drape, fit, and construct. Develop styles and images through fabric sourcing, market research, and inspirational research for the project.

ENTREPRENEURSHIP

Course Code: FST2604 **Credit Units: 03**

Course Objective:
Identify and apply the elements of entrepreneurship and to entrepreneurial processes. Recognize the importance of entrepreneurship and identify the profile of entrepreneurs and their role in economic growth. Use the entrepreneurial mind-set and behave responsibly and ethically in their roles as entrepreneurs. To enable them to identify the opportunities in apparel, textile and Accessories

Course Contents:

Module I : Introduction to Entrepreneurship: What is Entrepreneurship, Why Entrepreneurship, Characteristics of Entrepreneur & Entrepreneurship

Module II : Importance of Entrepreneurship: Importance of Entrepreneurship, Common Myths about Entrepreneurship

Module III : Entrepreneurial Opportunities and Enterprise Creation
Sensing Entrepreneurial Opportunities, Environment Scanning, Market Assessment, Identification of Entrepreneurial Opportunities

Module IV: Enterprise Planning and Resourcing: Business Planning - Preparation of a Project Report, Resource Assessment -Financial and Non – Financial, Fixed and Working Capital Requirement, Funds, Flows, Profit Ratios, Break Even Analysis etc., Mobilising Resources - Sources and Means of Fund,Facilities and Technologies for starting an Enterprise. Organising/Production of goods and services-quality, quantity and flow of inputs.

Module V: Supply Chain and Logistics: What is supply chain? What is the role and importance of Supply chain and logistics in fashion industry? Various challenges faced by fashion industry due to constraints in infrastructure of India

DESIGNING AND DEVELOPMENT OF FASHION ACCESSORIES

Course Code: FST2606 **Credit Units: 01**

Course Objective: Students will be able to learn about different types of accessories that are relevant to fashion industry

Course Contents:

Module I: Introduction to fashion accessories, Types of accessories

Module II: Functional and decorative importance of accessories

Module III: Designing and developing accessories: Sketching and rendering of headgear, hand wear, foot wear and hand bags (3 each) (Construction of any one)

Module IV: Sketching and rendering of belts, gloves and (construction of any one), Sketching of Indian jewellery- Mughal Jewellery, Thewa, Kundan Jewellery, Temple Jewellery, Sketching of accessories on women and men's croqui (2 each) Jewellery designing based on theme. (with Concept Board)

PROJECT
(CONCENTRATION ELECTIVES)

Objectives

1. To understand the relationship of forecasting to product development and the need for forecasting knowledge for all aspects of apparel and textile businesses.
2. Integrate consumer, aesthetic and quantitative trend information into the product development process.
3. Engineer new value into an existing product or line while holding costs.

This course is a 'team project' integrated with Concentration Electives -1. The team size should be minimum of two. The team has to be choosing any one of the project from the following:

Course Code:	Concentration Electives -2	Credit Units:
FST2607	Sportswear Design and Development	03
FST2608	Costume Design pertaining to performing arts.	03
FST2609	Functions of Indian Buying Houses/Agents – A study	03

Project Guideline

- Students' team has to complete the project through various research methods.

- **Research Project Idea Generation**: current (or perennial) problems and controversies in the apparel field with relevant chosen topic. This method allows historians the opportunity to explain how the current situation came about and to analyze contributing factors to the problem. To find perennial problems in the apparel industry, search through apparel-related journals. Based on this analysis, formulate the purpose of a potential research study. Think about WHY this topic is important to study (the "so what" question). Summarize the points (research question/purpose; why significant; brief literature review) in a one page outline – Design Brief. Critically think about the purpose of your research study.

- **The Final Research Paper:** This will include the updated sections: introduction, literature review/background, methods, and results with discussion, conclusion and ideas for future research. Students should include images as well as a complete reference list. All citations should comply with requirements for submitting a paper.

- **Professional Presentation:** Students will prepare a PowerPoint presentation for a maximum of 15 minutes (about 15-20 slides) including: introduction, brief literature review, methods, results and discussion, and conclusion. Images should be embedded within the PPT.

Project Evaluation

- There will be an evaluation by a jury comprising of external experts and a committee of internal faculties from the department. Failure to submit the portfolio with final products or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination.

GRADUATION DESIGN COLLECTION

Course Code: FST2704 **Credit Units: 10**

Course Objective:

This programme focuses on the design and construction of the fashion garments for the partial fulfillment of the degree of B.Sc. in Fashion Design & Technology.
This course is practical application of creativity, Innovation, discovery, and expression in aesthetic or artistic design through the development of innovative garments that employ unique and sculptural shapes. The course will be assessed through critique and evaluation of design project in each topic area. Project components include inspirational research and development of aesthetic direction, ideation and sketching, garment construction and project presentation of the collection at a fashion show before and invited trade audience.

Course Methodology : Research Project & Product Development

Aim : To developing ideas from paper to object, theory to practice, and fabric to garment.

The projects taken up and have to develop through the following stages:

1. **Fashion Market Study** - Fashion market research information helps the students to understand what, where, and why consumers are buying across all retail channels. It combines point-of-sale (POS) market tracking with consumer panel insights so students can stay on top of fashion industry trends and effectively connect with the fashion consumer.

2. **Field trip / Visit** - The students will have the opportunity to create or styles a collection of designs based on various design inspirations and trends, and learn how to put together presentation boards and portfolio pages.

3. **Portfolio Development -** A portfolio is a collection of work that shows an applicant's skills and knowledge across a number of projects or studies. It is a visual representation of interests, exploration, experimentation, development and final pieces. So fashion portfolio is a critically important tool for successfully applying for additional education opportunities or landing your first internship or entry level job. It reflects your professional skills and best work.

4. **Digital Design Techniques & Presentation** - Include Computer-generated (CAD) mood, color, textile, fashion plate, and flat drawing pages as separate pages or in combinations, these demonstrate the designer's skills with CAD programs. Pages should be all portraits or all landscape orientation, with a few exceptions if needed, to allow for easy viewing by interviewers.

5. **Range Development** – The students will explore what makes a good range, taking into account customers, competitors, price points, fabrics, core items and seasonal specials.

6. **Final presentation** - Fashion show.

GRADUATION PROJECT

Course Code: FST2837 **Credit Units: 16**

Course objective: To provide an opportunity to students to apply and relate the concepts and theoretical inputs from various contextual studies offered in Fashion Design programme. To involve the students in the day to day activities of the functional areas of fashion industry and familiarize the practical aspects of the same.

Course Content:
Week 1 – Week 16: Self study and practical observation by student in the industry.
Week 17: Internal Jury
Week 18: External Jury

Teaching Tools:
Self Study, Observation

Learning outcome: Students are exposed to practical aspects of the functional areas of fashion industry and expected to learn the operational methodology of exploring business opportunities, solving problems and making decisions

Parameters to be considered in External Jury:
• Title of the Project
• Objective
• Research Methodology and Design
• Appropriateness of data
• Scope and coverage of the survey
• Comprehension and analysis
• Findings and recommendations
• Innovative approach to the industrial problems

Parameters to be considered in internal Jury:
• Title page
• Objective
• Report framework and methodology
• Context and analysis
• Comprehension and interpretation
• Findings and recommendations
• Report presentation
• Meeting the time requirements of DP schedule

Examination Scheme:

DRAWING-I

Course Code: FNA2101 **Credit Units: 03**

Course Objective:
Drawing is the basic element of learning art. Drawing exercises are to acquire accurate observation and skills to present representational art.

Course Contents:

Module I
Drawing still life or object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between line, mass, volume and texture, emphasis on various visual experiences.
a) Learning basic elements of drawing.
b) Still life or object drawing, Free hand drawing from nature.

Module II
Pencil work representing still life with familiar objects .like fruits, foliage drapery, books and flowers etc.
Emphasis on creating characteristics and volume (light and shade).
a) Basic knowledge of drawing with pencil.
b) Still life with from arranged objects like fruits, drapery etc.

No. of works to be done - 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

GEOMETRICAL DRAWING AND PERSPECTIVE - I

Course Code: FNA2102 **Credit Units: 02**

Course Objective:
Introduction to orthographic projections in simple positions, drawing of plan, elevation and section of simple objects to scale, full size, reduced or enlarged.

Course Contents:

Module I
Understanding and use of geometrical instruments. Simple exercise in angles and geometrical figures i.e. triangle, quadrilaterals, parallelograms, squares, rectangles, rhombus, polygons, circles etc.

Module II
Projections of solids in simple positions. Drawing of plan, elevation and section of simple objects. Enlargement and reduction of drawings in different scales. One point, two point and three point perspective etc.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN – I

Course Code: FNA2103 **Credit Units: 02**

Course Objective:
Learning Design is to understand the basic visual language and various methods of form synthesis. It is to develop intellectual and imaginative abilities in creative thinking. It is to provide technical know-how about the principles of design, distribution of space, proportion, behaviour of force and energy contained in lines, form and colour. Organized design exercises in different media offer a wide range of opportunity to develop systematic and intuitive approaches to Creative Design work.

Course Contents:

Module I
Transformation of simple shapes into well balanced design. Understanding the subjective and objective value of applied art. Visualize complex forms into simple, primitive and basic forms from nature also.

Module II
Repetition of a well composed square block, with simple shapes or image into different scale to create rational or systematic design. Concept of positive and negative areas.

No. of works to be done - 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - I

Course Code: FNA2104 **Credit Units: 02**

Course Objective:
The objective of this course is to acquire experience in basic knowledge to explore painting techniques. Structured exercises on painting include basic colour theory and pictorial composition, which enables students to be confident in the use and manipulation of colour. It also provides a clear idea of different painting techniques. Like water colour, Tempera and opaque colour.

Course Contents:

Module I
Understanding the colour and its possibilities. Practical approach to know primary, secondary and other colours to develop a clear perception about painting work. Painting from objects and nature; study of colours, forms, perspective, tone and texture. Experimenting with vibrant, fluorescent colours and passionate sophistication of opaque and transparent colours. Draw and paint with transparent or opaque colour on a theme (from memory & Nature)

Module II
Handling the tools, application and control of a wide range of painting media. Understanding the detail complex possibilities exploiting different types of colours. Project works on monochromatic experimentations.
Still life with monochromatic.

No. of works to be done – 06

- Colour knowledge and colour wheels
- Memory and landscape painting.
- Monochrome still life

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE - I

Course Code: FNA2105 **Credit Units: 02**

Course Objective:
Clay Modeling to develop visual awareness in three dimensions, through manipulative skills in clay and plaster etc.

Course Contents:

Module I
Simple relief composition in clay, technique of terracotta and direct modeling in plaster.

Module II
Studies to understand three dimensional forms, texture and colour of the material, principle of weight, volume, space and contour.

Module III
Finishing of the final sculpture or relief and installation.

No. of works to be done - 03

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING - I

Course Code: FNA2106 **Credit Units: 02**

Course Objective:
This hands-on course is to introduce basic techniques in surface printing in one and more colors. It is to learn and experience simple methods of making printing lino & wood cut technique.

Course Contents:

Module I
Learning basic studio techniques in print making, surface printing relief media and use of printing equipments and tools. Understanding the concept of design construction and composition in black and white. Simple method of making relief blocks for lino print based on final design layout.

Module II
Handling the process of ink application on prepared block; experimenting with different colour-combination and paper surface. Wood cut printing in black and white.

No. of works to be done - 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

VISUAL GRAPHICS - I

Course Code: FNA2108 **Credit Units: 02**

Course Objective:
The objective of the course is to focus on the usage of the digital media. The course lay emphasis on the basics of designing software's to ensure that the students are updated with the technological aspect of the industry.

Course Contents:

Module I
Photoshop: Introduction to any designing software's.
Getting familiar with the tools.

Module II
Photoshop: Making various layouts using the tools

No. of works to be done - 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - I

Course Code: FNA2109 **Credit Units: 02**

Course Objective:
The objective of the course is to introduce the fundamental technology, theory, history, techniques and applications of photography.

Course Contents:

Module I
Basic use of camera, its various parts and their functions.

Module II
Observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING - II

Course Code: FNA2201 **Credit Units: 02**

Course Objective:
Drawing exercises are to learn accurate observation and skills to represent work of art from life or surroundings.

Course Contents:

Module I
Drawing human figures to study proportion. Centre of gravity, inclination of main mass based on anatomical structure. & Animal Study.
a) Sketches / drawing

Module II
Drawing from nature - Outdoor study

No. of works to be done – Drawing 10 + Sketching 100

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

GEOMETRICAL DRAWING AND PERSPECTIVE - II

Course Code: FNA2202 **Credit Units: 02**

Course Objective:
This is to provide adequate knowledge on visual illusion depending upon the distance and point of view. It makes the learners well-equipped in measurement and scaling system related to visual art.

Course Contents:

Module I
Isometric projection of simple objects like cube, prism, pyramids, cone etc.

Module II
Introduction of perspective - Parallel and angular perspective. Terminology like picture plane, station point, vanishing point. Perspective of simple geometrical objects and their combination.

No. of works to be done - 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN – II

Course Code: FNA2203 **Credit Units: 02**

Course Objective:
The objective of learning Design and exercises is to develop spontaneity in creative thinking executing a meaningful construction of forms based on principles of design.

Course Contents:

Module I
Creating conceptual design emphasizing the importance of lines and forms. Project on experimental design in creative forms

No. of works to be done - 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - II

Course Code: FNA2204 **Credit Units: 02**

Course Objective:
Learning colour techniques of transparent and opaque representing still life and social themes.
Course Contents:

Module I
Still life with multicolour in transparent water colour technique.

Module II
Developing opaque colour treatment on figurative composition based on social themes and Landscape painting.
Study of Indian Folk painting.

No. of works to be done - 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING - II

Course Code: FNA2206 **Credit Units: 02**

Course Objective:
To introduce more techniques of surface printing in one and more colours, creating blocks with cardboard, plywood or linoleum. Experimental printing with other materials.

Course Contents:

Module I
Experimenting and exploring various texture of different surface using materials like wire, wire mesh, coarse cloth, cork, cardboard and ply wood on print surface. Taking monoprints.

Module II
Experimenting with different color-combination and paper surface.

No. of works to be done- 06

Examination Scheme:

Components	P	CT	A	EE

SUMMER PROJECT EVALUATION-I

Course Code: FNA2335 **Credit Units: 03**

Course Objective:
The students have to prepare a summer assignment to develop their creative skills. They also have to prepare summer assignment and give a presentation highlighting the following:

- Balance
- Perspective
- Concept
- Value
- Texture
- Composition
- Art and Artist

Examination Scheme:

Assignment	-	60
Viva voce	-	40
Total	**-**	**100**

COMPOSITION - I

Course Code: FNA2304 **Credit Units: 02**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CARVING - I

Course Code: FNA2305 **Credit Units: 02**

Course Objective:
This course is to learn about working with woods and its various texture to create relief work as well as three-dimensional composition.

Course Contents:

Module I
Introduction to various kinds of wood and carving tools. Practical approach to the introductory phase.

Module II
Simple compositions suitable for curving with appropriate emphasis on techniques.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - I

Course Code: FNA2306 **Credit Units: 02**

Course Objective:
The objective of this course is to train the learners how to work on wall surface using various mural mediums emphasizing technical aspects in details. Mural is a permanent work on building walls inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface using specific materials.

Course Contents:

Module I
Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

Module II
Practical mural work on board using painting mediums.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - I

Course Code: FNA2307 **Credit Units: 02**

Course Objective:
This course is designed to provide an adequate training on photography emphasizing on handling the camera, techniques and equipments. Advanced experiments on nature and indoor subjects based on various kinds of light effects.

Course Contents:

Module I
Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

Module II
Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

ASSEMBLAGE - I

Course Code: FNA2309 **Credit Units: 02**

Course Objective:
This course is to provide basic concept on assemblage work.

Course Contents:

Module I
Introduction to various kinds of materials and their characteristics.

Module II
Practical method of assemblage.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE METHODS AND MATERIALS - I

Course Code: FNA2310 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
Types of clay, Plaster of Paris, Cement & its properties

Module II
Nature and types of wood its growth and process of seasoning use of various tools and equipment.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

Text & References:

DRAWING AND ILLUSTRATION – I

Course Code: FNA2311 **Credit Units: 02**

Course Objective:
Drawing exercises are must to develop creative ability, which is essential for any artist. It is to develop accurate sense of observation and skills of graphic presentation.

Course Contents:

Module I
Life and object study to understand light and shade, half tone and colored. Sketching from nature. Quick sketches in limited time from life and nature - Outdoor as well as indoor.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN-III

Course Code: FNA2312 **Credit Units: 03**

Course Objective:
This will be student's first introduction to design. Students will do small basic level exercises to understand design.

Course Contents:

Module I
Introduction to logo Design and Overlapping of different forms identify proportions with texture black & white and Colour.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

LETTERING AND TYPOGRAPHY – I

Course Code: FNA2313 **Credit Units: 02**

Course Objective:
Study and history of letter forms of both Roman and Vernacular as design form: spacing, study of basic type faces, study of fundamentals of layout and their practical application, preparation of simple typographical layout for News Papers.

Course Contents:

Module I
Study of basic type faces and exercise based on it

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - III

Course Code: FNA2314 **Credit Units: 02**

Course Objective:
This course is designed to provide an adequate training on photography emphasizing on handling the camera, techniques and equipments. Advanced experiments on nature and indoor subjects based on various kinds of light effects.

Course Contents:

Module I
Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

Module II
Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINTING TECHNIQUES – I

Course Code: FNA2315 **Credit Units: 02**

Course Objective:
This course in designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks with linoleum, cardboard, plywood and also serigraphy techniques.

Course Contents:

Module I
Creative experimentation with different colour combinations and paper surface. Printing exercises using relief blocks made from various materials based on different layouts, basically working on serigraphy.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPUTER GRAPHICS – I

Course Code: FNA2316 **Credit Units: 02**

Course Objective:
Introduction to Design software related to designs.

Course Contents:

Module I
Application of Coral Draw software.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING - III

Course Code: FNA2318 **Credit Units: 02**

Course Objective:
The objective of Drawing Exercise is to learn to approach art in most direct way. It is an introduction to various aspects and techniques of drawing exploring variety of drawing tools and mediums such as pencil, charcoal, crayons, ink and color. This exercise provides accuracy in observation and great opportunity to study and experiment expressive force and spontaneity of line work. Drawing is the most significant basic skill of visual representation of real world.

Course Contents:

Module I: Still Life
Drawing exercises from selected arranged objects and drapery to learn and study using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values.

Module II: Portraiture
Portraiture drawing study of human heads, construction of the skull, anatomy, proportion, planes, masses and specific feature; light and shade from different angles and finishing.
Life Drawing-Full Figure: Drawing study from full human figure based on human anatomy, proportion, planes and masses, building blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

Module III: Landscape/ Nature Study (outdoor)
Observation, finding the right view to study, addition and elimination, simplification, eye level and perspective, balance and rhythmic presentation with a unique aesthetic value.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - III

Course Code: FNA2319 **Credit Units: 03**

Course Objective:
This is an intensive training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

Course Contents:

Module I: Still Life
Painting Study (Monochrome)from selected well arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

Module II: Painting from life: portraiture and full figure
Head study and full figure study (monochrome) same as drawing from life models (male & female)

Module III: Landscape
Outdoor study using different painting mediums (water colours/pastel/acrylic etc).

Module IV: Mix Media
Experimentation handling variety of painting mediums including collage and other innovative techniques working on still life, life or nature study to explore beyond traditional and academic method.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION - I

Course Code: FNA2320 **Credit Units: 02**

Course Objective:
Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

Course Contents:

Module I
Composition Exercises working on still life, life and nature study –outdoor and indoor; The 2-D and 3-D objects and the structural possibilities, use of colour and textural values, form and content compositions, use of suitable objects. Exercises based on traditional formats

Module II
Creative composition exercise from traditional paintings and imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING - III

Course Code: FNA2322 **Credit Units: 02**

Course Objective:
This course in designed for learning basic techniques in print making, surface printing relief media and use of printing equipments and tools. This course provides training on technical method of making relief blocks with linoleum, cardboard, plywood and also making blocks using various metal sheets.

Course Contents:

Module I
Creative experimentation with different colour combinations and paper surface. Printing exercises using relief blocks made from various materials based on different layouts, basically working on silkscreen.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

PAINTING METHODS AND MATERIALS - I

Course Code: FNA2324 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
Importance of method & materials.
Permanence and deterioration of paint.

Module II
Nature and characteristic of drawing and painting media such as Pencil, crayon, charcoal, pen and ink, water color, gouache, pastel and oil paint.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION - II

Course Code: FNA2404 **Credit Units: 03**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 6

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CARVING - II

Course Code: FNA2405 **Credit Units: 01**

Course Objective:
The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

Course Contents:

Module I
To make the small maquettes on creative theme, and the concept of mix-media.

Module II
Uses of various carving tools on the given medium. Emphasis on techniques. Enlargement of the maquettes to create the final work.

Module III
Finishing & installing the final work.

No. of works to be done – 6

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - II

Course Code: FNA2406 **Credit Units: 02**

Course Objective:
This course is to train the learners about working on wall surface using various mediums emphasizing technical aspects in details. Mural is a permanent work wall inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface.

Course Contents:

Module I
Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

Module II
Practical mural work on board using painting mediums.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - II

Course Code: FNA2407 **Credit Units: 02**

Course Objective:
This course is to provide a training on photography emphasizing on creative techniques using basic equipments. Experiments on nature and indoor subjects using specific Light arrangements.

Course Contents:

Module I
Indoor project on photography experimenting with light effects.

Module II
Outdoor project exploring various possibilities.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CERAMICS - II

Course Code: FNA2408 **Credit Units: 02**

Course Objective:
This course is designed to provide basic training on ceramics emphasizing on basic techniques.

Course Contents:

Module I
Slab work, wheel work, coil work and tile making in different textures and designs.

Module II
Ceramic clay body making.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN – IV

Course Code: FNA2412 **Credit Units: 03**

Course Objective:
This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work.

Course Contents:
Module II
Introduction to product poster.

Module I
Show cards and other exercises of creative concept.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

COMPUTER GRAPHICS - II

Course Code: FNA2414 **Credit Units: 02**

Course Objective:
Introduction to Design Softwares

Course Contents:

Module I
Working with Coral Draw software for various design purpose.

Module II
Introduction to Adobe Photoshop CS4 or later version for various design purpose.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINTING TECHIQUES - II

Course Code: FNA2415 **Credit Units: 02**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental serigraphy on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using various printing surfaces with serigraphy.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING - IV

Course Code: FNA2417 **Credit Units: 02**

Course Objective:
The objective of Drawing Exercise is to learn to approach art in most direct way. It is an introduction to various aspects and techniques of drawing exploring variety of drawing tools and mediums such as pencil, charcoal, crayons, ink and colour. This exercise provides accuracy in observation and great opportunity to study and experiment expressive force and spontaneity of line work. Drawing is the most significant basic skill of visual representation of real world.

Course Contents:

Module I: Still Life
Drawing with pen and ink. Still life with pen and ink.

Module II: Landscape/ Nature Study (outdoor)
Nature with pen and ink

Module III: Life drawing with charcoal /pencil.

No. of works to be done – 20

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - IV

Course Code: FNA2418 **Credit Units: 03**

Course Objective:
This is an intensive and advanced training to equip the students with a great skill for original and creative visual expression using different painting mediums and tools. Mastery of technical aspects provides essential foundation for the learners, though it is only means, not the end. Painting is the visual expression of thoughts, dreams and experiences. It is an introductory exposure to different schools, traditions, techniques and media of painting practiced through the ages.

Course Contents:

Module I: Still Life
Painting Study (Monochrome) from selected well arranged objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values, colour balance and colour perspective.

- Still life : multi-colour with water colour

Module II: Painting from life
Portraiture and full figure: Head study and full figure study (monochrome) same as drawing from life models (male & female)

- Portrait : multi-colour technique

Module III: Landscape
Copy work from traditional paintings.
Copy work (traditional painting)

Module IV: Mix Media
Copy work (Indian & western) from traditional paintings and opaque colour technique

No. of works to be done – 16

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION – II

Course Code: FNA2419 **Credit Units: 02**

Course Objective:
Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

Course Contents:

Module I
Composition, arrangement of objects, figures and architectures.

Module II
Creative composition exercise from imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation with experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - I

Course Code: FNA2420 **Credit Units: 02**

Course Objective:
The objective of this course is to train the learners how to work on wall surface using various mural mediums emphasizing technical aspects in details. Mural is a permanent work on building walls inside or outside. It provides professional experience and good knowledge of handling fundamentals of working on vertical wall surface using specific materials.

Course Contents:

Module I
Making suitable layout designing for mural work as per the basic technical aspects of working on wall surface, which is to be viewed from wide eye level.

Module II
Practical mural work on board using painting mediums.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING - II

Course Code: FNA2421 **Credit Units: 02**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

Module II
Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING METHODS AND MATERIALS - II

Course Code: FNA2422 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of artwork practically.

Course Contents:

Module I
Nature and characteristics of Drawing and Painting Media such as Pencils, Crayons, Charcoal, Pen and Ink, Water Colour, Gouache, Pastels and Oils.

Module II
Introduction to murals and Print making media.

Module III
Folk Art of India

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRACTICAL TRAINING EVALUATION - I

Course Code: FNA2535 **Credit Units: 03**

Course Objective:

It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

Sufficient time should be allowed for satisfactory completion of reports, taking into account that initial drafts should be critiqued by the faculty guide and corrected by the student at each stage.

BFA (Applied Art)

- Practical work in concerned subject
- Visualization
- Concept of designing

BFA (Painting)

- Concept
- Different technique of painting

BFA (Animation)

- Apply the principle of animation, animation using software
- Short animation clip

Examination Scheme:

Project Report:	60
Viva Voce:	40
Total:	**100**

STUDY FROM LIFE - III

Course Code: FNA2503 **Credit Units: 03**

Course Objective:
The objective of sculptural study from life is to learn human forms in details. It provides the skill to sculpt human figure in realistic way based on anatomy, planes, body masses, balance, posture and rhythm.

Course Contents:

Module I:
Life Drawing:- Bust & Portrait:- Study of Human Portrait and bust using different drawing tools to study blocks, posture and rhythm, unity of body parts, inter-related force of lines, foreshortening and finishing.

Module II
Head Study Male & Female, Building of Armature study in clay and direct plaster.

Module III
Understanding of structure and proportion and detail modeling of full figure. Waste mould technique & casting in PoP.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION - III

Course Code: FNA2504 **Credit Units: 02**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

METAL CASTING - I

Course Code: FNA2505 **Credit Units: 02**

Course Objective:
This course provides the knowledge on working with metals.

Course Contents:

Module I
Methods of casting – lost wax and sand process.

No. of works to be done – 03

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - III

Course Code: FNA2506 **Credit Units: 02**

Course Objective:
This course is to innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

Course Contents:

Module I
Designing for mural work as per the advanced technique of working on wall surface with tempera, acrylic, encaustic, fiber glass etc.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - III

Course Code: FNA2507 **Credit Units: 02**

Course Objective:
The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments on nature, depending upon time and mood. It also provides experimental experience on indoor subjects.

Course Contents:

Module I
Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

CERAMICS - III

Course Code: FNA2508 **Credit Units: 02**

Course Objective:
This course is to provide training on creative aspects on ceramics.

Course Contents:

Module I
Slab work, wheel work, coil work and tile making in different textures and designs.

Module II
Ceramic claybody making

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ASSEMBLAGE - III

Course Code: FNA2509 **Credit Units: 02**

Course Objective:
This course is designed to provide experimental training on assemblage.

Course Contents:

Module I
Methods of various assemblage techniques

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE METHODS AND MATERIALS - III

Course Code: FNA2510 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
Analysis of fundamentals of sculpture in various media.

Module II
Enlarging and reducing devices. Taking points for copying sculpture.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING AND ILLUSTRATION – III

Course Code: FNA2511 **Credit Units: 02**

Course Objective:
Drawing exercises are must to develop creative ability which is essential for any artist. It is to develop accurate sense of observation and skills of graphic presentation. Exercises on illustration for various needs of the clients.

Course Contents:
Module I
Study of human figure draped and undraped to study volume, proportion, mass, weight, and anatomy with the aid of light and shade.

Module II
Developing compositions through studies working in colour mediums.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN – V

Course Code: FNA2512 **Credit Units: 03**

Course Objective:
This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work. To understand the needs of visual communications.

Course Contents:

Module I
Comparatively study of different types of Indoor layouts like Designing for press, Brouchers and magazine advertisements etc.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

PACKAGING – I

Course Code: FNA2513 **Credit Units: 02**

Course Objective:
This will be student's first introduction to various packaging design according to the environment, occasions and need. Students will do small basic level layouts exercises to understand design of packaging.

Course Contents:

Module I
Study the basic layouts of Label Design, Box design and shopping Bags and their practical application.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

COMPUTER GRAPHICS – III

Course Code: FNA2514 **Credit Units: 02**

Course Objective:
To understand Computer Software related to Design.

Course Contents:

Module I
Tools interface and applications of Adobe Photoshop CS4 (or above) and Use of Adobe Photoshop CS4 (or above) software to create different types of layouts.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

PRINTING TECHNIQUES-III

Course Code: FNA2515 **Credit Units: 02**

Course Objective:
This course in designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks.

Course Contents:

Module I
Originals for reproduction (monochrome, line originals)
Photographic materials and equipments.
Line negative making.
Line block-making

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

TEXTILE DESIGN-I

Course Code: FNA2516 **Credit Units: 02**

Course Objective:
To enable creation of various types of textile designs and patterns

Course Contents:

Module I
Fundamental of Textile Design: Motif, Repeat & Design Concept, Setting of Repeat & Change or Repeat into Design.

Module II

Design for Weaving:
a. Weaving Texture
b. Stripe & Check Effect
c. Floral Design

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

DRAWING - V

Course Code: FNA2518 **Credit Units: 02**

Course Objective:
The objective of Drawing Exercise is to practice the basic technique in direct way emphasizing on various aspects and techniques of drawing in advanced concept, exploring and experimenting variety of drawing tools and mediums in traditional way as well as innovative way. This exercise provides accuracy in observation and great opportunity to face the challenge and experiment possibilities in line work.

Course Contents:

Module I: Still Life
Study of selected assorted objects in advanced drawing techniques using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values in analytical process.

Module II: Landscape/ Nature Study (outdoor)
Advanced training in landscape drawing depending upon artist's observation, concept of addition and elimination, simplification. Study from nature as a controlled design, difference of handling near and distant objects.

Module III: Life Drawing- Portraiture
Advanced drawing study of human heads based on proportion, masses and specific feature and character using various media with emphasize on manner of finished execution.
Life Drawing-Full Figure: Advanced drawing study from full human figure based on structure of human form and anatomy using life models

Module IV: Sketching
Quick sketches in limited time from life and nature exploring innovative possibilities emphasizing on advanced techniques - Outdoor and indoor.

No. of works to be done – 20

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - V

Course Code: FNA2519 **Credit Units: 03**

Course Objective:
Painting is a visual experience with various medium and techniques .learning the fundamental methods of painting will lead to an individual style of painting .developing skill and experimenting different media of painting working in water colour , acrylic and oil colour technique.

Course Contents:

Module I: Still Life
Advanced Painting Study in water colour from selected assorted objects along with drapery; emphasizing on composition, eye level, structure, relative proportion and perspective, source of light and its effect, tonal and textural values with appropriate colour balance and colour perspective.

Module II: Painting from life
Portraiture: Advanced study of human head using colours. The knowledge of advanced techniques of colour application

Module III: Landscape
Figurative composition with opaque colour treatment.

Module IV: Mix Media
Experimentation with various painting mediums exploring innovative techniques to represent thoughts in creative form. Use of various tools like roller, spetuta etc.

No. of works to be done – 16

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION – III

Course Code: FNA2520 **Credit Units: 02**

Course Objective:
Composition exercise is the most important to learn and study theory of composition, individual approach to the possibilities. Experimenting innovative arrangement of the thing around to create unique visual presentation improves artistic sense and concept of beauty.

Course Contents:

Module I
Composition, arrangement of objects, figures and architectures.

Module II
Creative composition exercise from imagination emphasizing on individual creative sense, transformation of simple shapes into well-balanced unique visual presentation with experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY- III

Course Code: FNA2521 **Credit Units: 02**

Course Objective:
The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments on nature, depending upon time and mood. It also provides experimental experience on indoor subjects.

Course Contents:

Module I
Basic use of camera, observation according to photographic angles, selection of subject, composition exploring indoor and outdoor situations including effects of light.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING- III

Course Code: FNA2522 **Credit Units: 02**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

Module II
Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media and further experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

TRADITIONAL PAINTING-I

Course Code: FNA2523 **Credit Units: 02**

Course Objective:
To introduce Indian traditional art and painting techniques and styles

Course Contents:

Module I
Rajasthani Miniature
Mughal Miniature
Pahari Miniature
Nathdwara and Tanjore Paintings

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING METHODS AND MATERIALS - III

Course Code: FNA2524 **Credit Units: 02**

Course Objective:
The Course is planned to provide technical knowledge of various mediums, techniques and tools used for different kinds of artwork practically.

Course Contents:

Module I
Preparation of canvas
Streching and framing of canvas & Traditional and Folk Paintings making Process etc.

Module II
Lithography, silkscreen and etching methods and experimental approach.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PROJECT-I

Course Code: FNA2532 **Credit Units: 03**

Course Objective:
The objective of this course is to help the students with an opportunity to further their intellectual and personal development in the chosen field by undertaking a significant practical unit of activity. The project can be defined as a scholarly inquiry into a problem or issue, involving a systematic approach to gathering and analysis of information/data, leading to production of a structured Report.

Chapter Scheme and distribution of marks:

Chapter 1: Introduction – 10 marks
Chapter 2: Conceptual Framework/National/International Scenario – 25 marks
Chapter 3: Presentation, Analysis & Finding – 25 marks
Chapter 4: Conclusion & Recommendations – 10 marks
Chapter 5: Bibliography – 05 marks

Selection of the Topic for the project by taking following points into consideration:

- Suitability of the topic
- Relevance of the Topic
- Time available at the disposal

Examination Scheme:

Components	**Project Report**	**PowerPoint Presentation & Viva**
Weightage (%)	75	25

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

Note:-
Marking is completely based on submitted project Report

DISSERTATION-I

Course Code: FNA2637 **Credit Units: 06**

Course Objective:
This course is to continue the research work to put the collected materials together for developing the body of the dissertation on the particular subject.
Putting up the necessary photographs, reproductions with the text materials.

Course Contents:

Module I
Preparing the final paper along with necessary photographs, reproductions with detail information.

Module II
Submission and review of printed dissertation paper.

Examination Scheme:

Components	PR	PS	V
Weightage (%)	70	15	15

(**V**- Viva**; PR**- Project Report**; PS;** Presentation)

Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Course Code: FNA2604 **Credit Units: 02**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

METAL CASTING - II

Course Code: FNA2605 **Credit Units: 02**

Course Objective:
The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

Course Contents:

Module I
Making maquettes in wax or clay alongwith addition, alteration & modification depending upon the layout. Enlargement of the maquette in round or relief

Module II
Student will learn the process of sand casting.

Module III
Finishing, grinding, buffing, and polishing.

No. of works to be done – 03

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - IV

Course Code: FNA2606 **Credit Units: 02**

Course Objective:
This course is to provide advanced training to work on wall surface using various mediums emphasizing all possible techniques. It provides professional exposure and professional knowledge of handling mural materials.

Course Contents:

Module I
Practical mural work on slab using mosaic tiles

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - IV

Course Code: FNA2607 **Credit Units: 02**

Course Objective:
The objective of this course is to provide advanced exposure on photography highlighting on all possible creative aspects on natural subjects and also indoor subjects.

Course Contents:

Module I
Introduction to the process of developing and printing, films and their sensitivity. Basic knowledge of photo printing papers and various chemicals.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CERAMICS - IV

Course Code: FNA2608 **Credit Units: 02**

Course Objective:
This course is to provide training on creative techniques on ceramics.

Course Contents:

Module I
Creating innovative texture and design on claywork.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ASSEMBLAGE - IV

Course Code: FNA2609 **Credit Units: 02**

Course Objective:
This course is designed to provide creative experimental training on assemblage.

Course Contents:

Module I
Methods of technical assemblage aesthetically

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE METHODS AND MATERIALS - IV

Course Code: FNA2610 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
Types of clay, Plaster of Paris, Cement & its properties

Module II
Nature and types of wood its growth and process of seasoning use of various tools and equipments.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING AND ILLUSTRATION – IV

Course Code: FNA2611 **Credit Units: 02**

Course Objective:
Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

Course Contents:

Module I
Illustrate children story book.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN – VI

Course Code: FNA2612 **Credit Units: 03**

Course Objective:
This course provides a clear concept of various aspects of designing. It is specially planned for a graphic artist to enable students to develop a commercial skill in design work.

Course Contents:

Module I
Comparatively study of different types of outdoor layouts like Hording, bus shelter, Poster etc

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PACKAGING - II

Course Code: FNA2613 **Credit Units: 02**

Course Objective:
Making of various packaging according to products environment and needs

Course Contents:

Module I
Advanced exercises on packaging according to various shapes and styles.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINTING TECHNIQUES-IV

Course Code: FNA2614 **Credit Units: 02**

Course Objective:
This course in designed for learning basic techniques in print making, surface printing relief media and use of printing equipment and tools. This course provides training on technical method of making relief blocks.

Course Contents:

Module I
Originals for reproduction (Monochrome, half tone originals)
Half tone negative –making.
Half tone block making.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPUTER GRAPHICS – IV

Course Code: FNA2615 **Credit Units: 01**

Course Objective:
To work on design related software's for various purpose.

Course Contents:

Module I
Tools interface and Applications of Flash software.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

TEXTILE DESIGN-II

Course Code: FNA2616 **Credit Units: 02**

Course Objective:
To enable creation of various types of textile designs and patterns.

Course Contents:

Module I
Fundamental of Textile Design: Motif, Repeat & Design Concept, Setting of Repeat & Change or Repeat into Design.

Module II

Design for Block Printing :

- Design for Block Printing
- Design for Screen Printing

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING - VI

Course Code: FNA2618 **Credit Units: 02**

Course Objective:
This course will be found on learning pen & ink drawing technique depicting various objects and nature. It is to devlop skill in handling black and white distribution, tonal various and texture which will lead to expertise in visualization.

Course Contents:

Module I: Still Life in pen & ink
Study of selected assorted objects in advanced drawing techniques using various drawing tools based on eye level, relative proportion, perspective, structure, form, volume, texture, source of light and its effect, balance and also tonal values in analytical process.

Module II: Landscape/ Nature Study (outdoor) in pen & ink
Advanced training in landscape drawing depending upon artist's observation, concept of addition and elimination, simplification. Study from nature as a controlled design, difference of handling near and distant objects.

Module III: Life Drawing- Portraiture in pen & ink
Advanced drawing study of human heads based on proportion, masses and specific feature and character using various media with emphasize on manner of finished execution.
Life Drawing-Full Figure: Advanced drawing study from full human figure based on structure of human form and anatomy using life models.

No. of works to be done – 20

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING - VI

Course Code: FNA2619 **Credit Units: 03**

Course Objective:
This is an intensive and advanced training in painting using variety of painting mediums and tools. Mastery of technical aspects of painting provides advanced knowledge for the learners. It is an exposure to different schools, traditions, techniques and media of painting practiced through the ages in details.

Course Contents:

Module I: Still Life
Creative composition in acrylic or oil colour on canvas.

Module II: Painting from life
Portraiture and full figure: Advanced study of human head and full figure using colours. The knowledge of advanced techniques of colour application in monochrome and full colour.

Module III: Landscape
Exploring outdoor painting to capture the various moods of nature.

Module IV: Mix Media
Experimentation with various painting mediums exploring innovative techniques to represent thoughts and dreams in creative form.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPOSITION - IV

Course Code: FNA2620 **Credit Units: 02**

Course Objective:
The objective of composition exercise is to study theory of composition, individual approach to the possibilities. Exploration of creative composition of the real world and imaginary world in unique visual presentation, to improve concept of creative sense.

Course Contents:

Module I
Composition Exercises working on still life, life and nature study – outdoor and indoor. The 2-D and 3-D objects, pictorial space, forms sub division and grouping. Use of colour and textural values

Module II
Creative composition exercise based on individual layouts using various painting mediums giving more stress on oil on canvas also on acrylic.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - II

Course Code: FNA2621 **Credit Units: 02**

Course Objective:
This course is to innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

Course Contents:

Module I
Designing for mural work as per the advanced techniques of working on wall surface with tiles, Arrangement of tiles and fixing on board for final execution.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

Text & References:

PRINT MAKING-II

Course Code: FNA2622 **Credit Units: 01**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

Module II
Advanced experimentation with monochrome & multi-color lithography etching – intaglio/photo process, advanced print making, use of multicolor relief print and mixed media and further experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING METHODS AND MATERIALS - IV

Course Code: FNA2623 **Credit Units: 02**

Course Objective:
The Course is planned to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
Classification and variation of colours.
Chemical factors and cause of changing colours.

Module II
Techniques of fresco painting
Tempara Techniques

Module III
Cataloging, Concept of art galleries and auction houses.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPUTER ANIMATION – II

Course Code: FNA2624 **Credit Units: 03**

Course Objective:
Objective of this course is to undergo Maya deformers, rigging, animation, dynamics, lighting, rendering so the student can have complete knowledge of the software.

Course Contents:

Module I
Deformers, Rigging, Animation

Module II
Dynamics, Lighting & Rendering

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRACTICAL TRAINING EVALUATION-II

Course Code: FNA2735 **Credit Units: 02**

Course Objective:
The Practical Training can best be described as an attempt to institutionalize efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal class room situations. The students have to prepare a project and give a presentation highlighting the following:

BFA (Applied Art)
- Organizational structure
- Design Development
- Software's used for designing
- Type of printing machines used
- Industry feedback

BFA (Painting)
- About Senior Artist and his/her history, work style etc.
- Student's independent work style.

BFA (Animation)
- Organizational structure
- Demo reel
- Software's used for 2D / 3D animation
- Personal review of the students management skill
- Animation studio feedback

Assessment Scheme:

Continuous Evaluation: (based on Internship File and the observations of the faculty guide/ supervisor)	15%
Feedback from Company/ Organization:	25%
Final Evaluation: (Based on Internship Report, Viva/ Presentation)	60%

COMPOSITION - V

Course Code: FNA2703 **Credit Units: 02**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Detailed and advance sketches in clay of given subjects and the enlargement in round and relief exploring various possible techniques of moulding and casting, direct building processes.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

METAL CASTING - III

Course Code: FNA2704 **Credit Units: 02**

Course Objective:
The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

Course Contents:

Module I
Making maquettes in wax or clay alongwith addition, alteration & modification depending upon the layout. Enlargement of the maquette in round or relief.

Module II
Student will learn the process of sand casting

Module III
Finishing, grinding, buffing, polishing

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL - V

Course Code: FNA2705 **Credit Units: 02**

Course Objective:
This course is to provide an advanced training on Mural.

Course Contents:

Module I
Experimentation on mural work in professional way with direct and indirect methods, designs, materials and techniques including Mosaic tiles, Fresco, Encaustic and assemblage along with glaze, distemper, plastering and installing on wall.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY - V

Course Code: FNA2706 **Credit Units: 02**

Course Objective:
This course is to provide an advanced training on photography.

Course Contents:

Module I
Advanced training on photography capturing various moods from nature & indoor subjects with special light effects emphasizing on different types of lances to explore experimental photographic techniques.

No. of works to be done – 20

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CERAMICS - V

Course Code: FNA2707 **Credit Units: 02**

Course Objective:
This course is to provide training on creative techniques on ceramics.

Course Contents:

Module I
Working on 3D creative form, introduction to glazing.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ASSEMBLAGE - V

Course Code: FNA2708 **Credit Units: 02**

Course Objective:
This course is designed to provide creative experimental training on assemblage.

Course Contents:

Module I
Advanced creative assemblage.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE METHODS AND MATERIALS - V

Course Code: FNA2709 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
System of indigenous casting foundry practice, metals and alloys.

Module II
Coppers and its alloys, metals and alluminium etc. melting points of different metals. Properties of bronze preparation of modeling was and reins, finishing and technical treatments.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN - VII

Course Code: FNA2710 **Credit Units: 05**

Course Objective: Students will learn the various exercises of Design according to the promotion of products and services.

Course Contents:

Module I
Promotional campaign for any product (indoor as well as outdoor advertisement)
Create a distinct brand identity campaign design for product, services and social awareness while building networking and entrepreneurial skills. With the help of print media, broadcast and social media promotion. Working on a Social Design research-based project leads you to evolve into ethical and purposeful design professionals committed to designing for a better future.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

PACKAGING - III

Course Code: FNA2711 **Credit Units: 03**

Course Objective:
Various Packaging Designs.

Course Contents:

Module I
3D forms in thermo coal & card board etc.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING AND ILLUSTRATION-V

Course Code: FNA2712 **Credit Units: 02**

Course Objective:
Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

Course Contents:

Module I
Illustrate Graphic Novels and Book/Magazine Covers.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPUTER GRAPHICS – V

Course Code: FNA2713 **Credit Units: 02**

Course Objective:
To work on design related software's for various purpose.

Course Contents:

Module I
Advance study of Flash software and Applications.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY-V

Course Code: FNA2714 **Credit Units: 02**

Course Objective:
The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments in darkroom on light control, developing and fixing the pictures. It also provides experimental experience on indoor and outdoor subjects.

Course Contents:

Module I
Experiments on indoor and outdoor subjects. Post Production research in dark room.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING - VII

Course Code: FNA2716 **Credit Units: 03**

Course Objective:
Advanced drawing exercise is an exposure to various creative aspects and contemporary techniques of drawing exploring all available drawing tools and mediums such as pencil, charcoal, crayons, ink, colour and brush. This exercise provides accuracy in observation and wide opportunity to study and experiment variety of significant possibilities of line work.

Course Contents:

Module I: Portrait study
Portrait study with charcoal from model, life study.

Module II: life study
Life study from a model in different media of drawing**.**

Module III: Full Figure
Advanced drawing study of human head and full body (male & female) exploring complex detailing and finishing from different viewpoints and angles using suitable drapery background and surrounding.

Module IV: creative and indivisual composition using pen and ink

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING & COMPOSITION - I

Course Code: FNA2717 **Credit Units: 05**

Course Objective:
Painting is an activity which requires a long time involvement to achieve excellence. This stage to explore one's own ideas and style. Studying various schools of art, traditional to modern and contemporary. This stage is to focus in one particular style of his or her own after learning various techniques of paintings. The students would produce/create a number of works of art, paintings and drawings in a fashion of specializing in the subject. It is to specialize in thinking and imagination which create good art.

Advanced exercise on composition work provides thorough knowledge on theory of composition, individual approach to the possibilities and experimental innovative aspects to create unique visual presentation enriched with artistic and aesthetic value. Working with figurative and non-figurative arrangement of objects.

Course Contents:
Module I
Sketching/making layouts based onlife experience, culture and people
Human Figure Study Based on Models from Various Perspective.
Medium: Pastel (dry/oil)/water colour etc.

Module: II
Painting on individual composition based on thelayouts.
Painting Using Digital Media Application and Mixed Media.

Module III
Composition Exercises working on objects from real life and nature. Creative transformation of real world according to the possibilities (2-D & 3-D), use of colour and textural values, forms and individual expression.
Medium: Acrylic/oil/tempara on canvas/paper/board.

Module IV
Creative composition exercise from imagination emphasizing on individual vision and concept, complete pictorial interpretation, theme, expression of moods, symbolism, dramatization, and distortion for emotional effect. Project on independent creative work.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

MURAL - III

Course Code: FNA2718 **Credit Units: 02**

Course Objective:
This course is for innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

Course Contents:

Module I
Designing for mural work as per the advanced techniques of working on wall surface with tiles .arrangement of tiles and fixing on board.

Module II
Relief mural in P.O.P & mix media.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING - III

Course Code: FNA2719 **Credit Units: 02**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

Module II
Advanced experimentation with monochrome & multi-color lithography, etching – intaglio/photo process, aquatint, mezzotint, advanced print making, use of multicolor relief print and mixed media and further experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

PAINTING METHODS AND MATERIALS - V

Course Code: FNA2720 **Credit Units: 02**

Course Objective:
This course is designed to provide a thorough knowledge of methods and technical aspects of drawing and painting work. It helps the students to handle the materials and tools in scientific way.

Course Contents:

Module I
Technique of Jaipur Murals.
Ceramics, glass and terra-cotta tiles.

Module II
Various modern techniques in Painting and Printmaking.
Restoration and Preservation.

Module III
Exhibition Display and Lighting.

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PORTFOLIO DEVELOPMENT AND PRESENTATION WITH EXHIBITIONS

Course Code: FNA2837 **Credit Units: 5**

Course Objective:
Portfolio Development & Presentation is for the students who are in the final stage of specialization in a particular subject. The students are to prepare a portfolio which contains all type of works relating to the subjects studied by them.

Course Contents:
Submission & Presentation

Module I
As decided by faculty.

Examination Scheme:

Components	C	P	A	EE (Presentation, Report & Viva)
Weightage (%)	15	10	5	70

FOR ANIMATION SPECIALIZATION

Course Objective:
The objective of this course is to help the student in their preparation of their Demo Reel and let them understand the pipeline procedure of the industry by working in groups.

Course Contents:

Methodology
Students are advised to work on individual short animation clip.

Examination Scheme:

Components	P	C	A	FP
Weightage (%)	10	15	5	70

COMPOSITION - VI

Course Code: FNA2803 **Credit Units: 02**

Course Objective:
The Objective of Composition exercise is the key to study theory of composition in sculptural 3 Dimensional representations of thoughts and concepts. This work provides a meaningful knowledge on creative expression.

Course Contents:

Module I
Sketches in clay of given subjects and the enlargement in round and relief with two of more human figure, birds animals, moulding and casting, direct building processes. Plaster, Cement and terracotta.

Module II
Building of armature for direct work in plaster or cement on the given topic.

Module III
Waste mould and piece mould technique and casting in wax.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

METAL CASTING - IV

Course Code: FNA2804 **Credit Units: 02**

Course Objective:
The course is designed to improve the skills in working with these two mediums based on textural values and technical differences chiseling out artist's own expressions.

Course Contents:

Module I
Taking a waste or piece moulds in PoP. Casting in this mould with wax and fixing runners and risers and preparation of mould for firing.

Module II
Firing of the mould in a kiln. And pouring of molten metal.

Module III
Breaking open the mold and cutting of runners and risers. Grinding buffing and polishing and patina.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL-IV

Course Code: FNA2805 **Credit Units: 02**

Course Objective:
This course is to provide an advanced training on Mural.

Course Contents:

Module I
Experimentation on mural work in professional way with direct and indirect methods, designs, materials and techniques including Mosaic tiles, Fresco, Encaustic and assemblage along with glaze, distemper, plastering and installing on wall.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY-IV

Course Code: FNA2806 **Credit Units: 02**

Course Objective:
This course is to provide an advanced training on photography.

Course Contents:

Module I
Advanced training on photography capturing various moods from nature & indoor subjects with special light effects emphasizing on different types of lances to explore experimental photographic techniques in dark room and out door.

No. of works to be done – 20

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

CERAMICS-IV

Course Code: FNA2807 **Credit Units: 02**

Course Objective:
This course is to provide training on creative techniques on ceramics.

Course Contents:

Module I
Working on 3D creative form, introduction to glazing.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ASSEMBLAGE-IV

Course Code: FNA2808 **Credit Units: 02**

Course Objective:
This course is designed to provide creative experimental training on assemblage.

Course Contents:

Module I
Advanced creative assemblage.

No. of works to be done – 06

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

SCULPTURE METHODS AND MATERIALS-IV

Course Code: FNA2809 **Credit Units: 02**

Course Objective:
The Course is planned for detailed training on methods and materials to work with through the edges. It is to provide technical knowledge of various mediums, techniques and tools used for different kinds of art work practically.

Course Contents:

Module I
System of indigenous casting foundry practice, metals and alloys.

Module II
Coppers and its alloys, metals and aluminum etc. melting points of different metals. Properties of bronze preparation of modeling was and reins, finishing and technical treatments.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DESIGN-VIII

Course Code: FNA2810 **Credit Units: 05**

Course Objective: Students will learn the various exercises of Design according to the promotion of products and services.

Course Contents:

Module I

Promotional campaign for any product (indoor as well as outdoor advertisement)

Portfolio Development according to the industry requirement. Professional portfolio page on behance and academic, designer profile on linked in. Complete self-branding of print media and Digital research portfolio.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(A-Attendance; P-Project/Seminar/Quiz/Viva; HA-Home Assignment; CT-Class Test; EE-End Semester Examination; PT- Portfolio)

PACKAGING-IV

Course Code: FNA2811 **Credit Units: 03**

Course Objective:
Various Packaging Designs

Course Contents:

Module I
3D forms in thermo coal & card board etc.

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING AND ILLUSTRATION-VI

Course Code: FNA2812 **Credit Units: 02**

Course Objective:
Drawing exercises are to learn accurate observation and skills of graphic presentation, and various exercises on illustrations.

Course Contents:

Module I
Illustrate Graphic Novels and Book/Magazine Covers.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

COMPUTER GRAPHICS-VI

Course Code: FNA2813 **Credit Units: 02**

Course Objective:
To work on design related software's for various purpose.

Course Contents:

Module I
Advance study of Flash software and Applications.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PHOTOGRAPHY-VI

Course Code: FNA2814 **Credit Units: 02**

Course Objective:
The objective of this course is to provide an experimental exposure on photography highlighting on creative aspects. Experiments in darkroom on light control, developing and fixing the pictures. It also provides experimental experience on indoor and outdoor subjects.

Course Contents:

Module I
Experiments on indoor and outdoor subjects. Post Production research in dark room.

No. of works to be done – 12

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

DRAWING-VIII

Course Code: FNA2816 **Credit Units: 03**

Course Objective:
Advanced drawing exercise is an exposure to various creative aspects and contemporary techniques of drawing exploring all available drawing tools and mediums such as pencil, charcoal, crayons, ink, colour and brush. This exercise provides accuracy in observation and wide opportunity to study and experiment variety of significant possibilities of line work.

Course Contents:

Module I: Portrait study
Portrait study with charcoal from model, life study.

Module II: life study
Life study from a model in different media of drawing**.**

Module III: Full Figure
Advanced drawing study of human head and full body (male & female) exploring complex detailing and finishing from different viewpoints and angles using suitable drapery background and surrounding.

Module IV: creative and indivisual composition using pen and ink

No. of works to be done – 08

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PAINTING & COMPOSITION-II

Course Code: FNA2817 **Credit Units: 05**

Course Objective:
Painting is an activity which requires a long time involvement to achieve excellence. This stage to explore one's own ideas and style. Studying various schools of art, traditional to modern and contemporary. This stage is to focus in one particular style of his or her own after learning various techniques of paintings. The students would produce/create a number of works of art, paintings and drawings in a fashion of specializing in the subject. It is to specialize in thinking and imagination which create good art.
Advanced exercise on composition work provides thorough knowledge on theory of composition, individual approach to the possibilities and experimental innovative aspects to create unique visual presentation enriched with artistic and aesthetic value. Working with figurative and non-figurative arrangement of objects.

Course Contents:
Module I
Creative Sketching Based on Surround Observation and Life Experiences.
Human Figure Study Based on Models from Various Perspective.
Medium: Pastel (Dry/Oil)/Water Colour and Mixed Media.

Module: II
Creative Painting on Individual Compositions Based on Own Concept.
Creative Painting Using Digital Media Application and Mixed Media.
Medium: Any Mediums

Module III
Composition Exercises working on objects from real life and nature. Creative transformation of real world according to the possibilities (2-D & 3-D), use of colour and textural values, form and individual expression
Medium: Acrylic/oil/tempara on canvas/paper/board.

Module IV
Creative composition exercise from imagination emphasizing on individual vision and concept, complete pictorial interpretation, theme, expression of moods, symbolism, dramatization, and distortion for emotional effect. Project on independent creative work.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

MURAL-IV

Course Code: FNA2818 **Credit Units: 02**

Course Objective:
This course is for innovative training to work on wall surface using various mediums emphasizing technical aspects. It provides professional exposure and good knowledge of handling mural materials to work on wall surface.

Course Contents:

Module I
Designing for mural work as per the advanced techniques of working on wall surface with tiles .arrangement of tiles and fixing on board.

Module II
Relief mural in P.O.P & mix media.

No. of works to be done – 04

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

PRINT MAKING-IV

Course Code: FNA2819 **Credit Units: 02**

Course Objective:
This course in designed for learning techniques in print making, surface relief printing using printing equipment and tools. This course provides technical training on method of making experimental relief blocks on various surfaces.

Course Contents:

Module I
Exploring various texture of different surface by using materials including metal sheets like zinc plate and aluminum sheet.

Module II
Advanced experimentation with monochrome & multi-color lithography, etching – intaglio/photo process, aquatint, mezzotint, advanced print making, use of multicolor relief print and mixed media and further experimentation.

No. of works to be done – 10

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

PAINTING METHODS AND MATERIALS-VI

Course Code: FNA2820 **Credit Units: 02**

Course Objective:
This course is designed to provide a thorough knowledge of methods and technical aspects of drawing and painting work. It helps the students to handle the materials and tools in scientific way.

Course Contents:

Module I
Technique of Jaipur Murals.
Ceramics, glass and terra-cotta tiles.

Module II
Various modern techniques in Painting and Printmaking.
Restoration and Preservation.

Module III
Exhibition Display and Lighting.

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

VISUALIZATION - I

Course Code: FNA4101 **Credit Units: 08**

Course Objective:
Additionally for MFA students, to develop further an ability to pursue independent research and articulate ideas in writing through a sound understanding of a range of historical, theoretical and philosophical approaches to art and an understanding of the relevance of these to their work

Course Contents:

Module I
Introduction to Visualization

Module II
Execution of ONE advertising campaigns on consumer's Institutional (Services), related with any of the appropriate medias including Print, Television, Transit etc. and in various techniques available

Module III
Photography module:
a) Product Shoot
b) Models shoot
c) Creative photography
These shoots are to be utilized in the campaign making process by the students.

Module IV
Advanced learning of Corel draw and Photoshop software

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam

GRAPHIC DESIGNING - I

Course Code: FNA4102 **Credit Units: 08**

Course Objective:
Graphic designing is a creative field of work which involves imagination in communicating with users It deals with working with object, shape, text, images etc, It is uses to create corporate identity. Brochures, advertisements, print media, product, packaging and icon etc. The objective of this course is to make the students professionals and fully equipped with the software. So that the software's become just a more tool for hem to execute the finished artworks

Software's introduced:
Adobe Illustrator: Adobe Photoshop, Corel Draw

Course Contents:

Module I
To edit photographs, create artistic imagery

Module II
To create illustrations, logos

Module III
Product window display for interactive media

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

DRAWING - I

Course Code: FNA4106 **Credit Units: 08**

Course Objective:
The course is to develop professional drawing skill through anatomical study of human figure. This drawing activity is to learn creating big sized drawing on bigger space to capture life size drawing. The drawing exercise to be done from a model in front is called life study.
Secondly this course is also to execute creative drawing based on life experience or to depict socio cultural aspect or conceptualization of new ideas.

Course Contents:

Module I: Life Study
Life study from life model

Module II: Creative Drawing
Creative drawing (figurative/non-figurative)

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(**A**-Attendance; **PT**- Portfolio; **HA**-Home Assignment; **CT**-Class Test)

CREATIVE PAINTING - I

Course Code: FNA4107 **Credit Units: 08**

Course Objective:
Life study in acrylic or oil colour on canvas from life model to exercise figurative painting technique, colour and tonal variation to create three dimensional human figure. An approach to achieve professional level realistic painting skill.
After life study the students are to give the task of innovative and experimental work. This is to execute acrylic or oil colour painting on canvas based on given themes or on themes will be chosen by the students themselves to achieve individual or original style of rendering painting. It is to explore various mediums of painting with new ideas and perception.

Course Contents:

Module I: Life Study
Life Study from life model.

Module II: Creative Painting
Painting based on social or individual experience based themes.

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(**A**-Attendance; **PT**- Portfolio; **HA**-Home Assignment; **CT**-Class Test)

MURAL (PAINTING) - I

Course Code: FNA4108 **Credit Units: 08**

Course Objective:
The objective of this course is to provide working knowledge on wall surface. It gives a detail exposure about all kinds of mural techniques.

Course Contents:

Module I
Preparing suitable layout for mural followed by modification required according to the materials to be used

Module II
Preparing the base and surface

Module III
Final work followed by the installation

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(**A**-Attendance; **PT**- Portfolio; **HA**-Home Assignment; **CT**-Class Test)

Text & References:

DISSERTATION AND VIVA - I

Course Code: FNA4337 **Credit Units: 02**

Course Objective:

PAINTING-
This course is about research work on a particular school of art, artist so on. It is for enrichment of professional knowledge through detail study and research about the field and artist as well. It focuses to put authentic information with analytical approach.
This paper is to be submitted in a form of a report, printed with necessary and authentic reproductions, photographs, or images as illustrations.

Portfolio development is also a part of this course. This project compiles the selected art works have been executed during MFA programme (first and second year both). The portfolio development project has the purpose of preparing students for future prospects in the professional field.

APPLIED ARTS & SCULPTURE-
This is to provide professional exposure for the researchers.

Course Contents:

Module I
a. Research work on the given topic from various sources like art institutes, galleries, libraries so on.
b. Collecting materials like notes, photographs and reproductions.

Module II
Portfolio development project (compiling of selected art works).

Examination Scheme:

Components	PR	PS	V
Weightage (%)	70	15	15

MURAL (SCULPTURE) - IV

Course Code: FNA4413 **Credit Units: 08**

Course Objective:
The objective of this course is to provide advanced techniques of working knowledge on wall surface. It gives a professional exposure about all kinds of mural work including mixed materials.

Course Contents:

Module I
Preparing suitable layout for mural followed by modification required according to the materials to be used.

Module II
Preparing the base and surface.

Module III
Final work followed by the installation**.**

Examination Scheme:

Components	**A**	**PT / HA / CT**	**End Term Exam**	
			Project (Display & Viva)	**Exam (Practical)**
Weightage (%)	5	25	30	40

(**A**-Attendance; **PT**- Portfolio; **HA**-Home Assignment; **CT**-Class Test)

CREATIVE SCULPTURE - IV

Course Code: FNA4414 **Credit Units: 08**

Course Objective:
This is to provide professional experience about working on sculpture using various materials.

Course Contents:

Module I
Abstract Composition supported by preparatory studies and techniques.

Examination Scheme:

Components	A	PT / HA / CT	End Term Exam	
			Project (Display & Viva)	Exam (Practical)
Weightage (%)	5	25	30	40

(**A**-Attendance; **PT**- Portfolio; **HA**-Home Assignment; **CT**-Class Test)

ART CRITICISM (SCULPTURE) - II

Course Code: FNA4415 **Credit Units: 03**

Course Objective:
The objective of this course is to provide Critical Study of Art.

Course Contents:

Module I
History of criticism, Development of Art History as Human Discipline, Visual Analysis and Psycho-analytic point of View on Art.

Module II
Critical References on Painting and Sculpture (Indian and Western)

Examination Scheme:

Components	CT	P	A	EE
Weightage (%)	15	10	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

Syllabus - Semester First

DESIGN ECO-SYSTEM

Course Code: VFD2152 **Credit Units: 03**

Course Objectives:
The aim of the course is to provide Performance Criteria, Knowledge & Understanding and skills & abilities required to organize/maintain work areas and activities to ensure tools and machines are maintained as per norms to a Fashion Designer.

Course Contents:
Module-I: Maintain the work area
(1) Handle materials, drawing and pattern drafting tools, equipment and the system for computer designing with care (2.) Use correct handling procedures. (3.) Use materials to minimize waste (4.) Use of measuring devices effectively

Module-II: Maintain the work Tools
(1) Maintain tools and equipment (2) Carryout running maintenance within agreed schedules (3) Carryout maintenance and/or cleaning within one's responsibility (4) Report unsafe equipment and other dangerous occurrences (5) working a comfortable position with the correct posture.

Module-III: Maintain the work equipment.
(1) Use cleaning equipment and methods appropriate for the work to be carried out (2)Dispose of waste safely in the designated location (3) Carryout cleaning according to schedules and limits of responsibility

Module-IV: Maintain the Self and work Computers
(1.) Request for up gradation of system or software's when required for effective working (2.) Always a backup file to be maintained when working on various design software's (3.) All soft copies of design work to be maintained in files as well for future reference (4.) Personal hygiene and duty of care. (5.) Safe working practices and organizational procedures. (6.) Limits of your own responsibility,
(7.) Ways of resolving with problems within the work area. (8.) The production process and the specific work activities that relate to the whole process (9.)The importance of effective communication with colleagues (10) the lines of communication, authority and reporting procedures

Module-V: Case Study (Compulsory)
Industrial visit and case presentation

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(**A-**Attendance**; CS-**Case Study**; CT-**Class Test**; EE-**End Semester Examination)

FASHION DESIGN-RESEARCH

Course Code: VFD2252 **Credit Units: 03**

Course Objectives: The aim of the course is the development of design concepts for commercial production. The Initial process includes conducting market research and trend analysis for the particular season and identifying a theme for the collection; then creating a mood board and color board based on the theme, develop an entire range according to the business plan and as per the theme board.

Course Contents:

Module-I: Designing Fashion Design Research

(1) Review previous 10 years trends and their impact in terms of accuracy. (2) Research on fashion trends and identify the emerging theme (3.) Product range and previous designs developed by the business are reviewed to assess relevance to current design.

Module-II: Conduct fashion design research

(1) Business processes and client goals are identified. (2.) Research is conducted on target market, materials, designs, processes and marketing materials according to the needs of the design. (3.) Quality standards for designs are identified.

Module-III: Design Brief

(1) Design themes and style requirements of design are determined (2) Budget, cost points and timing constraints are identified. (3) Requirements for use of fabrics, materials, suppliers and production processes are determined. (4) Client Requirements are confirmed with the client

Module-IV: Organize fashion design research.

(1) Analyze the market trends and targets for the season (2) Rule-based decision-making processes (3) Complete accurate well written work with attention to detail

Module-V: Case Presentation (Compulsory)

Case presentation with complete mood boards and design presentation for the following season.

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(**A-**Attendance**; CS-**Case Study**; CT-**Class Test**; EE-**End Semester Examination)

Syllabus - Semester Third

DESIGN PREPARATORY PROCESS

Course Code: VFD2352 **Credit Units: 03**

Course Objectives:
The aim of the course is to designs a clothing range and gets it finalized to make the prototype garments.

Course Contents:
Module-I: Determine key criteria for design brief
(1) Determined Design themes and style. (2) Recognizing and adapting to cultural differences in the workplace, including modes of behavior and interactions (3.) Identify improvements.

Module-II: Technical Aspects
(1.) To do the design by hand sketches or by Computer Aided Design (CAD). (2.) Garment construction techniques and processes. (3.) Detailed knowledge of a range of fabrics and trims

Module-III: Financial Aspects
(1) An understanding on the cost process involved in making an apparel (2) Costing of created designs / product ensembles with knowledge of sale ability of a product designed (3) Knowledge of Intellectual Property Rights with respect to designs.

Module-IV: Pre proto Analyses
(1) Provide opinions on work in a detailed and constructive way (2) communicate with others in the company and to clients in writing (3) Clarification on the design to be developed with the team members

Module-V: Case Presentation (Compulsory)
Case presentation for any two constructed garment with their technical details i.e. Teck-pack and Coasting

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(**A**-Attendance**; CS**-Case Study**; CT**-Class Test**; EE**-End Semester Examination)

PROTOTYPE GARMENT DEVELOPMENT

Course Code: VFD2452 **Credit Units: 03**

Course Objectives:
The aim of the course is about how technical package is made after garment range confirmation and process of how prototype garment is made for entire collection

Course Contents:
Module-I: Confirming Design Brief
(1) Create techpack which clearly conveys all guidelines for development of the sample (2) Appropriate personnel are consulted with to confirm feasibility and appropriateness of techpack (3.) Sketches, drawings and samples are used to illustrate design requirements, as appropriate. (4) Given techpacks on the range to be finalised

Module-II: Specify Design Processes
(1.) Required involvement of sampling merchandiser, patternmaker, and tailor are identified, finalized and briefed about the collection (2.) Monitoring procedures and checking points are determined. (3.) Design development personnel selected are briefed and time constraints met (4.)

Module-III: Proto- Type Construction
(1) Construct the prototype and given to concerned dept for better understanding on the product, if required

Module-IV: Implement Design Processes
(1.) Development of sample is monitored to ensure budget and time constraints are met (2) Problems or inconsistencies in sample are identified and addressed. (3) Communicate with others in the company and to clients in writing (4) Evaluate the prototype sample.

Module-V: Case Presentation (Compulsory)
Case presentation for actually constructed garment with their technical details and Coasting

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(**A**-Attendance**; CS**-Case Study**; CT**-Class Test**; EE**-End Semester Examination)

Syllabus - Semester Fifth

DESIGN DEVELOPMENT

Course Code: VFD2552 **Credit Units: 03**

Course Objectives:
The aim of the course is about how to review the prototype garment developed for the collection

Course Contents:
Module-I: Evaluate Design Process
(1) Analyze the prototype sample along with the design team (2) coordinate along with design team to check sample against the techpack given to the sampling merchandiser, the look and feel and fit of the sample (3.) Identify the prototype for the feasibility of the garment in terms of sourcing of the fabric and the trims available for the span of production.

Module-II: Evaluate Development Process
(1.) Identify various products testing to proceed with prototype (2.) Incorporate modification of the sample until approved for final production. (3.) Get approval on the prototype/final techpack, agreement finalized with the client

Module-III: Complete Documentation
(1) Document Design brief, development processes and outcomes (2) Complete Documentation processes, including filing and storing, Construct the prototype and given to concerned dept for better understanding on the product, if required

Module-IV: Organization Process
(1) Organization's policies, procedures and priorities for your area of work and your role and responsibilities in carrying out your work. (2) Limits of your responsibilities when coordinating with other department. (3) Your specific work requirements and who these must be agreed with

Module-V: Industrial Case (Compulsory)
Developing Standard Operating Procedure for an Fashion Design Team

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

(**A**-Attendance**; CS**-Case Study**; CT**-Class Test**; EE**-End Semester Examination)

HEALTH AND SAFETY EQUILIBRIUM

Course Code: VFD2652 **Credit Units: 03**

Course Objectives:
The aim of the course is to provide Performance Criteria, Knowledge, Understanding, Skills and Abilities required to comply with health, safety and security requirements at the workplace and Covers procedures to prevent, control and minimize risk to self and others.

Course Contents:
Module-I: Comply with Health Requirements at Work
1) Comply with health and safety related instructions applicable to the work place (2) Use and maintain personal protective equipment as per protocol (3) Carry out own activities in line with approved guidelines and procedures. (4) Maintain a healthy lifestyle and guard against dependency on intoxicants (5) Follow environment management system related procedures

Module-II: Comply with Safety Requirements at work
Identify and correct (if possible) malfunctions in machinery and equipment (2.)Report any service malfunctions that cannot be rectified. (3.) Store materials and equipment in line with manufacturer's and organizational requirements (4) safely handle and move waste and debris (5) Minimize health and safety risks to self and others due to own actions (6) Seek clarifications, from supervisors or other authorized personnel in case of perceived risks (7) Monitor the workplace and work processes for potential risks and threats

Module-III: Comply with Security Requirements at work
(1) Carry out periodic walk through to keep work area free from hazards and obstruction (2) Report hazards and potential risks/ threats to supervisors or other authorized personnel (3) Participate in mock drills/ evacuation procedures organized at the workplace (4) Undertake first aid, fire fighting and emergency response training (5) Take action based on instructions in the event of fire, emergencies or accidents. (6) Follow organization procedures for shutdown and evacuation when required

Module-IV: Organization Process
(1) To know and understand: (A) Occupational health and safety risks and methods. (B) Proper disposal system for waste and by-products (c) Signage related to health and safety and their meaning (2) limits of your responsibilities when coordinating with other department. (3) Identification, handling and storage of hazardous substances (4) effects of alcohol, tobacco and drugs

Module-V: Industrial Case (Compulsory)
Ill-effects of alcohol and tobacco (on Employ) – physiology & performance

Examination Scheme:

Components	A	CS	CT	EE
Weight age (%)	05	10	15	70

FASHION ART ILLUSTRATION AND MODEL DRAWING

Course Code: FDT2151 **Credit Units: 03**

Course Objective:
The study of this course develops the student's ability to visualize the ideas and putting them in concepts for fashion garments. It gives an understanding to different illustration techniques and explores other media for creating concepts through practical assignments. Whereas Model Drawing is introduced with the concept of drawing normal figures in movement and different postures.

Course Content:

Module I	:	Sketching of Block and Flesh Figures
Module II	:	Photo Analysis
Module III	:	Rendering of Prints into flat illustration
Module IV	:	Detailed drawing of Basic Styles
Module V	:	Draping of Garments
Module VI	:	Introduction to Garment Drawing
Module VII	:	Use of different colour medium

Submission of practical work records - (Compulsory)

Examination Scheme:

Components	A	H	R	EE
Weightage (%)	05	10	15	70

(**A** - Attendance**; H** -Home Assignment**; R-** Practical work records**; EE-**End Semester Examination)

FASHION THEORY

Course Code: FDT2251 **Credit Units: 03**

Course Objective:
To provide a broad foundation to acquire the knowledge of fashion theory and its growth which develop the students' potential for professional activities that demand considerable independence or for fashion research work.

Course Contents:
Module-I: Fashion Development
Origin of the Fashion**,** Effect of Industrial Revolution on Fashion; Mass production of clothing; Introduction of Retailing; Changes caused by communications, leisure, and Industry; Effect of world War-i; Effect of depression on Fashion; Effect of world War –ii; Reactionary Postwar Fashion; Fashion at 1960s; Anti fashion at 1970s; Fashion 1980s; Fashion 1990s.

Module-II: Fashion Evaluation & Adoption.
Introduction - Fashion Cycles, Length of Fashion Cycles**; Adoption-** Traditional Fashion adaption (Trickle – Down Theory), Reverse Adaption (Trickle-up or Bottom-up Theories), Mass Dissemination (Trickle-across Theory); James Laver and Laws on the Timeline of Style

Module-III: Study of International Fashion Centers.
France, Italy, England, Germany, Canada, United States.

Module-IV: Applied Learning Assignments.
Visit fashion malls and analyze current fashion styles and find social, economical, technological influence on it. Also refer the fashion magazines and newspapers for trend review. Make a report with views and reasons.

Examination Scheme:

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

COMPUTER-AIDED MANUFACTURING (CAM)

Course Code: FDT2351 **Credit Units: 03**

Course Objective:
This module makes the student know-how the Computer Applications in the Fashion & Apparel Industry.

Course content:

Module I	**:**	**Adobe Photoshop - Functions of Tools & Working on layers**
Module II	**:**	**Photo-editing & its usage**
Module III	**:**	**Demo on 'TUKA cad' Module**
Module IV	**:**	**Mode conversation through editing**
Module V	**:**	**Demo on 'Opti Tex'**
Module VI	**:**	**Rendering & filter effects along tutorials**

Examination Scheme:

FASHION MANAGEMENT

Course Code: FDT2451 **Credit Units: 03**

Course Objective:
The objective of this course is to impart knowledge about fashion global market, fashion brand management, different pricing strategies, and necessary for successful employment in apparel businesses.

Course Contents:
Module-I: Fashion for global market
Social, Cultural, Economic, Demographic factors relating to branded and licensed products, Analyzing potential or global market, identify target consumers and competition, market research and testing, customization
Module-II: Fashion Marketing Concepts
The concept of marketing, Utility, Marketing functions and related activities, The concepts of market segmentation and niche marketing, The marketing mix, The channels of distribution used in the fashion industry, Marketing and merchandising
Module-III: Economics in the Fashion Industry
The concept of economic goods/services, The concept of economic resources, The concept of supply and demand, Cost and retail, Gross profit and net profit.
Module-IV: Fashion Promotional Mix
Types of media used in fashion retail advertising, The importance of special promotional events
Module-V: Consumer Demand for Fashion Marketing
Consumer Groups - Demographic Trends & Psychographic Trends, Consumer spending – Personal Income, Disposable Income, Discretionary Income, Purchasing Power, Factors influencing consumer behaviour.
Module-VI: Pricing strategies & Decisions
Concept and importance of pricing, Factors affecting pricing decisions, Methods of pricing
Module-VII: Fashion Brand Management
Types and relevance of branding, Fashion & brand positioning, launching strategies, distribution, marketing
campaigns for brand introduction
Examination Scheme:

Syllabus - Semester Fifth

FASHION FORECASTING

Course Code: FDT2551 **Credit Units: 03**

Course Objective:
The students are made to start their work with the collection of data regarding fashion forecasting, trend analysis
and presentations. They are then made to forecast the fashion trend and dictate fashion in their very own way.

Course Contents:
Module-I: Concept of fashion forecasting (Theory)
Awareness of fashion fairs and fashion centers, Knowledge of creative writing, Reading of fashion forecast magazine, Sources of information, Role of Exhibitions and Fashion shows

Module-II: Fashion Forecasting Process (Theory)
Market Research- Consumer research, Shopping, Sales records; Evaluating the collections- Similar Ideas indicate fashion trends, Trends for target market; Fashion services – Collection reports, Trend books, consulting, Color services, Television/Video services , News letter services, Web sites, Directories and reference books, Fashion Magazines and news papers, Catalogs. Design Sources- Historic inspirations, Folk influences, Vintage clothing shops, Museums, Libraries and bookstores, Arts, Fabrics/Textiles, Travel, Form follows function, The street scene, The turn of the century, innovations and technologies.

Module-III: Applied Learning Assignments. (Practical)

Market Research - On site visits to fashion retailers and cloth markets and study the market trends and collect various cloth samples, catalogs etc.

Forecasting Exploration - Students will explore a variety of sources like Magazines, News papers, Internet sites and in-site, their market research reports etc. to become familiar with apparel, textile, color, style, and general culture and consumer forecasting resources. Each student will identify and report trends found to class.

Preparation of story boards - Students will prepare story boards for specific target.

Presentation of designs - Students will prepare fashion forecast for different seasons.

Final Presentation - Each student have to submit their Research file in a standard format guided by the faculty for the final evaluation.

Course Evaluation:

Syllabus - Semester Sixth

FASHION RETAILING AND VISUAL MERCHANDISING

Course Code: FDT2651 **Credit Units: 03**

Course Objectives:
The aim of the course is to provide an integrated curriculum frame work within which students are able to acquire a range of knowledge and transferable skills relevant to employment in retail industry.

Course Contents:

Module-I: Introduction to Fashion Retailing & Strategies
Fashion Retailing-Definition, Concept, Importance, Functions – Indian Retails vs. Global Scenario, **Retail Location**- Factors affecting location decision, Site Selection. **Retail Directions** -Value directed retailing; Service oriented retailing, Unique Merchandising, Shopping as entertainment, Street retailing, Global expansion of retailing; **Types of Retail operations** – (1) Specialty stores- Single brand or Private label retailers, Secondary spin-offs, (2) Department stores, (3) Mass Merchants – Discounters, Off-Price retailers, Outlet stores, Warehouse clubs, (4) Promotional stores, (5) Non store retailing - Mail order merchants, Party plan retailing, Electronic retailing, Television shopping, Online shopping.

Module-II: Fashion Retail Functions & Organizations
Retailing Functions – Merchandising, Store operations, Marketing, Sales Promotion, Finance, Real estate or Store planning, Human resources **Organizations –** (1) Shopping Centers – Traditional Malls, Diversified Malls, Value centers, Outlet Malls, Transportation centers, Recreational Malls, Town center malls; (2) The small stores, (3) The large stores, (4) Store with in a store – In store designer boutiques, Leased departments; (5) Multiple -unit stores – Chain stores, Department store groups, corporate ownerships. **Retail Buying –** Buyer's role, Duties & responsibilities of a retail buyer

Module-III: Introduction to Visual Merchandising
Visual Merchandising - Definition, Concept, Importance; **Store Planning –** Store Image, Target customers, Seasonal Visual merchandising, **Store Design –** (1) Windows – Special event windows, Fashion message windows, Direct-sell windows; (2) Interiors - Apparel fixtures, Folding and stacking, Accessories display **Managing Visual Merchandising Elements -** Mannequins, Standards Manuals, Presentation packages, Tele communications, Designer / Brand in-store shops

Module-IV: General Principles of IPR
Introduction to Intellectual Property 1.1 Concept of Intellectual Property 1.2 Kinds of Intellectual Property 1.3 Economic importance of Intellectual Property 2. **Philosophical Justification of Intellectual Property Western Theories on Private and IP** 2.1 Locke's Labour Theory of Property 2.2 Hegel's Personality Theory of Property 2.3 Marxian Theory on Private Property and IP. 3. **Indian Theory on Private Property** 3.1 Constitutional Aspects of Property 3.2 Constitutional Protection of Property and IP 4**. International Scenario** Introduction to the leading international instruments concerning intellectual property rights: the Berne Convention, Universal Copyright Convention, the Paris Convention, TRIPS, the World Intellectual Property Rights Organization (WIPO) and the UNESCO 5. **Economic Development and IPR Protection**
6.Enforcement of Industrial Property in General 6.1 Civil Court Procedures 6.2 Criminal Actions: 7.**Counterfeiting Intellectual Property Rights and Human Rights** 7.1 Right to Health as

APPAREL MERCHANDISING

Syllabus - Semester First

INTRODUCTION TO APPAREL MERCHANDISING

Course Code: VFD2151 **Credit Units: 03**

Course Objective:
This course helps the students to get a preview to develop merchandising skills for apparel products. This course covers the basic knowledge of fashion; textile and apparel industry, Safety Management and introduction to merchandizing,

Course Contents:
Module-I: Fashion Terminology
The Language of fashion – Introduction to fashion concept; Definitions and meaning, Classification, Style, Change, Acceptance, Taste, Look, Trends, Season; Color, Texture, Fit, Comfort, Brand or Designer Label, Fashion cycles. **Adoption Theories –** Trickle down, Trickle up, Trickle-across and Laver's law. **Fashion clothing categories, Styling & Size range -** Women's wear, Men's wear Children's wear

Module-II: Introduction to Textiles
Textile fibers & Yarns - Definition & classification. **Woven fabrics -** Classification, fabric properties and identification of fabrics types. **Knit fabrics –** Classification, fabric properties and identification of fabrics types. **Textile processing –** Introduction to Dying, Printing and Finishing. **Care symbols & Labeling.**

Module-III: The Overview of Apparel Industry & Apparel Production
Apparel industry - Major segments; **Organizational structures -** Structure of Export house, Buying house and Domestic companies, Buyer's classification and buying network in exports. Sources of fabric buying and selling of finished fabric. **Apparel construction techniques** - Introduction to Drafting & Patten making. **Machinery & Equipment** - Cutting, sewing, finishing, washing, stain removal, embellishment. **Production methodology -** Assembly line, individual garment manufacturing, job work, quality checkpoints. **Design & Tech-pack -** Introduction & Definition. Labelling & Packing.

Module-IV: Workplace Safety Management Practices
Health and safety instructions – Importance of sound health, hygiene and good habits. Ill-effects of alcohol, tobacco and drugs.. Occupational health and safety risks. Signage related to health and safety. Personal protective equipments & its use. Method of write report on the hazards and risks / threats faced at workplace**.** event of a mock drills, evacuation procedures, accident, emergency or fire **Environmental management system (EMS)** - EMS procedures. Proper disposal system for waste and by-products. Identification, handling and storage of hazardous substances.

Module-V: Basics of Apparel Merchandising
Introduction, Functions and role of Merchandiser, Merchandising Process, Meaning and Need for quality control in Merchandising process.

Syllabus - Semester Second

APPAREL MARKET RESEARCH AND PRODUCT ANALYSIS

Course Code: VFD2251 **Credit Units: 03**

Course Objective:
This course focuses on the awareness about apparel business plans, market target is and design brief. Scopes of this course include Market trend assessment, Determine design brief, Identification of Design brief and analyze.

Course Contents:

Module-I: Assessment of Market Trends
Research on market trends - Conduct research on target market, materials, trims, better or new sources / suppliers for procurement; **Design review** - Review previous designs & samples developed by the business to assess relevance to current design/samples;

Module-II: Determination of Key Criteria for Design Brief
Identify processes - Identify business processes and client goals; Identify Quality standards for designs, Identify budget, cost points and timing constraints, **Tech-pack review** - Check the Tech-pack received and identify it with the design brief given by the designer and also checked if all specifications are there in the tech-pack, If not clarify and modify if needed.

Module-III: Organizational Context & Technical Knowledge
Organizational processes - Organization's policies, procedures, guidelines and standards for dealing with buyers/clients, Recognizing and adapting to cultural differences in the workplace, including modes of behavior and interactions, Production capacity and processes of business are identified. Systematically work completion with attention to detail without damage to goods and equipment. Awareness of Intellectual Property rights, **Technical processes** - Garment construction techniques and processes, Detailed knowledge of a range of fabrics and trims, An understanding on the cost process involved in making an apparel, Vendors, Compliance Standards.

Examination Scheme:

Syllabus - Semester Third

VENDOR MANAGEMENT AND PRODUCT EVALUATION

Course Code: VFD2351 **Credit Units: 03**

Course Objective:
This course is aimed to understand the merchandiser's way to set the objectives to develop the product given following the work flow and the norms required. This course covers preparation of Bill of Materials, Identification of Vendor or Supplier and Evaluation of different parameters.

Course Contents:
Module-I: Vendor Identification.
Vendor database - Method of Identify the vendors for initial development and confirmation on bulk if approved, Method of update the Vendor database, **Swatches collection** - Collect all kind of relevant swatches to meet the design brief from fabrics to trims and get confirmation on the same. **Appropriateness of Tech-pack** - Method of appropriate personnel are consulted with to confirm feasibility.

Module-II: Preparation & Evaluation of the Bill of Material (BOM)
Bill of Material (BOM) – Procedure and Method of preparation a well formed BOM (Bill of Material) for each of the styles in the collection. Method of specify all that is required like the raw material, parts, quantities of each needed to manufacture the end product. **Primary costing** - Method of initial costing of the sampling derived. **Consumption identification** - Appropriate personnel identified for the consumption to be made for making, **Follow up Procedures** - Required involvement of patternmaker and tailor, Determination of monitoring procedures and checking points, follow-ups with IE Department and calculation of the SAM (Standard Allowed Minute) of the sample. **TNA (Time and Action) calendar** – Method of TNA (Time and Action) calendar preparation made with the estimated details got to fix on the delivery date after confirmation on the sample.

Module-III: Organizational Context & Technical Knowledge
Organizational processes – Understand the protocol to obtain more information on work related tasks. Understand the limits of merchandiser's role and responsibilities in relation to IT service requests or incidents and reporting structure. **Technical processes** - Understand how to use equipment, templates and processes for preparing the tech-pack., understand the fabrics and garments that require stitching by hand or machine stitching. Understand Sewing and Pattern making techniques to put across ideology the tailor master to make the same, Understand concepts of product and pricing life cycle, Procedure for Pricing and costing.

Examination Scheme:

PROTOTYPE PREPARATION AND MERCHANDISE PLAN

Course Code: VFD2451 **Credit Units: 03**

Course Objective:
This course helps the students to learn how to develop the samples against the design brief for analyzing and getting it confirmed for bulk production as well as how to plan and process for production. The scope of this course is Prototype Preparation and Merchandise plan.

Course Contents:
Module-I: Prototype Preparation
Specification sheet follow-ups - Procedure of check the specification sheet prepared in accordance with standard format. Preparation, coordination and confirmation of pattern cutting, detailed drawings and mini- markers. Preparation, coordination and confirmation of patterns developed are according to the shrinkage report, tested and received. Procedure and method of checking of assembled garments according to specifications sheet and accepted garment assembly techniques. **Prototype test report** – Procedure and method of Prototype sent for test report either according to company norms or as per the buyers standards requested.

Module-II: Merchandise Plan.
Buyer approval process - Preparation, coordination and confirmation Prototype checked with design team and sent to buyer for approval and accordingly changes done if any and confirmed for production. Size sets approved internally. **P.O (Purchase Order) & P.I (Performa Invoice)** - Procedure and Method of raise and receive P.O (Purchase Order) & P.I (Performa Invoice) after confirmation on the costing to buyer and vendor. **Approval and updating of work sheets** - Procedure and method of approval and updating of all the work sheets, like the trims sheet, fabric sheet, consumption sheet (fabric and thread) this also includes in tech-pack, if any. Procedure and method of actual TNA updating that sent for approval.

Examination Scheme:

Components	A	L	CT	EE
Weightage (%)	05	10	15	70

(**A**-Attendance**; L**- Learning Assignments**; CT**-Class Test**; EE**-End Semester Examination)

Syllabus - Semester Fifth

PRE-PRODUCTION MANAGEMENT

Course Code: VFD2551 **Credit Units: 03**

Course Objective:
This course focuses on the method of organizes and coordinates the pre-production meeting and a well prepared pre-production file.

Course Contents:
Module-I: Updating Time & Action Calendar (TNA)
Time & Action Calendar (TNA) Follow-ups- Procedure and method of updated on the TNA prepared. Procedure and method of coordination with all departments in the organization. Procedure and method of check on mainly with status on the warehouse to know if the raw materials, trims and all necessary ordered are getting in-house on time.

Module-II: Preparation of pre-production file and pre-production meeting (PPM)
Pre-production file - Procedure and method of create a good and accurate and pre-production file. - Procedure and method of create Trims and accessories card, Procedure and method of create a card that contained all the approved swatches / lab dips and samples with strike offs etc. Procedure and method of maintaining the file with the tech-pack, production order sheet with size break up, cut plan and mini marker, packaging specification, washing instruction (if any), Test report, TNA Chart and important mail conversations etc. **Pre-production meeting** - Procedure and method of clarifies and address any potential issues if any at the pre-production meeting. Procedure and method of identify any other issues, raised if any from the other department personnel attending the meeting. Procedure and method of handling to sort out issue based PPM meeting, if any. Procedure and method of prepare minutes of the PPM meeting.

Module-III: Applied Learning Assignments. (Practical)
The students will have to prepare a pre-production file for the part of their study. Each student has to submit their file in a standard format guided by the faculty for the final evaluation. The students are asked to give a brief oral presentation with 'Power Point' to the class about their understanding. The submission of pre-production file and presentation will be part of student's internal examination scheme.

Examination Scheme:

Components	A	L	Practical	EE
Weightage (%)	05	10	15	70

(**A**-Attendance**; L-** Learning Assignments**; CT**-Class Test**; EE**-End Semester Examination)

SHIPMENT & DOCUMENTATION MANAGEMENT

Course Code: VFD2651 **Credit Units: 03**

Course Objective:
This course is aimed to understand how the merchandiser coordinates with the factory to check on the smooth running of it to meet the delivery line. This course discus about hoe the merchandiser handles the program during shipment while the quality check is done and all approved.

Course Contents:
Module-I: Buying House Coordination
Buyer Coordination - Procedure and method of coordinate with buyer or buying house if any clarification is required that is if any issue raised during production is not well identified internally. **QA or 3rd Party QA** - Procedure and method of coordinating with buying house QA or 3rd Party QA for initial/mid and final inspection of shipment. Procedures and methods of inspection

Module-II: Coordination and Management of Shipment
Execution of orders - Procedure and method of check execution of orders whether it is running on time. **Shipping and Documentation** - Procedure of shipping and documentation. Method of coordination with shipping and documentation department for forwarding approved shipment. Procedure and method of closely work with logistics and help shipping department with timely information of packing reports for preparation of shipping documents.

Module-III: Industrial Visits
The students will have to visit various export and buying houses for the part of their study.
The students are asked to give a brief oral presentation with 'Power Point' to the class about their Understanding. They have to explain, what kind of knowledge they want to develop in the field of merchandizing and a debate will follow as well. The submission of industrial visit report and presentation will be part of student's internal examination scheme.

Examination Scheme:

PAINTING ARTS

Syllabus - Semester First

BASICS OF DRAWING AND ASIAN LANDSCAPE

Course Code: FNA2151 **Credit Units: 03**

Course Objective:
Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore painting techniques too. Structured exercises on painting include basic colour theory and pictorial composition, which enables students to be confident in the use and manipulation of colour. It also provides a clear idea of different painting practices. Like water colours and opaque colours.

Course Contents:

Module I: Basics of Drawing
Object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between lines, mass, volume and texture, emphasis on various visual experiences. Quick Sketching to increase hand eye coordination and improving vision and observation skills.
a) Learning basic elements of drawing.
b) Object drawing.

Module II: Asian Landscape
Landscape drawing and rendering using pencil, charcoal pencil or colour pencils. Understanding the basic fundamentals of Asian style landscapes.
Works to be done:

1. Sketches – 5
2. Landscape-5

Examination Scheme:

Components	PT	CT	A	EE (Practical)

BASICS OF DRAWING AND MONOCHROME FOLK COMPOSITION

Course Code: FNA2251 **Credit Units: 03**

Course Objective:
Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore Indian folk painting style & techniques too. Structured exercises on painting include basic colour theory, theme and pictorial composition, which enables students to be confident in the use and manipulation of colour of the folk traditions also provides a clear idea of different folk painting practices.

Course Contents:

Module I: Basics of Drawing
Object drawing to explore basic drawing tool 'Pencil'. Suggestion of solidity by line work as well as light and shade, realization for rhythmic relationship between lines, mass, volume and texture, emphasis on various visual experiences. Quick Sketching to increase hand eye coordination and improving vision and observation skills.
a) Learning basic elements of drawing.
b) Object drawing.

Module II: Monochrome Folk Composition
Indian folk style paintings in monochrome colours using any 2 mediums.

Works to be done:

1. Sketches – 5
2. Folk Paintings-5

Examination Scheme:

Components	PT	CT	A	EE (Practical)
Weightage (%)	10	15	5	70

Syllabus - Semester Third

ADVANCED DRAWING AND ILLUSTRATION OF INDIAN TEMPLE SCULPTURE

Course Code: FNA2351 **Credit Units: 03**

Course Objective:

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore temple art & techniques too. It also provides a clear idea of different illustration/painting techniques. Also understanding the structural formation of objects as well as architectural structures is to be taught.

Course Contents:

Module I:
Quick Sketching to increase hand eye coordination and improving vision and observation skills.

a). Indian sculpture drawing like Buddhashirsha, dancing girl of Mohenjo-Daro
b) Ancient architectural composition like Kailas temple, Konark temple

Module II: Illustration of Indian Temple Sculpture

Illustrations and drawings related to the Indian Temple Sculpture of whole India. Understanding the various parts and formation along with architectural structure.

Works to be done:

1. Sculpture drawing – 05
2. Indian Architectures composition -- 05

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ADVANCED DRAWING WITH INK & BRUSH ILLUSTRATION

Course Code: FNA2451 **Credit Units: 03**

Course Objective:

Illustration and composition is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Also the objective of this course is to acquire experience in basic knowledge to explore illustrative techniques too. It also provides a clear idea of different Illustration style & techniques with ink and brush. Like transparent colours and opaque colours.

Course Contents:

Module I: Illustration and Composition
Quick Sketching to increase hand eye coordination and improving vision and observation skills.

a) Theme based figure composition in ink
b) Poster making composition for social cause.

Module II: Ink and color Composition
Illustrations and composition using ink and color. Both single & multi-colour techniques.

Works to be done:

1. Illustration and Composition -- 05
2. Ink and color Composition --05

Examination Scheme:

Components	P	CT	A	EE
Weightage (%)	10	15	5	70

ADVANCED DRAWING & ILLUSTRATION WITH MURAL ART

Course Code: FNA2551 **Credit Units: 03**

Course Objective:

Drawing is the basic element of learning art. Drawing study of human figure based on proportion, masses, specific feature and character using various media with emphasize on manner of finished execution. Structured exercises on mural painting include basic Indian style application and composition, which enables students to be confident in the use and manipulation of Indian mural themes, style & techniques. Mural Art techniques are taught to liberate the students in context of mediums of expression.

Course Contents:

Module I: Life Study
Life study and figurative composition using different mediums of drawing**.**
a) Quick Sketching of Human Figure
b) Figure drawing Composition

Module II: Mural
Illustrations and drawing as murals on wall or board in single/multi-colour.

Works to be done:

1. Sketches – 05
2. Mural - 1

Examination Scheme:

Components	PT	CT	A	EE (Practical)
Weightage (%)	10	15	5	70

(**A**-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination; **PT**- Portfolio)

ADVANCED DRAWING & ILLUSTRATION WITH VISUAL DESIGN

Course Code: FNA2651 **Credit Units: 03**

Course Objective:

Drawing is the basic element of learning art. Drawing exercises are to acquire accurate sense of observation and skills to present representational art. Practice figurative drawing through observation. Also the objective of this course is to acquire experience in basic knowledge to explore illustration as well as visual design styles & techniques too. It also provides a clear idea of different design techniques and mediums. Other techniques like visual design are taught to help them develop a visual sense of design in general.

Course Contents:

Module I: Life Study
a) Figure Sketching
b) Life study and figurative composition using different mediums of drawing.

Module II: Illustration with Visual Design

a) Illustrations and drawings using the basic elements of Visual Design along with developing a better sense of color & form coordination to represent the subject.
b) Creative composition exercise based on individual layouts using various painting mediums.

Works to be done:

1. Drawings – 05
2. Illustrations – 1
3. Painting - 1

MICRO ECONOMICS-I

Course Code: LAW2106 **Credit Units: 04**

Course Objective:
This course is designed to expose first –year students, who may be new to economics, the basic principles of microeconomic theory. The emphasis would be on thinking like an economists & the course will illustrate how microeconomic concepts can be applied to analyze real life situations.

Course Contents:

Module I: Exploring the Subject Matter of Economics
Why study economics? The scope and method of economics; scarcity and choice; questions of what, how and for whom to produce and how to distribute output

Module II: Supply and Demand: How Markets Work, Markets and Welfare
Individual demand and supply schedules and the derivation of market demand and supply; shifts in demand and supply curves; the role prices in resource allocation; Elasticity of Demand — price, income and cross; Consumer's surplus

Module III: Consumer's Behavior
Utility-cardinal and ordinal approaches, Indifference curves; budget constraints;. Consumer's equilibrium (Hicks and Slutsky); Giffin goods; Compensated demand; Revealed preference theory; Engel curve.

Module IV: Theory of Production and Costs:
Technology, Isoquants, production with one and more variable inputs, Returns to scale, short run and long run costs, cost curves in the short run and long run, total, average, and marginal product, cost minimization and expansion path, elasticity of substitution.

Examination Scheme:

Components	A	P	HA	CT	EE
Weightage (%)	5	10	5	10	70

(A-Attendance; **P**-Project/Seminar/Quiz/Viva; **HA**-Home Assignment; **CT**-Class Test; **EE**-End Semester Examination)

MICRO ECONOMICS-II

Course Code: LAW2205 **Credit Units: 04**

Course Objective:
The main objective of the course is to provide a deeper knowledge on some specific field of Microeconomics such as game theory, factor pricing, oligopoly & welfare Economics.

Course Contents:

Module I: Decision theory under Uncertainty: Utility Functions and Expected Utility
Risk aversion and risk preference, insurance and investor's choice.
Asymmetric information- Adverse selection and moral hazard

Module II: Oligopoly
Analysis of Cournot & Stackelberg, Collusive Oliogopoly and application of Prisoner's Dilemma of Nash equilibrium

Module III: Market Structure
Review of perfect competition and monopoly; Pricing with market power; price discrimination, peak load pricing, two-part tariff; monopolistic competition and oligopoly.

Module IV: Factor Pricing
Derived demand for a single input and multiple inputs in competitive & imperfect competition markets, firm demand and industry demand, collective bargaining and exploitation rent & quasi rent.

Module V: Welfare Economics
Conditions of Pareto optimality in pure exchange and with production, optimality of perfect competition

Examination Scheme:

SUMMER INTERNSHIP EVALUATION-I

Course Code: LAW2335 **Credit Units: 03**

It is a mode of Clinical Legal education Specified period to be spent by the student with a law firm/court/Commissions/NGO's and like institutions working with the realm of law or connected therewith. The reports both by the student and the office together with diary where applicable to be certified will be submitted for evaluation

The Internship during the summer break is a compulsory course. There is a Internship Data form where students fill in the details of where they are interning with complete address and phone numbers Customized Legal Reference /Diary is provided to the students on payment They maintain a day to day record of the work that they do at the place they are interning. They are expected to intern for a minimum 90 days. They submit their completed diary, certificate from the employer and also a report of their experience at work. After submission there is a Viva by concerned faculty. They assess the student on the kind of work they have done during internship, presentation of the work they have done and also on the practical knowledge they have gained

The Paper is marked out of 100 marks. The break up of the marks is as follows:

1.	Diary submission	25 Marks
2.	Report and certificate	25 Marks
3.	Viva (Panel of External Examiners)	40 Marks
4.	Attendance (Regularity in meeting the supervisor)	10 Marks
	Total	**100**

MACRO ECONOMICS-II

Course Code: LAW2402 **Credit Units: 04**

Course Objective:
The objective of this paper to understand the issues related to economic development and planning and International trade and enables them to have a broader perspective while dealing with these issues as a policy maker.

Course Contents:

Module I: Economic development
Concepts of economic development and growth, determinants of economic growth, obstacles to economic growth, Vicious circle of poverty, Strategy of economic development: Balanced and unbalanced growth, Inequalities of income and wealth.

Module II: Economic planning
Economic planning: meaning, forms of planning, objectives & significance and rationale of planning, features of planned economy, Five year plans: Strategy of plans, critical appraisal of plans, Public v. Private Sector.

Module III: International trade
Liberalization & Globalization: Argument for and against, Economic Reforms: Banking, Money market, capital market and International Trade Reforms, Special Economic Zones, Foreign Direct Investment.

Examination Scheme:

ADMINISTRATIVE LAW

Course Code: LAW2404 **Credit Units: 04**

Course Objective:

Administrative law is as old as the administration itself. However, the form in which we find it today, Administrative is described a most outstanding legal development of the twentieth century. The reason for this development can only be attributed to a change of philosophy as regards the role and function of the State. The change in the concept of State from 'laissez faire' to a 'welfare state' has led to emergence of state activities in almost all spheres of human life. With the phenomenal increase in the area of state operation, the State was bound to take over a number of functions which were earlier left to private enterprise. In order to ensure that such functions are performed effectively and further due to certain other factors namely contingency, expertise etc. administrative agencies are given extraordinary powers and functions such as to make rules and deciding disputes apart from its wide discretionary powers. Obviously, this necessitated a new set of laws to check the possible abuses of such extraordinary powers on the part of administration. The courts in India and abroad in the course of time have developed various doctrines and methods to deal with such p[problems. However, there is no end to this journey. The field is still open for new changes.

The main thrust of administrative law has been to study the nature of functions and powers exercised by the authorities on whom they have been conferred on and the study of remedies available to common man in case the limits of exercising power are transferred by such an authority. The focus or the centre point of this study, as usual as in cases of the study of other branches of public law, is the rights of individual *wis a wis* the public interest.

Course Contents:

Module I: Evolution, Nature and scope of Administrative law

Definitions, scope, classification and reason for the growth of administrative law; Relationship between constitutional law and administrative law; doctrine of Separation of Powers and its application in administrative law; Doctrine of Rule of law and application in administrative law.

ARBITRATION AND ALTERNATE DISPUTE RESOLUTION

Course Code: LAW2705 **Credit Units: 05**

Course Objective:
The course material imparts to the students an understanding of the concept of alternate methods of resolving disputes in addition to the traditional court oriented processes. It focuses on an analytical study of arbitration law and practice in India and the relevant institutions monitoring the same. The paper also focuses on other alternate dispute resolving mechanisms through State mediatory services under the supervision of the courts.

Course Contents:

Module I: Introduction
Alternative Dispute Resolution (ADR): Concept and Need and International and National initiatives in India; IIC, UNCITRAL, KSID.
Arbitration and Conciliation Act, 1996
General Provisions, Definitions, receipt of written communications, waiver of right to object, extent of Judicial Intervention, Administration Assistance; Arbitration agreement, power to refer parties to arbitration where there is an arbitration agreement, Interim measures by court.

Module II: Composition of Arbitral Tribunal
Composition, Jurisdiction, Conduct of Arbitral Proceedings: Settlement, form and contents of arbitral award, termination of proceedings, correction and interpretation of awards, additional award.

Module III: Recourse against Arbitral Award
Application for setting aside Arbitral Award, Finality and enforcement of Arbitral Award, appealable orders, Miscellaneous, Deposits, Lien on Arbitral Award and Deposits as to costs, Arbitration agreement not to be discharged by death of party thereof, Provisions in case of insolvency, Jurisdiction, limitation, Limitations, Enforcement of certain Foreign Awards.

Module IV: Techniques of ADR – I
Negotiation / Consultation, Mediation, Good offices, Conciliation: Nature, Scope and Methods.
Legal Services: Meaning and scope in Legal Aid and Advice, Lok Adalats-nature, scope, procedure and functioning.

Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

SUMMER INTERNSHIP EVALUATION-III

Course Code: LAW2735 **Credit Units: 03**

It is a mode of Clinical Legal education Specified period to be spent by the student with a law firm/court/Commissions/NGO's and like institutions working with the realm of law or connected therewith. The reports both by the student and the office together with diary where applicable to be certified will be submitted for evaluation

The Internship during the summer break is a compulsory course. There is a Internship Data form where students fill in the details of where they are interning with complete address and phone numbers Customized Legal Reference /Diary is provided to the students on payment They maintain a day to day record of the work that they do at the place they are interning. They are expected to intern for a minimum 90 days. They submit their completed diary, certificate from the employer and also a report of their experience at work. After submission there is a Viva by concerned faculty. They assess the student on the kind of work they have done during internship, presentation of the work they have done and also on the practical knowledge they have gained

The Paper is marked out of 100 marks. The breakup of the marks is as follows:

1.	Diary submission	25 Marks
2.	Report and certificate	25 Marks
3.	Viva (Panel of External Examiners)	40 Marks
4.	Attendance (Regularity in meeting the supervisor)	10 Marks
	Total	**100**

TAXATION LAW

Course Code: LAW2802 **Credit Units: 05**

Course Objective:
Power to tax has been described as the power to destroy. This idea is being floated often whenever the State introduces a new tax. Is this true? Is it not necessary that in order to raise revenue and place the economy on solid foundation, the taxing power should be conferred on the State? The power to tax shall not go unregulated. In this context of a federal structure the distribution of the taxing powers assumes added significance. Obviously, a study of the Constitutional framework on taxation becomes important. Along with this, an analysis of the different laws enacted in exercise of these powers with their safeguards and remedies sheds light on the mechanics of the taxation by the Union and the States.

Course Contents:

Module I: General Principles of Taxation Laws
History and Development of Tax Laws in India, Fundamental Principles relating to Tax Laws, Taxing power and constitutional limitations, Distinction between: Tax, Fee and Cess; Tax avoidance and Tax evasion .

Module II: Basic concepts of Income Tax
Income, Previous Year, assessment Year, Person, Assesee and Total Income, Income not included in the Total Income. Residential status, Clubbing of Income, Tax planning, Rate of Income Tax, Heads of Income, Salaries, Income from House Property, Income from Business or Profession, Capital Gains, Income from Other sources, Deductions under the Income Tax Act, 1961, Income Tax Authorities: Power and Functions, Filing of returns and procedure for assessment, Offences and Penal Sanctions .

Module III: Value Added Tax
Meaning and importance of VAT, Difference between VAT and Sales Tax, West Bengal Value Added Tax Act, 2003, Criticisms and limitations of Vat system.

Module IV: Service Tax
Taxable Service, Meaning and importance of Service Tax, Valuation of Taxable Service, Offences and Penalities.

Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

INTERPRETATION OF STATUTES

Course Code: LAW2803 **Credit Units: 05**

Course Objective:
Judicial interpretation involves construction of words, phrases and expressions. In their attempt to make the old and existing statutes contextually relevant, courts used to develop certain rules, doctrines and principles of interpretation. The course material seeks to impart to the students, the necessary skills to interpret the statutes with a judicial mind set.

Course Contents:

Module I: Rules of Interpretation
Commencement, repeal and revival of a statute; Rules of interpretation: Liberal rule, mischief rule and golden rules, Harmonious construction.

Module II: Principles of interpretation
Ejusdem of Generis, Noscitur – A Socius, Reddendo Singula Singlis., Expressio Unius Est exclusion Alteriu, UI Res Magis Valent Quam Pereat, Contemporanea Espositio Est Optima Et Protissima Lege.

Module III: Internal Aids to Interpretation

Module IV: External Aids to Interpretation

Module V
Construction of Penal Statutes, Mens rea in statutory offences, Principles to be applied in interpreting the Constitution, Strict construction of taxing statues and its limitations.

Examination Scheme:

Components	P/S/V	CT	C	A	EE
Weightage (%)	10	10	5	5	70

INTELLECTUAL PROPERTY RIGHTS

Course Code: LAW2902 **Credit Units: 05**

Course Objective:

The course is designed to provide comprehensive knowledge to the students regarding Indian position of the Patent Law (1970), Copy Right Law (1957) and Designs Act of 2000 which invariably form the part of Intellectual Property Law and shall comprise of the following.

The importance of this branch of the law is to be sufficiently realized in the Indian legal education. These areas are now internationally conceptualized as representing intellectual property. It is often the case that while the law of patents and trademarks is referred to as industrial property, the law relating to copyright is named intellectual property. While both these terms could be suitably invoked, we here speak of intellectual property as signifying all the three bodies of the law as well as the law on industrial designs.

Unlike other forms of property, intellectual property refers to regimes of legal recognition of, primarily, the products of the mind or imagination. The subject matter of property relations is here preeminently based on mental labour. The law relating to intellectual property protects the right to mental labour.

The law confers rights of proprietary nature on relative intellectual labour primarily on the basis that it is in the interests of society and state to promote creativeness and inventiveness. Limited monopoly provides incentive for greater inventive and innovative efforts in society. An important aspect of the exploration in this course would be ways in which the laws strike a fair balance between the interests and rights of the intellectual labourers on the one hand and organized industrial enterprises on the other. Another dimension is a study of the ways in which this regime of laws militates against, or favours, comm. Moduley property in national cultures. As concerns 'modernization' crucial questions arise in the field of copyright protection in computer software and hardware, internet, electronic music and scientific research. Both copyright, trademarks, design and patent law here relate basically to the law of unfair competition and constitute an aspect of consumer protection and welfare not only in the context of national perspectives but also in view of the waves of globalization already set in. Both from the standpoint of human resources development, modernization and justice it is important that the law students get sufficient insights in Intellectual Property Law.

Course Contents:

Module I: Introduction

Intellectual Property, Concept and Philosophy, Need for Private Rights versus Public Interests, Advantages and Disadvantages of IPR.

Module II: Patent

Development of patent law, Rationale for patent protection**,** Nature and definition, Types of patentable subject matter, Patentability criteria, non-patentable inventions, Rights of patentee, Procedure for granting a patent, Grounds for opposition, Transfer of patent rights, Compulsory Licenses, Acquisition, Surrender, Revocation, restoration, Patent infringement and remedies, Bio patents and software patents, Official Machinery, Controller, Powers and Functions, Patent in pharmaceutical industry, Patent cooperation treaty, Paris convention.

Module III: Copyright

History, Concept of copyright, conditions for grant of copyright, extent of rights exception to copyright protection, fair use provision, assignment and licensing, Compulsory licensing and statutory licensing, Collective administration, Copyright board and office, powers and functions, Moral rights: Neighboring rights; infringement penalties and remedies, Appeals, Berne Convention, Universal Copyright Convention - WIPO Copyright Treaty: WIPO Phonograms and Performances treaty, TRIPS with respect to Copyright and Neighboring rights.

Module IV: Designs, Protection, Historical development, Rationale

Designs Act of 2000: Meaning of Design, Conditions for grant of protection, Ambit of Protection, Exceptions, Registration of Designs, Cancellation, Copyright in Registered Designs, Enforcement, Infringement and remedies, Powers and duties of Controller.

Module V: Trademarks

Evolution, Functions, Objective, Definition, Kinds of Marks, Domain names, Registration, Concurrent registration, Procedure for registration, Relative and absolute grounds of refusal, opposition and its grounds, Assignment, transmission and licensing of Trademarks, Infringement, Penalties and Remedies, Withdrawal of protection, Passing off, Official machinery for regulation administration and Redressal, Registrar, Difference between Trade Mark, **Trade Secret, Traditional Knowledge** and Geographical Indications, TRIPS on Trademarks, Madrid Agreement for The Repression of False or Deceptive Indications of Source on Goods, 1891- Madrid Agreement for the International Registration of Marks, 1891 and protocol relating to that agreement 1989.

Module VI: Plant Varieties Protection Act, 2001

Objectives, Rationale,Registry, Official machinery, registration, Criteria of fulfillment Exclusions, Benefit sharing, Farmers rights, CommModuley Rights, compulsory license Redressal fora, Appellate tribunal, Infringement, offences and penalties; Geographical indications of Goods (Registration and Protection Act, 1999**:** History, Definition, Rationale, Functioning, official Machinery,Registry,Rights conferred, Registration Procedure. Redressal Machinery, Appeal, Passing off, Offences, penalties and Procedure.
