4. Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
5. Melting point/Boiling point of organic compounds
6. Identification of the unknown compound from the literature using melting point/ boiling point.
7. Preparation of the derivatives and confirmation of the unknown compound bymelting point/ boiling point.
8. Minimum 5 unknown organic compounds to be analysed systematically.

B. Preparation of suitable solid derivatives from organic compounds

C. Construction of molecular models

BIOCHEMISTRY PRACTICAL

Course Code : BP209P **Credit Units: 02**

List of experiments

1. Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Maltose, Sucrose and starch)
2. Identification tests for Proteins (albumin and Casein)
3. Quantitative analysis of reducing sugars (DNSA method) and Proteins (Biuret method)
4. Qualitative analysis of urine for abnormal constituents
5. Determination of blood creatinine
6. Determination of blood sugar
7. Determination of serum total cholesterol
8. Preparation of buffer solution and measurement of pH
9. Study of enzymatic hydrolysis of starch
10. Determination of Salivary amylase activity
11. Study the effect of Temperature on Salivary amylase activity.
12. Study the effect of substrate concentration on salivary amylase activity.

Examination Scheme :

COMPUTER APPLICATIONS IN PHARMACY PRACTICAL

Course Code : BP210P **Credit Units: 01**

List of experiments

1. Design a questionnaire using a word processing package to gather information about a particular disease.
2. Create a HTML web page to show personal information.
3 Retrieve the information of a drug and its adverse effects using online tools
4 Creating mailing labels Using Label Wizard , generating label in MS WORD
5 Create a database in MS Access to store the patient information with the required fields Using access
6. Design a form in MS Access to view, add, delete and modify the patient record in the database
7. Generating report and printing the report from patient database
8. Creating invoice table using – MS Access
9. Drug information storage and retrieval using MS Access
10. Creating and working with queries in MS Access
11. Exporting Tables, Queries, Forms and Reports to web pages
12. Exporting Tables, Queries, Forms and Reports to XML pages

Examination Scheme:

PHARMACEUTICAL MICROBIOLOGY

Course Code : BP303T **Credit Units: 04**

Course Objectives: Study of all categories of microorganisims especially for the production of alcohol antibiotics, vaccines, vitamins enzymes etc..

Course Content:

Module-I
Introduction, history of microbiology, its branches, scope and its importance. Introduction to Prokaryotes and Eukaryotes. Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count). Study of different types of phase constrast microscopy, dark field microscopy and electron microscopy.

Module-II
Identification of bacteria using staining techniques (simple, Gram's & Acid fast staining) and biochemical tests (IMViC). Study of principle, procedure, merits, demerits and applications of physical, chemical gaseous,radiation and mechanical method of sterilization. Evaluation of the efficiency of sterilization methods. Equipments employed in large scale sterilization. Sterility indicators.

Module-III
Study of morphology, classification, reproduction/replication and cultivation of Fungi and Viruses.
Classification and mode of action of disinfectants Factors influencing disinfection, antiseptics and their evaluation. For bacteriostatic and bactericidal actions Evaluation of bactericidal & Bacteriostatic. Sterility testing of products (solids, liquids, ophthalmic and other sterile products) according to IP, BP and USP.

Module-IV
Designing of aseptic area, laminar flow equipments; study of different sources of contamination in an aseptic area and methods of prevention, clean area classification. Principles and methods of different microbiological assay. Methods for standardization of antibiotics, vitamins and amino acids. Assessment of a new antibiotic.

Module-V
Types of spoilage, factors affecting the microbial spoilage of pharmaceutical products, sources and types of microbial contaminants, assessment of microbial contamination and spoilage. Preservation of pharmaceutical products using antimicrobial agents, evaluation of microbial stability of formulations.
Growth of animal cells in culture, general procedure for cell culture, Primary, established and transformed cell cultures. Application of cell cultures in pharmaceutical industry and research.

PHARMACEUTICAL ENGINEERING

Course Code : BP304T **Credit Units: 04**

Course Objectives: This course is designed to impart a fundamental knowledge on the art and science of various Module operations used in pharmaceutical industry.

Course Content:

Module-I

Flow of fluids: Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer.

Size Reduction: Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.

Size Separation: Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank.

Module-II

Heat Transfer: Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.

Evaporation: Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator& Economy of multiple effect evaporator.

Distillation: Basic Principles and methodology of simple distillation,flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation

Module-III

Drying: Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer.

Mixing: Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetarymixers, Propellers, Turbines, Paddles & Silverson Emulsifier,

Module-IV

Filtration: Objectives, applications, Theories & Factors influencing filtration, filter aids, filter medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter.

Centrifugation: Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of Perforated basket centrifuge, Non-perforated basket centrifuge, semi continuous centrifuge & super centrifuge.

Module-V

Materials of pharmaceutical plant construction, Corrosion and its prevention: Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion and there prevention. Ferrous and nonferrous metals, inorganic and organic non metals, basic of material handling systems.

PHARMACEUTICAL ORGANIC CHEMISTRY PRACTICAL-II

Course Code : BP305P **Credit Units: 02**

List of experiments

I Experiments involving laboratory techniques
Recrystallization
Steam distillation

II Determination of following oil values (including standardization of reagents)
Acid value
Saponification value
Iodine value

III **Preparation of compounds**

Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol /Aniline by acylation reaction.
2,4,6-Tribromo aniline/Para bromo acetanilide from Aniline/ Acetanilide by halogenation (Bromination) reaction.
5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid / Nitro benzene by nitration reaction.
Benzoic acid from Benzyl chloride by oxidation reaction.
Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction.
1-Phenyl azo-2-napthol from Aniline by diazotization and coupling reactions.
Benzil from Benzoin by oxidation reaction.
Dibenzal acetone from Benzaldehyde by Claison Schmidt reaction
Cinnammic acid from Benzaldehyde by Perkin reaction
P-Iodo benzoic acid from *P*-amino benzoic acid

PHYSICAL PHARMACEUTICS PRACTICAL-I

Course Code : BP306P **Credit Units: 02**

List of Experiments

1. Determination the solubility of drug at room temperature
2. Determination of pKa value by Half Neutralization/ Henderson Hasselbalch equation.
3. Determination of Partition co- efficient of benzoic acid in benzene and water
4. Determination of Partition co- efficient of Iodine in CCl4 and water
5. Determination of % composition of NaCl in a solution using phenol-water system by CST method
6. Determination of surface tension of given liquids by drop count and drop weight method
7. Determination of HLB number of a surfactant by saponification method
8. Determination of Freundlich and Langmuir constants using activated char coal
9. Determination of critical micellar concentration of surfactants
10. Determination of stability constant and donor acceptor ratio of PABA-Caffeine complex by solubilitymethod
11. Determination of stability constant and donor acceptor ratio of Cupric-Glycine complex by pH titration method

PHARMACEUTICAL MICROBIOLOGY PRACTICAL

Course Code : BP307P **Credit Units: 02**

List of experiments

1. Introduction and study of different equipments and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology.
2. Sterilization of glassware, preparation and sterilization of media.
3. Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations.
4. Staining methods- Simple, Grams staining and acid fast staining (Demonstration with practical).
5. Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.
6. Microbiological assay of antibiotics by cup plate method and other methods
7. Motility determination by Hanging drop method.
8. Sterility testing of pharmaceuticals.
9. Bacteriological analysis of water
10. Biochemical test.

PHARMACEUTICAL ENGINEERING PRACTICAL

Course Code : BP308P **Credit Units: 02**

List of Experiments

I. Determination of radiation constant of brass, iron, unpainted and painted glass.
II. Steam distillation – To calculate the efficiency of steam distillation.
III. To determine the overall heat transfer coefficient by heat exchanger.
IV. Construction of drying curves (for calcium carbonate and starch).
V. Determination of moisture content and loss on drying.
VI. Determination of humidity of air – i) From wet and dry bulb temperatures –use of Dew point method.
VII. Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, de humidifier.
VIII. Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic andlogarithmic probability plots.
IX. Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
X. Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such othermajor equipment.
XI. Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/ viscosity
XII. To study the effect of time on the Rate of Crystallization.
XIII. To calculate the uniformity Index for given sample by using Double Cone Blender.

MEDICINAL CHEMISTRY PRACTICAL-I

Course Code : BP406P **Credit Units: 02**

List of experiments

I Preparation of drugs/ intermediates

1 1,3-pyrazole
2 1,3-oxazole
3 Benzimidazole
4 Benztriazole
5 2,3- diphenyl quinoxaline
6 Benzocaine
7 Phenytoin
8 Phenothiazine
9 Barbiturate

II Assay of drugs

1 Chlorpromazine
2 Phenobarbitone
3 Atropine
4 Ibuprofen
5 Aspirin
6 Furosemide

III Determination of Partition coefficient for any two drugs

Examination Scheme :

PHYSICAL PHARMACEUTICS PRACTICAL-II

Course Code : BP407P **Credit Units: 02**

List of experiments

1. Determination of particle size, particle size distribution using sieving method
2. Determination of particle size, particle size distribution using Microscopic method
3. Determination of bulk density, true density and porosity
4. Determine the angle of repose and influence of lubricant on angle of repose
5. Determination of viscosity of liquid using Ostwald's viscometer
6. Determination sedimentation volume with effect of different suspending agent
7. Determination sedimentation volume with effect of different concentration of single suspending agent
8. Determination of viscosity of semisolid by using Brookfield viscometer
9. Determination of reaction rate constant first order.
10. Determination of reaction rate constant second order
11. Accelerated stability studies

PHARMACOLOGY PRACTICAL-I

Course Code : BP408P **Credit Units: 02**

List of experiments

1. Introduction to experimental pharmacology.
2. Commonly used instruments in experimental pharmacology.
3. Study of common laboratory animals.
4. Maintenance of laboratory animals as per CPCSEA guidelines.
5. Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies.
6. Study of different routes of drugs administration in mice/rats.
7. Study of effect of hepatic microsomal enzyme inducers on the phenobarbitone sleeping time in mice.
8. Effect of drugs on ciliary motility of frog oesophagus
9. Effect of drugs on rabbit eye.
10. Effects of skeletal muscle relaxants using rota-rod apparatus.
11. Effect of drugs on locomotor activity using actophotometer.
12. Anticonvulsant effect of drugs byMES and PTZ method.
13. Study of stereotype and anti-catatonic activity of drugs on rats/mice.
14. Study of anxiolytic activity of drugs using rats/mice.
15. Study of local anesthetics by different methods

Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos

INDUSTRIAL PHARMACY-I

Course Code : BP502T **Credit Units: 04**

Course Objectives: Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product.

Course content:

Module-I

Preformulation Studies: Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

a. Physical properties: Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

b. Chemical Properties: Hydrolysis, oxidation, reduction, racemisation, polymerization BCS classification of drugs & its significant. Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

Module-II

Tablets:

a. Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tablet tooling.

b. Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects in coating.

c. Quality control tests: In process and finished product tests

Liquid orals: Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

Module-III

Capsules:

a. ***Hard gelatin capsules:*** Introduction, Production of hard gelatin capsule shells. Size of capsules, Filling, finishing and special techniques of formulation of hard gelatin capsules, manufacturing defects. In process and final product quality control tests for capsules.

b. ***Soft gelatin capsules:*** Nature of shell and capsule content, size of capsules,importance of base adsorption and minim/gram factors, production, in process and final product quality control tests. Packing, storage and stability testing of soft gelatin capsules and their applications.

Pellets: Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets

Module-IV

Parenteral Products:

a. Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity

b. Production procedure, production facilities and controls, aseptic processing

c. Formulation of injections, sterile powders, large volume parenterals and lyophilized products.

d. Containers and closures selection, filling and sealing of ampoules, vials and infusion fluids. Quality control tests of parenteral products.

Ophthalmic Preparations: Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers; evaluation of

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

ophthalmic preparations

Module-V

Cosmetics: Formulation and preparation of the following cosmetic preparations: lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and sunscreens.

Pharmaceutical Aerosols: Definition, propellants, containers, valves, types of aerosol systems; formulation and manufacture of aerosols; Evaluation of aerosols; Quality control and stability studies.

Packaging Materials Science: Materials used for packaging of pharmaceutical products, factors influencing choice of containers, legal and official requirements for containers, stability aspects of packaging materials, quality control tests.

Examination Scheme :

PHARMACEUTICAL JURISPRUDENCE

Course Code : BP505T **Credit Units: 04**

Course Objectives: This course is designed to impart basic knowledge on important legislations related to the profession of pharmacy in India.

Course Content:

Module-I

Drugs and Cosmetics Act, 1940 and its rules 1945:

Objectives, Definitions, Legal definitions of schedules to the Act and Rules

Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under license or permit. Offences and penalties**.**

Manufacture of drugs – Prohibition of manufacture and sale of certain drugs,

Conditions for grant of license and conditions of license for manufacture of drugs,

Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan license and repacking license.

Module-II

Drugs and Cosmetics Act, 1940 and its rules 1945.

Detailed study of Schedule G, H, M, N, P,T,U, V, X, Y, Part XII B, Sch F & DMR (OA)

Sale of Drugs – Wholesale, Retail sale and Restricted license. Offences and penalties

Labeling & Packing of drugs- General labeling requirements and specimen labels for drugs and cosmetics, List of permitted colors. Offences and penalties.

Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs

Laboratory, Drugs Consultative Committee, Government drug analysts, Licensing authorities, controlling authorities, Drugs Inspectors

Module-III

Pharmacy Act –1948: Objectives, Definitions, Pharmacy Council of India; its constitution and functions, Education Regulations, State and Joint state pharmacy councils; constitution and functions, Registration of Pharmacists, Offences and Penalties

Medicinal and Toilet Preparation Act –1955: Objectives, Definitions, Licensing,

Manufacture In bond and Outside bond, Export of alcoholic preparations,

Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations.

Offences and Penalties.

Narcotic Drugs and Psychotropic substances Act-1985 and Rules: Objectives, Definitions, Authorities and Officers, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and Regulation, opium poppy cultivation and production of poppy straw, manufacture, sale and export of opium, Offences and Penalties

Module -IV

Study of Salient Features of Drugs and Magic Remedies Act and its rules: Objectives, Definitions, Prohibition of certain advertisements, Classes of Exempted advertisements, Offences and Penalties

Prevention of Cruelty to animals Act-1960: Objectives, Definitions, Institutional Animal Ethics Committee, CPCSEA guidelines for Breeding and Stocking of Animals, Performance of Experiments, Transfer and acquisition of animals for experiment, Records, Power to suspend or revoke registration, Offences and Penalties

National Pharmaceutical Pricing Authority: Drugs Price Control Order (DPCO)- 2013.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Objectives, Definitions, Sale prices of bulk drugs, Retail price of formulations, Retail price and ceiling price of scheduled formulations, National List of Essential Medicines (NLEM)

Module-V

Pharmaceutical Legislations – A brief review, Introduction, Study of drugs enquiry committee, Health survey and development committee, Hathi committee and Mudaliar committee

Code of Pharmaceutical ethics D efinition, Pharmacist in relation to his job, trade, medical profession and his profession, Pharmacist's oath

Medical Termination of Pregnancy Act

Right to Information Act

Introduction to Intellectual Property Rights (IPR)

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

INDUSTRIAL PHARMACY PRACTICAL-I

Course Code : BP506P **Credit Units: 02**

List of experiments

1. Preformulation studies on paracetamol/asparin/or any other drug
2. Preparation and evaluation of Paracetamol tablets
3. Preparation and evaluation of Aspirin tablets
4. Coating of tablets- film coating of tables/granules
5. Preparation and evaluation of Tetracycline capsules
6. Preparation of Calcium Gluconate injection
7. Preparation of Ascorbic Acid injection
8. Qulaity control test of (as per IP) marketed tablets and capsules
9. Preparation of Eye drops/ and Eye ointments
10. Preparation of Creams (cold / vanishing cream)
11. Evaluation of Glass containers (as per IP)

Examination Scheme :

IA				EE	
A	**PR**	**LR**	**V**	**PR**	**V**
02	**05**	**03**	**05**	**25**	**10**

Note: A-Attendance, IA –Internal Assessment, EE- External Exam, PR- Performance, LR – Lab Record, V – Viva.

PHARMACOLOGY PRACTICAL-II

Course Code : BP507P **Credit Units: 02**

List of experiments

1. Introduction to *in-vitro* pharmacology and physiological salt solutions.
2. Effect of drugs on isolated frog heart.
3. Effect of drugs on blood pressure and heart rate of dog.
4. Study of diuretic activity of drugs using rats/mice.
5. DRC of acetylcholine using frog rectus abdominis muscle.
6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileum respectively.
7. Bioassay of histamine using guinea pig ileum by matching method.
8. Bioassay of oxytocin using rat uterine horn by interpolation method.
9. Bioassay of serotonin using rat fundus strip by three point bioassay.
10. Bioassay of acetylcholine using rat ileum/colon by four point bioassay.
11. Determination of PA2 value of prazosin using rat anococcygeus muscle (by Schilds plot method).
12. Determination of PD2 value using guinea pig ileum.
13. Effect of spasmogens and spasmolytics using rabbit jejunum.
14. Anti-inflammatory activity of drugs using carrageenan induced paw-edema model.
15. Analgesic activity of drug using central and peripheral methods

Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos

Examination Scheme :

IA				EE

PHARMACOGNOSY AND PHYTOCHEMISTRY PRACTICAL-II

Course Code : BP508P **Credit Units: 02**

List of Experiments

1. Morphology, histology and powder characteristics & extraction & detection of:
Cinchona, Cinnamon, Senna, Clove, Ephedra, Fennel and Coriander
2. Exercise involving isolation & detection of active principles
a. Caffeine - from tea dust.
b. Diosgenin from Dioscorea
c. Atropine from Belladonna
d. Sennosides from Senna
3. Separation of sugars by Paper chromatography
4. TLC of herbal extract
5. Distillation of volatile oils and detection of phytoconstitutents by TLC
6. Analysis of crude drugs by chemical tests: **(**i) Asafoetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh

Examination Scheme :

HERBAL DRUG TECHNOLOGY

Course Code : BP603T **Credit Units: 04**

Course Objectives: This subject gives the student the knowledge of basic understanding of herbal drug industry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good Manufacturing Practices (GMP), patenting and regulatory issues of herbal drugs

Course Content:

Module-I

Herbs as raw materials: Definition of herb, herbal medicine, herbal medicinal product, herbal drug preparation. Source of Herbs. Selection, identification and authentication of herbal materials. Processing of herbal raw material

Biodynamic Agriculture: Good agricultural practices in cultivation of medicinal plants including Organic farming. Pest and Pest management in medicinal plants: Biopesticides/Bioinsecticides.

Indian Systems of Medicine

a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy

b) Preparation and standardization of Ayurvedic formulations viz Aristas and Asawas, Ghutika,Churna, Lehya and Bhasma.

Module-II

Nutraceuticals: General aspects, Market, growth, scope and types of products available in the market. Health benefits and role of Nutraceuticals in ailments like Diabetes, CVS diseases, Cancer, Irritable bowel syndrome and various Gastro intestinal diseases. Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek, Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina

Herbal-Drug and Herb-Food Interactions: General introduction to interaction and classification. Study of following drugs and their possible side effects and interactions: Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper & Ephedra.

Module-III

Herbal Cosmetics

Sources and description of raw materials of herbal origin used via, fixed oils, waxes, gums colours, perfumes, protective agents, bleaching agents, antioxidants in products such as skin care, hair care and oral hygiene products.

Herbal excipients:

Herbal Excipients – Significance of substances of natural origin as excipients – colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors & perfumes.

Herbal formulations :

Conventional herbal formulations like syrups, mixtures and tablets and Novel dosage forms like phytosomes

Module-IV

Evaluation of Drugs WHO & ICH guidelines for the assessment of herbal drugs Stability testing of herbal drugs.

Patenting and Regulatory requirements of natural products:

a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right, Bioprospecting and Biopiracy

b) Patenting aspects of Traditional Knowledge and Natural Products. Case study of Curcuma & Neem.

Regulatory Issues - Regulations in India (ASU DTAB, ASU DCC), Regulation of

Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

manufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU drugs.

Module-V

General Introduction to Herbal Industry: Herbal drugs industry: Present scope and future prospects. A brief account of plant based industries and institutions involved in work on medicinal and aromatic plants in India.

S**chedule T – GoodManufacturing Practice of Indian systems of medicine**

Components of GMP (Schedule – T) and its objectives

Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

PHARMACEUTICAL QUALITY ASSURANCE

Course Code : BP606T **Credit Units: 04**

Course Objectives: This course deals with the various aspects of quality control and quality assurance aspects of pharmaceutical industries. It deals with the important aspects like cGMP, QC tests, documentation, quality certifications and regulatory affairs.

Course Content:

Module-I
Quality Assurance and Quality Management concepts: Definition and concept of Quality control, Quality assurance and GMP
Total Quality Management (TQM): Definition, elements, philosophies
ICH Guidelines: purpose, participants, process of harmonization, Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines
Quality by design (QbD): Definition, overview, elements of QbD program, tools
ISO 9000 & ISO14000: Overview, Benefits, Elements, steps for registration
NABL accreditation : Principles and procedures

Module-II
Organization and personnel: Personnel responsibilities, training, hygiene and personal records.
Premises: Design, construction and plant layout, maintenance, sanitation, environmental control, utilities and maintenance of sterile areas, control of contamination.
Equipments and raw materials: Equipment selection, purchase specifications, maintenance, purchase specifications and maintenance of stores for raw materials.

Module-III
Quality Control: Quality control test for containers, rubber closures and secondary packing materials.
Good Laboratory Practices: General Provisions, Organization and Personnel, Facilities, Equipment, Testing Facilities Operation, Test and Control Articles, Protocol for Conduct of a Nonclinical Laboratory Study, Records and Reports, Disqualification of Testing Facilities

Module-IV
Complaints: Complaints and evaluation of complaints, Handling of return good, recalling and waste disposal.
Document maintenance in pharmaceutical industry: Batch Formula Record, Master Formula Record, SOP, Quality audit, Quality Review and Quality documentation, Reports and documents, distribution records.

Module-V
Calibration and Validation: Introduction, definition and general principles of calibration, qualification and validation, importance and scope of validation, types of validation, validation master plan. Calibration of pH meter, Qualification of UV-Visible spectrophotometer, General principles of Analytical method Validation.
Warehousing: Good warehousing practice, materials management

MEDICINAL CHEMISTRY PRACTICAL-III

Course Code : BP607P **Credit Units: 02**

List of experiments

I Preparation of drugs and intermediates
1 Sulphanilamide
2 7-Hydroxy, 4-methyl coumarin
3 Chlorobutanol
4 Triphenyl imidazole
5 Tolbutamide
6 Hexamine

II Assay of drugs
1 Isonicotinic acid hydrazide
2 Chloroquine
3 Metronidazole
4 Dapsone
5 Chlorpheniramine maleate
6 Benzyl penicillin

III Preparation of medicinally important compounds or intermediates byMicrowave irradiation technique

IV Drawing structures and reactions using chem draw®

V Determination of physicochemical properties such as logP, clogP, MR, Molecular weight, Hydrogen bond donors and acceptors for class of drugs course content using drug design software Drug likeliness screening (Lipinskies RO5)

PHARMACOLOGY PRACTICAL-III

Course Code : BP608P **Credit Units: 02**

List of experiments

1. Dose calculation in pharmacological experiments
2. Antiallergic activity by mast cell stabilization assay
3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model and NSAIDS induced ulcer model.
4. Study of effect of drugs on gastrointestinal motility
5. Effect of agonist and antagonists on guinea pig ileum
6. Estimation of serum biochemical parameters by using semi- autoanalyser
7. Effect of saline purgative on frog intestine
8. Insulin hypoglycemic effect in rabbit
9. Test for pyrogens (rabbit method)
10. Determination of acute oral toxicity (LD50) of a drug from a given data
11. Determination of acute skin irritation / corrosion of a test substance
12. Determination of acute eye irritation / corrosion of a test substance
13. Calculation of pharmacokinetic parameters from a given data
14. Biostatistics methods in experimental pharmacology(student's t test, ANOVA)
15. Biostatistics methods in experimental pharmacology (Chi square test, Wilcoxon Signed Rank test)

**Experiments are demonstrated by simulated experiments/videos*

HERBAL DRUG TECHNOLOGY PRACTICAL

Course Code : BP609P **Credit Units: 02**

List of experiments

1. To perform preliminary phytochemical screening of crude drugs.
2. Determination of the alcohol content of Asava and Arista
3. Evaluation of excipients of natural origin
4. Incorporation of prepared and standardized extract in cosmetic formulations like creams, lotions and shampoos and their evaluation.
5. Incorporation of prepared and standardized extract in formulations like syrups, mixtures and tablets and their evaluation as per Pharmacopoeial requirements.
6. Monograph analysis of herbal drugs from recent Pharmacopoeias
7. Determination of Aldehyde content
8. Determination of Phenol content
9. Determination of total alkaloids

INDUSTRIAL PHARMACY-II

Course Code : BP702T **Credit Units: 04**

Course Objectives: This course is designed to impart fundamental knowledge on pharmaceutical product development and translation from laboratory to market

Course Content:

Module-I

Pilot plant scale up techniques: General considerations - including significance of personnel requirements, space requirements, raw materials, Pilot plant scale up considerations for solids, liquid orals, semi solids and relevant documentation, SUPAC guidelines, Introduction to platform technology

Module-II

Technology development and transfer: WHO guidelines for Technology Transfer(TT): Terminology, Technology transfer protocol, Quality risk management, Transfer from R & D to production (Process, packaging and cleaning), Granularity of TT Process (API, excipients, finished products, packaging materials) Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer, Approved regulatory bodies and agencies, Commercialization - practical aspects and problems (case studies), TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE / SIDBI; TT related documentation - confidentiality agreement, licensing, MoUs, legal issues

Module-III

Regulatory affairs: Introduction, Historical overview of Regulatory Affairs, Regulatory authorities, Role of Regulatory affairs department, Responsibility of Regulatory Affairs Professionals

Regulatory requirements for drug approval: Drug Development Teams, Non-Clinical Drug Development, Pharmacology, Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND) Application, Investigator's Brochure (IB) and New Drug Application (NDA), Clinical research / BE studies, Clinical Research Protocols, Biostatistics in Pharmaceutical Product Development, Data Presentation for FDA Submissions, Management of Clinical Studies.

Module-IV

Quality Management Systems: Quality management & Certifications: Concept of Quality, Total Quality Management, Quality by Design (QbD), Six Sigma concept, Out of Specifications (OOS), Change control, Introduction to ISO 9000 series of quality systems standards, ISO 14000, NABL, GLP

Module-V

Indian Regulatory Requirements: Central Drug Standard Control Organization (CDSCO) and State Licensing Authority: Organization, Responsibilities, Certificate of Pharmaceutical Product (COPP), Regulatory requirements and approval procedures for New Drugs.

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

PHARMACY PRACTICE

Course Code : BP703T **Credit Units: 04**

Course Objectives: In the changing scenario of pharmacy practice in India, for successful practice of Hospital Pharmacy, the students are required to learn various skills like drug distribution, drug information, and therapeutic drug monitoring for improved patient care. In commModuley pharmacy, students will be learning various skills such as dispensing of drugs, responding to minor ailments by providing suitable safe medication, patient counselling for improved patient care in the commModuley set up.

Course Contents:

Module-I

a) Hospital and it's organization: Definition, Classification of hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinical and non- clinical basis, Organization Structure of a Hospital, and Medical staffs involved in the hospital and their functions.

b) Hospital pharmacy and its organization: Definition, functions of hospital pharmacy, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital pharmacists.

c) Adverse drug reaction: Classifications - Excessive pharmacological effects, secondary pharmacological effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs, Drug interaction- beneficial interactions, adverse interactions, and pharmacokinetic drug interactions, Methods for detecting drug interactions, spontaneous case reports and record linkage studies, and Adverse drug reaction reporting and management.

d) **CommModuley Pharmacy:** Organization and structure of retail and wholesale drug store, types and design, Legal requirements for establishment and maintenance of a drug store, Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.

Module-II

a) Drug distribution system in a hospital: Dispensing of drugs to inpatients, types of drug distribution systems, charging policy and labelling, Dispensing of drugs to ambulatory patients, and Dispensing of controlled drugs.

b) Hospital formulary: Definition, contents of hospital formulary, Differentiation of hospital formulary and Drug list, preparation and revision, and addition and deletion of drug from hospital formulary.

c) Therapeutic drug monitoring: Need for Therapeutic Drug Monitoring, Factors to be considered during the Therapeutic DrugMonitoring, and Indian scenario for Therapeutic Drug Monitoring.

d) Medication adherence: Causes of medication non-adherence, pharmacist role in the medication adherence, and monitoring of patient medication adherence.

e) Patient medication history interview: Need for the patient medication history interview, medication interview forms.

f) CommModuley pharmacy management: Financial, materials, staff, and infrastructure requirements.

Module-III

a) Pharmacy and therapeutic committee: Organization, functions, Policies of the pharmacy and therapeutic committee in including drugs into formulary, inpatient and outpatient prescription, automatic stop order, and emergency drug list preparation.

b) Drug information services: Drug and Poison information centre, Sources of drug information, Computerised services, and storage and retrieval of information.

c) Patient counseling: Definition of patient counseling; steps involved in patient

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

counseling, and Special
cases that require the pharmacist

d) Education and training program in the hospital: Role of pharmacist in the education and training program, Internal and external training program, Services to the nursing homes/clinics, Code of ethics for commModuley pharmacy, and Role of pharmacist in the interdepartmental communication and commModuley health education.

e) Prescribed medication order and communication skills: Prescribed medication order- interpretation and legal requirements, and Communication skills- communication with prescribers and patients.

Module-IV

a) Budget preparation and implementation: Budget preparation and implementation

b) Clinical Pharmacy: Introduction to Clinical Pharmacy, Concept of clinical pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy monitoring - medication chart review, clinical review, pharmacist intervention, Ward round participation, Medication history and Pharmaceutical care. Dosing pattern and drug therapy based on Pharmacokinetic & disease pattern.

c) Over the counter (OTC) sales: Introduction and sale of over the counter, and Rational use of common over the counter medications.

Module-V

a) Drug store management and inventory control: Organisation of drug store, types of materials stocked and storage conditions, Purchase and inventory control: principles, purchase procedure, purchase order, procurement and stocking, Economic order quantity, Reorder quantity level, and Methods used for the analysis of the drug expenditure

b) Investigational use of drugs: Description, principles involved, classification, control, identification, role of hospital pharmacist, advisory committee.

c) Interpretation of Clinical Laboratory Tests: Blood chemistry, hematology, and urinalysis

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

NOVEL DRUG DELIVERY SYSTEMS

Course Code : BP704T **Credit Units: 04**

Course Objectives: This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

Course Content:

Module-I

Controlled drug delivery systems: Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates.Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

Polymers: Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

Module-II

Microencapsulation: Definition, advantages and disadvantages, microspheres /microcapsules, microparticles, methods of microencapsulation, applications

Mucosal Drug Delivery system: Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

Implantable Drug Delivery Systems: Introduction, advantages and disadvantages, concept of implantsand osmotic pump

Module-III

Transdermal Drug Delivery Systems: Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

Gastroretentive drug delivery systems: Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

Nasopulmonary drug delivery system: Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered dose), nasal sprays, nebulizers

Module-IV

Targeted drug Delivery: Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

Module-V

Ocular Drug Delivery Systems: Introduction, intra ocular barriers and methods to overcome – Preliminary study, ocular formulations and ocuserts

Intrauterine Drug Delivery Systems: Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

INSTRUMENTAL METHODS OF ANALYSIS PRACTICAL

Course Code : BP705P **Credit Units: 02**

List of experiments

1 Determination of absorption maxima and effect of solvents on absorption maxima of organic compounds
2 Estimation of dextrose by colorimetry
3 Estimation of sulfanilamide by colorimetry
4 Simultaneous estimation of ibuprofen and paracetamol by UV spectroscopy
5 Assay of paracetamol by UV- Spectrophotometry
6 Estimation of quinine sulfate by fluorimetry
7 Study of quenching of fluorescence
8 Determination of sodium by flame photometry
9 Determination of potassium by flame photometry
10 Determination of chlorides and sulphates by nephelo turbidometry
11 Separation of amino acids by paper chromatography
12 Separation of sugars by thin layer chromatography
13 Separation of plant pigments by column chromatography
14 Demonstration experiment on HPLC
15 Demonstration experiment on Gas Chromatography

PRACTICE SCHOOL

Course Code: BP706PS **Credit Units: 06**

Objectives: Every candidate shall undergo practice school for a period of 150 hours evenly distributed throughout the semester. The student shall opt any one of the domains for practice school declared by the program committee from time to time. At the end of the practice school, every student shall submit a printed report (in triplicate) on the practice school he/she attended (not more than 25 pages). Along with the exams of Semester VII, the report submitted by the student, knowledge and skills acquired by the student through practice school shall be evaluated by the subject experts at college level and grade point shall be awarded.

Examination Scheme:
Total: 150 marks

Internal Marks : 25
Continuous Mode :

Assignment	Periodic report
10	15

External Marks : 125

Objective(s) of the work done	15 Marks
Learning Outcomes	30 Marks
Presentation of Work	30 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks
	Total = 125 Marks

BIOSTATISITCS AND RESEARCH METHODOLOGY

Course Code : BP801T **Credit Units: 04**

Course Objectives: To understand the applications of Biostatics in Pharmacy. This subject deals with descriptive statistics, Graphics, Correlation, Regression, logistic regression Probability theory, Sampling technique, Parametric tests, Non Parametric tests, ANOVA, Introduction to Design of Experiments, Phases of Clinical trials and Observational and Experimental studies, SPSS, R and MINITAB statistical software's, analyzing the statistical data using Excel**.**

Course Content:

Module-I
Introduction: Statistics, Biostatistics, Frequency distribution
Measures of central tendency: Mean, Median, Mode- Pharmaceutical examples
Measures of dispersion: Dispersion, Range, standard deviation, Pharmaceutical problems
Correlation: Definition, Karl Pearson's coefficient of correlation, Multiple correlation - Pharmaceuticals examples

Module-II
Regression: Curve fitting by the method of least squares, fitting the lines y= a + bx and x = a + by, Multiple regression, standard error of regression– Pharmaceutical Examples
Probability: Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties - problems
Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples
Parametric test: t-test (Sample, Pooled or Unpaired and Paired) , ANOVA, (One way and Two way), Least Significance difference

Module-III
Non Parametric tests: Wilcoxon Rank Sum Test, Mann-Whitney U test, Kruskal-Wallis test, Friedman Test
Introduction to Research: Need for research, Need for design of Experiments, Experiential Design Technique, plagiarism
Graphs: Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph
Designing the methodology: Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

Module-IV
Blocking and confounding system for Two-level factorials
Regression modeling: Hypothesis testing in Simple and Multiple regressionmodels
Introduction to Practical components of Industrial and Clinical Trials Problems: Statistical Analysis Using Excel, SPSS, MINITAB®, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach
Module-V
Design and Analysis of experiments:
Factorial Design: Definition, 22, 23design. Advantage of factorial design

SOCIAL AND PREVENTIVE PHARMACY

Course Code : BP802T **Credit Units: 04**

Course Objectives: The purpose of this course is to introduce to students a number of health issues and their challenges. This course also introduced a number of national health programmes. The roles of the pharmacist in these contexts are also discussed.

Course Content:

Module-I:
Concept of health and disease: Definition, concepts and evaluation of public health. Understanding the concept of prevention and control of disease, social causes of diseases and social problems of the sick.
Social and health education: Food in relation to nutrition and health, Balanced diet, Nutritional deficiencies, Vitamin deficiencies, Malnutrition and its prevention.
Sociology and health: Socio cultural factors related to health and disease, Impact of urbanization on health and disease, Poverty and health
Hygiene and health: personal hygiene and health care; avoidable habits

Module-II:
Preventive medicine: General principles of prevention and control of diseases such as cholera, SARS, Ebola virus, influenza, acute respiratory infections, malaria, chicken guinea, dengue, lymphatic filariasis, pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

Module-III:
National health programs, its objectives, functioning and outcome of the following: HIV AND AIDS control programme, TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National programme for prevention and control of deafness, Universal immunization programme, National programme for control of blindness, Pulse polio programme.

Module-IV:
National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

Module-V:
CommModuley services in rural, urban and school health: Functions of PHC, Improvement in rural sanitation, national urban health mission, Health promotion and education in school.

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE
Weightage(%)	15	3	3	4	75

CT: Class Test, HA: Home Assignment, S/V/Q: Seminar/Viva/Quiz, ATTD: Attendance EE: End Semester Examination

QUALITY CONTROL AND STANDARDIZATION OF HERBALS

Course Code : BP806ET **Credit Units: 04**

Course Objectives: In this subject the student learns about the various methods and guidelines for evaluation and standardization of herbs and herbal drugs. The subject also provides an opportunity for the student to learn cGMP, GAP and GLP in traditional system of
medicines.

Course Contents:

Module-I
Basic tests for drugs – Pharmaceutical substances, Medicinal plants materials and dosage
Forms WHO guidelines for quality control of herbal drugs.
Evaluation of commercial crude drugs intended for use

Module-II
Quality assurance in herbal drug industry of cGMP, GAP, GMP and GLP in traditional system of medicine.
WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines
WHO Guidelines on GACP for Medicinal Plants.

Module-III
EU and ICH guidelines for quality control of herbal drugs.
Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines

Module-IV
Stability testing of herbal medicines.Application of various chromatographic techniques in standardization of herbal products.
Preparation of documents for new drug application and export registration
GMP requirements and Drugs & Cosmetics Act provisions.

Module-V
Regulatory requirements for herbal medicines.
WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance systems
Comparison of various Herbal Pharmacopoeias.
Role of chemical and biological markers in standardization of herbal products

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

COMPUTER AIDED DRUG DESIGN

Course Code : BP807ET **Credit Units: 04**

Course Objectives: This subject is designed to provide detailed knowledge of rational drug design process and various techniques used in rational drug design process.

Course Content:

Module-I
Introduction to Drug Discovery and Development
Stages of drug discovery and development
Lead discovery and Analog Based Drug Design
Rational approaches to lead discovery based on traditional medicine,
Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.
Analog Based Drug Design: Bioisosterism, Classification, Bioisosteric replacement. Any three case studies

Module-II
Quantitative Structure Activity Relationship (QSAR): SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partition coefficient, Hammet's substituent constant and Tafts steric constant. Hansch analysis, Free Wilson analysis, 3D-QSAR approaches like
COMFA and COMSIA.

Module-III
Molecular Modeling and virtual screening techniques
Virtual Screening techniques: Drug likeness screening, Concept of pharmacophore mapping and pharmacophore based Screening,
Molecular docking: Rigid docking, flexible docking, manual docking, Docking based screening. *De novo* drug design.

Module-IV
Informatics & Methods in drug design: Introduction to Bioinformatics, chemoinformatics. ADME databases, chemical, biochemical and pharmaceutical databases.

Module-V
Molecular Modeling: Introduction to molecular mechanics and quantum mechanics.Energy Minimization methods and Conformational Analysis, global conformational minima determination.

Examination Scheme :

COSMETIC SCIENCE

Course Code : BP809ET **Credit Units: 04**

Course Contents :

Module-I

Classification of cosmetic and cosmeceutical products

Definition of cosmetics as per Indian and EU regulations, Evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs

Cosmetic excipients: Surfactants, rheologymodifiers, humectants, emollients, preservatives. Classification and application

Skin: Basic structure and function of skin.

Hair: Basic structure of hair. Hair growth cycle.

Oral Cavity: Common problem associated with teeth and gums**.**

Module-II

Principles of formulation and building blocks of skin care products: Face wash, Moisturizing cream, Cold Cream, Vanishing cream and their advantages and disadvantages.Application of these products in formulation of cosmecuticals.

Antiperspants & deodorants- Actives & mechanism of action.

Principles of formulation and building blocks of Hair care products: Conditioning shampoo, Hair conditioner,anti-dandruff shampoo. Hair oils. Chemistry and formulation of Para-phylene diamine based hair dye. Principles of formulation and building blocks of oral care products: Toothpaste for bleeding gums, sensitive teeth. Teeth whitening, Mouthwash.

Module-III

Sun protection, Classification of Sunscreens and SPF.

Role of herbs in cosmetics:

Skin Care: Aloe and turmeric

Hair care: Henna and amla.

Oral care: Neem and clove

Analytical cosmetics: BIS specification and analytical methods for shampoo, skincream and toothpaste**.**

Module-IV

Principles of Cosmetic Evaluation:Principles of sebumeter, corneometer. Measurement of TEWL, Skin Color, Hair tensile strength, Hair combing properties. Soaps,and syndet bars. Evolution and skin benfits.

Module-V

Oily and dry skin, causes leading to dry skin, skin moisturisation. Basic understanding of the terms Comedogenic, dermatitis. Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes Cosmetic problems associated with skin: blemishes, wrinkles, acne, prickly heat and body odor. Antiperspirants and Deodorants- Actives and mechanism of action

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

EXPERIMENTAL PHARMACOLOGY

Course Code : BP810ET **Credit Units: 04**

Course Objectives:
This subject is designed to impart the basic knowledge of preclinical studies in experimental animals including design, conduct and interpretations of results.

Course Contents:

Module-I
Laboratory Animals:
Study of CPCSEA and OECD guidelines for maintenance, breeding and conduct of experiments on laboratory animals, Common lab animals: Description and applications of different species and strains of animals. Popular transgenic and mutant animals. Techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.

Module-II
Preclinical screening models
a. Introduction: Dose selection, calculation and conversions, preparation of drug solution/suspensions, grouping of animals and importance of sham negative and positive control groups. Rationale for selection of animal species and sex for the study.
b. **Study of screening animal models for:** Diuretics, nootropics, anti-Parkinson's,antiasthmatics,
Preclinical screening models: for CNS activity- analgesic, antipyretic,anti-inflammatory, general anaesthetics, sedative and hypnotics, antipsychotic, antidepressant, antiepileptic, antiparkinsonism, alzheimer's disease

Module-III
Preclinical Screening Models: for ANS activity, sympathomimetics, sympatholytics, parasympathomimetics, parasympatholytics, skeletal muscle relaxants, drugs acting on eye, local anaethetics

Module-IV
Preclinical screening models: for CVS activity- antihypertensives, diuretics, antiarrhythmic, antidyslepidemic, anti aggregatory, coagulants, and anticoagulants. Preclinical screening models for other important drugs like antiulcer, antidiabetic, anticancer and antiasthmatics.
Research methodology and Bio-statistics: Selection of research topic, review of literature, research hypothesis and study design Pre-clinical data analysis and interpretation using Students 't' test and One-way ANOVA. Graphical representation of data

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

ADVANCED INSTRUMENTATION TECHNIQUES

Course Code : BP811ET **Credit Units : 04**

Course Objectives: This subject deals with the application of instrumental methods in qualitative and quantitative analysis of drugs. This subject is designed to impart advanced knowledge on the principles and instrumentation of spectroscopic and chromatographic hyphenated techniques. This also emphasizes on theoretical and practical knowledge on modern analytical instruments that are used for drug testing.

Course Content:

Module-I

Nuclear Magnetic Resonance spectroscopy: Principles of H-NMR and C-NMR, chemical shift, factors affecting chemical shift, coupling constant, Spin - spin coupling, relaxation, instrumentation and applications

Mass Spectrometry- Principles, Fragmentation, Ionization techniques – Electron impact, chemical ionization, MALDI, FAB, Analyzers-Time of flight and Quadrupole, instrumentation, applications

Module-II

Thermal Methods of Analysis: Principles, instrumentation and applications of ThermogravimetricAnalysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC)

X-Ray Diffraction Methods: Origin of X-rays, basic aspects of crystals, Xray Crystallography, rotating crystal technique, single crystal diffraction, powder diffraction, structural elucidation and applications.

Module-III

Calibration and validation-as per ICH and USFDA guidelines

Calibration of following Instruments: Electronic balance, UV-Visible spectrophotometer, IR spectrophotometer, Fluorimeter, Flame Photometer, HPLC and GC

Module-IV

Radio immune assay: Importance, various components, Principle, different methods, Limitation and Applications of Radio immuno assay

Extraction techniques:General principle and procedure involved in the solid phase extraction and liquid-liquid extraction

Module-V

Hyphenated techniques-LC-MS/MS, GC-MS/MS, HPTLC-MS.

Examination Scheme :

Components	CT	HA	S/V/Q	ATTD	EE

PROJECT WORK

Course Code: BP813PW **Credit Units: 06**

Objectives:
The aim of the project work is to provide student with an opportunity to further intellectual and personal development in chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of the degree. The project work can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information / data, leading to production of a structured report.

The area of the project shall directly relate any one of the elective subject opted by the student in semester VIII. The project shall be carried out in group not exceeding 5 in number. The project report shall be submitted in triplicate (typed & bound copy not less than 25 pages).

THE COMPONENTS OF A PROJECT REPORT
The outcome of Project Work is the Project Report. A project report should have the following components:
1) Cover Page: This should contain the title of the project proposal, to whom it is submitted, for which degree, the name of the author, name of the supervisor, year of submission of the project work, name of the University.
2) Acknowledgement: Various organizations and individuals who might have provided assistance /co-operation during the process of carrying out the study.
3) Table of Content: Page-wise listing of the main contents in the report, i.e., different Chapters and its main Sections along with their page numbers.
4) Body of the Report: The body of the report should have these four logical divisions

a. *Introduction:* This will cover the background, rationale/ need / justification, brief review of literature, objectives, methodology (the area of the study, sample, type of study, tools for data collection, and method of analysis), Limitations of the Study, and Chapter Planning.
b. *Conceptual Framework / National and International Scenario*: (relating to the topic of the Project).
c. *Presentation of Data, Analysis and Findings*: (using the tools and techniques mentioned in the methodology).
d. *Conclusion and Recommendations:* In this section, the concluding observations based on the main findings and suggestions are to be provided.

5) Bibliography or References: This section will include the list of books and articles which have been used in the project work, and in writing a project report.
6) Annexures: Questionnaires (if any), relevant reports, etc.
(The main text of the Project should normally be in the range of 5000 words. However, there may be annexure in addition to the main text)

THE STEPS OF PROJECT WORK
STEP I : Selection of the topic for the project by taking following points into consideration:

- Suitability of the topic.
- Relevance of the topic
- Time available at the disposal.
- Feasibility of data collection within the given time limit.
- Challenges involved in the data collection (time & cost involved in the data collection, possibility of getting responses, etc.)

STEP II : Finalisation of the Topic and preparation of Project Proposal in consultation with

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

the Supervisor.
STEP III : Collection of information and data relating to the topic and analysis of the same.
STEP IV : Writing the report dividing it into suitable chapters, viz.,
Chapter 1: Introduction,
Chapter 2: Conceptual Framework / National & International Scenario,
Chapter 3: Analysis & Findings
Chapter 4: Conclusion and Recommendations.
STEP V : The following documents are to be attached with the Final Project Report.
1) Approval letter from the supervisor (Annexure-IA)
2) Student's declaration (Annexure-IB)
3) Certificate from the Competent Authority of the Organisation / Institution, if the student undertakes the Project Work in any Organisation / Institution.
Annexures, References / Bibliography

Guidelines for Evaluation:

- Each of the students has to undertake a Project individually under the supervision of a teacher and to submit the same following the guidelines stated below.
- Language of Project Report and Viva-Voce Examination may be English. The Project Report must be typed and hard bound.
- Failure to submit the Project Report or failure to appear at the Viva-voce Examination will be treated as "Absent" in the Examination. He /she has to submit the Project Report and appear at the Viva-Voce Examination in the subsequent years (within the time period as per University Rules).
- No marks will be allotted on the Project Report unless a candidate appears at the Viva-Voce Examination. Similarly, no marks will be allotted on Viva-Voce Examination unless a candidate submits his/her Project Report.
- Evaluation of the Project Work to be done jointly by one internal expert and one external expert with equal weightage, i.e., average marks of the internal and external experts will be allotted to the candidate.
- A candidate has to qualify in the Project Work separately, obtaining minimum marks of 80 (Dissertation Book and Presentation taken together).

Examination Scheme: Total-150 marks

Evaluation of Dissertation Book:

Objective(s) of the work done	15 Marks
Methodology adopted	20 Marks
Results and Discussions	20 Marks
Conclusions and Outcomes	20 Marks
	Total-75 Marks

Evaluation of Presentation:

Presentation of work	25 Marks
Communication skills	20 Marks
Question and answer skills	30 Marks
	Total-75 Marks

SEMESTER-I

MODERN PHARMACEUTICAL ANALYTICAL TECHNIQUES

Course code: MPH101T **Credit Units: 4**

Course Objective

This subject deals with various advanced analytical instrumental techniques for identification, characterization and quantification of drugs. Instruments dealt are NMR, Mass spectrometer, IR, HPLC, GC etc.

Course Contents:

Module I

a. UV-Visible spectroscopy: Introduction, Theory, Laws, Instrumentation associated with UV-Visible spectroscopy, Choice of solvents and solvent effect and Applications of UV Visible spectroscopy.

b. IR spectroscopy: Theory, Modes of Molecular vibrations, Sample handling, Instrumentation of Dispersive and Fourier -Transform IR Spectrometer, Factors affecting vibrational frequencies and Applications of IR spectroscopy

c. Spectroflourimetry: Theory of Fluorescence, Factors affecting fluorescence, Quenchers, Instrumentation and Applications of fluorescence spectrophotometer.

d. Flame emission spectroscopy and Atomic absorption spectroscopy: Principle, Instrumentation, Interferences and Applications.

Module II

NMR spectroscopy: Quantum numbers and their role in NMR, Principle, Instrumentation,Solvent requirement in NMR, Relaxation process, NMR signals in various compounds, Chemicalshift, Factors influencing chemical shift, Spin-Spin coupling, Coupling constant, Nuclearmagnetic double resonance, Brief outline of principles of FT-NMR and 13C NMR. Applications of NMR spectroscopy.

Module III

Mass Spectroscopy: Principle, Theory, Instrumentation of Mass Spectroscopy, Different types of ionization like electron impact, chemical, field, FAB and MALDI, APCI, ESI, APPI Analyzers of Quadrupole and Time of Flight, Mass fragmentation and its rules, Meta stable ions, Isotopic peaks and Applications of Mass spectroscopy

Module IV

Chromatography: Principle, apparatus, instrumentation, chromatographic parameters, factors affecting resolution and applications of the following:

a) Paper chromatography b) Thin Layer chromatography c) Ion exchange chromatography

d) Column chromatography e) Gas chromatography f) High Performance Liquid chromatography

g) Affinity chromatography

Module V

a. Electrophoresis: Principle, Instrumentation, Working conditions, factors affecting separationand applications of the following:

a) Paper electrophoresis b) Gel electrophoresis c) Capillary electrophoresis d) Zone electrophoresis e) Moving boundary electrophoresis f) Isoelectric focusing

b. X ray Crystallography: Production of X rays, Different X ray diffraction methods, Bragg,,s law, Rotating crystal technique, X ray powder technique, Types of crystals and applications of Xray diffraction.

DRUG DELIVERY SYSTEMS

Course code- MPH102T **Credit Units: 4**

Course Objective
This course is designed to impart knowledge on the area of advances in novel drug deliverysystems.

Course Contents
Module I
Sustained Release (SR) and Controlled Release (CR) formulations: Introduction & basic concepts, advantages/disadvantages, factors influencing, Physicochemical & biological approaches for SR/CR formulation, Mechanism of Drug Delivery from SR/CR formulation.Polymers: introduction, definition, classification, properties and application Dosage Forms for Personalized Medicine: Introduction, Definition, Pharmacogenetics, Categories of Patients for Personalized Medicines: Customized drug delivery systems, Bioelectronic Medicines, 3Dprinting of pharmaceuticals, Telepharmacy.

Module II
Rate Controlled Drug Delivery Systems: Principles & Fundamentals, Types, Activation; Modulated Drug Delivery Systems; Mechanically activated, pH activated, Enzyme activated, andOsmotic activated Drug Delivery Systems Feedback regulated Drug Delivery Systems; Principles & Fundamentals.

Module III
Gastro-Retentive Drug Delivery Systems: Principle, concepts advantages and disadvantages,Modulation of GI transit time approaches to extend GI transit. Buccal Drug Delivery Systems: Principle of mucoadhesion, advantages and disadvantages, Mechanism of drug permeation,Methods of formulation and its evaluations.

Module IV
Occular Drug Delivery Systems: Barriers of drug permeation, Methods to overcome barriers.

Module V
Transdermal Drug Delivery Systems: Structure of skin and barriers, Penetration enhancers,Transdermal Drug Delivery Systems, Formulation and evaluation.

Module VI
Protein and Peptide Delivery: Barriers for protein delivery. Formulation and Evaluation ofdelivery systems of proteins and other macromolecules.

Module VII
Vaccine delivery systems: Vaccines, uptake of antigens, single shot vaccines, mucosal andtransdermal delivery of vaccines.

MODERN PHARMACEUTICS

Course Code: MPH103T **Credit Units: 04**

Course Objectives:
Course designed to impart advanced knowledge and skills required to learn various aspects andconcepts at pharmaceutical industries.

Course Contents

Module I

1. a. Preformation Concepts – Drug Excipient interactions - different methods, kinetics ofstability, Stability testing. Theories of dispersion and pharmaceutical Dispersion (Emulsion and Suspension, SMEDDS) preparation and stability large and small volume parental –physiological and formulation consideration, Manufacturing and evaluation.

b. Optimization techniques in Pharmaceutical Formulation:

Concept and parameters of optimization, Optimization techniques in pharmaceutical formulation and processing. Statistical design, Response surface method, Contour designs, Factorial designs and application in formulation

Module II

Validation: Introduction to Pharmaceutical Validation, Scope & merits of Validation, Validation and calibration of Master Types of validation. Government regulation, Manufacturing Process Model, URS, DQ, IQ, OQ & P.Q. of facilities, plan, ICH & WHO guidelines for calibration and validation of equipments, Validation of specific dosage form,

Module III

cGMP & Industrial Management: Objectives and policies of current good manufacturing practices, layout of buildings, services, equipments and their maintenance Production management: Production organization, materials management, handling and transportation, inventory management and control, production and planning control, Sales forecasting, budget and cost control, industrial and personal relationship. Concept of Total Quality
Management.

Module IV

Compression and compaction: Physics of tablet compression, compression, consolidation, effect of friction, distribution of forces, compaction profiles. Solubility.

Module V

Study of consolidation parameters; Diffusion parameters, Dissolution parameters and Pharmacokinetic parameters, Heckel plots, Similarity factors – f2 and f1, Higuchi and Peppas plot, Linearity Concept of significance, Standard deviation , Chi square test, students T-test , ANOVA test.

REGULATORY AFFAIRS

Course Code: MPH104T **Credit Units: 04**

Course Objective:
Course designed to impart advanced knowledge and skills required to learn the concept of generic drug and their development, various regulatory filings in different countries, different phases of clinical trials and submitting regulatory documents: filing process of IND, NDA and ANDA

Module I

a. Documentation in Pharmaceutical industry: Master formula record, DMF (Drug Master File), distribution records. Generic drugs product development Introduction, Hatch-Waxman act and amendments, CFR (CODE OF FEDERAL REGULATION) ,drug product performance, in- vitro, ANDA regulatory approval process, NDA approval process, BE and drug product assessment, in – vivo, scale up process approval changes, post marketing surveillance, outsourcing BA and BE to CRO.
b. Regulatory requirement for product approval: API, biologics, novel, therapies obtaining NDA,ANDA for generic drugs ways and means of US registration for foreign drugs

Module II
CMC, post approval regulatory affairs. Regulation for combination products and medical devices CTD and ECTD format, industry and FDA liaison. ICH - Guidelines of ICH-Q, S E, M. Regulatory requirements of EU, MHRA, TGA and ROW countries

Module III
Non-clinical drug development: Global submission of IND, NDA, ANDA. Investigation of medicinal products dossier, dossier (IMPD) and investigator brochure (IB).

Module IV
Clinical trials: Developing clinical trial protocols. Institutional review board/ independent ethics committee Formulation and working procedures informed Consent process andprocedures. HIPAA- new, requirement to clinical study process, pharmacovigilance safety monitoring in clinical trials.

PHARMACEUTICS PRACTICALS-I

Course Code: MPH105P **Credit Units: 06**

Course Objective: To perform experiments (based on theoretical knowledge of the subject) in the laboratory.

Course Content:

1. Analysis of pharmacopoeial compounds and their formulations by UV Vis spectrophotometer
2. Simultaneous estimation of multi component containing formulations by UV spectrophotometry
3. Experiments based on HPLC
4. Experiments based on Gas Chromatography
5. Estimation of riboflavin/quinine sulphate by fluorimetry
6. Estimation of sodium/potassium by flame photometry
7. To perform In-vitro dissolution profile of CR/ SR marketed formulation
8. Formulation and evaluation of sustained release matrix tablets
9. Formulation and evaluation osmotically controlled DDS
10. Preparation and evaluation of Floating DDS- hydro dynamically balanced DDS
11. Formulation and evaluation of Mucoadhesive tablets.
12. Formulation and evaluation of transdermal patches.
13. To carry out preformulation studies of tablets.
14. To study the effect of compressional force on tablets disintegration time.
15. To study Micromeritic properties of powders and granulation.
16. To study the effect of particle size on dissolution of a tablet.
17. To study the effect of binders on dissolution of a tablet.
18. To plot Heckal plot, Higuchi and Peppas plot and determine similarity factors.

SEMESTER-II

MOLECULAR PHARMACEUTICS (NANO TECHNOLOGY & TARGETED DDS)

Course Code: MPH201T **Credit Units: 04**

Course Objectives
This course is designed to impart knowledge on the area of advances in novel drug deliverysystems.

Course Contents:
Module I
Targeted Drug Delivery Systems: Concepts, Events and biological process involved in drugtargeting. Tumor targeting and Brain specific delivery.

Module II
Targeting Methods: introduction preparation and evaluation. Nano Particles & Liposomes: Types, preparation and evaluation.

Module III
Micro Capsules / Micro Spheres: Types, preparation and evaluation , Monoclonal Antibodies ;preparation and application, preparation and application of Niosomes, Aquasomes, Phytosomes,Electrosomes.

Module IV
Pulmonary Drug Delivery Systems : Aerosols, propellents, Containers Types, preparation andevaluation, Intra Nasal Route Delivery systems; Types, preparation and evaluation.

Module V
Nucleic acid based therapeutic delivery system: Gene therapy, introduction (ex-vivo & in-vivo gene therapy). Potential target diseases for gene therapy (inherited disorder and cancer). Gene expression systems (viral and nonviral gene transfer). Liposomal gene delivery systems.
Biodistribution and Pharmacokinetics. knowledge of therapeutic antisense molecules andaptamers as drugs of future.

ADVANCED BIOPHARMACEUTICS & PHARMACOKINETICS

Course Code: MPH202T **Credit Units: 4**

Course Objectives

This course is designed to impart knowledge and skills necessary for dose calculations, dose adjustments and to apply biopharmaceutics theories in practical problem solving. Basic theoretical discussions of the principles of biopharmaceutics and pharmacokinetics are providedto help the students‟ to clarify the concepts.

Course Contents:

Module I

Drug Absorption from the Gastrointestinal Tract:

Gastrointestinal tract, Mechanism of drug absorption, Factors affecting drug absorption, pH– partition theory of drug absorption. Formulation and physicochemical factors: Dissolution rate, Dissolution process, Noyes–Whitney equation and drug dissolution, Factors affecting the dissolution rate. Gastrointestinal absorption: role of the dosage form: Solution (elixir, syrup andsolution) as a dosage form ,Suspension as a dosage form, Capsule as a dosage form, Tablet as adosage form ,Dissolution methods ,Formulation and processing factors, Correlation of in vivo data with in vitro dissolution data. Transport model: Permeability-Solubility-Charge State and the pH Partition Hypothesis, Properties of the Gastrointestinal Tract (GIT), pH MicroclimateIntracellular pH Environment, Tight-Junction Complex.

Module II

Biopharmaceutic considerations in drug product design and In Vitro Drug Product Performance: Introduction, biopharmaceutic factors affecting drug bioavailability, rate-limiting steps in drug absorption, physicochemical nature of the drug formulation factors affecting drug product performance, in vitro: dissolution and drug release testing, compendial methods of dissolution, alternative methods of dissolution testing, meeting dissolution requirements, problems of variable control in dissolution testing performance of drug products. In vitro–in vivocorrelation, dissolution profile comparisons, drug product stability, considerations in the design of a drug product.

Module III

Pharmacokinetics: Basic considerations, pharmacokinetic models, compartment modeling: one compartment model- IV bolus, IV infusion, extra-vascular. Multi compartment model: two compartment - model in brief, non-linear pharmacokinetics: cause of non-linearity, Michaelis – Menten equation, estimation of kmax and vmax. Drug interactions: introduction, the effect of protein binding interactions, the effect of tissue-binding interactions, cytochrome p450-based drug interactions, drug interactions linked to transporters.

Module IV

Drug Product Performance, In Vivo: Bioavailability and Bioequivalence: drug product performance, purpose of bioavailability studies, relative and absolute availability. methods for assessing bioavailability, bioequivalence studies, design and evaluation of bioequivalence studies, study designs, crossover study designs, evaluation of the data, bioequivalence example, study submission and drug review process. Biopharmaceutics classification system, methods.

Permeability: In-vitro, in-situ and In-vivo methods. generic biologics (biosimilar drug products),clinical significance of bioequivalence studies, special concerns in bioavailability andbioequivalence studies, generic substitution.

Module V

Application of Pharmacokinetics: Modified-Release Drug Products, Targeted Drug Delivery Systems and Biotechnological Products. Introduction to

COMPUTER AIDED DRUG DEVELIVERY SYSTEM

Course code: MPH203T **Credit Units: 04**

Course Objective:
This course is designed to impart knowledge and skills necessary for computer Applications in pharmaceutical research and development who want to understand the application of computersacross the entire drug research and development process. Basic theoretical discussions of the principles of more integrated and coherent use of computerized information (informatics) in thedrug development process are provided to help the students to clarify the concepts.

Course contents:

Module I
a. Computers in Pharmaceutical Research and Development: A General Overview: History of Computers in Pharmaceutical Research and Development. Statistical modeling in Pharmaceutical research and development: Descriptive versus Mechanistic Modeling, Statistical Parameters, Estimation, Confidence Regions, Nonlinearity at the Optimum, Sensitivity Analysis, Optimal Design, Population Modeling
b. Quality-by-Design In Pharmaceutical Development:
Introduction, ICH Q8 guideline, Regulatory and industry views on QbD, Scientifically basedQbD - examples of application.

Module II
Computational Modeling Of Drug Disposition: Introduction, Modeling Techniques: Drug Absorption, Solubility, Intestinal Permeation, Drug Distribution ,Drug Excretion, Active Transport; P-gp, BCRP, Nucleoside Transporters, hPEPT1, ASBT, OCT, OATP, BBB-CholineTransporter.

Module III
Computer-aided formulation development:: Concept of optimization, Optimization parameters,Factorial design, Optimization technology & Screening design. Computers in Pharmaceutical Formulation: Development of pharmaceutical emulsions, microemulsion drug carriers
Legal Protection of Innovative Uses of Computers in R&D, The Ethics of Computing in Pharmaceutical Research, Computers in Market analysis

Module IV
a) Computer-aided biopharmaceutical characterization:
Gastrointestinal absorption simulation. Introduction, Theoretical background, Model construction, Parameter sensitivity analysis, Virtual trial, Fed vs. fasted state, In vitro dissolutionand in vitro in vivo correlation, Biowaiver considerations
b) Computer Simulations in Pharmacokinetics and Pharmacodynamics: Introduction, Computer Simulation: Whole Organism, Isolated Tissues, Organs, Cell, Proteins and Genes.
c) Computers in Clinical Development: Clinical Data Collection and Management, Regulation of Computer Systems

Module V
Artificial Intelligence (AI), Robotics and Computational fluid dynamics: General overview,Pharmaceutical Automation, Pharmaceutical applications, Advantages and Disadvantages.
Current Challenges and Future Directions.

COSMETIC AND COSMECEUTICALS

Course code: MPH204T **Credit Units: 04**

Course Objective:
This course is designed to impart knowledge and skills necessary for the fundamental need forcosmetic and cosmeceutical products.

Course content:
Module I
Cosmetics – Regulatory: Definition of cosmetic products as per Indian regulation. Indian regulatory requirements for labeling of cosmetics Regulatory provisions relating to import of cosmetics., Misbranded and spurious cosmetics. Regulatory provisions relating to manufactureof cosmetics – Conditions for obtaining license, prohibition of manufacture and sale of certaincosmetics, loan license, offences and penalties.

Module II
Cosmetics - Biological aspects : Structure of skin relating to problems like dry skin, acne, pigmentation, prickly heat, wrinkles and body odor. Structure of hair and hair growth cycle. Common problems associated with oral cavity. Cleansing and care needs for face, eye lids, lips,hands, feet, nail, scalp, neck, body and under-arm.

Module III
Formulation Building blocks: Building blocks for different product formulations of cosmetics/ cosmeceuticals. Surfactants – Classification and application. Emollients, rheological additives: classification and application. Antimicrobial used as preservatives, their merits and demerits.
Factors affecting microbial preservative efficacy. Building blocks for formulation of a moisturizing cream, vanishing cream, cold cream, shampoo and toothpaste. Soaps and syndetbars.
Perfumes; Classification of perfumes. Perfume ingredients listed as allergens in EU regulation. Controversial ingredients: Parabens, formaldehyde liberators, dioxane.

Module IV
Design of cosmeceutical products: Sun protection, sunscreens classification and regulatory aspects. Addressing dry skin, acne, sun-protection, pigmentation, prickly heat, wrinkles, bodyodor., dandruff, dental cavities, bleeding gums, mouth odor and sensitive teeth through cosmeceutical formulations.

Module V
Herbal Cosmetics : Herbal ingredients used in Hair care, skin care and oral care. Review ofguidelines for herbal cosmetics by private bodies like cosmos with respect to preservatives, emollients, foaming agents, emulsifiers and rheology modifiers. Challenges in formulating herbal cosmetics.

PHARMACEUTICS PRACTICALS-II

Course Code: MPH205P **Credit Units: 06**

Couse objective: To perform experiments (based on theoretical knowledge of the subject) in the laboratory.

Course Content:

1. To study the effect of temperature change , non-solvent addition, incompatible polymer addition in microcapsules preparation
2. Preparation and evaluation of Alginate beads
3. Formulation and evaluation of gelatin /albumin microspheres
4. Formulation and evaluation of liposomes/niosomes
5. Formulation and evaluation of spherules
6. Improvement of dissolution characteristics of slightly soluble drug by Solid dispersion technique.
7. Comparison of dissolution of two different marketed products /brands
8. Protein binding studies of a highly protein bound drug & poorly protein bound drug
9. Bioavailability studies of Paracetamol in animals.
10. Pharmacokinetic and IVIVC data analysis by Winnoline R software
11. In vitro cell studies for permeability and metabolism
12. DoE Using Design Expert® Software
13. Formulation data analysis Using Design Expert® Software
14. Quality-by-Design in Pharmaceutical Development
15. Computer Simulations in Pharmacokinetics and Pharmacodynamics
16. Computational Modeling Of Drug Disposition
17. To develop Clinical Data Collection manual
18. To carry out Sensitivity Analysis, and Population Modeling.
19. Development and evaluation of Creams
20. Development and evaluation of Shampoo and Toothpaste base
21. To incorporate herbal and chemical actives to develop products
22. To address Dry skin, acne, blemish, Wrinkles, bleeding gums and dandruff

SEMESTER-III

RESEARCH METHODOLOGY AND BIOSTATISTICS

Course Code: MRM301T **Credit Units: 4**

Course Objective: To make students understand the application of statistical tools for carrying out research activities

Course Contents:

Module I
General Research Methodology: Research, objective, requirements, practical difficulties, review of literature, study design, types of studies, strategies to eliminate errors/bias, controls, randomization, crossover design, placebo, blinding techniques.

Module II
Biostatistics: Definition, application, sample size, importance of sample size, factors influencing sample size, dropouts, statistical tests of significance, type of significance tests, parametric tests (students "t" test, ANOVA, Correlation coefficient, regression), non-parametric tests (wilcoxan rank tests, analysis of variance, correlation, chi square test), null hypothesis, P values, degree of freedom, interpretation of P values.

Module III
Medical Research: History, values in medical ethics, autonomy, beneficence, nonmaleficence, double effect, conflicts between autonomy and beneficence/nonmaleficence, euthanasia, informed consent, confidentiality, criticisms of orthodox medical ethics, importance of communication, control resolution, guidelines, ethics committees, cultural concerns, truth telling, online business practices, conflicts of interest, referral, vendor relationships, treatment of family members, sexual relationships, fatality.

Module IV
CPCSEA guidelines for laboratory animal facility: Goals, veterinary care, quarantine, surveillance, diagnosis, treatment and control of disease, personal hygiene, location of animal facilities to laboratories, anesthesia, euthanasia, physical facilities, environment, animal husbandry, record keeping, SOPs, personnel and training, transport of lab animals.

Module V
Declaration of Helsinki: History, introduction, basic principles for all medical research, and additional principles for medical research combined with medical care.

	ARCHITECTURAL GRAPHICS SKILLS-I (ARC2104)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Architectural Design- I					
Co-requisites	Basic Design & Visual Arts					

Catalog Description

The aim of this course is to provide the students with the basic tools and techniques for free hand drawing and technical drawings. The subject covers concept of scales and lettering and familiarize them with planar and solid geometry to conceptualize the 3D forms in to 2D with the help of Orthographic Projections of Planes and Solids including sections of solids as well.

Course Objectives

The objective of this course is

- To familiarize the students with various drawing tools and accessories used in drafting and lettering techniques to produce and visualize geometrical composition and form.
- To provide a clear understanding about the scale measurement; plane geometry, solid geometry and projections used as drawing technique.

Course Outcomes

On completion of this course, the students will be able to

CO1: Draw free hand drawing and lettering.
CO2: Project points, lines and planes in different positions in 1st angle projection system.
CO3: Project regular rectilinear and circular solids in different positions.
CO4: Apply their knowledge in making sections, intersections and interpretations of solids.

Modules	Blooms level*	Number of hours
MODULE 1: Free Hand Drawing and Lettering Free hand and mechanical lettering cycle.	L1	6
MODULE 2: Basic Technical Drawing Concept and types of line, Division of lines and angles, Drawing polygons, Inscribing and circumscribing circles in polygons, Drawing geometrical curves helix, Conoid etc.	L1, L2	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3:Orthographic Projections- Planes and Solids Definition, Meaning and concept, Planes of Projections, First angle projections, Projection of points, Lines and planes in different positions. Projection of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in different positions. Sections of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc) in varying conditions of sectional plane.	L1, L2, L3	18
MODULE 4: Solid Geometry Construction of section, Intersection and interpenetration of solid.	L1, L2, L3	6

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	VISUAL ARTS-I (ARC2105)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Architectural Design- I					
Co-requisites	Carpentry & Model Making					

Catalog Description

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

Course Objectives

The objective of this course is

- To understand the elements and principles of Basic Design as the building blocks of creative design through exercises that will develop the originality, expression, skill and creative thinking.
- To familiarize with principles and theories of arts and architectural composition
- To develop presentation skills, visual expression and representation, imaginative thinking and creativity through free hand sketching and painting on various mediums and materials.
- To familiarize students with the grammar of art by involving them in a series of free hand exercises both indoor and outdoor to understand form, proportion, scale, etc.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create 2d, 3D Graphic forms, size, and their proportions
CO2: Create object based painting and develop creative art forms
CO3: Apply architectural graphics skills and improve presentation skills
CO4: Create life-long connection in one's pursuit for painting and other art forms

Modules	Blooms level*	Number of hours
MODULE 1: Free Hand Sketching Warm-up module for students to gain exposure to the importance of sketching and drawings in architecture. Free hand still life sketching of composition of solids, cubes, cylinders etc. Study of light, shade and shadow. Free hand sketching in pencil of elements of scale like trees, shrubs, human, figures, vehicles etc. Indoor and Outdoor Sketching.	L1, L2, L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Live Sketching Live sketching in pencil of elements of scale like trees, shrubs, human, figures, vehicles etc. Indoor and Outdoor Sketching.	L1, L2, L3	9
MODULE 3: Colour Theory and Colour Wheel Properties of colour – Colour schemes – Types of colours -primary, secondary and tertiary colours. Application and visual effects of colour.	L1, L2, L3, L4	9
MODULE 4: Color Course Introduction to Hue, Tint, Tone and Shades. Exercises for the same to study their impacts on still objects, buildings, etc	L1, L2, L3, L4	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	STRUCTURE - I (ARC2109)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure						
Co-requisites	Building Materials & Construction Technology – I					

Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials. The course covers Engineering mechanics, stress and strain of beams, shear force and bending moment theory. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is

- To introduce the structural system in a building with all the basic components.
- To understand the functions of various elements and building technologies used in various types of buildings.
- To study of stresses and strains and their effect in various elements.
- To give an introduction to the basic principles governing structural systems.
- To introduce basic prefab and high-rise structure.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain basics of engineering mechanics
CO2: Define stresses and strains with their effects in various elements
CO3: Explain force and bending moment diagrams.
CO4: Understand prefab and high-rise building structure.

Modules	Blooms level*	Number of hours
MODULE 1: Engineering mechanics Introduction , force, resultant force, parallelogram ,triangle, and polygon law of forces, system of forces, Lami‟s theorem, moment of forces, parallel forces , couple , center of gravity , moment of inertia, friction , angle of friction, angle of repose, basics of pulley centripetal and centrifugal force, super elevation ,work, power, energy. Frame- perfect and imperfect frame, motion of a lift, lifting machine	L1, L2	06

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Stress and strain Introduction, direct stress and strain , shear stress and strain, stress strain diagram for mild steel, young's modulus , poisson's ratio, shear modulus, bending equation for beam in simple bending volumetric strain, bulk modulus, stress in bass of varying section, shear stress diagram, stresses in composite bass, flinched beams, stresses due to change in temperature, principal of superposition, principal stress and strain , Mohr's circle of stresses , resilience.	L1, L2	06
MODULE 3:Shear Force and bending moment diagram, theory of yielding and failure Types Of Beams, Supports, Loadings, Assumption Of Theory Of Bending ,SFD And BMD, Material Failure, Structural Failure, Max Principal Stress (Rankine's theory), Max Principle Stress (Saint-Venant's principle), Maximum Shear Stress , Total Strain Energy Theory , Shear And Distortion Strain (von Mises and Hencky)	L1, L2	06
MODULE 4: Design principles and elementary concept for building construction systems Design principles of RCC beams and slabs. Construction system: reinforced concrete, pre-stressed concrete and prefab system and modular co-ordination. Load action and high-rise buildings, various structural systems for high rise buildings.	L1, L2	06

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	ARCHITECTURAL GRAPHICS SKILLS-II (ARC2204)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Architectural Graphics Skills-I					
Co-requisites	Architectural Design-II, Basic Design and Visual Arts-II					

Catalog Description

The aim of this course is to provide the theoretical, practical and pictorial aspect of the architectural drawings to the students. The subject covers concepts of metric drawings and development surfaces familiarize them with isometric and axonometric views and development of the surfaces of basic forms. The subject will be taught in congruence with the design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is:

- To familiarize the students with theoretical, practical and pictorial aspects of architectural drawings.
- To develop the perception and presentation of simple architectural forms and buildings.
- To introduce the development of the basic forms in architecture.
- To equip the students with visualization and surface development of complex forms.

Course Outcomes

On completion of this course, the students will be able to

CO1: Recognize the need to combine the use of manual drawing tools and techniques for drafting and freehand drawing for architectural design communication.

CO2: Produce 3- Dimensional Architectural drawings and forms by using drawings/sketching and manual techniques.

CO3: Produce surface development of the simple geometric forms.

CO4: Produce and visualize the surface development of the complex architectural forms.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Metric Drawing Types, uses and advantages, Isometric, Axonometric and Pictorial views, Metric Drawing and projection and their Dimensioning, Metric of plane figures composed of straight lines, Metric of circles, Metric of simple and complex block.	L1, L2, L3	6
MODULE 2: Isometric and Axonometric Drawings Preparation of Isometric and Axonometric views of the 3d composition of simple geometric forms, architectural manifestation and exploded Isometric of furniture and architectural plans.	L2, L3, L4	12

	VISUAL ARTS – II (ARC2205)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1.5	1	3
Pre-requisites/Exposure	Visual Arts – I					
Co-requisites	Architectural Design - II					

Catalog Description

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helpsanalyze complex shapes, design and application of colour.

Course Objectives

The objective of this course is to

- To introduce Art and appreciation its philosophies.
- To develop sensitivity towards sculpture and mural as an integral part of architecture.
- To familiarize with principles and theories of arts and architectural composition.
- To utilize the skills for rendering and paintings.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create 2d, 3D Graphic forms, size, and their proportions
CO2: Create art forms with different mediums
CO3: Apply rendering techniques for indoor and outdoor painting.
CO4: Create life-long connection in one's pursuit for painting and other art forms

Modules	Blooms level*	Number of hours
MODULE 1: Art and Philosophy An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing compositions	L1, L2, L3	9
MODULE 2: 2D Compositions An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing composition	L1, L2, L3	9
MODULE 3: Rendering Rendering techniques, dot rendering, point rendering of still and live objects	L1, L2, L3, L4	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 4: Painting Different types of painting styles and their masters and philosophy, Indoor and outdoor painting – Exercise involving Water colour – Water soluble colour pencil – Tempra – Acarali – Water soluble oil colour – Oil colour – Pen and ink – Brush – Air brush – Mixed mediums – Study of multi-colour and 3D effects from nature and built environment	L1, L2, L3, L4	9

	STRUCTURE – II (ARC2209)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Structure – I					
Co-requisites	Building Materials & Construction Technology – II					

Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials especially in case of beams, columns and trusses. The course covers deflection of beams, forces in members of truss, condition of equilibrium and displacement methods. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is

- To understand the basic principles of structural system so that it forms the basis for study of structural design.
- To help students to understand the basic principles of structural behavior and requirements of buildings with emphasis laid on the principles of various load distribution in beams and columns.
- To understand the basic principles of structural mechanics that would be pertinent to simple design elements ad understanding the structural behavior of buildings.

Course Outcomes

On completion of this course, the students will be able to

CO1: Calculate deflection of beams through analytical method.
CO2: Analyze the resolution of forces as well as various study of various theorem related to equilibrium.
CO3: Explain force and bending moment diagrams.
CO4: Calculate deflection in beams and trusses through graphic and conjugate method.

Modules	Blooms level*	Number of hours
MODULE 1: Deflection of Beams Equation for deflection of beams, formula for maximum deflection under various loading conditions, shear stress in shaft, stiffness of a spring- leaf and helical spring. Column and struts – effective length, buckling load, short or long column, slenderness ratio, Rankine's formula, Euler's formula, dams and retailing walls, Rankine's theory for active earth pressure	L1, L2	6
MODULE 2: Forces in Members Of Trusses Types of Trusses, Method of Section, Method of Joint, Analytical Method, Graphical Method, Analysis of Plane Trusses and Space Trusses	L1, L2	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3:Statically Determinate and In-determinate Structures Condition of equilibrium, compatibility conditions, simple and compound systems, linear and nonlinear systems, sway and sinking, analysis of statically determinate formulas.	L1, L2	6
MODULE 4: Displacements – Geometric Methods Deflected shapes, moment area method, conjugate beam method, deflection of trusses – graphical method.	L1, L2	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	ARCHITECTURAL GRAPHICS SKILLS-III (ARC2304)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Architectural Graphic Skills – II					
Co-requisites	Architectural Design – III					

Catalog Description

The aim of this course is to develop essential manual skills such as proficiency in drawing, largely used as primary mode of communication of ideas in architectural design. Students will be introduced to a variety of tools and techniques for visual expression with emphasis on manual drawing. Architectural Graphics-II introduces advanced techniques for architectural drawing such as perspective projection, mix-media renderings etc. The course would help students identify suitable methods of representation and methods in different built environment scenarios.

Course Objectives

The objective of this course is

- To familiarize the students with One Point Perspective visualization of architectural drawing.
- To familiarize the students with Two Point Perspective visualization of architectural drawing.
- To introduce a variety of tools and techniques for visual expression with emphasis on manual drawing.
- To introduce the geometrical method of producing shadows in Architectural Drawings.

Course Outcomes

On completion of this course, the students will be able to

CO1: Recognize the need to combine the use of manual drawing tools and techniques for drafting architectural design communication.
CO2: Apply the projected drawing method of exterior and interior perspective
CO3: Render the drawings in different mediums.
CO4: Draw views demonstrating the play of light and shadows.

Modules	Blooms level*	Number of hours
MODULE 1: One Point Perspective Drawing One perspectives of combination of geometrical forms, Building exterior and interior perspectives.	L3, L4	12

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Two Point Perspective Drawing Two perspectives of combination of geometrical forms, Building exterior and interior perspectives. Introduction to three-point perspective and basic exercises based on the same	L3, L4	12
MODULE 3: Rendering Rendering perspectives in different media (Dry and water based color and ink etc.). Presentation techniques in different types of rendering and materials. Variation in color/ ink, as per light position. Use of basic plantation, vehicles etc to introduce scale to building perspectives.	L4,L5	6
MODULE 4: Sciography Values in shades and shadows, constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows. Introduction of sciography in perspective drawings.	L4,L5	6

Catalog Description
The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

Course Objectives
The objective of this course is

- To introduce the concept of perspectives and perspective drawings.
- To develop architectural skills of perspectives
- To familiarize with principles and theories of arts and its appreciation techniques.
- To introduce the concept of shades and shadows in architecture drawing.

Course Outcomes
On completion of this course, the students will be able to
CO1: Appreciate art and art works and re-create them in form of logos, symbols, etc.
CO2: Create perspectives for surroundings and buildings
CO3: Understand the importance of shading devices in architecture
CO4: Understand the role of shades and shadows in building construction

Modules	Blooms level*	Number of hours
MODULE 1: Art Appreciation Graphic representations – Visual composition and Abstraction- Exercises involving Logo design, collage, calligraphy and printing.	L1, L2, L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Perspective (Free-Hand) Free-hand perspective drawing and rendering of imagined objects, in pencil and pen/ink. One and two point perspective drawings of solids and of different room interiors.	L1, L2, L3	9
MODULE 3:Perspective (Free-Hand) Free-hand perspective drawing of complex composition of solids. One and two point perspective view of the exterior of the building with understanding of the basic human proportion and scale. Introduction to three point perspective.	L1, L2, L3, L4	9
MODULE 4: Sciography Values in shades and shadows, Constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows Presentation techniques in different types of rendering techniques and materials.	L1, L2, L3, L4	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	STRUCTURE - III (ARC2308)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – II					
Co-requisites	Building Materials & Construction Technology – III					

Catalog Description

The aim of this course is to understand the ground situation before preparing an architectural design of any type of structure. In this course basic principles of structural mechanics that would be pertinent to simple design elements and understanding the structural behavior of buildings. The survey maps will be foundation documents for selection of technique of design based on ground elevation and contour pattern of proposed site. This subject covers the conceptual theory and practical application of surveying and leveling on ground with help of various survey concepts, techniques, methods and instruments.

Course Objectives

The objective of this course is

- To understand an informal choice regarding the most appropriate structural system for the building design due to different types of loading.
- To provide a basic understanding about the structural modeling and research techniques in the field of Architecture.
- To understand the role of surveying and leveling in architecture and will be introduced to the techniques and equipment's for land surveying.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the calculation of concentrated loads
CO2: Define the basis of arches and cables
CO3: Analyze Frame – With Lateral Translation and With No Lateral Translation of Joints by Slope deflection method and Moment deflection method
CO4: Explain frames with and without lateral translation of joints

Modules	Blooms level*	Number of hours
MODULE 1: Loads and spans Introduction, single concentrated load, udl longer than the span, UDL shorter than the span, two concentrated spans, series of concentrated loads, equivalent UDL	L1, L2	6
MODULE 2: Arches and Cables Basis of arches, cables and suspension in bridges, basic concept, frames with and without lateral translations of joints, general case – 1 story column slender in height and bases fixed or hinged.	L1, L2	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Slope deflection method and Moment distribution Method Slope Deflection Method and Moment Distribution Method, Development of Slope Deflection, Equation, Analysis Of Frame – With Lateral Translation And With No Lateral Translation Of Joints. MDM- Development of Method, Analysis Of Frames With Lateral Translation And With No Lateral Translation Of Joints, Symmetrical Frames, Multi Storey Frames, No Shear Moment Distribution	L1, L2	14
MODULE 4: Kani's Method Basic concept, frames with and without lateral translation of joints, general cases, story column unequal in height and bases fixed or hinged	L1, L2	8

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	SURVEYING AND LEVELLING (ARC2313)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1.5	1	3
Pre-requisites/Exposure	Structure – II					
Co-requisites	Structure – III					

Catalog Description

The aim of this subject is to make students understand the ground situation before preparing an architectural design of any type of structure. The survey maps will be foundation documents for selection of technique of design based on ground elevation and contour pattern of proposed site. This subject covers the conceptual theory and practical application of surveying and leveling on ground with help of various survey concepts, techniques, methods and instruments. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is

- To understand the role of surveying and leveling in architecture
- To introduce the techniques and equipment for land surveying.
- To understand the practical surveying in the field.

Course Outcomes

On completion of this course, the students will be able to

CO1: Enable the students to understand land topography and its connection with surveying & leveling exercises.

CO2: Enable the students to understand the primary basic surveying techniques adopted in past years.

CO3: Enable the students to understand essentials parameters (basic and advanced) of leveling with various instruments & methods and concept of contouring.

CO4: Enable to do contour and slope analysis for a building.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to surveying Introduction to surveying, its practicality in the profession. Classification of various survey instruments, techniques & equipment. Reading of survey maps, understanding of features and undulations of ground. Scaling of survey measurements and errors in surveying. Concept of trigonometry, traversing & tachometry in surveying.	L1, L2	04

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 1: Measurements Measurements in horizontal plane, linear measurements with chain & tape, setting-out & survey stations, survey accessories, survey lines, open & closed traverse, chaining & offsetting, direct & indirect ranging, log-books, field boundaries, field area estimation. Chain Surveying: Principles of survey, equipment required selection of station, methods of taking offsets. Compass Surveying: The prismatic compass, its construction and uses and other types of compasses.	L1, L2	09
MODULE 3: Basic and advanced surveying techniques Plane table surveying (equipment, methods, advantage & disadvantage, errors etc.), Theodolite Surveying (temporary & permanent adjustment, measuring of magnetic bearings, horizontal & vertical angles and Theodolite traverse & balancing closing error). Tachometric surveying (general instruments, different systems of tachometric measurements, stadia method). The concept of total station survey and its multi-functioning in surveying. Introduction to Use of DGPS, automated & digital surveying, G.P.S, Aerial Photography, etc.	L1, L2	14
MODULE 4: Contours and Slope Analysis Contouring methods & equipment, contour intervals, direct & indirect methods of contouring, block contour surveys, profile levelling, longitudinal & traverse cross sections, and gradients. Measurements along sloping landforms, principles, definitions, methods, instruments required for simple & differential levelling.	L1, L2	09

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	STRUCTURE - IV (ARC2409)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure –III					
Co-requisites	Structure – V					

Catalog Description

The aim of this course is to enable students to understand various principles of strength of materials especially in case of beams, columns and trusses. The course covers deflection of beams, forces in members of truss, condition of equilibrium and displacement methods.

Course Objectives

The objective of this course is

- To understand rational basis of the design of reinforced concrete members and structures through advanced materials and structural behavior.
- To enable students to undertake problems, identify, formulate and solve the critical thought, rational inquiry and self-directed learning.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the building materials used in construction such as cement, fine and coarse aggregate, reinforcement, etc.
CO2: Design a slab for given building floor for different end support conditions.
CO3: Design a column for given axial load and moments.
CO4: Develop understanding about complex foundations and the construction techniques involved.

Modules	Blooms level*	Number of hours
MODULE 1: Material and Design Method Cement, Fine and Coarse Aggregate, Water, Admixtures, Reinforcements, Properties and Tests For Concrete, WSM Vs LSM, Soil Mechanics, Basis Of Soil Properties, Soil Type, Bearing Capacity, Terzaghi's And Skempton's Formula.	L1, L2	09
MODULE 2: Beams and Slabs Using LSM and WSM Singly Beam, Doubly Beams, T, L Beams, Slabs – Rectangle, Circular, One Way, Two Way, Flat. Using IS 456:2000 And SP -16, Continuous Beams and Slabs.	L1, L2	09
MODULE 3: Column and Footing Short column and long column, minimum eccentricity, column subjected to combined axial load, uniaxial bending and biaxial bending, design of footing.	L1, L2	09
MODULE 4: Pile and Raft Foundation Design Of RCC Piles, Pile Caps, Raft Foundation (Theory)	L1, L2	09

	COMPUTER APPLICATION - I (ARC2413)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	2	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design –IV					

Catalog Description

The aim of this course is to understand the available software technologies and their applications in Architectural Designs. In order to enable students to use computer systems, software's and hardware, teaching necessary digital skills are important aspect of the course. This course will help learners to prepare presentation drawings, generating 2D and rendered views in a short time. This would finally help them in Design studio to develop conceptual as well as final Plan.

Course Objectives

The objective of this course is

- To introduce the students with the Photo editing software.
- To develop theoretical understanding of AutoCAD and its relevance in Architecture.
- To practice various commands of the Autocad.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop understanding of minimum system requirements and computer aided drafting
CO2: Comprehend Photoshop and its parameter as tools and its application in architecture
CO3: Comprehend computer aided drafting and its parameter as tools and its application in architecture
CO4: Evaluate CAD techniques for quicker methods and presentation skills

Modules	Blooms level*	Number of hours
MODULE 1:Introduction to Use of Photo Editing Software Introduction to Photo editing, montaging as well as preparation of 2-D presentations.	L1, L2	2
MODULE 2:Workshop on Photo Editing Software Practice on Photo editing as well as preparation of 2-D presentations onPhotoshop**.**	L1, L2	6
MODULE 3: Introduction to Auto Cad (2-D) Software Introduce to the drafting software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 2D-3D drawing concepts. Students learn the ability to Drafting, Editing and modification work to be done in the graphic presentation. Practice on the various AutoCAD commands through software User Interface. Conduct 2D Skills Workshop to train the students. Introduce to the draft skills and minimize errors in the presentation skills.	L1, L2,L3	8

	VISUAL ARTS – IV (ARC2414)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1.5	1	3
Pre-requisites/Exposure	Visual Arts – III					
Co-requisites	Architectural Design - IV					

Catalog Description

The aim of this course is to provide practical learning in creative thinking. The course intends to build student interest in think creative and express freedom of expression in Art, Paintings, and model making. The design and creative thinking course helps analyse complex shapes, design and application of colour.

Course Objectives

The objective of this course is

- To Create 2d, 3D Graphical forms in form of sculptures, murals, etc.
- To study the principles and understand the importance of audio visuals and photography in presenting architectural drawings.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create 2d, 3D Graphic forms, size, and their proportions
CO2: Create sculptural art forms with different mediums
CO3: Apply photography techniques for better presentations
CO4: Understand the importance of ergonomics in designing

Modules	Blooms level*	Number of hours
MODULE 1: 3D Compositions Basic components of 3-dimensional art, including subject, form, and content. Discussions centered on 3-dimensional design and concepts	L1, L2, L3	9
MODULE 2: Sculpture Different types of Sculpture, their masters and philosophy. Live scale murals and their uses in building with examples.	L1, L2, L3	9
MODULE 3: Photography and Audio-Visual Presentation Importance of photography, angles, views in field of art and architecture. Techniques to combine photography and audio into audio-visual presentations using softwares or in form of animated magazine.	L1, L2, L3, L4	9
MODULE 4: Ergonomics and Furniture Design Golden mean ratio, Principles of ergonomics and its importance in history of architecture. Studying furniture design through examples from Schools of Architecture. Exercises incorporating both terminologies.	L1, L2, L3, L4	9

	STRUCTURE - V (ARC2509)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – IV					
Co-requisites	Building Materials & Construction Technology – V					

Catalog Description

The aim of this course is to enable students to design steel structures and also an overview of alternative building materials. The course covers knowledge of materials such as cement, aggregate, grades of concrete, steel structures. The course would enable students to design simple RCC structures and their basic components, viz, columns, beams, slabs and staircases. This course covers staircase design, retaining wall, portal frames, masonry structures, pre-stressed and post stressed concrete.

Course Objectives

The objective of this course is

- To understand the analysis of in-determinant structures and their use in field in greater depth.
- To design different types of staircase with various materials.
- To make students aware of column footing.

Course Outcomes

On completion of this course, the students will be able to

CO1: Design a dogleg staircase for given stair well space in residential or public building. **CO2:** Explain the alternatives of long span structures.

CO3: Apply composite materials for masonry works.

CO4: Summarize the conceptual idea behind the development of pre-stressed structural component for general use.

Modules	Blooms level*	Number of hours
MODULE 1: Design of Staircase and Retaining Wall General Features, Types of Staircase, Distribution of Loading on Stairs, Wall Proportions, Design Principles, Counterfort Retaining Walls.	L1, L2	09
MODULE 2: Portal Frames Design of Portal Frames with Hinged Base, Design of Portal Frames with Fixed Base, Structural Analysis and Design of Grid Floor, Slab Culvert Rectangular – Beam Deck.	L1, L2	09
MODULE 3:Masonry Structures Introduction, Masonry Walls, Design of Wall and Column Footing	L1, L2	09
MODULE 4: Design principles and high-rise structures Elements of Pre-Stressed and post tensioning Concrete, Principles and System, Loss, Analysis and Design of Pre-Stress and post tensioned Beam.	L1, L2	09

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	COMPUTER APPLICATIONS- II (ARC2513)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	2	3
Pre-requisites/Exposure	Computer Applications - I					
Co-requisites	Landscape Design					

Catalog Description

The aim of this subject is to introduce techniques for further refinement of computer generated graphics covered in the previous semester. In addition to that, this course also trains students for developing photorealistic modeling using popular software in the field of architecture. Advanced technologies and concepts using computers as an essential tool are also introduced such as Building Information Modeling. This course equips students with soft skills which increase their productivity and expression in design related subjects.

Course Objectives

The objective of this course is

- To introduce and make students learn about graphic presentation tools
- To introduce Sketch up as 3D drafting software.
- To introduce Revit as 3D drafting software and its allied rendering plugins.

Course Outcomes

On completion of this course, the students will be able to

CO1: Prepare building design through sketch up software..
CO2: Prepare building design through revit software.
CO3: Render the drawings in various rendering plugins.
CO4: Train others in various types of softwares such as revit, sketch up.

Modules	Blooms level*	Number of hours
MODULE 1:Introduction to SketchUp (3-D) Software Introduce to the Sketch up 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 3D drawing concepts. Students learn the ability to Model, Editing and modification work to be done in the graphic presentation.	L1, L2	12
MODULE 2:Introduction to Revit (3-D) Software Introduce to the Revit 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Students learn the ability to Building Information Modeling.	L4, L5, L6	8
MODULE 3:Introduction to Rendering Plugins Introduce to the Lumion and Twilight Render software for the Rendering.	L1, L2	4
MODULE 4:Workshop Practice on the various Revit and Sketch Up commands through software User Interface. Conduct 3D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.	L4, L5, L6	12

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	PEOPLE CULTURE AND BUILT ENVIRONMENT- I (ARC2519)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

CO2: Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

	ECOLOGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT – I (ARC2520)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

CO2: Produce reports and presentation.

	COMPUTER APPLICATIONS & ADVANCE TECHNOLOGIES – I (SMART BUILDINGS) (ARC2521)	L	T	S	P	C
Version 1.1	Date of Approval:	3	-	-	-	3
Pre-requisites/Exposure	Architecture Design, Building Services					
Co-requisites	Advanced Architecture Design, Building Services					

Catalog Description

Security of the building and safety of personal have become important aspects now. The aim of this subject is to familiarize students with the concept of Smart buildings which has become very important today and in the near future. Through the modules, the students are introduced to the components of smart buildings and various smart materials used in architecture. In addition to this, the students also will be introduced to the current and future trends in smart building construction.

Course Objectives

The objective of this course is

- To familiarize what Smart buildings are and its importance in today's life.
- To understand the various components and materials related to Smart buildings.
- To be able to keep up with the current and future trends and challenges faced in the development of Smart building services.

Course Outcomes

On completion of this course, students will be able to

CO1: Develop a basic understanding of Smart buildings and its components
CO2: Explain various smart materials and their application
CO3: Analyze the market trends of smart building services
CO4: Apply the knowledge of smart buildings in their design

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Smart Buildings Introduction to what is smart building, Terms and definition, Purpose, Building performance, User experience	L1, L2	7
MODULE 2: Components of Smart Building Key requirements for Smart Building, Building Automation Hardware: controllers, sensors, actuators, communication network	L1, L2, L3	10

	STRUCTURE - VI (ARC2609)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – V					
Co-requisites	Building Materials & Construction Technology – VI					

Catalog Description

The aim of this course is to enable students to design simple RCC structures and their basic components viz, columns, beams, slabs and staircases. This course will help student to understand RCC structures and its application in consecutive design project. The course covers limit state state method and working stress method, partial safety factor, stress and strain relationship for concrete and steel, design of simply reinforced L&T beams, RCC columns and beams, foundation and footings.

Course Objectives

The objective of this course is

- To understand the analysis of intermediate structures and their use in field in greater depth.
- To design simple elevated water tanks
- To understand the application of RCC structure in consecutive design project.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe Three Moment theorem and their application in fixed and continuous beams. **CO2:** Analyze the structural geometry based on strength and stability criteria.
CO3: Design the effective use of structural systems for complex architectural need.
CO4: Design the effective use of Truss structure for residential and commercial purpose.

Modules	Blooms level*	Number of hours
MODULE 1: Theory of Beams and Frames Continuous beams, curved beams, portal frames, multistory building frames.	L1, L2	9
MODULE 2: Elevated Water Tanks Introduction of Tanks, Conical or Funnel Shaped Tanks.	L1, L2	9
MODULE 3:Shells and Floors Shells, Hyperbolic, Parabolic, Folded Plates, Grid or Coffered Floors, Girders.	L1, L2	9
MODULE 4: Truss Design principles of Truss Roof, Truss for Residential use, Truss for commercial use, Truss for long span structure like Railway shed, hanger etc.	L1, L2	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	SITE PLANNING AND LANDSCAPE (ARC2617)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	1.5	1	3
Pre-requisites/Exposure	Architectural Design - IV					
Co-requisites	Architectural Services - III					

Catalog Description

The aim of this course is to make the students understand the role of landscape architecture in the creation of better environments. This course shall have a direct application in the design studio of the same semester as well as in the Thesis. The course covers basic introduction to landscape architecture, landscape graphics, planting design. This course will help students to understand the concepts of landscape architecture and to study and analyze site in relation to landscape design and be able to design and detail various architectural and planning landscape projects.

Course Objectives

The objective of this course is

- To understand various types of Landscape and the role of natural and manmade landscape for Land Development;
- To provide different methods for site planning at regional and micro level;
- To understand landscape design as an allied field of architecture and planning;
- To understand process of landscape design for small and large areas.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the role and scope of Landscape architect.
CO2: Identify the development processes and cycles in the urban landscapes.
CO3: Conduct a landscape analysis and evaluate it with required functions.
CO4: Develop a site plan with landscape design and relate with environment and ecology.

Modules	Blooms level*	Number of hours
MODULE 1: Elements and History of Landscape Study of Landscape elements such as land, vegetation, water, earth & climate, Natural & manmade elements, etc. Principles of landscape design such as unity, simplicity, variety, balance, proportion, sequence, etc. Social and economic factors. Psychological considerations of spaces and enclosures. History of Landscape Architecture including natural & cultural factors of the place, development of landscape architecture through history in different parts of the world such as China, Japan, Europe, Italy, France, England, Persia, Egypt, Greece, Rome. Study of landscape architecture in Medieval period in India such as Mughal. Modern & Contemporary Landscape architecture. Cultural aspects of the landscape architecture with contextual understanding.	L1, L2, L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Hardscapes, Softscapes and Urban Landscape Hardscapes - pergolas, garden furniture, fences, rocks, masonry, paving & surfacing, roads & parking lots, walks & plazas; Softscapes such as plantation, turfing, water features. Design criteria for landscape design such as visual, functional, micro-climatic, ecological and aesthetic. Basic horticultural idea about plants, plant selection, planting design and care of plants; Urban Landscape - Characteristics and components of open space patterns in towns and cities (traditional and contemporary) basic types: streets, squares, plazas, gardens, ghats and maidans, public parks at district, local and neighbourhood levels; park systems; landscape design related to land-use, circulation networks and activity; street furniture as a component of urban landscape.	L1, L2, L3	9
MODULE 3: Landscape Design and Services Macro and micro-climatic considerations in landscape architecture. Effect of climate on landscape and various components of landscape on the microclimate. Landscape Services & Sustainability: Introduction; Outdoors lighting, surface water drainage, irrigation, soil management techniques.	L1, L2, L3	9
MODULE 4: Landscape Aspects of Site Planning Principles of understanding and evaluating and existing landscape; development as a response to constraints and opportunities offered by the site; the landscape concept and open space structure as a basic component of the site plan; The role of vegetation: environmental benefits, functional requirements, aesthetic considerations; typical situations and criteria for design with plants and selection of species; grading; in relation to existing contours, plinth levels, road alignment and storm water drainage; principles of cut and fill.	L1, L2, L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	PEOPLE CULTURE AND BUILT ENVIRONMENT- II (ARC2620)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

CO2: Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

	ECOLOGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT – II (ARC2621)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

CO2: Produce reports and presentation.

	COMPUTER APPLICATIONS AND ADVANCE TECHNOLOGIES-II (AR-VR ARCHITECTURE) (ARC2622)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	0	4	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design, Building Materials and Construction Technology					

Catalog Description

The aim of this course is to covers the technical and experiential design foundation required for the implementation of immersive environments in current and future virtual, augmented and mixed reality platforms. The curriculum covers a wide range of literature and practice starting from the original Computer Science and HCI concepts following the evolution of all supporting technologies including visual displays for VR, AR and MR, motion tracking, interactive 3D graphics, multimodal sensory integration, immersive audio, user interfaces, IoT, games and experience design.

Course Objectives

The objective of the course is

- To establish and cultivate a broad and comprehensive understanding of this rapidly evolving and commercially viable field of Computer Science
- To prepare the student for participating in the production of highly integrative immersive applications, immersive social platforms, cross disciplinary academic research projects and leading developments in Medical, Industrial and Manufacturing R&D.
- To work in collaborative group projects and develop working prototypes, demo experiences, immersive platforms, unique controllers and new innovative technologies.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understand visual displays for VR, AR and MR, motion tracking, interactive 3D graphics, multimodal sensory integration, immersive audio, user interfaces, IoT, games and experience design.

CO2: Work on highly integrative immersive applications, immersive social platforms, cross disciplinary academic research projects and leading developments in Medical, Industrial and Manufacturing R&D.

CO3: Analyze inside-out camera tracking

CO4: Understand and prepare 3D rendering for immersive environment.

	STRUCTURE - VII (ARC2703)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Structure – VI					
Co-requisites	Building Materials & Construction Technology – VII					

Catalog Description

The aim of this course is to enable students to design simple steel structures and their basic components. The fundamental aspects of analysis and design and also discusses the practical requirements such as safety, feasibility and economy of steel structures. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is

- To understand the design of steel structures.
- To learn the behavior and design of structural steel components (members and connections in two - dimensional (2D) truss and frame structures)
- To gain an educational and comprehensive experience in the design of simple steel structures.

Course Outcomes

On completion of this course, the students will be able to

CO1: Design building structure.
CO2: Design simple connections, rivets, welds, bolts and pins.
CO3: Design column base and footing.
CO4: Design beams and gantry girders.

Modules	Blooms level*	Number of hours
MODULE 1: Design Principles Introduction to Design Specification for Steel Members, Bolted Connections, Welded Connections.	L1, L2, L3	9
MODULE 2: Structural Connections Beam to beam connections, beam to column connection, bolted bracket connection, welded crane bracket connection.	L1, L2, L3	9
MODULE 3:Shear Force and bending moment diagram, theory of yielding and failure Design Of Laced Column, Battened Column, Design Of Slab Base And Gusseted Base.	L1, L2, L3	9
MODULE 4: Design principles and high-rise structures Laterally restrained beam, gantry girder, plate girder with -thick web plate and thin web plate. Design of steel roof truss and tubular truss.	L1, L2, L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	RESEARCH METHODOLOGY (ARC2705)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Research - I					
Co-requisites	Building Material and Construction Technology-VI					

Catalog Description

The aim of this course is to prepare students for writing a paper based on secondary research and literature review and its oral and visual presentation. Students would be able to identify and go in depth into specific and appropriate aspects relating to the discipline of architecture and discuss how it is reflected in the realm of design.
Students learn how to research a subject area through readings; learn description, analysis and synthesis of readings; citation of authors in their writing. The importance of the course is also in understanding what constitutes plagiarism research writing and in imbibing the ethics of publication. Literature review is seen as the first step in preparation of understanding research methods.

Course Objectives

The objective of this course is

- To introduce research work to the students
- To identify a specific aspect relating to the discipline of architecture.
- To conduct a research

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify area of research for thesis
CO2: Identify a research problem, formulation of hypothesis and organize a study based on literature survey
CO3: Apply research methods in case study and analyze the data collected from different sources
CO4: Develop ethics of publication

Modules	Blooms level*	Number of hours
MODULE 1: Identifying research topic, Research Gap and Project Formulation Choose any topic of the interest in consultation to the faculty concern; Research Question – Investigation Question – Measurement Issues – Hypothesis – Qualities of a good Hypothesis –Null Hypothesis & Alternative Hypothesis. Hypothesis Testing – Logic & Importance.	L1, L2, L3	6
MODULE 2: Literature Review Review of research paper, books, journals etc related to the topic	L1, L2, L3	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Surveys, Data Collection and Data Analysis Questionnaire to be prepared and Surveys to be conducted related to research. Other related data to be collected from appropriate resources. Collected data to be analysed using proper software. frequency tables, bar charts, pie charts, percentages etc	L1, L2, L3, L4	6
MODULE 4: Paper Writing Research paper writing in appropriate format. Ethical issues related to publishing, Plagiarism and Self-Plagiarism to be checked	L1, L2, L3	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	LEED LAB – I (ARC2717)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Architectural Design- VI					
Co-requisites	Architectural Design – VII					

Catalog Description

The aim of this course is to provide fundamental knowledge about natural and built environment. And also introduces fundamental concepts to understand environmental processes. The curriculum further incorporates understanding in relation to Indian context. Course will be interdisciplinary and flexible.

Course Objectives

The objective of this course is

- To acquaint the student with the factors to be taken into consideration
- To understand the applications of an intelligent building.
- To familiarize the students to the Green Building rating systems, design processes, regulations and prevailing best practices

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the fundamental of green building design.
CO2: Identify the role of USGBC, GBCI and their structure.
CO3: Identify the criteria for the selection of site
CO4: Review the fundamental concepts of waste management system.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Green Building & Green Building Rating Systems Introduction to Course, Syllabus and assessment, Fundamental concepts of Green Building Design and Sustainability. Green Rating regime and their scope (regional and global), Policies and legislations	L1, L2	6
MODULE 2: LEED Lab & Processes LEED Systems: Organization, fundamentals & Role USGBC/GBCI, Structure of LEED rating (credit, prerequisites and requirements) and Impact categories, LEED Certification & registration process, What, How and where to collect data for LEED certification	L1, L2, L3	6
MODULE 3: Site, Location and Transportation Scope and criterion of sustainable site, Transport and resource footprint	L1, L3,L4	6

	INTERIOR DESIGN (ARC2718)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Architectural Design - IV					
Co-requisites	Architectural Design - V					

Catalog Description

The aim of this course is to make students understand the application of design principles in interiors. The subject Interior Design is a specialized course offered in architecture which deals with functionality, safety and provides an aesthetically pleasing space for users. This semester will deal with minute details and construction techniques involved in interior design. The subject will also be integrated with a small component of design exercise with the current or previous semester design works. The course will include several exercises in relation to sit visits, market surveys, presentation, reports, etc.

Course Objectives:

The objective of this course is

- To equip the students with varied aspects of theory and practice of Interior Design, and develop skills to deal with diverse interior spaces.
- To understand qualities of spaces and develop their skills in designing for functional and meaningful interior space.
- To initiate students into theory and practice of Interior design.
- To merge theoretical and practical knowledge of interior design of a building.

Course Outcomes:

On completion of this course, the students will be able to

CO1: Apply elements of interior design in their design process.
CO2: Explain the application of design principles in interiors.
CO3: Create interior design model with the help of furniture, lighting fixtures, furnishings, paintings, sculptures, etc.
CO4: Design modern interiors using modern materials and techniques.

Modules	Blooms level*	Number of hours
MODULE 1:Introduction and basic principles of design Purpose, scope, objectives, history and importance of Interior Design. Elements and principles of interior design and their application inthecontextofbuildings.Aesthetic order, functional Value and Psychological impact of various elements ofInterior Design. Application of Colour, Texture, Landscaping, Artificial and Natural Lighting in theBuilding interiors.	L1, L2	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Principles and Elements of Interior Design Elements of Interior Design, Role in interiors.Space making elements like wall, column, partition screen, floor, furniture, interior landscaping etc., their design value, colour theories and schemes, light	L2, L3, L4	9
MODULE 3: Understanding Furniture work and furnishings in Interior Understanding furniture layout, furniture design with the construction technique, types of furniture and their usage, construction materials and fabrics used in furniture designing, cost estimation, understanding works of great masters.Furniture, Furnishings, Fabrics, Murals, Paintings, Sculpture, Lighting Fixtures, Floor coverings, Wall coverings and related materials. Study of furniture designs, Built-in furniture, Movable furniture, Modular furniture.	L2, L3, L4	9
MODULE 4: Modern trends in Interior design Understanding and designing modern interiors using modern materials and techniques. Study Report of an existing DESIGN PROJECT. Space organization in interiors--presentation of the complete interior scheme of a given projects such as Library, Public Halls, Conference Room, Commercial buildings etc.	L4, L5, L6	9

	SPECIFICATION, ESTIMATION AND VALUATION (ARC2720)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Building Materials & Construction Technology - V, Workshop Practice & Site Exposure					
Co-requisites	Building Material and Construction Technology-VI					

Catalog Description

The aim of this course is to make students familiar with the theory and practice of specifications and estimation, and quantity surveying; along with its importance in the field of building construction. The process of writing specification document for materials, labour, budgets and; estimating the cost and time of construction works shall be covered. The preparation of bill of quantities, optimum resource consumptions and introduction to BIS and other standardized institutions is also a part of the course.

Course Objectives

The objective of this course is

- To develop a real-time judgment of quantity surveying, details specifications, estimations and valuation
- To develop skill for precise and approximate estimations and be able to estimate and specify quantities of various items of material and work involved in architectural and planning projects

Course Outcomes

On completion of this course, the students will be able to

CO1: Discuss the importance and usage of specification, estimation, valuation and depreciation
CO2: Describe the detailed specification of various common building materials
CO3: Execute and implement the appropriate methods for preparing the estimates.
CO4: Compare, evaluate and interpret the building typologies for doing the valuation.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction Why the knowledge of quantity surveying and specifications is necessary for architects and planners? Significance and methods of writing specifications, classifications of specifications, sources of specifications; Types and methods of cost estimation for different types of projects, rates and sources of rates for different components of projects; Cost Index.	L1, L2, L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Specification Specifications for common building materials and building trades, earthwork, structure (framing), flooring, stonework, plasters, waterproofing of basements and terraces, roofing, doors and windows, elevators. Site development and earth works; Water supply network and distribution systems; Sewer systems; Electrical and telephone networks; Landscaping, roads, pathways, boundary wall, pools, lighting.	L1, L2, L3	9
MODULE 3: Estimating Calculation of plinth area, floor area, carpet area and circulation area, Preliminary estimates- plinth area rates and cost indices, Detailed estimate-modes of measurement, taking off quantities from drawings, Bill of Quantities (BOQ) and Bill of Materials (BOM), Deriving rates for items from labour and material costs based on CPWD Schedule of Rates, scheduled and non-scheduled items, Establishing market rates. Cost estimation and determination of rates for different types of housing; Cost estimation and determination of rates of works involved in the infrastructure services (roads, water supply, sewer systems, etc.); Costing procedure for different land use categories, development works, interest on investment, and phasing.	L1, L2, L3	9
MODULE 4: Valuation Value and purpose of valuation; Definition and importance of valuation of land and buildings; Factors affecting property and land value at a city and clarity level; Legal, fiscal and administrative measures of land value; Sinking fund; Betterment; Scrap value, salvage value, outgoings; Capitalized value of buildings; appreciation, depreciation and their types, methods of calculating depreciation.	L1, L2, L3	9

	PEOPLE CULTURE AND BUILT ENVIRONMENT- III (ARC2721)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

CO2: Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Psychology, Sociology and Built Environment Basic introduction to various critical social aspects; Role of psychology in architecture; Role of sociology in built environment; Determinants of sociology- social structure, social status, social control, social institutions, social mobility; Inclusive Built Environment; Barrier free designs and built environments; Various case studies related to gender and architecture, community development- community response towards development strategy etc.	L1, L2	18
MODULE 2: Project Work Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	18

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	ECOLOGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT – III (ARC2722)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

Catalog Description

The aim of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

CO2: Produce reports and presentation.

	COMPUTER APPLICATIONS AND ADVANCE TECHNOLOGIES – III (BIM) (ARC2723)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	0	4	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design, Building Materials and Construction Technology					

Catalog Description

This course covers Building Information Modeling (BIM), including its use and application for small- and large-scale building construction projects. Students will learn terminology associated with buildings, the theory and evolution of BIM, and how to develop BIM models using Autodesk Revit. As time allows, this course will also cover selected topics on how BIM is used to help prepare or feed into key project items, such as cost estimation, architectural renderings, interference checking, and modeling of energy consumption.

Course Objectives

The objective of this course is

- To assess the viability of a project and detect possible design errors
- To enhance project performance and produce better outcomes.
- To help construction manager to gather data and information from the relevant disciplines and communicate them more effectively
- To understand Revit interface and function

Course Outcomes

On completion of this course, the students will be able to

CO 1: Be able to compare, including advantages and disadvantages of BIM vs. 2D and 3D CAD
CO 2: Explain the challenges and roadblocks still facing the use of BIM.
CO 3: Comprehend the details of BIM and its role and application in the construction industry
CO 4: Create plans, sections, details, schedules, staircase, cover page

Modules	Blooms level*	Number of hours
Module 1: Introduction • Introduction to BIM • BIM vs. 3D CAD • Introduction to Revit interface and Function • Building design process and roles of owners, managers, designers, engineers, and contractors/ sub-contractors	L1, L2, L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 2: BIM Concepts • How can BIM be a part of the building design process? • Evolution and development of BIM & object-based parametric modelling • BIM platforms	L1, L2, L3	8
Module 3: Autodesk Revit • Model navigation Architecture Modelling • Adding Elevations and Gridlines • Creating wall, adding doors and windows • Creating floor, staircase, shaft opening, roof • Adding furniture components	L1, L2, L3, L4	10
Module 4: Modelling Output • Annotations and Tagging • Labelling and Tagging • Dimensioning • Room Tag • Creating door and window schedule • Creating schedule of accommodation	L1, L2, L3	10

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	STRUCTURE - VIII (ARC2815)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure	Structure – VII					
Co-requisites						

Catalog Description

The aim of this course is to enable students to design advanced structures system and their basic components. This subject covering three major different types of structures i.e. Pneumatic structure, Geodesic Dome and Bridges. The fundamental aspects of analysis and design and also discusses the practical requirements such as safety, feasibility and economy these structures. Along this some iconic examples as a case study will also cover in this course. The subject will be taught in congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is

- To understand the design of Pneumatic structures.
- To learn the behavior and design of Geodesic Dome.
- To understand the design of Bridges.
- To gain an educational and comprehensive experience with the various types of Iconic Structure.

Course Outcomes

On completion of this course, the students will be able to

CO1: Design Pneumatic structures.
CO2: Design Geodesic Dome structures.
CO3: Design various types of Bridges.
CO4: Understanding of different types of modern and contemporary iconic buildings.

Modules	Blooms level*	Number of hours
MODULE 1: Pneumatic Structure Introduction to Design Specification for Pneumatic Structure, Design principles, Components, Limitations in Design, Economic parameters, Case Studies.	L1, L2, L3	9
MODULE 2: Geodesic Dome Introduction to Design Specification for Geodesic Dome, Design principles, Components, Limitations in Design, Economic parameters, Case Studies.	L1, L2, L3	9

	TOWN PLANNING (ARC2816)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/ Exposure	History of Architecture – III					
Co-requisites	Building Bye-laws					

Catalog Description

The aim of this course is to familiarize the students with Planning concepts and process in urban and regional planning. The course provides insights into ancient Town Planning to the contemporary best practices. The aim is to familiarize the students with the process of evolution of cities, concepts related to humanitarian planning processes and skill development to identify planning issues in existing areas and develop solutions at basic levels. The subject will be taught in congruence with the Design studio and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same

Course Objectives

The objective of this course is to

- To familiarize the students with Planning concepts and process in Urban and Regional Planning.
- To understand the various elements, classifications and typology of humans settlements.
- To develop research interest in the theory of urban planning and development studies.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the various elements, classification and typology of planning
CO2: Define types of settlements based on different criteria and different parameters.
CO3: Review the condition of development/status of urbanization.
CO4: Classify constituents of town or city and develop different type of Plans.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Planning and its concepts Definitions, planning as hierarchical process, essential features of planning, town planning as a practice, Regional Planning, Rural Planning, Transport Planning, Housing. Various Roles that Planners Play- in Development Authority. Planning concepts and their relevance to Indian Planning practice in respect of Ebenezer Howard – Garden city concepts and contents – Patrick Geddes – Conservative surgery – case study – C.A. Perry – Neighborhood concept Le Corbusier – concept and case studies	L1, L2	5

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Classification and history of Cities Definitions of urbanization such as world cities, city-regions, global cities; Census definitions such as Class-I, Class-III cities. Example of good planned cities and their planner. Analysis of old– Egyptian, Mesopotamian, Greek, Roman, Renaissance, and Modern cities - Garden cities, Chandigarh etc.	L1, L2	5
MODULE 3: Planning process and standards Identification of values, norms, goals and objectives, methodology of plan formulation, site selection, land use mapping, population projection, calculation of housing and community services, calculation and laying of physical infrastructure, public participation, plan visioning exercise, community dispute resolution as per URDPFI guidelines	L1, L2	6
MODULE 4: Types of Plans and modern approach Comprehensive plans, development plans, local plans, district plans, public participation, people and plans, regional planning, Five Year Plans, District Development Plans, Regional Plans, Master Plans, Strategic Plans, Zonal Plans, Urban Renewal Plan – Meaning, Redevelopment, Rehabilitation and Conservation – JNNURM, SEZ – case studies. Introduction, Benefits and Planning components of Green City (e.g. Vancouver), Compact City (e.g. Sky city, China) and Smart City (e.g. Malta)	L1, L2	8

	LEED LAB-II (ARC2817)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	LEED Lab – I					
Co-requisites	Architectural Design – VIII					

Catalog Description

The aim of this course is to provide fundamental knowledge about natural and built environment. And also introduces fundamental concepts to understand environmental processes. The curriculum further incorporates understanding in relation to Indian context. Course will be interdisciplinary and flexible.

Course Objectives

The objective of this course is

- To understand the concept of an Energy and climate
- To understand the importance of Water Efficiency
- To familiarize the students with LEED Arc

Course Outcomes

On completion of this course, the students will be able to

CO1: Define basic concepts of building loads, energy efficiency, environmental concern
CO2: Prepare a documentation plan of water efficiency.
CO3: Calculate the indoor environmental quality for comfort and health.
CO4: Define basic concepts for building data analysis and prepare a report on environment impact on built up area.

Modules	Blooms level*	Number of hours
MODULE 1: Energy and Climate Basic concepts I (Building loads, Energy efficiency, Environmental concerns), Basic concept II (Electrical systems, Visual & thermal comfort and other concepts), Energy commissioning & performance management Energy audit process, equipment and tools	L1, L2	6
MODULE 6: Water Efficiency Water use pattern, source and conservation scope (including water harvesting and treatment), Water flow, fixtures and plumbing networks and water efficient appliances, Water Audit: Performance management and monitoring, LEED requirement and documentation plan	L1, L2, L3	6

	DISSERTATION (ARC2837)	L	T	S	P	C
Version 1.1	Date of Approval:	2	1	3	0	6
Pre-requisites/Exposure	Research - I					
Co-requisites	Research - II					

Catalog Description

The aim of this course is to enable students to establish a strong theoretical foundation, clarity of thought and also to orient the students to structured research in a focused manner. The process of study shall enable students to conduct in depth analysis and objective research on a topic of their interest. Students may be encouraged to select the topic which may eventually culminate in the Architectural Design Thesis in the subsequent semester.

Course Objectives

The objective of this course is

- To enable students to establish a strong theoretical foundation, clarity of thought.
- To orient the students to structured research in a focused manner.
- To enable students to conduct in depth analysis and objective research on a topic of their interest.
- To select the topic this may eventually culminate in the Architectural Design Thesis in the subsequent semester.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify area of research for thesis

CO2: Identify a research problem, formulation of hypothesis and organize a study based on literature survey

CO3: Apply research methodology, tools and techniques to conduct a research

CO4: Present the research work carried out in a report format.

Modules	Blooms level*	Number of hours
MODULE 1: Selection of Topic Students may choose a topic of their interest, related to Architecture and allied subjects; stating proper justification	L1, L2, L3	6
MODULE 2: Background study/ Literature Review and Case Studies Review of research paper, books, journals etc related to the topic. Studying, analysing and interpreting various similar case studies, nationally and internationally	L1, L2, L3	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Research Design Data Collection, Data Analysis and Data Interpretation; the extensive methodology to be adopted for conducting the research along with various tools and techniques	L1, L2, L3, L4	12
MODULE 4: Presentation Presenting the research work done on identified topic which may eventually culminate in the Architectural Design Thesis of the subsequent semester. Students can thus utilise this as an opportunity for pre-Thesis study, amounting to literature review and relevant case studies which are otherwise required for Thesis.	L1, L2, L3	48

	PEOPLE CULTURE AND BUILT ENVIRONMENT- IV (ARC2818)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure	History of Architecture, Architectural Design – III					
Co-requisites	Theory of Architecture					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in psychological and sociological aspects which are of concern to Architecture. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding society and various built forms produced by society. The course will also provide the students hands-on cultural, sociological and psychological studies of the built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross fertilization with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of psychology, sociology and culture of settlement.
- The course intends to study and understand the typical components of city in order to appreciate how these elements contribute to the quality of life of urban communities.
- To familiarize students with decisive strategies that brings inclusivity and equality in the designs of built forms.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and his larger social environment, with special emphasis on aspects that are likely to affect intervention in or creation of, the built environment (predominantly urban)

CO2: Develop a language and vocabulary for discussions/ analysis on the sociological/ psychological dimensions of architecture.

	ECOLOGY, ENVIRONMENT AND SUSTAINABLE DEVELOPMENT - IV (ARC2819)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure	Environmental Sciences, Building Services-1, Building Services-2					
Co-requisites	Architectural Design, Building Services-3					

Catalog Description

The objective of this course is to offer opportunities in specialized or advance learning in ecology, environment and sustainable aspects which are of concern to Architecture. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The aim of this course is to provide students the exposure to understanding ecology and various environmental problems faced by settlements. The course will also provide the students hands-on ecological and environmental studies of built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for cross learning with other courses. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on projects. During the course the students will be working on a live project in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To understand the basic principles of ecology, environment and sustainable development.
- The course intends to study and understand the different components of city in order to understand how these elements contribute to environment quality.
- To establish the significance of the ecological issues, their impact and initiatives to address the same in the built environs to achieve sustainable development.
- To develop interdisciplinary understanding and sensitivities of future architects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop a relationship between man and ecology, will understand critical environmental issues and need to address the m by using advanced technology.

CO2: Produce reports and presentation.

	COMPUTER APPLICATIONS AND ADVANCE TECHNOLOGIES – IV (SOFTWARES) (ARC2820)	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	0	4	3
Pre-requisites/Exposure	Architectural Graphic Skills					
Co-requisites	Architectural Design, Building Materials and Construction Technology					

Catalog Description

The aim of this subject is to introduce popular 3D modelling and photorealistic rendering softwares to precisely communicate their designs. The students will learn how to develop an interactive, adapting model, controlled by a few chosen design parameters and capable of generating a wide range of design variants. Using these softwares, the students will explore designing, visualizing and documentation of their design projects thereby increasing their productivity and expression.

Course Objectives

The objective of this course is

- To introduce the software Lumion 3D to students to make their models more interactive.
- To introduce Grasshopper modelling software.
- To introduce the BIM software ArchiCAD.
- To help the students communicate their design ideas graphically using 3d softwares and rendering tools.

Course Outcomes

On completion of this course, the students will be able to

CO1: Create flexible, parametric models for architectural design exploration
CO2: To develop a 2D building model in ArchiCAD and document the project
CO3: Create realistic settings and views of their design project
CO4: Create a walkthrough of their project

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Lumion 3D Loading existing project scene in Lumion 3D, settings window, creating and saving new project scene, getting familiar with the interface	L1, L2	4
MODULE 2: Building the exterior scene and Working with Layers Creating and modifying terrain, Blending the model with terrain, landscaping, adding furniture and humans, creating new layers, and editing the layers, controlling the layer visibility, Manipulating and Controlling Lumion, Animating, Scene creation and Rendering in Lumion content	L1, L2, L3, L4	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

	PRACTICAL TRAINING (ARC2937)	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	0	0	14
Pre-requisites/Exposure	Architectural Design – VIII					
Co-requisites	NA					

Catalog Description

The aim of the 'Practical Training' is to enable the students to gain the kind and range of practical experience which will prepare them for their likely responsibilities, immediately after qualifying B. Arch. Course. The trainee student has the responsibility to use his/her own initiative in making the best use of the opportunities which he gets during training period and prepare himself/herself for profession. The core of the professional training is architectural one. Student is expected to get well worse with the realm of architectural discipline ranging from generation of idea, preparation of drawings to the final execution of design on site. A Training Manual shall provide the details of the expected outline of work and other procedures.

• **Mandatory Requirements:** Student shall have to undergo Professional Training for a period of at least 06 months

Course objectives

The objective of this course is

- To expose the students to the practical environment and works by working under an Architect.
- To gain a practical knowledge and involved in all aspects of office works.
- To design for situation specific problems.

Course Outcomes

On completion of this course, the students will be able to

CO1: Formulate and theorize the principles into practices.

CO2: Apply the professional aspects of an architecture office/company and the multiple issues in conception, preparation and execution of project on a site.

CO3: Develop a skill that helps to adapt to fit special requirements.

	ARCHITECTURAL THESIS (ARC2037)	L	T	S	P	C
Version 1.1	Date of Approval:	2	6	10	0	18
Pre-requisites/ Exposure	Professional Practice- II					
Co-requisites	Architectural Design – VIII					

Catalog Description

The aim of this course is to provide an opportunity to the students to handle a complete design project. Project Thesis is the final stage of learning Architectural Design. With the help of a thesis project, students are expected to demonstrate the understanding of a systematic design process which includes identification of project requirements, site study and analysis, case studies, programming, schematic design and Design Development. It provides the students with an opportunity to culminate the nine semesters of architectural education by demonstrating the body of knowledge and skills gained during their education and the professional training.

Course objectives

The objective of this course is

- To prepare a student to independently handle and present all aspects of an architectural design, from its evolution to final solution in totality.
- To understand the importance of the evolutionary stages of a design process and various techniques required for a successful presentation of an architectural design.
- To develop in students the ability to handle specific aspects / thrust area of design relevant to the topic.

Course Outcomes

On completion of this course, the students will be able to

CO1: Design a Thesis project responsive to the contextual and program requirements.
CO2: Evaluate data and information gathered from primary and secondary data collection
CO3: Combine the systematic methodology from various stages of study and analysis in design process towards culmination of an informed design.
CO4: Produce detail estimation and specification data of a building unit.
CO5: Demonstrate the ideas clearly using detailed physical model.

	PROFESSIONAL PRACTICE (ARC2001)	L	T	S	P	C
Version 1.1	Date of Approval:	4	0	0	0	4
Pre-requisites/Exposure	Town Planning					
Co-requisites	Architectural Thesis					

Catalog Description

This course aim is to provide the foundation, knowledge and skills needed to professional practice. It is designed to build understanding of the complex interactions and uncertainties of the professional practice. It provides students with the essential knowledge components of role of COA, IIA, Uttar Pradesh architect association, Architects Act 1972, Tendering & Contract and Valuation. It also develops an appreciation of the skills and tasks inherent in development Conditions of engagement of Architect – Duties, Responsibilities, Liabilities of the profession, scale of charges, mode of payment etc. Clauses governing conduct of professional practice

Course Objectives

The objective of this course is

- To understand the role of Professional bodies.
- To acquaint the students with the responsibility, scale of charges and Architect's conduct in Architectural practice.
- To understand the office and administration of an Architect's office, Tenders and contracts.
- To analyze judicial process involved in arbitration.

Course Outcomes

On completion of this course, the students will be able to

CO1: Gain a comprehensive understanding of the Professional Practice in India.
CO2: Explain different role of Architect's Act 1972 in professional conduct and all the work related to scales of charges.
CO3: Compare and float tenders and contract for the Architectural project.
CO4: Compare difference between Arbitration, Conciliation and Mediation.

Modules	Blooms level*	Number of hours
MODULE 1: Role of professional bodies Role of different bodies i.e. COA, IIA, Uttar Pradesh Architect Association, their working constitution and bye-laws, categories of membership and election procedures.	L1, L2	6

MODULE 2: Architect's Act 1972 & Office and administration Detail study of the Act and procedures of membership. Office set up and administration, Filling and recording, nature of partnership, registration of firm and dissolution, copy rights of drawings, practice procedures and conduct etc. Conditions of engagement of Architect, discuss the Duties, Responsibilities, Liabilities of the Architect profession, Fee (scale of charges), mode of payment etc. Clauses governing conduct of professional practice.	L1, L2,	12
MODULE 3:Tendering and Contract Tendering - Types of tenders and tender documents, tender drafts notices, Inviting Tenders, Procedure of opening and selection process and report of owner. Contract – Types, conditions of contract – Earnest money, Security deposit, Retention money, Mobilization fund, Bank Guarantee, Architect's Instructions, Defects, Certificates and payments, Penalties, Insurance, Liquidated damages, Termination of contract, breach of contract.	L1, L2, L3	15
MODULE 4:Arbitration Introduction, Techniques, elements and factors affecting valuation, Methods, Types – renewal or lease/ extension of lease, standard rent, easement right, dilapidation, Property valuation techniques, circle rate analysis, comparable cost of scale. Share knowledge on the concept of property purchase and mortgage, Goods and Service Tax, Capital gain tax, wealth tax, property tax and other taxes etc. Arbitration, Arbitrator, nature of arbitration, appointment, conduct, powers and duties of arbitrator and umpire amended from time to time. Procedure of arbitration. Mediation & Reconciliation	L1, L2, L3	15

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	CAREER DEVELOPMENT (ARC2002)	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Professional practice					
Co-requisites						

Catalog Description

The aim of this course is to enable students to understand future after completing architecture study. It also includes knowledge the legal and regulatory body. The subject will be taught in a way so that they are able to build a concrete portfolio, and assignments for the subject will be linked to the design presentation exercises to achieve higher level of representation in real world.

Course Objectives

The objective of this course is

- To introduce the scope after completing architecture.
- To understand the functions of various national and international regulatory bodies.
- To study the cyber security.
- To provide portfolio development.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain career after completing architecture.
CO2: Define national and international regulatory bodies.
CO3: Explain cyber security and its role in architectural field.
CO4: Understanding of portfolio development.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to area of specialized course Architecture, Scope for architecture stream, careers in govt. sector and private sector for architects, higher education in different fields (i.e. planning, construction, management, conservation, software development and analysis etc.) Research in different specialized area.	L1, L2, L3	6
MODULE 2: International Architecture Practice and role of regulatory Role of different bodies i.e. COA, IIA, their working constitution and bye-laws, categories of membership and election procedures. Introduce to the relevant Act and procedures of membership. Conditions of engagement of Architect, discuss the Duties, Responsibilities, Liabilities of the Architect profession, Fee (scale of charges), mode of payment etc.	L1, L2, L3	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3:Cyber security Introduction to information systems, Need for Information security, Threats to Information Systems, Information Assurance, Cyber Security, and Security Risk Analysis. Security Policies, WWW policies, Email Security policies, Policy Review Process-Corporate Policies, Information Security Standards-ISO, IT Act, Copyright Act, Patent Law, IPR. Cyber Laws in India; IT Act 2000 Provisions, Intellectual Property Law: Copy Right Law, Software License.	L1, L2, L3	6
MODULE 4: Portfolio development Analyse, critically evaluate and articulate assessments of their own design works. Composition, Colour schemes, Sizes, Sequences, Software, Logo and style development	L1, L2, L3	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

	UNDERSTANDING CULTURAL LANDSCAPES FOR URBAN RENEWAL AND CONSERVATION (ARC2003)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

Catalog Description

The aim of this course is to understand the definition and concept of Culture Landscapes for urban renewal and conservation. It explain the culture of landscape to renewal/redevelopment of the existing environment and its surrounding to sustain the better quality of life though proper plan or documentation. This course has explained about the cultural heritage conservation particularly heritage site. It also deals about the urban area development through the literature study of Renewal, Redevelopment Revitalization and Rejuvenation. In this course, development approaches are comprises of social, environment and economy dimensions. The learning and outcome of this course is exploring in the field of Culture Landscapes, Heritage site and Urban Environment aspects in order to plan for development. The students must learn through literature review of research articles, professional documents, books related to urban renewal. It needs to carry out the field work and preparing the development report in this particular subject.

Course Objectives

The objectives of this course are

- To assess the urban renewal/redevelopment approaches at old city and historical sites in the context of having better access to services and sustainable urban development.
- To critically analyze the best practices of urban re-development for furthering utilization and formulation of a redevelopment plan.

Course Outcomes

At the end of this course, students will be able to

CO1: Digest and apply the knowledge of development approaches such as urban renewal/redevelopment/revitalization/rejuvenation.

CO2: To prepare the detail report and presentation on a given project related to urban renewal and urban re-development.

MODULE 1: Introduction of Cultural Landscape for Urban Renewal and Conservation. Introduction to definition and concept of Cultural Landscape, Urban Renewal, and Conservation, Development Approaches of Old City, A brief history of the landscape concept, Principle for Conservation and Renewal of decay areas within City Area, Principles and methods for the assessment of the cultural landscape, Landscape resources, management and planning structure, Mechanism for Development of Historical Area includes the Environment, Social, Culture and Economic aspect; Infrastructure and Services Facilities System of Old Area within City. Governance System and Planning aspect to build new Plan. Case Studies of various Plan and Documents for Renewal and Redevelopment in Developed Countries and Development Nations particularly Indian cities context.	L1, L2	12
MODULE 2: Project Work Selection of Study Areas, Literature Review, Formulation of Aim and Objectives through Proper Scientific Approaches, Collection of data through various techniques such as primary and secondary sources; Conducting survey (Focus Group Discussion, Households Survey etc), Documentation; Develop the data Base to Analyze the relevant by using the advance software; Analyze the Qualitative and quantitative approaches and formulating the new plan through scientific manner and; Report writing and presentations.	L4, L5, L6	24

	SMART CITIES AND SMART TECHNOLOGIES (ARC2004)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/ Exposure						
Co-requisites						

Catalog Description

The aim of this course is to introduce the students to smart cities concepts and solutions with their specific planning needs and priorities and the implication on development in these areas. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on **exploring the role of technology and data in cities, and learn how you can participate in the creation of smart cities.** This course will provide the student's hands-on experience on smart city planning that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To investigate, analyze and explore Smart City concepts and solutions important for urban development sectors
- To learn about state-of-the-art strategies for effectively managing the transition from legacy infrastructures to smart urban systems.

Course Outcomes

On completion of this course, the students will be able to

CO1: Comprehend the concept, challenges and solutions for smart cities planning

CO2: Prepare the detail report and presentation on a given project related to Special area planning.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Smart Cities Concept and analysis of smart technologies Introduction to smart cities, the city as a system of systems, smart citizens, Infrastructure, technology and data, Innovation and enterprise, smart leadership and strategy, standards and capacity building, smart measurement, and learning. Case Studies of various smart cities in Indian and international context.	L1, L2	12

	TRANSIT ORIENTED DEVELOPMENT (ARC2005)	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre-requisites/Exposure						
Co-requisites						

Catalog Description

The aim of this course is to introduce the students to transit oriented development concepts and solutions with their specific planning needs and priorities and the implication on development in urban transportation sectors. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on **exploring the role of TOD and learn how this can be implemented.** This course will provide the students hands-on experience on planning for TOD that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To investigate, analyze and explore TOD concepts and solutions important for urban transportation sectors
- To develop interdisciplinary understanding and sensitivities of future planners.

Course Outcomes

On completion of this course, the students will be able to

CO1: Comprehend the concept, challenges and solutions for TOD planning

CO2: Prepare the detail report and presentation on a given project related to TOD planning.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction and Planning of TOD Introduction to TOD, need of transit-oriented development, Factors driving the trend, components of TOD, Principles, Benefits, government policies, Case Studies of various TOD's in Indian and international context.	L1, L2	12

Overview

Amity School of Architecture and Planning (ASAP) is an academic division of Amity University Haryana. The Interior Design Program at ASAP benefits uniquely to the students as it meets a multi-disciplinary approach towards design, technology and management. The program has been designed in such a way that each student develops their academic, creative and professional progress and helps them to build a professional network by ensuring personal way of coaching. The faculties available in ASAP are professionals in the appropriate field and bring a current understanding of design practice to the classroom. The combination of academic courses and professional practice will prepare students to enter practice as members of the design team. Graduates are expected to understand the professional, economic and societal challenges and opportunities that will impact the field of design.

Mission:
ASAP have a mission that exists to support the students learn by providing transformative education experiences, to become productive, creative, ethical and engaged citizens and professional leaders serving the global community. ASAP commits to contribute the intellectual, cultural, environmental, economic and social advancement of the communities and individuals it serves.

Bachelor of Interior Design
Interior Designers exercise creativity in the design of functional spaces that meet people's needs. Bachelor of Design (Interior design) is a design oriented technical course that meet psychological, physiological, and sociological needs of individuals by enhancing the environments in which they live and work. Apart from the common syllabi, this graduation program addresses issues like, sustainability and life safety codes, responsibility for welfare of the public in spaces designed for human habitation etc. with a theoretical foundation and professional knowledge. The students have been practiced to Individuals use knowledge and skills related to interior and exterior environments, technical design skills, construction, and furnishings to make wise consumer decisions, increase productivity, and compete in industry.

The courses are coordinated on the basis of subject evaluations and informal consultations between students and lecturers, in part to ensure an open and ongoing dialogue about the student's progress. Similarly, discussions in the context of presentations are meant to contribute to greater self-knowledge and the development of a personal vision.

Throughout their coursework, students learn to evaluate their own activities and discover their stronger and weaker abilities in terms of talent, skills and motivation. The course is designed in semesters and further divided into modules which will offer them insight into personal capacities and skills. Each curriculum implies the development of a critical view about oneself as a professional and towards the industry in general. During their course students complete their various graduation projects; this is the phase where all the knowledge they acquired comes together.

Programme Objectives (PO's)

The graduates will

- **PO 1** **Interior Design knowledge:** Apply the knowledge of humanities, science, architecture fundamentals to the solution of complex interior design problems.
- **PO 2** **Problem analysis:** Identify, formulate, research literature and analyze complex interior design problems reaching substantiated conclusions using principles and elements of design.
- **PO 3** **Design/ Development of Solutions:** Ability to identify social, economic, environmental and cultural issues related to interior design process.
- **PO 4** **Conducting Investigations of complex problems:** use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- **PO 5** **Modern tool usage:** Create, select and apply appropriate techniques, resources and modern software with an understanding of the limitations.
- **PO 6** **The interior designer and society:** Apply reasoning informed by the contextual knowledge to assess social, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional interior design practice.
- **PO 7** **Environment and sustainability:** Understand the impact of the professional interior design solutions in societal and environmental contexts and demonstrate the knowledge and need for sustainable development.
- **PO 8** **Ethics:** Apply ethical and professional responsibilities of the interior design practice.
- **PO 9** **Individual and teamwork:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.
- **PO 10** **Communication:** Ability to communicate effectively on complex architectural activities with the interior design community and with society at large, such as, being able to comprehend and write reports and design documentation, make effective presentations and give and receive clear instructions.
- **PO 11** **Project management and finance:** Demonstrate knowledge and understanding of the interior design and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO 12** **Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Programme Specific Outcomes (PSOs)

On completion of the Bachelor of Interior Design, the student will be able to:

PSO1. To promote intellectual inquiry, creative expression and original work through a structured curriculum that balances theory and practice, experimentation and planning, creativity and logic, and art and technology, framed within a series of related investigations into language communications, critical thinking, the humanities, natural and social sciences, global awareness, and design history.

PSO2. To encourage the development of visual fluency as well as the acquisition of essential knowledge and skills in the elements and principles of design, drawing and color, Computer Aided Design (CAD), interior space planning, sustainability, materials and finishes, lighting, structures, surfaces and codes specific to both residential and non-residential situations.

PSO3. To define and encourage the dialogue and relationship between interior design and architecture by providing studies in architectural history, universal and barrier-free accessibility, spatial patterning and organization, and environmental sensitivity, as well as the essential need to restore and maintain the natural connection between people and architecture, interiors, and the environment.

PSO4. To introduce students to interior design business practices, market resources, and project management techniques used in the interior design profession as well as health, safety and welfare responsibilities that interior designers hold as they develop solutions with clients, rather than simply for clients.

Syllabus – First Semester

IND2106	INTRODUCTION TO CRAFT & MODEL MAKING	L	T	S	P	C
Version	Date of Approval:	1	0	2	0	3
Pre- requisites/Exposure	Basic understanding of Model making Materials					
Co-requisites	Designing Concepts					

Catalog Description

The course is a build with an objective to make students understand the different shapes that can be used to produce better innovative design in the future. Simplification of from in order to learn their basic properties and working.

Course Objectives

- This course aims to give the basic insights into the concepts of crafts and model making are increasingly being used by designers to evaluate designs and innovative products.
- This helps to simulate the impacts of alternative approaches.
- The course will introduce the hands-on activity of making models and crafts to from a product design idea.

Course Outcomes

On completion of this course, the students will be able to

CO1: Sketching and developing 2D, 3D Graphical forms in scales, size, and their proportions

CO2: Create object based models and develop creative art forms

CO3: Applying architectural graphics skills in model making presentations

CO4: Create life-long connection in one's pursuit for model making and other art forms

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Introduction Introduction to the art of model making and its allied tools, techniques and materials.	L1, L2, L3	9
MODULE 2: Design Evolution Conceptual sketching/ planning, design and developing various three-dimensional geometries in the model making; in context of understanding the scale and proportion.	L1, L2, L3	9
MODULE 3: Workshop The workshop-based activity will help in understanding the qualities of different materials, different types of joints and model making to relevant scales and proportions. Students may use different materials such as – Paper, Thermocol, Clay, Wood, Plaster of Paris, metals, and use of different colors in model making.	L1, L2, L3, L4	9

IND2107	HISTORY OF DESIGN & CULTURE	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	NA					
Co-requisites	Art & Graphics-I					

Catalog Description

History is an important part of our study. It is the basic structure of development. With the course the students will be aware of the past and the hierarch of isms that followed. The changes brought on every step.

Course Objectives

- This course aims to have students acquire a familiarity with historical and philosophical aspects of design that contributed to the rise of design styles.
- This course will also explore the cultural studies that explore the relationship between the designs and the human culture and how the relationship may have evolved within different industries over time. In-depth reading is highly recommended to gain deeper meaning and comprehension of this subject and research detailed information for an assignment.

Course Outcomes

On completion of this course, the students will be able to

CO1: Importance of design and the philosophies that followed during every ism of world art history.
CO2: Knowledge of the art and design traditions of India. (temple architecture and cave paintings of India)
CO3: Introduction to the basic culture of Indian society will help the student to design better to the social demands.
CO4: Study of Philosophies make the students a better thinker and thoughtful.

Course Content:

Modules	Blooms Level	No. of Hours
Module 1: Design Philosophy & History Art and Aesthetics in Design, Applied Aesthetics & Technical	L1	6

Prof. (Dr.) Anil Kumar

IND2111	BUILDING MATERIALS & CONSTRUCTION TECHNIQUES-I	L	T	S	P	C
Version	Date of Approval:	1	1	1	0	3
Pre-requisites/ Exposure	NA					
Co-requisites	Architectural Design – I					

Catalog Description

This course focuses on interior design materials and its applications, expending the opportunities for creative design solutions. Understanding traditional and rural materials in buildings and knowing the interiors. This subject will enable students to familiarize with building elements of superstructure and Sub-Structure, to apply the construction techniques involved in masonry work with different materials like brick, stone and composite materials .

Course Objectives

The objective of this course is

- To understand the use of traditional building materials in simple building works
- To familiarize students with basic building components, their function and behavior under various conditions with specific reference to "Load Bearing Construction"
- Students will understand the importance of various bonds through brick models and the assembling of these brick models in the form of courses and bonds.
- To introduce brick as building material for super and sub structure construction.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define basic building elements.
CO2: Recognize the various types of masonry made up of suitable materials.
CO3: Wood & Timbers
CO4: Explain the principles of construction.

Course Content:

MODULE 1: Introduction to Building Materials and Construction Technology Introduction to components of building from foundation to roof: Foundation, plinth, plinth beam, damp proof course (D. P.C.), sill, lintel, beam and slab, parapet, mumty etc. Detailed Section through 2 story building, Introduction to various methods, technology, materials, tools and equipment commonly used in – Excavation, Masonry works and carpentry. **Clay and Clay products**, Stone Mud including stabilized earth, burnt bricks, brick tiles, blocks, lime and its product, stone and its varieties etc, Classification, availability, preparation and uses of above materials and their structural, visual and textural properties. **Lime:** Sources of lime, Classification and manufacturing process of lime, Fatand hydraulic lime – properties and use, tests on lime, etc. **Cement:** Composition of ordinary cement, function of cement ingredients, properties of cement – soundness, setting time, strength, etc. Grade of cementand different types of cement used in construction. Mortar: Sand, sources of sand and its classification, tests on sand, classification of mortar – lime mortar, mud mortar, surkhi mortar, cement mortar, preparation of mortar and its properties, use and selection of mortar for different construction work, etc.	L1, L2	9
MODULE 2: Introduction to different types of Masonry, Brick Masonry and Stone Masonry Terminology: Bricks and its types, bats and closures used in different Brick Bonds Bonding: Types of bonds: English, Single, double, Flemish and rat trap bond. Corbelling, String courses and decorative brickwork. Stone masonry: Types ofstones, dressing and different bonds in stone, Random Rubble, Coursed Rubble, Ashlar Rubble work: Random Rubble, built-to-course and coursed masonry, miscellaneous, Classification, characteristics and properties of stones, quarrying of stone, artificial stones	L1, L2,L3	9
MODULE 3: Timber Types of timber, defects, seasoning and preservation of timber. Ecological impact due to use of wood, deforestation etc. Study of engineered wood used in buildings, i.e., Plywood, block boards, particleboards, and other types. Application of timber in building components.	L1, L3,L4	9
MODULE 4: Principles of Construction and Building Elements Foundations, Footings, D.P.C., flooring, sills, lintel, roofing, parapets, coping, cladding expansion joints, waterproofing of roofs, external wall sections with details, beams, columns, slabs, retaining walls, etc. External Wall Section.	L1, L3,L4	9

IND2112	GRAPHICS SKILLS-I	L	T	S	P	C
Version	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Design- I					
Co-requisites	Basic Design & Visual Arts					

Catalog Description

The aim of this course is to provide the students with the basic tools and techniques for free hand drawing and technical drawings. The subject covers concept of scales and lettering and familiarize them with planar and solid geometry to conceptualize the 3D forms in to 2D with the help of Orthographic Projections of Planes and Solids including sections of solids as well.

Course Objectives

The objective of this course is:

- To familiarize the students with various drawing tools and accessories used in drafting and lettering techniques to produce and visualize geometrical composition and form.
- To provide a clear understanding about the scale measurement; plane geometry, solid geometry and projections used as drawing technique.

Course Outcomes

On completion of this course, the students will be able to

CO1: Draw free hand drawing and lettering.
CO2: Project points, lines and planes in different positions in 1st angle projection system.
CO3: Project regular rectilinear and circular solids in different positions.
CO4: Apply their knowledge in making sections, intersections and interpretations of solids.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Free Hand Drawing and Lettering Free hand and mechanical lettering cycle.	L1	6
MODULE 2: Basic Technical Drawing Concept and types of line, Division of lines and angles, Drawing polygons, Inscribing and circumscribing circles in polygons, Drawing geometrical curves helix, Conoid etc.	L1, L2	6
MODULE 3: Orthographic Projections- Planes and Solids Definition, Meaning and concept, Planes of Projections, First angle projections, Projection of points, Lines and planes in different positions. Projection of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in different positions.	L1, L2, L3	18
MODULE 4: Solid Geometry Construction of section, Intersection and interpenetration of solid.	L1, L2, L3	6

IND2113	ART & GRAPHICS-I	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre- requisites/Exposure	NA					
Co-requisites	Model Making 1, Design 1					

Catalog Description

Drawing is a foundational course that is essential for mastering any stream of design. The goal of this course is to develop, through a variety of media, fundamental drawing skills; to understand and apply pictorial organization; develop vocabulary and terminology, and to develop perceptual, observational conceptual awareness and critical thinking skills in design.

Course Objectives

- The course will get the students to a basic practice of sketching and would be helpful in learning the various techniques of drawing.
- It will be helpful for the getting the students acquainted with the consistency ofpractice and the advantages of use of different styles.

Course Outcomes

On completion of this course, the students will be able to

- **CO1:** A basic introduction to new materials and their techniques open up theperspective of the students.
- **CO2:** Learn the basic of shading and acquaintance with the tools to be used.
- **CO3:** Comprehending the sketching of shapes, forms and other basics of sketching.
- **CO4:** Study of shadows and lights for a better understanding of composition andperspective.

Course Content:

Modules	BloomsLevel*	No. of Hours
Module 1: Introduction to Freehand drawing & Sketching. Introduction to Different art media and materials - Method of holding pencil – Eye-Hand coordination - Line quality studies -Lines: Straight, Curvilinear, Angular, Thick-Thin, Plane, Volume - Straight Lines - Curvilinear Lines: Thick, Thin And Angular - Line Variety: Conveying movement of volume interms of line.	L1,L3	6
Module 2: Basic Drawing Techniques Contour- Principles of One, Two and Three Dimensional compositions- Perception: Visual perception, Intuitiveperception - Positive/Negative- Gesture - Value - Perspective: Linear, Aerial.	L1,L3	8

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 3: Methods of Sketching Study and sketching various shapes, form and structure – Foreshortening – Study of Ellipses- Drawing through building and creating form - Sketching by method of seeing the shapes and forms- Sketching by using loose, circular strokes – Sketching by using free and scribbled lines – Sketching byusing wide, bold strokes – Quick reference sketch - Conveying movement sketching - Rendering wave action – Sketching focusing on negative space - Sketching by filling in the negative spaces – Silhouetting - Drawing with a grid - Wire frame sketching - Spiral line sketching.	L1,L3	10
Module 4: Colour Theory and Colour Wheel Properties of colour – Colour schemes – Types of colours -primary, secondary and tertiary colours. Application and visual effects of colour. **Rendering in different mediums and color course** Introduction to Hue, Tint, Tone and Shades. Exercises for the same to study their impacts on still objects, buildings, etc .	L1,L3	12

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2110	INTERIOR DESIGN STUDIO-I	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	0	6
Pre-requisites/ Exposure	Visual Arts 1, Model Making 1					
Co-requisites	Building Materials & Construction Technology - I, Visual Arts 1, Model Making 1					

Catalog Description

The aim of this subject is to familiarize students with visual grammar, elements of design and methods of visual composition with various mediums and color. In addition to the earlier, the intention of space design activity will be limited to the level of visual composition of architectural spaces considering human activity and anthropometry. There would be several studio/ design thinking exercises based on the module contents. as described below.

Design Exercise: sleeping area, washroom, cooking area, Small living space, juice stall etc.

Course Objectives

The objective of this course is

To understand the application of visual grammar in the domain of Visual design

- To create composition with various 2D and 3D media with various mediums.
- To develop the ability to translate abstract principles of design into architectural solutions for simple problems.

Course Outcomes

On completion of this course, students will be able to

CO1: Define principles of design and architectural aesthetics
CO2: Evaluate the human activities in built environment
CO3: Measure drawings of simple objects
CO4: Evaluate and analyze 3D form with visual grammar.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Study and Application of Elements and Principles of Design Basic Composition, Elements of design in basic composition, Application of principles of design, Positive and Negative spaces, Additive and Subtractive spaces, Exercises primarily through 2-D & 3-D models of simple geometric.	L1, L2,	10
MODULE 2: Anthropometry Anthropometrical study of various spaces, Application of Anthropometrics, Design of Anthropometrics Cell with minimum space requirements of single unit for a single person, Study the interior spaces by making 3-D views (axonometric and isometric)	L!, L2	10

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 3: Measured Drawing Introduction to fundamentals of measured drawing, line value, lettering, drawing representation, format for presentation methods and technique of measuring buildings and their details. Measured drawing of simple objects like furniture, detailing in terms of construction, ornamentation, measured drawing of building components like column, door, window, cornice, etc.	L1,L2,L3	20
MODULE 4: Scale and Order in Interior Design Analyzing single activity, anthropometrical data, designing the elements of building e.g. entrance gate design, floor design, door design, Table-Chair, Drafting table etc. Living space, Home stay, Shop, Small Activity space, etc	L1,L2,L3	20

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Version 1.1	Date of Approval:	0	0	2	0	2
Pre-requisites/Exposure	NA					
Co-requisites	Visual Arts 1					

Catalog Description

The objective of this course is to develop a basic proficiency in creating various graphic forms and objects using calligraphic and typography lettering skills This course introduces the language of type, its practical use and historical grounding.

Course Objectives

- The objective of this course is to develop a basic proficiency in creating various graphic forms and objects using calligraphic and typography lettering skills through analyze a letterform, identifying its distinctive features.
- This course covers compose various letter form to demonstrate an understanding of calligraphic and typography elements , basic terminology , deployment of its various strokes.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understanding calligraphy and typography definition , difference, and its use.
CO2: Practicing and acknowledging the importance of lettering in design.
CO3: Apply his knowledge in practical field
CO4: Understand the basic strokes

Course Content:

Modules	Blooms Level	No. of Hours
Module -1: Introduction to Typography Introduction to Typography. - Historical Perspective. - Anatomy of Letter Form – Typeface Classification: Usage and context. - Setting Text. - Digital Typography. The Grid Document Design. - Design Alphabets. - Typography and Logo Design. - Typography at rice. - Kinetic Typography. - Ambigrams **Typographic Visualization (Self-study / Assignment)** Develop and submit a Typography Portfolio with previous selected class assignments and various creative ideas that	L1, L2,	6
Module –2 - Introduction to Calligraphy Understanding calligraphy - Calligraphy definition – History of Calligraphy – Importance of calligraphy- Modern calligraphy - Tools required for calligraphy.	L1,L2,L3	6

Syllabus – Second Semester

IND2209	INTERIOR DESIGN STUDIO-II	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	0	6
Pre-requisites/Exposure	Interior Design – I					
Co-requisites	Building Materials & Construction Technology - II, Graphic Skills -1					

Catalog Description

The aim of this subject is to familiarize the students with the design process through small scale projects of human. Habitat. The design activity will be limited to the level of visual composition of architectural and interior spaces considering human activity and anthropometry, building material exploration, colour etc. The projects would connect horizontal circulation reflecting their creative approach drawn from data analysis and climatic consideration to the physical setting. To impart ability to design single functional interior spaces by application of design principles learned in previous semester and to correlate with human activities.

Design Exercise: Bedroom, Living Room, Study Room, Reception Area, Travel Agent Office, Barber Shop, Small Café etc

Course Objectives

The objective of this course is

- To involve students in a design project(s) that will involve simple space planning and the understanding of the functional aspects of good design.
- To involve students in a small-scale building project(s) which will sensitize them to intelligent planning that is responsive to the environmental context.
- To involve students in case study by choosing appropriate examples to enable them to formulate and concretize their concepts.
- To enable the presentation of concepts through various modes and techniques that will move constantly between 2D representation and 3D modeling

Course Outcomes

On completion of this course, students will be able to

CO1: Understand the application of the design process for small scale projects of human habitat.
CO2: Transform the human behavioral needs into program requirements.
CO3: Analyze the information on context and the human space relationship.
CO4: Compose the interior spaces in a design project.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Design Process and Human as user of space Study and differentiate human needs, wants and desire, study of cases for	L1, L2,	12

`

different user‟s requirements, Transform the behavioural requirements into space form, Study of relationship among spaces with proximity chart, Storytelling etc.		
MODULE2: Human Activity and Context Study Analyse a context and its surroundings and collect information, Analyse the above information in favour of the usage perspective, Understanding of human scale to the context.	L!, L2	10
MODULE 3: Planning of Spaces Distribution of the human activity spaces along the context considering the context as visual background, Analyse the relationship among the spaces. Verbal presentation on planning of built environment with different mediums.	L1,L2,L3	20
MODULE 4: Detail Design of Interior Spaces with a theme Detail planning and design of interior spaces considering human needs and human anthropometric data with a theme. Application of building materials with colour and texture in detail design. Verbal presentation of Interior Spaces.	L1,L2,L3	20

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2211	GRAPHICS SKILLS-II	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Graphics Skills-I					
Co-requisites	Design-II, Basic Design and Visual Arts-II					

Catalog Description

The aim of this course is to provide the theoretical, practical and pictorial aspect of the architectural drawings to the students. The subject covers concepts of metric drawings and development surfaces familiarize them with isometric and axonometric views and development of the surfaces of basic forms. The subject will be taught in congruence with the design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same.

Course Objectives

The objective of this course is:

- To familiarize the students with theoretical, practical and pictorial aspects of architectural drawings.
- To develop the perception and presentation of simple architectural forms and buildings.
- To introduce the development of the basic forms in architecture.
- To equip the students with visualization and surface development of complex forms.

Course Outcomes

On completion of this course, the students will be able to

CO1: Recognize the need to combine the use of manual drawing tools and techniques for drafting and freehand drawing for architectural design communication.

CO2: Produce 3- Dimensional Architectural drawings and forms by using drawings/sketching and manual techniques.

CO3: Produce surface development of the simple geometric forms.

CO4: Produce and visualize the surface development of the complex architectural forms.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Metric Drawing Types, uses and advantages, Isometric, Axonometric and Pictorial views, Metric Drawing and projection and their Dimensioning, Metric of plane figures composed of straight lines, Metric of circles, Metric of simple and complex block.	L1, L2, L3	06
MODULE 2: Isometric and Axonometric Drawings Preparation of Isometric and Axonometric views of the 3d composition of simple geometric forms, architectural manifestation and exploded Isometric of furniture and architectural plans.	L2, L3, L4	12
MODULE 3: Development of Surfaces of simple form Development of surfaces of cubes, prisms, cylinders, pyramids, cones and spheres.	L1, L2, L3	12
MODULE 4: Development of Surfaces of complex composition of form Development of surfaces of composition of cubes, prisms, cylinders, pyramids, cones and spheres.	L3, L4, L5	6

IND2212	ART & GRAPHICS-II	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre-requisites/Exposure	Art & Graphics 1, Presentation Techniques					
Co-requisites	Design II					

Catalog Description
The objective is to make the students aware of all the possible graphic skills used in interior design and provide a wider knowledge to the students about the various levels of graphic drawing. Familiarize with the principles and theories of graphics.

Course Objectives
The objective of this course is
- To introduce Art and appreciation its philosophies.
- To develop sensitivity towards sculpture and mural as an integral part of architecture.
- To familiarize with principles and theories of arts and architectural composition.
- To utilize the skills for rendering and paintings.

Course Outcomes
On completion of this course, students will be able to
CO1: Create 2d, 3D Graphic forms, size, and their proportions
CO2: Create art forms with different mediums
CO3: Apply rendering techniques for indoor and outdoor painting.
CO4: Create life-long connection in one‟s pursuit for painting and other art forms

Course Content:

Modules	Blooms level*	Number of hours
Module I: Art and Philosophy An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing compositions.	L1, L2,	12
MODULE 2: 2D Compositions An introduction to the basic formal concepts in the two-dimensional arts and the principles of aesthetic organization. Using Shapes to construct aesthetically pleasing composition, Introduction to Sciography	L!, L2	20
MODULE 3: Graphical representation Rendering techniques, dot rendering, point rendering of still and live objects, Graphical representation of furniture, human figures in 2D &3D, Rendering techniques for textures, materials, finishes, etc.	L4, L5, L6	20
MODULE 4: Painting Different types of painting styles and their masters and philosophy, Indoor and outdoor painting – Exercise involving Water colour – Water soluble colour pencil –	L4, L5, L6	20

`

Tempra – Acarali – Water soluble oil colour – Oil colour – Pen and ink – Brush – Air brush – Mixed mediums – Study of multi-colour and 3D effects from nature and built environment

IND2214	FUNDAMENTALS OF STRUCTURES	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Building Constructions					
Co-requisites	NA					

Catalog Description

On the successful completion of the course students will be able to, understand and execute properties of Structures on Interiors, Identify practical problems to obtain solutions involving Structure Solution in Renovation Projects.

(NB: Submission of Work record is compulsory for all Modules and will be part of the Final Course Evaluation)

Course Objectives

- This course aims at developing basic Structural knowledge for interior design students to understand. structural concepts complex form and structure understanding.
- This course will help to understand and identifying practical problems, on-site issues, designing patterns to obtain solutions involving existing structures, renovation, alterations of interior while forming the concept.
- Forming a structure to a designer's idea is one of the most important steps for a perfect execution. and this step teaches students and patrons the basics of the same.

Course Outcomes

On completion of this course, the students will be able to

CO1: Basics of Structures in Interiors
CO2: Calculation of Structures and Understanding of Spaces
CO3: Basics of Structure Alterations
CO4: Case Study of Renovation Structures

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Basic of Structures in a building and its types in Residential & Commercial spaces Basic of Concept to understand and importance to Structures Understanding Beams & Columns, Foundation its types and sizes.	L2, L2	5
Module 2 Calculation of Areas, understanding how to combine structure and design together. Basics of Structure placement in Design and understanding spaces. Material knowledge of Structures. Designing with Structure understanding of Staircase, Toilet, Kitchen.	L1, L2	5

`

Module 3 Understanding Alteration and Renovation how to perform in Interior Design Structure Learning how to design with the existing structure. Understanding existing HVAC services and how to convert the structure into design.	L1, L2	3
Module 4 Case Study on Existing Residential Spaces understanding predefined Structures and Renovate designing on it.	L3, L4	4

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evauation*

IND2215	CLIMATE RESPONSIVE INTERIORS	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Building Constructions					
Co-requisites	NA					

Catalog Description

The aim of this course is to obtain knowledge required for understanding the influence of climate on Interiors. This course helps to acquaint students to various concepts of climate and its use in Interiors and makes them understand the concept of human thermal comfort as an essential function of the buildings in accordance with climate responsive materials, ventilation and air movement. The students are exposed to the various design strategies for building in different types of climatic zones. The subject will be taught is congruence with the Design studio, and assignments for the subject will be linked to the design exercises to achieve higher level of learning and understanding the practical application of the same (NB: Submission of Work record is compulsory for all Modules and will be part of the Final Course Evaluation**)**

Course Objectives

The objective of this course is

- To acquaint the students to various concepts of climate analysis and its use in Interiors.
- To familiarize students with human thermal comfort as an essential function of building.
- To familiarize students with the design and settings for buildings for daylight and factors that influence temperature.

Course Outcomes

On completion of this course, the students will be able to

CO1: Basics of Climate impact in Interiors
CO2: Analyze movement of sun in relation to earth and design shading devices. And analyze how to avoid sun‟s heat but utilize maximum daylight
CO3: Analyze factors affecting climate and its elements
CO4: Analyze different climatic zones and their characteristics and design shelters in response to various climate zones. And analyze relation between transfer of heat between buildings and environment and design buildings for thermal comfort

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Introduction to Climate • Importance of climate in architecture, factors affecting climate, elements of climate- Solar radiation, temperature, wind, humidity and precipitation and their measurement.	L2, L2	3

`

Module 2: Climatic zones and human thermal comfort Climatic zones, macro and micro climate, elements of climate and climatology data required for design of buildings in different climatic zones, Characteristics of tropical climate, macroclimate and microclimate. Study of various shelters in response to various climate zones in the tropical belt of India. Study of body‟s heat production and heat loss, comfort zone, bio-climatic chart and effective temperature, Isopleths	L1, L2	6
Module 3: Solar chart, shading devices and Daylight Method of recording the position of sun in relation to earth, solar chart, azimuth, altitude, incidence, using shadow angle protractor for designing shading devices. Apparent movement of sun, solar radiation and intensity on surfaces and buildings in different latitude, sun path diagram, shading device and its design, heliodon and its use; Opaque building and heattransfer through its multi-layered envelope; Transparent surface and solar radiation on it, absorbance, reflectance, transmittance and remittance.Fenestration, lighting level and glare, amount of light, sky as a source of light and daylight factor, effect of different types of fenestrations, their size, shape in different planes with and without obstructions, Principles of day lighting in Tropics	L1, L2	8
Module 4: Climate of Northern India Planning aspects, Materials used, Constructional details, Climatic factors influencing the planning of • Kashmir – Typical Kutcha houses, mosque, Dhoongas(Boathouses), Ladakhi houses, bridges • Himachal Pradesh – Kinnaur houses • Uttar Pradesh – Domestic housing of Uttar Pradesh • Bengal – Bangla (Rural house form), Aat Chala houses – change from Bangla to Bungalow, Kutcha & Pucca architecture of Bengal. Nagaland – Naga houses & Naga village, Khasi houses Factors influencing the planning aspects, materials of construction& constructional details of the above.	L3, L4	7

**Bloom's Level:L1-Knowledge; L2-Comprehension; L3-Application; L4-Analysis; L5-Synthesis, L6-Evauation*

IND2213	HISTORY OF INTERIOR DESIGN - I	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History of Design and Culture					
Co-requisites	Visual Arts – II					

Course Catalog

The aim of this course is to make students understand the application of design principles in interiors. The subject Interior Design is a specialized course offered in architecture which deals with functionality, safety and provides an aesthetically pleasing space for users. This semester will deal with minute details and construction techniques involved in interior design. The subject will also be integrated with a small component of design exercise with the current or previous semester design works. The course will include several exercises in relation to sit visits, market surveys, presentation, reports, etc.

Course Objectives

- To provide students a critical overview of the history of interior design, its connection to different periods and cultures, and its integral relationship with architecture and decorative arts.
- To give students a Global & Indian perspective of achievements and characteristics in interior design, and decorative arts and their relevance and impact on society.
- To develop an understanding of determinants that helped shape art forms & orders in Classical Periods & Indian architecture, interior design and decorative arts over time.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Introduction How Design is a product of the period and culture that created it. Interior Design as a physical representation of political, religious, aesthetic, socio-economic, or other values shared by society. Interior design as a representation ofspecific ideals, and its influence on society and culture.	L1, L2, L3	06
MODULE 2: Study of history of Furniture Design Characteristics & Significance of Furniture through the ages, History of furniture in the Middle Ages, 19th Century & 20th Century	L2, L3, L4	6
MODULE 3: Decorative arts of West: Gothic, Renaissance & Baroque Period Interior Design elements, styles, schemes and art forms of Early Christian , Byzantine and Romanesque Period. Gothic, Renaissance and Baroque Period Basic overview of Interior Design elements,styles, schemes and art forms like Rose Window, Vaults, etc.	L1, L2, L3	6
MODULE 4: North and South Indian Styles and their different interior design elements, styles and decorative art forms. Developments in	L3, L4, L5	6

`

Rajputana (Rajasthan) period with respect to Interior Design Elements, Art Forms & Styles. Art forms of India - Madhubani Paintings, Tanjore Paintings, Kalamkari Work, etc. Developments in Mughal period with respect to Interior design elements, artsforms and styles. Apprise about furniture and interior finishes, elements of mosque, etc.

IND2210	BUILDING MATERIALS & CONSTRUCTION TECHNIQUES – II	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	1	0	3
Pre-requisites/ Exposure	NA					
Co-requisites	Materials & Construction Techniques – I					

Catalog Description

The aim of this course is to make students familiar with basic concepts of building materials and construction techniques in the field. The study in the semester increases in complexity from shallow and spread foundations to deep foundations. Study of openings will proceed to the study of Arches and its classification, to familiarize the students with the temporary supporting structures required for construction.

Course Objectives

The objective of this course is

- To introduce students to details of shallow and deep foundations.
- To understand openings and the use and construction details of doors and windows with timber shutters and frames.
- To understand the use of construction building materials like clay and timber.
- Students will also learn about arches.

Course Outcomes

On completion of this course, the students will be able to

CO1: To develop understanding about foundations and the constructions techniques involved.

CO2: To recognize the various types of temporary supporting structures used in different locations in the building industry.

CO3: To understand the importance of wooden carpentry joinery details used in openings.

CO4: To evaluate the best suitable Joinery in openings and become aware of conventional and new clay products used.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Foundations: Shallow, spread & Deep Shallow foundation: Types, Isolated, combined and raft foundations and their construction techniques. Deep Foundation: Grillage foundations, Piles foundations, Caisson foundations, etc.	L1, L2, L3	8
MODULE 2: Temporary Supporting Structures Form work and shuttering for different types of RCC elements, trench timbering, scaffolding, shoring and underpinning.	L1, L2	8
MODULE 3: Timber Doors and Windows Timber: Structure and timber trees, varieties of timber, defects in timber, decay of timber, Qualities of timber for construction, seasoning, storage and preservation of timber, properties and strength of manufactured products, veneers, plywood, block boards, fiber board, etc. • Doors: classification of doors; (a) paneled doors. (b) ledged and battened doors, (c)	L1, L3,L4	10

`

ledged, braced and battened doors, (d) framed, ledged, braced, and battened doors (e) flush doors • Windows: Timber windows; Casement window and its details		
MODULE 4: Arches and Clay Product Classification of Arches on the basis of geometrical shape, materials, construction techniques, viz. flat, segmental, semi-circular, Tudor, circular, elliptical, semi-elliptical, venetian, Florentine arches, etc. Illustration of terminology for arches, construction detailing and methods of centring. Clay Products: Flooring and roofing tiles, their properties, manufacturing process, laying of tles, etc.. Clay products like terra-cotta, earthenware, stoneware, porcelain, mud – its stabilization and uses, etc.	L1, L3,L4	10

IND2206	FUNDAMENTALS OF APPLIED ERGONOMICS	L	T	S	P	C
Version	Date of Approval:	2	-	-	-	2
Pre- requisites/ Exposure	NA					
Co-requisites	Furniture Workshop - 1					

Catalogue Description

The aim of this course is to familiarize the students with Ergonomics which is a scientific discipline concerned with the understanding of interactions among humans and the design of the system in order to optimize human well-being and overall system performance. Through this course the students will learn about the basic concept about Ergonomics/Human Factors and its implementation in design and design process.

Course Objectives

The objective of this course is:

- To introduce the principles underlying the place of people in work systems, their abilities and limitations, sothat tasks and work generally may be designed for effectiveness, efficiency and health and safety.
- To increase awareness of the need for and role of ergonomics in occupational health.
- To understand the breadth and scope of occupational ergonomics
- To familiarize the students with the application of ergonomic principles to design of workplaces and the prevention of occupational injuries.

Course Outcomes

On completion of this course, the students will be able to

CO1: Analyze the application and benefits of Ergonomics.
CO2: Describe the various features of ergonomics.
CO3: Design the office computer workstation.
CO4: Identify the work methods and time required for work environment to increase productivity.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Ergonomics The evolution of Ergonomics; Reasons to use ergonomics, Micro and Macro- ergonomics, Areas of ergonomics - Physical Ergonomics, Cognitive Ergonomics, Organizational Ergonomics; Applications and benefits of ergonomics; Principles of ergonomics.	L1,L2	4

`

MODULE 2: Feature of Ergonomics Anthropology; Anthropometry - Static Anthropometry; Dynamic Anthropometry;The human body types – Somatotypes – Ectomorphs, Mesomorphs, Endomorphs, Ectomorphs; Measuring Procedures; Biomechanics; Factors to be considered in Biomechanics – Force, Joint: Simple Joint- Compound Joint- Complex Joint, Range of Motion; Physiology; Psychology; *Human Senses***:** Body sensors, vision sense, color theories, auditory sense, and smelling sense, tasting sense, touching sense, human body interaction with environment, thermoregulation of human body, workingin polluted air, working at high altitude, effect of vibration on human body.	L1,L2	4
MODULE 3: Office Workstation Theories of healthy standing and sitting, free posturing, ergonomics design the office computer workstation.	L1,L2	6
MODULE 4: Methods, Standards and Work Design Determination of work content, workstation, work methods, and times required for work environment to increase productivity, eliminate waste, and decrease occupationalinjury/illness.	L1,L2	4
MODULE 5: Case study (Self-study / Assignment) Plan a case study in three different areas of „Human Factors Affecting Design" aimsto improve the fit of products to their users and support user-centered design. Find out a core issues in relevant to the following aspects: Identify user preferences and usage-related phenomena and Product usage as a situated activity- User behavior in usage practices - Functional meaning attribution by users - The experience of comfort Users" physical aspects in terms of body dimensions, strengths body joint motions.	L3,L4,L5	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Syllabus – Third Semester

IND2312	INTERIOR DESIGN STUDIO – III	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	0	6
Pre-requisites/Exposure	Interior Design Studio–II					
Co-requisites	Building Materials & Construction Technology - II, Graphic Skills -1I					

Catalog Description
The aim of this course is to provide a clear understanding about the design elements and principles followed while designing interiors of a Residential unit like a house using different materials and architectural styles. The interior design objectives include Function; flexibility, timelessness and Universal design.

Design Exercise: Residences - Villa, Townhouse, Apartments, Office cum Residence, etc. Emphasis shall be on the composition, aesthetics and innovation. Holistic concepts in residential interiors – ability to integrate various individual spaces into one theme – treatment of patios, courtyards, verandahs & other semi sheltered spaces – integration of built form and open spaces.

Course Objectives
The objective of this course is

- To develop sensitivity towards existing informal settings and elements of built space.
- To critique the materials, construction techniques and color theories used in the elements of built forms.
- To create an understanding of the inter relationships amongst various elements– form, function, space planning, user perception and behavior and culture.
- To understand the relationship between form and spaces and the importance of aesthetics.
- To enable the presentation of concepts through sketches and models and drawings.

Course Outcomes
On completion of this course, students will be able to
CO1: Collect data from standards, case studies for the current project.
CO2: Analyze data collected with relevance to the current project.
CO3: Integrate learning from other allied subjects to the design proposal.
CO4: To be able to create a universal interior for the final project.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to the Design Problem Introduction to the design problem. Case studies. Collecting relevant data for the given design problem. Synthesising and analysing the collected data.	L1, L2,	10
Case studies, Site Studies and Literature Studies Case Studies – primary (existing Residences (2-3 Bedrooms)) and secondary (Residences (2-3 Bedrooms) through Literature); Literature Review –	L!, L2	10

`

Interior design schemes, std layouts etc. Comparative Analysis and Area statement		
MODULE 3: Design Development Relation to various functional aspects of the design problem. Use of bubble diagram, flow diagrams, zoning of site, etc. conceptual design. Finalization of design proposals – schematic 2D/3D single line/conceptual level site plan, floor plan, elevations, sections.	L1,L2,L3	20
MODULE 4: Final design Proposals Preparation of Presentation Drawings of the Final Design Proposal. Enhancement of presentation skills using multiple media. Creation of 3-D models based on the design. Preparation of perspective views (internal & external). Presentation of studies and design proposal through submission of sheet work – drawings and views as well as scaled models.	L1,L2,L3	20

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2315	GRAPHICS SKILLS-III	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	4	0	2
Pre-requisites/Exposure	Graphic Skills – II					
Co-requisites	Design – III					

Catalog Description
The aim of this course is to develop essential manual skills such as proficiency in drawing, largely used as primary mode of communication of ideas in architectural design. Students will be introduced to a variety of tools and techniques for visual expression with emphasis on manual drawing. Architectural Graphics-II introduces advanced techniques for architectural drawing such as perspective projection, mix-media renderings etc. The course would help students identify suitable methods of representation and methods in different built environment scenarios.

Course Objectives
The objective of this course is

- To familiarize the students with One Point Perspective visualization of architectural drawing.
- To familiarize the students with Two Point Perspective visualization of architectural drawing.
- To introduce a variety of tools and techniques for visual expression with emphasis on manual drawing.

Course Outcomes
On completion of this course, the students will be able to

CO1: Recognize the need to combine the use of manual drawing tools and techniques for drafting architectural design communication.
CO2: Apply the projected drawing method of exterior and interior perspective.
CO3: Render the drawings in different mediums.
CO4: Draw views demonstrating the play of light and shadows.

Modules	Blooms level*	Number of hours
MODULE 1: One Point Perspective Drawing One perspectives of combination of geometrical forms, Building exterior and interior perspectives.	L3, L4	12
MODULE 2: Two Point Perspective Drawing Two perspectives of combination of geometrical forms, Building exterior and interior perspectives. Introduction to three-point perspective and basic exercises based on the same	L3, L4	12

`

MODULE 3: Rendering Rendering perspectives in different media (Dry and water based color and ink etc.). Presentation techniques in different types of rendering and materials. Variation in color/ ink, as per light position. Use of basic plantation, vehicles etc to introduce scale to building perspectives.	L4,L5	6
MODULE 4: Sciography Values in shades and shadows, constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows. Introduction of sciography in perspective drawings.	L4,L5	6

IND2313	BUILDING MATERIALS & CONSTRUCTION TECHNIQUES – III	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	1	0	3
Pre-requisites/Exposure	NA					
Co-requisites	Materials & Construction Techniques – II					

Catalog Description

The aim of this subject is to introduce students with the classification, types and details of construction of roofs. And to give complete knowledge about the various types of flooring and its construction details. To familiarize students with different types of vertical circulation possibilities. Types and construction details of all vertical circulation elements will be dealt with in detail. Students will also learn about water proofing methods and techniques at all building levels.

Course Objectives

The objective of this course is

- To understand timber single and double roofs and timber floors.
- To comprehend the various modes of vertical circulation through live examples.
- To learn properties of various construction materials like waterproofing materials, clay used as flooring materials and timber used in the building industry.

Course Outcomes

On completion of this course, the students will be able to

CO1: To understand timber single and double roofs.
CO2: To understand timber floor and partition.
CO3: Make students aware of various types of staircases with reference to its placement, geometry and material used.
CO4: To understand importance, stages, methods and techniques of waterproofing,

Modules	Blooms level*	Number of hours
MODULE 1: Timber: Roofs Classification of roofs: (a) Single roofs; flat roofs, lean-to roofs, double lean-to, couple, close couple and collar roofs (b) Double or Purlin Roofs. (c) Trussed rafter roofs (d) Triple or framed roofs (e) Common roof coverings with its laying Waterproofing, rainwater gutter details. King post and Queen post roof trusses	L1, L2	10
MODULE 2: Timber- Floor & Partitions Timber floors: construction techniques, types of timber floors: single, double and triple joist timber floors, Furnishing of floors with different floor finishes like cement, coloured cement, mosaic, terrazzo, tiles etc. special consideration for rubber and PVC flooring, methods of laying Types of timber partitions: Single, double and flushed timber partitions	L1, L2, L3	8
MODULE 3: Introduction to Vertical transportation and Staircases Description of staircases, technical terminology involved, classification of	L1, L3,L4	10

`

staircases based on shape, material and its construction details. • Vertical section through staircases with detailing at various levels of staircases-Dog legged, Circular, Open Well, Spiral, Elliptical, etc. Classification also based on materials like wooden, steel and RCC • Staircase layout and its construction details, different elements of staircases, etc. • Design and details of construction of staircases in timber, stone, RCC and steel. • Cladding materials using traditional and contemporary materials		
MODULE 4: Water Proofing Materials • Waterproofing details in different levels: details in simple foundations, walls, roofs, sills, lintels and roofs in RCC, RB and steel, damp proof details of plinth, sill, lintel, and roof level. • Water proofing materials and systems for basement	L1, L3,L4	8

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2316	HISTORY OF INTERIOR DESIGN - II	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	History Of Interior Design I					
Co-requisites	Design III					

Course Objectives

- To make the students understand about the trends of interior design development and movements associated with them like Arts & Crafts, Art Deco and emergence of modernism and contemporary interiors of 20th Century.
- To give students a Global & Indian perspective of achievements and characteristics in interior design, and decorative arts and their relevance and impact on society.
- To develop an understanding of determinants that helped shape art forms & design elements in modern periods
- To familiarize students with the emergence and necessity of interior design and decoration which resulted in emergence of the profession.

Modules	Blooms level*	Number of hours
MODULE 1: Early 19th century and Mid 19th century Industrial Revolution, Period – Early 19th century. Victorian taste with change, Period – Mid 19th Century Module I: Late 19th century – 3 Weeks The search for a new style, Period – Late 19th Century in reference to European and American style	L1, L2, L3	06
MODULE 2: Early 20th Century Arts & Crafts movement, Art Nouveau, Impressionism Period – Early 20th Century	L2, L3, L4	12
MODULE 3: Mid 20th Century Art Deco, Bauhaus Movement and the Modern, Period – Mid 20th Century	L1, L2, L3	12
MODULE 4: Late 20th century The Post – Modern/ contemporary era, Minimalism, Photo Realism Period – Late 20th century Present universal trends emerging all over world. Overview of prominent works by Frank O Gehry, I .M. Pei, John Urtzon, Norman Foster, Zaha Hadid. Furniture design by prominent architects and designers like Le Corbusier, Charles and Ray Eames, EeroSaarinen, Marcel Breuer	L3, L4, L5	6

IND2314	ART & GRAPHICS– III	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	2	0	1
Pre-requisites/Exposure	Art & Graphics II					
Co-requisites	Design III					

Catalog Description

The objective of the course is to give an understanding of the graphics skills used in interior design. The course intends to build students' interest in thinking creatively and freedom of expression in Art, Paintings, and model making. The design and creative thinking course help analyze complex shapes, design and application of colour.

Course Objectives

The objective of this course is

- To introduce the concept of perspectives and perspective drawings.
- To develop architectural skills of perspectives
- To familiarize students with principles and theories of arts and its appreciation techniques.
- To introduce the concept of shades and shadows in architecture drawing.

Course Outcomes

On completion of this course, students will be able to

CO1: Appreciate art and artworks and re-create them in the form of logos, symbols, etc.
CO2: Create perspectives for surroundings and buildings.
CO3: Understand the importance of shading devices in architecture and interior design.
CO4: Understand the role of shades and shadows in presentation techniques.

Modules	Blooms level*	Number of hours
Module I: Compositions Graphic representations – Visual composition and Abstraction- Exercises involving Logo design, collage, calligraphy and printing.	L1, L2,	10
MODULE 2: Perspective (Free-Hand) Free-hand perspective drawing and rendering of imagined objects, in pencil and pen/ink. One and two point perspective drawings of solids and of different room interiors.	L!, L2	10
MODULE 3: Perspectives Free-hand perspective drawing of complex composition of solids. One and two point perspective view of the interior of the building with understanding of the basic human proportion and scale. Introduction to three point perspective.	L4, L5, L6	20
MODULE 4: : **Sciography** Values in shades and shadows, Constructing plan shadows (point, line and plane), Constructing shadows in elevations (Point, line and Plane). Short- cut methods for constructing shadows, Presentation techniques in different types of rendering techniques and materials.	L4, L5, L6	20

`

IND2304	PSYCHOLOGY OF LIVING ENVIRONMENTS	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Design Studio-III					
Co-requisites	NA					

Catalog Description

It is necessary to interact and understand the psychology of nature for the better understanding and development to modify the design accordingly. The course would be helpful to the students in simplifying thedesign patter by understanding the psychology of the environment and the vital functioning bodies of the environment.

Course Objectives

- Human beings are in constant interaction with the environment. With the growth of civilization, men are making more and more artificial environments, and interior designers play a significant role in thisprocess.
- The object of this course is designed to acquaint the students with some fundamental aspects of Environmental Psychology in relation with interior designing.

Course Outcomes

On completion of this course, the students will be able to

CO1. Basic principles of psychology and changing mental and emotional thought process.
CO2. Behavioral response to the built and unbuilt environment.
CO3. Application in different environments.
CO4. Use of research to enhance the interior quality.

Course Content:

Modules	Blooms Level	No.of Hours
Module 1 : Introduction to Environmental Psychology Emergence as a discipline, Importance in interior, Basic principles of psychology - changing understanding of man and his mental and emotional processes, corresponding relevance in design of built environment, Language of architecture (rhythm, balance, harmony, etc) and its elements (physical, aesthetic, sensory, colour, noise, light etc.), articulation of mass and space and its role in evoking emotions. Space syntax.	L1	6

`

Module 2 - Environment and Human response Behavioral response to the built and un-built environment, Processes involved in assessing and appraisal of environment, Responses to environment - Individual (environmental perception, spatial cognition, comfort, anthropometrics), Social (proxemics, territoriality, crowding, privacy), and Societal (neighborhood, community, work). Inducing behaviour through design.	L1,L4	6
Module 3– Application in different environments Design of spaces and places for occupants of varying ages, gender, use andgroup size , Educational (class room design, ambient noise, attention), Workplace (types of office design), Health care, religious, commercial, recreational, environments. Open spaces, cityscapes. Case studies	L3, L4	6
Module 4– Research methods in Environmental Psychology ofInteriors. Use of research to enhance the interior quality, measure satisfaction levels,direct behaviour in specific environments. Post occupancy evaluation, behavioral mapping, cognitive mapping, semantic differential techniques, trace measures. Case studies.	L3,L4,L6	6

IND2318	FURNITURE DESIGN WORSHOP-I	L	T	S	P	C
Version	Date of Approval:	0	0	2	0	1
Pre-requisites/Exposure	Interior Design Studio					
Co-requisites	NA					

Catalog Description

Furniture plays an important role in the life of an interior designer. It is a tool for visualizing &understanding the composition of the frame and placement of objects. This course enhances the skills of students to imagine and placement of objects**.**

Course Objectives

- The aim of the course is to make the students aware of the furniture designing which is an important part of interior design.
- The history of furniture is also to be introduced and described as the part of the course.

Course Outcomes

On completion of this course, the students will be able to

CO1: An introduction to materials and their techniques open up theperspective of the students to visualize furniture.
CO2: Learning model making and prototype for furniture in an interior space.
CO3: Design furniture as per the requirement.
CO4: Analyze measuring drawing.

Course Contents:

Modules	Blooms Level	No. of Hours
Module 1: Introduction to Safe Workshop Practice & Furniture Design Introduction to Ergonomics of furniture design Furniture design, Analyzing furniture type, form and designing	L1,L3	2
Module 2: Working with Wood and Wood Products Understanding of wood as building material, finishing materialfor surfaces and as furniture material. The wood materialparameters; Wooden joinery and its strength. Wood polishesand other finishes; color and surface quality; The safe and efficient use of the tools of the trade, Hand tools, portablepower tools, Stationary power tools, Materials, Hardware. Safeworking practices in a workshop. Joineries in wood – lap, butt,dowel, tenon& mortise, dovetail, etc. Exercises in plywood joinery; Wooden Paneling & Cladding; Wooden Flooring	L4	2
Module 3: Furniture Materials & Parameters Introduction to furniture design as per different materials and studying ergonomic design to prevent repetitive strain injuries and other musculoskeletal disorders. Analyzing working parameters and visual perception of furniture.	L1,L3	2

`

Module 4: Measuring Drawing Measuring drawing of a simple furniture and make it in the workshop, Introduction to various typology of furniture.	L2	2

Bloom's Level: *L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2307	LIGHTING & COLORS IN INTERIORS	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Climate and Design Studio					
Co-requisites						

Catalog Description

Understanding various types of lightings, their nature, importance of artificial lightning along witheffects of various lights on color and textures. Use of various luminaries and fixtures, lightning accessories their importance and study of lightning concepts.

Course Objectives

- This course provides knowledge of the various types of lightings to effectively communicate their designs and understand the effect of various lights on colors and textures.
- The aim of this course is to equip the students to understand, and successful y apply lighting techniques with color effects.

Course Outcomes

On completion of this course, the students will be able to

CO1: Introduction to Day Lighting
CO2: Artificial Lighting
CO3: Effect of Color in Lighting
CO4: Luminaries & Fixtures

Course Content

`

Modules	Blooms level*	Number of hours
Module 1: Introduction to Day Lighting Natural light, glare, day light factor and day lighting in tropics.sources of light, day light factor concept, design sky concept,day lighting requirements.	L1, L2	5
Module 2: Artificial Lighting Electric lamps –incandescent, fluorescent, sodium vapor, mercury,halogen and neon.Different types of lights in interior and exterior task lighting, special purposelighting. Calculation of artificial lighting,guidelines for lighting design, Glare in artificial lighting; Color characteristics of artificial lighting, integration of day lightingwith artificial lighting, lighting controls, intelligent building systems for lighting, switches, dimmers	L1, L2	5
Module 3: Effects of Color in Lighting Colour and light, colour and surface qualities, color and distances andscales. Problems with color. Use of color in various functional contexts Residential interiors, Non Residential interiors. Use of color in special situations out door/indoor spaces, accessories, art works etc	L1, L2	. 6
Module 4: Luminaries & Fixtures Definition, different luminaries for lighting, lighting control system-benefits & application, Impact of lighting, fixture types free standing or portable, fixed, light fixture control; Floor, table and desk,wall mounted, ceiling units, built in lighting, miscellaneous types, decorative lighting, spot lighting, task lighting, underwater lighting, etcLighting accessories-switches, sockets, fused connection units, lamp holders, ceiling roses etc.	L1, L2	8

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2317	BUILDING SERVICES-I	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Materials And Construction Technology –II					
Co-requisites	Interior Design – III					

Catalog Description

The aim of this subject is to give architects an overview and introduction to Plumbing systems and architectural considerations and their co-ordination with other services and architectural designs. Architectural services are the systems installed in buildings to make them comfortable, functional, efficient and safe. The course covers Water Supply and Sanitation system design in the buildings

Course Objectives

The objective of this course is

- To understand the need for and importance of building services.
- To understand the water supply system at urban level.
- To understand the importance of sanitation and sewerage system.
- To understand the treatment process of waste water.

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply knowledge gained on water supply system in small buildings.
CO2: Design sewage system for a residential building.
CO3: Design drainage system at urban level.
CO4: Prepare and understand principles of waste water management.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Water Supply Need to protect water supply, Requirements of water supply to different types of buildings. Sources of water supply, Quantity and quality of water as per NBC. Conveyance and distribution of water, Overhead tank, Underground tanks, Pipe appurtenances. Hot and cold water supply system in a low rise and high rise buildings. Distribution system in campus, Pipes their size, Jointing and different fittings.	L1, L2	6
MODULE 2: Sanitary Engineering Purpose and principles of sanitation, Collection and conveyance of waste matter. Quantity and Quality of refuse, Design and construction of sewer‟s and sewer appurtenances. Garbage and sewage disposal. Sanitary appliances, Traps their variety, Pipes and joints, Sanitary pipes works below and above ground level.	L1, L2	6

`

MODULE 3: Road and Drainage systems Introduce to the basic concepts of municipal drainage system, road pattern at city level. Roof and surface water drainage. Rain water storage and water harvesting principles and methods.	L4, L5, L6	6
MODULE 4: Waste Management System Introduction of different type of wastes produced at Urban level. Its management skills and criteria‟s for collections, Disposal and treatment of wastes. Reduce– Reuse–Recycle, Waste collection, Treatment & disposal. Thermal treatment Dumps and Landfills. Biological waste treatment. Waste water treatment	L4, L5, L6	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Syllabus – Fourth Semester

IND2408	INTERIOR DESIGN STUDIO-IV	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	0	6
Pre-requisites/Exposure	Interior Design – III					
Co-requisites	Building Materials & Construction Technology - III					

Catalog Description
The aim of this course is to provide a clear understanding about the design elements and principles followed while designing interiors of a Offices - open and enclosed and how to create a sustainable design.

Design Exercise: Offices - bureaucratic, IT, Corporate, Industrial etc. of maximum 200sq.m. Emphasis shall be on the composition, aesthetics, functional efficiency and innovation and sustainable design.

Course Objectives
The objectives of this course are:

- To develop an understanding towards sustainable concepts and materials
- To critique the materials, construction techniques used in the elements of built forms.
- To create an understanding of the interrelationships amongst various elements of interior architecture – form, function, aesthetics, space planning, user perception and behavior and culture.
- To enable the presentation of concepts through sketches and models and drawings.

Course Outcomes
On completion of this course, students will be able to
CO1: Collect data from standards, case studies for the current project.
CO2: Analyze data collected with relevance to the current project.
CO3: Integrate learning from other allied subjects to the design proposal.
CO4: Complete the architectural project with all given requirements for the given project.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to the Design Problem Introduction to the design problem. Case studies. Collecting relevant data for the given design problem. Synthesising and analysing the collected data.	L1, L2,	10
MODULE 2: Site study and Area Programming Site visit and Site analysis. Driving area requirements for the design exercise.	L!, L2	10
MODULE 3: Design Development Relation to various functional aspects of the design problem. Use of bubble diagram, flow diagrams, zoning of site, etc. conceptual design. Finalization of design proposals – schematic 2D/3D single line/conceptual level site plan, floor plan, elevations, sections.	L1,L2,L3	20

`

MODULE 4: Final design Proposals Final developed to the scale drawings of Site Plan, Floor Plans, Elevations, Sections, Views. Detailed floor plans with furniture layouts, and ceiling plans	L1,L2,L3	20

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2409	BUILDING MATERIALS & CONSTRUCTION TECHNIQUES – IV	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	1	0	3
Pre-requisites/Exposure	NA					
Co-requisites	Materials & Construction Techniques – III					

Catalog Description

The aim of this course is to develop understanding with RCC elements like column, beam etc. The knowledge about RCC is also enhanced through comprehension of RCC framed structures and reinforcement details in building elements like columns, beams, slab and lintels. The course gives complete knowledge about the various types of Cladding, false ceiling and surface finishes. Market survey and site visit studies shall be an essential part of the teaching – learning strategy.

Course Objectives

The objective of this course is

- To make students aware of joining details of columns, beams and slabs.
- To develop the ability to analyze the building construction methods and their applications.
- To equip students about the methods of designing various structural members using reinforced cement concrete.

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply basic information about construction procedures and reinforcement detailing about RCC elements like Columns, Beams and Slabs.
CO2: Apply various materials and fixing details of surface cladding.
CO3: Explain joinery and fixing details of false ceiling.
CO4: Describe uses of different surface finished in interior and exterior surfaces.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to RCC elements like Columns, Beams and Slabs Reinforcement detailing of RCC building elements like columns, beams and slabs through sketches and site visits.	L1, L2	8
MODULE 2: Cladding and Panelling • Details of cladding of wall with stone, tiles, timber and steel framing • Construction of cavity wall with different thermal and acoustical system • Various types of panelling (glazed, wooden etc.), details for panelling	L1, L2, L3	10
MODULE 3: False Ceiling Advantages and disadvantages of False Ceiling, Detail understanding of Reflected Ceiling Plan, joinery and fixing details.	L1, L3,L4	6
MODULE 4: Finishing Materials SURFACE FINISHES: Paints and surface finishes; Composition, properties and methods of application of different types of paints: Oil, synthetic enamels, acrylic and other plastic emulsions and formulations, interior and exterior grade paints. Natural and synthetic clear varnishes, French polish. Cement based paints	L1, L3,L4	12

`

• FLOOR FINISHES: PCC, terrazzo, stone slabs, brick and terracotta tiles, Synthetic materials (PVC, Timber). Floors of industrial buildings & warehouses. Ceramic wall & floor tiles. • PLASTIC: Classification of plastic, moulding and fabrication, properties of plastic, use of plastic, PVC. Fiber glass. • MISCELLANEOUS MATERIALS: Cork, rubber, Gypsum, sealants, heat and sound insulation materials. • GLASS AND GLASS PRODUCTS: Plain, sheet, plate, textured, laminated, wired and shock resistant glass. Glass blocks, glass tiles, mirrors, heat reflecting glasses and Glass wool.		

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2411	COMPUTER AIDED INTERIOR DESIGN & DRAFTING	L	T	S	P	C
Version 1.1	Date of Approval:	0	1	4	0	5
Pre-requisites/Exposure	Graphic Skills					
Co-requisites	Design –IV					

Catalog Description

The aim of this course is to understand the available software technologies and their applications in Architectural Designs. In order to enable students to use computer systems, software's and hardware, teaching necessary digital skills are important aspect of the course. This course will help learners to prepare presentation drawings, generating 2D and rendered views in a short time. This would finally help them in Design studio to develop conceptual as well as final Plan.

Course Objectives

The objective of this course is

- To introduce the students with the Photo editing software.
- To develop theoretical understanding of AutoCAD and its relevance in Architecture.
- To practice various commands of the Autocad.

Course Outcomes

On completion of this course, the students will be able to

CO1: Develop understanding of minimum system requirements and computer aided drafting.
CO2: Comprehend Photoshop and its parameter as tools and its application in architecture.
CO3: Comprehend computer aided drafting and its parameter as tools and its application in architecture.
CO4: Evaluate CAD techniques for quicker methods and presentation skills.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Use of Photo Editing Software Introduction to Photo editing, montaging as well as preparation of 2-D presentations.	L1, L2	2
MODULE 2: Workshop on Photo Editing Software ***Practice on Photo editing as well as preparation of 2-D presentations on Photoshop.***	L1, L2	6
MODULE 3: Introduction to Auto Cad (2-D) Software Introduce to the drafting software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 2D-3D drawing concepts. Students learn the ability to Drafting, Editing and modification work to be done in the graphic presentation. Practice on the various AutoCAD commands through software User Interface. Conduct 2D Skills Workshop to train the students. Introduce to the draft skills and minimize errors in the presentation skills.	L1, L2,L3	8

`

MODULE 4: Workshop on 2D drafting Practice on the various Auto Cad commands through software User Interface. Conduct 2D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.	L4, L5, L6	20

IND2412	PHOTOGRAPHY &VIDEOGRAPHY	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	2	0	3
Pre- requisites/ Exposure	Building Construction & History of Design					
Co-requisites	NA					

Catalog Description

On the successful completion of the course student will be able to, Define photography and videography and identify their usage in various fields, Explain the basic mechanism involved in capturing images and video clips, editing them and eventually publishing them, Explain the various types of cameras, Demonstrate various techniques of photography and videography by using the basic tools, Express their thoughts by using photography and videography as a medium of communication, Use photographic and videography skills for better representation of their portfolio.

Course Objectives

- The aim of this course is to develop knowledge, skills and understanding of Photography, Video and Digital imaging that enables students to gain an increasing accomplishment and independence in theirrepresentation of ideas in the fields of Design.
- This course enhances the students to visualize the concept of digital platform and various methods of image capture.

Course Outcomes

On completion of this course, the students will be able to

CO1: Photography & Digital Imaging, Videography

CO2: They will be given hands on training in audio and video recording. They will also learn the basics of Editing.

CO3: Understanding documentation of photography.

CO4: Understanding of photo documentation.

Course Content

Modules	Blooms level*	Number of hours
Module 1: Architectural Photography Origins of architectural photograph, Review of architectural photographs, Light and Shades, Understanding light – Properties and elements of light. Basics of camera – Operations and Control Parallax Error, use of camera, lens and understanding lighting conditions. Pixels, resolution, Sensor size	L1,L2	12

`

Module 2: Light and Architecture Understanding light and photography, External lighting- Direction of lighting - front, side, back, shadows, texture, and effects of clouds, light modification, psychological effects, and types of artificial lighting, combined daylight and flash. Overview of architectural photography, Color balance, Reading histogram, White balance and Color temperature	L1, L2	12
Module 3: Photographic Documentation Creative photography / photo renderings for special effects using software. Play of light and shadows to achieve dramatic pictures. Effects of seasons, inclusion of greenery, foliage, clouds, human scale etc.	L1,L2	12
Module 4: Photo Documentation Photo documentation of buildings highlighting quality of architectural elements and spaces.	L1,L2	12

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2413	FURNITURE DESIGN WORKSHOP-II	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	2	0	1
Pre-requisites/Exposure	Interior Design Studio					
Co-requisites	NA					

Catalog Description

Camera plays an important role in the life of an interior designer. It is a tool for visualizing &understanding the composition of the frame and placement of objects. This course enhances the skills of students to imagine and placement of objects.

Course Objectives

The objective of the course is to provide knowledge about an existing piece of furniture in its functional and technical aspect, carpentry skills required, materials and properties, biomechanical factors, ergonomics, aesthetics and economic factors

Course Outcomes

On completion of this course, the students will be able to

CO1: A basic introduction to the use of tools and cutting machines.
CO2: Acquaintance with the use of various metals and their properties.
CO3: Mastering the technique of welding, carpentry etc.
CO4: Understand furniture style of different eras.

Course Contents:

Modules	Blooms Level	No. of Hours
Module 1: Analyzing Furniture Analyzing furniture forms and designing furniture forms scientifically based on ergonomics, material design and working parameters and visual perception of furniture as a single form and as a system in each interior space	L1,L3	3
Module 2: Measuring Drawing Measurement drawing of a piece of a furniture-plan, elevation, sections and detail drawings on proper scale. Design of a simple object having some moving components like a folding stool or chair. History of furniture from early days to industrial revolution	L1,L3	6
Module 3: Modular Aspects Modular aspect and approach towards all types of furniture, cost criteria of design furniture for lower income group in the society	L4	1
Module 4: Furniture Style Design and understand Post Independence furniture style	L1,L3	2

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2414	BUILDING SERVICES – II	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre- requisites / Exposure	Technology –III, Architectural Services-I					
Co-requisites	Design – IV					

Catalog Description

The aim of this course is to give an overview and introduction of Noise Control, Acoustics, Gas installation and fire-fighting systems. In today's architectural environment, good acoustical design isn't a luxury – it's a necessity. This course deals with the science behind sound and its application to achieve desired acoustical performance in a specific building by using different building materials, systems and technologies.

Course Objectives

The objective of this course is

- To introduce to the theory and practices of Acoustics and Noise reduction.
- To introduce various building elements and their application in the built environment.
- To get familiarized with Gas installation techniques and requirements
- To understand the importance of Fire safety in a building.

Course Outcomes

On completion of this course, the students will be able to

CO1: Describe the theory of acoustics and its implementations in buildings like Auditorium, Lecturehalls, etc.

CO2: Describe the different types of noise, their transmission and the measure to isolate and controlthem.

CO3: Design Gas installation system at residential and non-residential buildings.

CO4: Describe the installation of Fire safety measures in a building.

Course Content:

Modules	Blooms level*	Numberof hours
MODULE 1: Building Acoustics Terminology and unit. Characteristics of audible sound – Propagation, Velocity, Frequency, Pitch, Quality/timbre, Loudness and Intensity. Behavior of audible sound in enclosures – Reflection, Absorption, Diffraction and Transmission of sound. Common acoustical defects and recommended remedies– Echo, Sound foci, Dead spots, Sound shadows, Resonance, Insufficient loudness, External noise and Reverberation. Sabine‟s expression for calculation of Reverberation time. Absorbents and absorption coefficient. Acoustical requirements as perNBC	L1, L2	6
MODULE 2: Noise Control Noise and its types, Noise pollution. Sources of indoor noise, Indoor noise levels, Planning and design against indoor noise. Sources of outdoor noise,Traffic noise levels, Planning and design against outdoor (traffic & buildings inbuilt-up area) noise. Identification of various sources of noise and	L1, L2	6

`

MODULE 3: Gas Installation L.P.G / Bio-gas installations, their location and layouts in residential and non-residential buildings	L4, L5, L6	6
MODULE 4: Fire Safety System Causes and spread of fire. Fire triangle/ tetrahedron. Classes of fire. Combustibility of materials and fire resistance. Building Plans, Drawings, and Schematics. Fire Detection Equipment- Heat &Smoke sensors. Fire Alarm Systems. Firefighting pump and water storage, Hose and hose fittings, Dry and wet risers, Automatic sprinklers. Fire Extinguishers - Portable fire extinguisher and other firefighting equipments. Means of escape, Fire escape, Fire doors and Water curtain. Passive means of fire fighting and building design criteria as per NBC.	L4, L5, L6	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2410	BARRIER FREE SPACE PLANNING FOR INTERIORS	L	T	S	P	C
Version 1.1	Date of Approval	2	0	0	0	2
Pre- requisites/ Exposure	Design IV					
Co-requisites	NA					

Catalog Description

The objective of this course is a detailed study of designs that eliminate or reduce hazards in the workplace to prevent mishaps and provide good indoor quality. This course also covers to make understanding of disaster management, seismic design principles and various building management systems.

Course Objectives

- The objective of this course is to develop deep insights of building safety systems and building management.
- This course provides the ability to gain on-site knowledge about planning of building basic necessity of safety systems.

Course Outcomes

On completion of this course, the students will be able to

CO1: The students learn the process and elements of a Safety and Health Management Systems.
CO2: Health and Safety Aspects factors of slips, trips and falls n the workplace and methods to prevent them.
CO3: Dealing of Fire Fighting Services, mechanism of fire spread in building and prevention.
CO4: Disaster Management & Seismic Design Principles, Emergency planning: on- site and off-site.

Course Contents:

Modules	Blooms Level*	No. of Hours
Module I : Safety Management & Special Abilities Scope of Environmental safety: Need for public awareness. Understanding the different human imparities such as visual, mobility and hearing and also understanding the abilities of such differently able persons. To understand the architectural requirements of such persons.		
Module 2: Introduction to Architecture for specially able Defining the basic concepts of barrier free design, need for barrier free concepts in architecture, concepts of universal design and types of disabilities. Design principles for barrier free architecture and accessibility for all.	L1,L2	5

`

Module 3: Barrier free elements for outdoors and Urban Design Design elements outside the building like curb ramps, pedestrian crossing, public toilets, and parking, signage, flooring and street furniture. Case examples of Barrier free architecture in India and across the globe. To study the anthropometrics and dimensions of mobility devices, special fixtures for barrier free design. Barrier free construction materials and dimensions for flooring, walls, doors, windows, staircases, elevators, toilets, entrances and corridors.	L1,L2	5
Module 4: Laws Knowledge of different laws prevailing within India and in other countries. Understanding implication of different laws on design of spaces.	L1,L2,L3	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

Syllabus – Fifth Semester

IND2502	REVITALIZATION OF ARTS & CRAFTS	L	T	S	P	C
Version 1.1	Date of Approval:	1	0	0	0	1
Pre- requisites/ Exposure	Visual Arts-I					
Co-requisites	NA					

Catalog Description

The course is a build with an objective to document people, life, culture and craft and understand the materials, tools, technology, processes and forms. Suggest suitable changes in technology to improve the products so as to make it acceptable in today's context.

Course Objectives

- This course aims a detailed study of the characteristics of Indian arts and crafts and its application in the interiors that provides an understanding of the role of revitalization of Art/craft form in interior spaces through a project assignment.

Course Outcomes

On completion of this course, the students will be able to

CO1: Acquiring knowledge of Indian Craft and art.

CO2: Conceptualizing & presentation skills.

Course Content

`

Modules	Blooms Level*	No. of Hours
Modules 1: Introduction to Creative Arts and Crafts inIndia Creative arts and crafts in India and its application in interior design; Materials; Art movements through history; Traditionalarts and crafts of India; Folk arts of India; Traditional arts and crafts of various states of India.	L1, L2, L3	6
Modules 2: Project AssignmentDescription: The project will consist of a general to the crafts traditions of	L1, L2, L3,	6
India, details about the crafts, their classifications, regional distribution etc. that will applicable to art in interior spaces such as – Residence, Reception, Lobby spaces, Theme Boutiques, Hotel, Restaurants, etc.This project will necessarily be a scientific, methodical documentation of aparticular craft tradition prevalent in the region, which will have the following core issues in the background: Philosophy and Aesthetics - Materials, Processes and Techniques - Environment and Resource management – Social structures - Economy & Marketing – International examples. **Procedure:** Select one of the art / craft form with the consultation of the faculty. Discuss about the crafts traditions practiced in the region, their history, distribution etc. along with faculty.Collect all information available through various sourcesincluding library, internet and resource persons. To availcomprehensive data on various aspects of the crafts, studentsmay develop an interview schedule and decide on number ofcrafts persons to be interviewed, which all places they will bevisiting etc. Faculty must equip the students on interactionwith craftsperson and other people from the community, typeof language they should use, how to be polite with them andwhile handling their materials etc. Students can buy some ofthe objects from craftsperson, take photographs after seekingtheir permission, make drawings, etc. which later on they canuse in PPT presentation along with submission of final project report. The students can also make a short documentary filmbasis on their research for their final presentation **Requirements:** The work will be periodically reviewed. The study has to be presented in the form of a „Documentation Report" with illustrations /images as aseminar for final Course Evaluation. The students are asked to give a brief oral presentation with „Power Point" to the class about their research. They have to explain, what kind of interests they want to develop in the research and a debate will follow as well. The submission of project assignment file and presentation will be part of student"s Examination Scheme. The students will have to visit various craft places and museums for the part of their research.	L4	

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2504	TEXTILE IN INTERIORS	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre- requisites/ Exposure	Design-V					
Co-requisites	NA					

Catalog Description

This course is intended for students of interior designing to learn them about the basics of textiles like different structures of fabric like woven, knitted, non- woven and braided.Students able to design the interiors with the help of elements of design and principles of design with appropriate fabric type for appropriate location in the building structure. Understood which type of fabric structure and designing required for walls, ceilings, floors coverings, cushion covers, bathrooms, slip covers, runners, rugs, carpets, curtains and bedand table covers etc. Other then fabrics which type of fabrics structures can be used for decoration in interiors of a buildings and homes like cork, leather, Rexene and crochet and braided structures etc.

Course Objectives

- The objective of this course is to familiarize the students of Interior Design on textilematerials used in interior.
- This course helps to gain knowledge and understanding of the functional and aesthetic requirements of textiles for a range of applications.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Identify different type of fibers, yarns and fabrics along with classification.

CO2: Understand the application of elements and principles of design to develop design collection range.

CO3: Describe different surface ornamentation techniques.

CO4: Apply different materials in different type of projects

`

Course Content

Modules	Blooms level*	Number of hours
Module 1: Introduction To Fabrics Fabric, yarn and fiber structure, Fabric structure- woven- warp, weft, selvedge ,knitted- course, non-woven, Fabric types and classification- woven, including plain, twill, satin, Jacquard, crepe and pile weaves, Knitted- including single knit, double knit, tricot knit, pile knit, lace and net, Non-woven-including felts webs and films, identification and properties of fabrics, yarns and fibers.	L1, L2	6
Module 2: Textile Design Applicable to Interiors Development of textile design in different cultures from primitive art to contemporary designs. Criteria of design of the elements and principles of textile design. Application of elements and principles of design across a range of textiles. Describe and analyze elements and principles of design -furnishings, textile arts. Functional and aesthetic requirements and features of textile range. Analysis of a motif, developing repeat as a basic unit of design.	L1, L2	6
Module 3: Colour on Fabrics Fabric coloration and decoration- Dying and Printing; Principles of applying color to fabrics. Textile arts and crafts in interiors, traditional and modern materials and methods. Preparing samples on tie and die printing, batik printing, appliqué, macramé and braiding.	L1, L5	8
Module 4: Textile Materials for Interiors. Miscellaneous materials such as cork, leather, paper, Rexene etc. – their properties, uses and applications in the interiors. A brief overview of Green materials. Jute or hessian – dyed jute fabric and its applications – various kinds of processed leather, its application in interior design. Furnishings-Classification; Types of curtain; Curtain construction; Selection criteria relation to backgrounds in walls; Floors and ceilings; Slip covers; Cushion covers; Bed linen and table linen; Floor coverings -rugs and carpets, types selection; Care and maintenance; Installation of floor coverings.	L1, L2	4

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2513	BUILDING SERVICES – III	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre- requisites/ Exposure	Building Materials And Construction Technology –IV, Architectural Services-II					
Co-requisites	Design – V					

Catalog Description

The aim of this course is to introduce the basic concepts of Electrical system design at the building planning level. Building services engineers are responsible for the design, installation, and operation and monitoring of the mechanical, electrical and public health systems required for the safe, comfortable and environmentally operation of modern buildings. The course module can help students to understand the basic concepts of electrical and mechanical circulation systems to make the building comfortable, functional, efficient and safe for use.

Course Objectives

The objective of this course is

- To familiarize the student with theoretical and practical aspects of Electrical Systems and Components of Home Electrical Design.
- To develop perception regarding the various norms and standards for Electrical Systems and Lighting.
- To increase knowledge capacity of the students in the, HVAC system and Ventilation.

Course Outcomes

On completion of this course, the students will be able to

CO1: Discuss the active and passive components of Electrical system and various principles.
CO2: Develop understanding for Electrical and illumination system for Small building.
CO3: Discuss the active and passive components of HVAC and their underlying principles.
CO4: Discuss the importance of ventilation systems in buildings.

Modules	Blooms level*	Number of hours
MODULE 1: Electrical System Terminology and architectural symbols (as per NBC/NEC) for electric installations in buildings. Need to generate and save electricity, transmission anddistribution of electricity (single and three phases), procuring service connection. Familiarization to various lighting accessories, wires and cables, metering, distribution panels / boards etc. for single and three phase supply. Basic considerations. Various types of internal wiring systems e.g. cleat, casing and capping, batten and conduit (surface & concealed). Introduction to various types of protection devices e.g. switches, fuses and circuit breakers.	L1, L2,L3	6
MODULE 2: Lighting and Illumination Terminology and unit. Light and its characteristics – scattering, propagation, transmission, reflection, absorption, refraction and dispersion of light. Different types of source of lights: Thermal radiators - Incandescent, Halogen. Discharge lamps– Low pressure (fluorescent, compact fluorescent, sodium, cold cathode	L1, L2,	6

`

neon), High pressure (mercury, metal halide, sodium). New technologies - LED, Fiberoptics. Luminaries – Types of Luminaries – Indirect, Semi-indirect, General diffusing, Semi-direct and Direct. Types of illumination schemes e.g. Ambient, Task, Focal and Decorative etc. Design considerations for illumination Schemes. Methods for lighting calculation – Watts per square meter, Light flux and Point to point method.		
MODULE 3: HVAC Introduce to the basic concepts of Air Conditioning, function, scope and purpose. Share relevant Indian BIS and ASHRAE standards. Study relationship of Human Comfort, Dry/Wet/Dew Bulb Temperature, Climatology principles, Psychrometric Chart Analysis, and study HVAC design considerations in typical building case.	L1, L2, L3	6
MODULE 4: Ventilation Introduction of the importance on ventilation in a building. Types and means of ventilation systems. Natural ventilation, Stack effect, Direct and Indirect	L1, L2,	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2509	INTERIOR DESIGN STUDIO – V	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	4	0	6
Pre-requisites/ Exposure	Interior Design Studio – IV					
Co-requisites	Building Materials & Construction Technology - IV					

Catalog Description
The aim of this subject is to emphasize on socio cultural values and design projects focused on cultural values of the users. The students can be introduced to hospitality spaces or cultural institutions and the planning and designing involved in creating such institutions which cater to various users and their needs.

Design Exercise: – Coffee Shops, Fine Dining Restaurants, Reception Lobbies and Lounge of Hotels, Spas, Bars, Clubs, Discotheque, Hotel Kitchens – open & enclosed etc, art galleries, small museums etc.

Course Objectives
The objectives of this course are:

- To explore the design of buildings addressing the socio – cultural & economic needs of contemporary society.
- To enable the students to understand the importance of spatial planning with regard to various functions and users.
- To enable the students to design for large groups of people in a socially and culturally sensitive manner, taking into account aspects such as user perception, crowd behavior, large scale movement of people and identity of buildings.
- To emphasize on the importance of understanding the relationship between open space and built form and interior services

Course Outcomes
On completion of this course, students will be able to
CO1: Design a Project involving multiple space utilization.
CO2: Design socially and culturally sensitive interiors.
CO3: Demonstrates basic interior service in the drawings.
CO4: Communicate through drawings or models.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction Design problem may be introduced, Site visit, Site analysis, Understanding the user and culture.	L1, L2,	10
MODULE 2: Development of Concept Collecting and analysing data of various spaces, Area programming, Flow diagram, Single line graphics and study models.	L!, L2	10
MODULE 3: Design Development Integrate the knowledge gained from previous theory based subjects like Building services, Building materials and Construction Technology, Structure, etc., and apply to detail out their design proposal.	L1,L2,L3	20

`

MODULE 4: Final Design Proposal The final design proposal is prepared after conducting various informal and formal reviews at individual and at group level. The drawing and detail physical model explaining the approach	L1,L2,L3	20

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2511	ESTIMATION & SPECIFICATIONS	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre-requisites/Exposure	Interior Design Studio					
Co-requisites						

Catalog Description

This course aims to equip the students to prepare the Estimate in order to foresee the costof the work or to implement an interior design project & also to monitor / control project cost. Also, this course exposes the students to the currently prevalent techniques in the planning, programming and management of a project.

Course Objectives

- This course aims to equip the students to prepare the Estimate in order to foreseethe cost of the work or to implement an interior design project & also to monitor / control project cost.
- Also, this course exposes the students to the currently prevalent techniques in the planning, programming and management of a project.

Course Outcomes

On completion of this course, the students will be able to

CO1: Prepare the Estimate to implement an interior design project

CO2: Monitor / control project cost

CO3: Get exposure to currently prevalent techniques in the planning, programmingand management of a project.

CO4:

Course Content

Modules	Blooms Level	No. of Hours
Module 1: Introduction To Estimation & Rate Analysis Estimation – definition, purpose, types of estimate, and procedure for Estimating the cost of work in order to implement an interior design project or to make products related to interior design like furniture, artifacts etc. Rate Analysis – definition, method of preparation, quantity & labor estimate for woodwork, steelwork, Aluminum work, glass & its rate for different, thickness & sections, finishing (enamel paint, duco paints, melamine, DU coats, Hand polishing, veneering and laminating) for walls & ceilings. Electrical &plumbing products, wiring, ducting etc., and laying of tiles & wall paneling in the estimate format of the project.	L1, L2	4
Module 2: Detailed Estimate Detailed Estimate – data required, factors to be considered, methodology of preparation, abstract of Estimate, contingencies, labor charges, bill of quantities, different methods of estimate for interior design works, methods of measurement of works.	L1, L2, L3	4

`

Module 3: Costing of Fixtures & Fittings Cost of the following items: Luminaries, Fan, Cables, Switches etc.; Tiles in skirting & dado, Cement plaster, Wood, Steel & Aluminum, Painting to walls : Cement paint, Oil paints , Distemper, Acrylic emulsion, Enamel paint; painting to joinery, Varnishing, French polishing, Plumbing equipments: Piping, Shower panels ,Cubicles, Tubs, Jacuzzis, Taps, Motors, Fountains, False ceiling of Aluminum panels, Steel & Wooden frame work, Thermosol etc. Wall paneling of tiles, Partitions made of materials like Aluminum, Wood, Steel etc.	L1, L2, L3	4
Module 4: Introduction To Specification: Definition, Purpose, Procedure for writing specification for the purpose of calling tenders, Types of specification. Specification for different item related to interiordesign project – woodwork for furniture window frames & pelmets, Partitions etc. Materials like steel aluminum glass of various kind. Wall paneling & false ceiling of materials like Aluminum, Steel, Wood, Electrical, Plumbing, Air-conditioning &Firefighting equipment. **Project Management** ***Introduction:*** Project planning and project scheduling and project controlling, Role of Decision in project management, Method of planning and programming, Human aspects of project management, work breakdown structure, Life cycle of aproject, disadvantages of traditional management system; ***Critical Path Method And PertAnalysis:*** CPM network analysis & PERT time estimates, timecomputation & network analysis; ***project time reduction and optimization:*** Project cost	L1, L2, L3, L4	4

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

IND2512	COMPUTER AIDED INTERIOR DESIGN & VISUALIZATION	L	T	S	P	C
Version 1.1	Date of Approval:	0	1	4	0	3
Pre-requisites/ Exposure	CAIDD					
Co-requisites	Landscape Design					

Catalog Description

The aim of this subject is to introduce techniques for further refinement of computer generated graphics covered in the previous semester. In addition to that, this course also trains students for developing photorealistic modeling using popular software in the field of architecture. Advanced technologies and concepts using computers as an essential tool are also introduced such as Building Information Modeling. This course equips students with soft skills which increase their productivity and expression in design related subjects.

Course Objectives

The objective of this course is

- To introduce and make students learn about graphic presentation tools
- To introduce Sketch up as 3D drafting software.
- To introduce Revit as 3D drafting software and its allied rendering plugins.

Course Outcomes

On completion of this course, the students will be able to

CO1: Prepare building design through sketch up software.
CO2: Prepare building design through revit software.
CO3: Render the drawings in various rendering plugins.
CO4: Train others in various types of softwares such as revit, sketch up.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to SketchUp (3-D) Software Introduce to the Sketch up 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 3D drawing concepts. Students learn the ability to Model, Editing and modification work to be done in the graphic presentation.	L1, L2	12
MODULE 2: Introduction to Revit (3-D) Software Introduce to the Revit 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Students learn the ability to Building Information Modeling.	L4, L5, L6	8
MODULE 3: Introduction to Rendering Plugins Introduce to the Lumion and Twilight Render software for the Rendering.	L1, L2	4
MODULE 4: Workshop Practice on the various Revit and Sketch Up commands through software User Interface. Conduct 3D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.	L4, L5, L6	12

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2510	BUILDING MATERIALS & CONSTRUCTION TECHNIQUES – V	L	T	S	P	C
Version 1.1	Date of Approval:	1	1	1	0	3
Pre-requisites/ Exposure	NA					
Co-requisites	Materials & Construction Techniques – IV					

Catalog Description

The aim of this course is to continue with metal as the main building material. The study is concerned with special doors and windows to steel doors, windows and partitions. The knowledge about RCC is also enhanced through comprehension of RCC framed structures and reinforcement details in building elements like columns, beams, slab and lintels. Students are familiarized with the types of metal shutters and partitions, doors and windows, their application and construction details in steel and aluminium sections.

Course Objectives

The objective of this course is to

- To familiarize the students with various types of metal doors.
- To develop understanding about framed structure in terms of reinforcement and construction details.
- To familiarize students with doors and windows in steel and aluminum sections. Also integration of openings with partitions in steel and aluminum used in interior of buildings

Course Outcomes

On completion of this course, the students will be able to

CO1: Define various types of door and windows used in different situations from day to day life.
CO2: Comprehend the details of metal doors.
CO3: Comprehend the details/ arrangements of reinforcement.
CO4: Evaluate the best suitable material and type of Door, Window and Partitions.

Modules	Blooms level*	Number of hours
MODULE 1: Special Doors and Shutters Different types of doors; sliding, sliding and folding, revolving doors, collapsible shutters, rolling shutters, types of rolling shutters in conventional and contemporary materials. The installation, working and mechanism of such doors and shutter	L1, L2, L3	10
Module II: Exterior and interior finishes Latest finishing materials and their applications in construction- Aluminium Composite Panels(ACP), PVC Sheets, Gypsum, Fiberglass, Glass bricks, other cladding materials and finishes.	L1, L2, L3	8
Module III: Paints, Polish, Varnishes and Application Technique Types of Paints used in Interiors and exteriors and application methods. Preparation of differentsurfaces for Painting, Polishing and Varnishing and their market study.	L1, L2, L3, L4	10
Module IV: Upholstery & Curtains, Drapes & Blinds Upholstery work in furniture, especially seats, with padding, springs, webbing,and fabric or leather, leatherette covers, etc. Curtains, Drapes, Blinds, their material types and application on doors and windows.	L1, L2,L3	8

Syllabus – Sixth Semester

IND2610	SUSTAINABLE INTERIOR DESIGN & MATERIALS	L	T	S	P	C
Version	Date of Approval:	3	0	0	0	3
Pre- requisites/ Exposure	NA					
Co-requisites	NA					

Catalog Description

On the successful completion of the course student will be able to Analyze Environmental Impacts and Sustainable Design Strategies. Understand Phases of Building Materials, Life-cycle Assessment; Life-cycleInventory. Analyze and Execute Sustainable Interior Materials in construction.

Course Objectives

- Careful selection of environmentally sustainable building materials is the easiest way for architects to begin incorporating sustainable design principles in buildings.
- This course helps the students to understand the sustainable interior materials and methods.

Course Outcomes

On completion of this course, the students will be able to

CO1: Bio Climatic Design Concepts
CO2: Sustainable Interior Materials Selection
CO3: Key Sustainable Interior Materials and Methods
CO4: Understand the detailing of flooring

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Bio Climatic Design Concepts Environmental Impacts and Sustainable Design Strategies: Natural Resource Depletion, Energy use, Pollution. The Designer's role beyonddesign and construction. The principles of Life Cycle Design; Phases of Building Materials,Life- cycle Assessment (LCA); Life-cycle Inventory (LCI); LCA in Practice: EIE, BEES; Assessments tools: BREEAM, SB Tool, LEED, Eco Profile, Promise, Green Mark of Buildings, Green Star, CASBEE. Certification Systems: First party, Second party and Third party ; Third-party Certification Organizations: The Forest Stewardship Council(FSC), Green guard Environmental Institute (GEI), Green Seal, Inc., and Scientific Certification Systems (SCS); The Carpet and Rug Institute (CRI); Resilient Floor Covering Institute (RFCI)	L1, L2	12

`

Module 2: Sustainable Interior Materials Selection Criteria: Indoor Air Quality (IAQ); Reusable or Renewable Resources Energy Efficiency; Water Conservation. Features:Pollution prevention;waste reduction; recycled content; embodied energy; Natural materials; Minimal construction waste; Locally produced materials; Non- or less- toxic materials; Durable materials; Rapidly Renewable Materials; Low Maintenance; Reusability; Recyclability; Biodegradability; Harmful Chemical that can affect air quality in interior spaces: Volatile Organic Compounds (VOCs); Brominated flame retardants, Halogenated plastics, Bisphenol A, Heavy metals, Toxic solvents in finishes and sealants, Formaldehyde.	L1, L2	12
Module 3: Key Sustainable Interior Materials and Methods Bricks & Blocks: Recycled concrete bricks, Adobe bricks, Stabilized earthblocks, Compressed sand bricks, Hydra form bricks, Fly Ash Bricks, Wool Bricks; Wood Materials: Engineered wood: Plywood, Oriented strand board, Glued laminated timber (glulam), Laminated veneer lumberCross Laminated Timber, Parallel strand lumber, Finger jointed lumber, I-joists and wood I-beams, Roof trusses and floor trusses, Certified Wood; Site and Landscaping: Landscape pavers made from recycled plastic, Recycled asphalt and bitumen, Expanded polystyrene foam. Foundations: rigid plastic foam, Concrete blocks with foam inserts.	L1, L2	12
Module 4: Flooring Flooring: Bamboo flooring, Cork flooring, Eco-friendly linoleum flooring; Structural Framing: Wood and steel open web joist; Roofing: Solar Tiles Roofing, Sustainable Concrete, Fiber- resin composition roofing tiles, integrated sheathing and insulation, pre-tapered for flat roofs, Weatherproof shingles manufactured from recycled aluminum alloys; Structural Envelopes: Super-insulated stress-skin panels; Earth bag construction; Insulation: Homasote fiberboard, Cotton insulation, Hemp based products, Blown insulation; Interior Finishes: wallpapers, recycled gypsum board or wallboard, Natural Fiber Reinforced Plastics, Casein paint, Sisal wall coverings, recycled burlap or virgin jute fiber carpet, recycled wool carpet, recycled ground up tire rubber. Plumbing: Low flow shower heads, Solar hot water, Vacuum- assisted toilets; Ventilation: Heat- recovery ventilator.	L1, L2	12

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2611	SUSTAINABLE INTERIOR RENOVATION	L	T	S	P	C
Version	Date of Approval	3	0	0	0	3
Pre- requisites/ Exposure	NA					
Co-requisites	NA					

Catalog Description

On the successful completion of the course student will be able to Typology of the existing housing, Constructive mode and materials, Renovation strategies. Execute Principles of acoustic insulation and correction, optimizing the Acoustic comfort. Optimize the lighting system, Renewable energies for generating electricity, Heat recovery on ventilation system, Air pre-heating by air ground exchanger.

Course Objectives

- Sustainable renovation needs special skills for diagnosis, conception, for using intelligent or new techniques, and then ensuring maintenance.
- This course provides an insight to the students about the need and importance as well as various concepts of sustainable renovation.

Course Outcomes

On completion of this course, the students will be able to

CO1: Introduction to Sustainable Renovation
CO2: The Comfort of Life
CO3: Energy Consumption
CO4: Water Consumption

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Introduction to Sustainable Renovation & The Comfort of Life Sustainable Renovation: Need, Meaning & Definition, Priorities for the renovation of housing, Definition of sustainable architecture, The inceptionof bioclimatic architecture. Typology of the existing housing, Constructive mode and materials, Renovation strategies. Increase the quality of the outdoor spaces: Favour social interactions, Favour Soft mobility, Favour and reintroduce biodiversity; Increase the quality of indoor air, limiting sources of indoor pollution, Optimizing the ventilation system. Acoustic comfort. Basic notions, principles of acoustic insulation and correction, optimizing the acoustic comfort.	L1, L2	6

`

Module 2: Energy Consumption Increase the thermal performances of housing: Optimizing the External walls performances, Optimizing the shape, : Additional insulation in housing renovation. Improving the air tightness, Reducingthe thermal bridge Thermal inertia in housing renovation, Optimizing the solar protections, Natural night cooling, Optimizing the window conception.Reduce fossil energies consumption: Optimizing the heating system,Optimizing domestic hot water, Heat pump for heating production, Hot Water production by solar energy, Optimizing the lighting system,Renewable energies forgenerating electricity, Heat recovery on ventilation system, Air pre-heating by air ground exchanger.	L1, L2	6
Module 3: Water Consumption Reduce the tap water consumption: Rational use of tap water, Recovery anduse of Rainwater, increase the water resources. Water management on the parcel, Water recycling by plants, Water recycling in urban area.	L1, L2	**8**
Module 4: Reduce production of waste & consumption of territory resources Reduce construction and demolition waste: Preventive measures to reduce Waste Waste management on building site, Reduce domestic waste: Preventive measures to reduce domestic waste; Reduce consumptionof territory and resources, Embodied energy consumption, Construction materials.	L1, L2	8

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6:Evaluation*

IND2612	ADAPTIVE REUSE AND RETROFIT	L	T	S	P	C
Version	Date of Approval:	3	0	0	0	3
Pre- requisites/ Exposure	NA					
Co-requisites	NA					

Catalog Description
On the successful completion of the course student will be able to: Analyse the building's performance, Able to use sustainable conservation techniques and to Improve the energy performance of heritage structures.

Course Objectives
The objective of this course is to give a comprehensive overview on how existingbuildings can be adapted and retrofitted to function sustainably.

Course Outcomes
On completion of this course, the students will be able to
CO1: Sustainable Retrofit for existing building
CO2: Adaptive Reuse of old building
CO3: Technologies for energy efficiency in existing buildings
CO4: Sustainable conservation of heritage structures

Course Content:

Modules	Blooms level*	Number of hours
Module I: Sustainable Retrofit for existing building Retrofitting options for existing buildings; Structural retrofit; Façade; Services; Interior retrofit; Performance analysis of existing buildings;Physical audits; Building simulation , metering and tracking options, analysis the building's current performance, decision influencers forretro fit, economic, social and environmental issues.	L1, L2	10
Module II: Adaptive Reuse of old building Need for adaptive reuse; Issues to be explored in building adaption; Economic, social environmental, and assessment models for adaptivereuse; Case studies of buildings with adaptive reuse.	L1, L2	8
Module III: Technologies for Energy Efficiency in Existing Buildings Improving energy efficiency in existing buildings,Facade improvements;HVACimprovements; Indoor EnvironmentImprovements; Monitoring the performance of retrofits; Case studies on energy efficiency improvements in existing buildings.	L1, L2	10
Module IV: Sustainable Conservation of Heritage Structures Conservation of heritage structures; Sustainability in heritage structures;Adaptive reuse of heritage structures; Issues in adapting a heritage structure; Use of sustainable conservation techniques; Improving the energy performance of heritage structures; Case studies of sustainable conservation in heritage structures.	L1, L2	8

IND2613	PERFORMANCE SPACE DESIGN	L	T	S	P	C
Version	Date of Approval:	2	0	2	0	3
Pre- requisites/ Exposure						
Co-requisites						

Catalog Description

This course provides the opportunity for the students to develop their own individual design in relation to Performative Spaces like theatre and performance design, stage and set design, production design for film and television through independent and collaborative project work On the successful completion of the course student will be able to Understanding Set Design and Stage Design Concept, Analyzing Site and Building Exteriors and Understanding Visual Creation

Course Objectives

This course provides the opportunity for the students to develop their own individual design in relation to Performative Spaces like theatre and performance design, stage and set design, production design for film and television through independent and collaborative project work

Course Outcomes

On completion of this course, the students will be able to

CO1: Performance Space Design
CO2: Set Design and Stage Design Concept
CO3: Functional Area Descriptions
CO4: Visualization of Scenic Design

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Performance Space Design Introduction Scenic Design , The nature of theatre design, Theatre forms, The goals of theatre design, The house and front of house, Scenic design, Considerations for the Scenic Designer: Mood and Spirit. Functionaldiversity of Performance Space: Movies, Conferences/ Seminar Auditorium, Live performance event space, Hybrid Performance S pace.	L1, L2	6
Module 2: Set Design and Stage Design Concept Theatre Terms: Arena stage, Box set, Curtain set, Cyclorama, Drops,Flats, Minimal set, Permanent set, Prism set, Proscenium stage, Scrim, Set pieces,Teaser, Thrust stage, Unit set; Stage Elements: Act curtain, Apron acting,Back wall, Battens, Cyclorama orCyc, Flies, Fly gallery, Gridiron or grid, Ground cloth, Leg, Pin rail, Proscenium arch, Tormentors, Trap, Wings;The Design and Setting: Provide adequate space for movement,Communicate the time and place, provide the audience with the moodand style of the play, Technically usable and safe.	L1, L2	5

`

Module 3: Functional Area Descriptions Site and Building Exteriors: Public Scale, Parking, Accessibility for disabled,marquee, Exterior Design and Materials, etc.; Performance Space Ceiling configuration and floor plans, Stage Specifications,Back stageand artistic support areas, Theatrical lighting system, Architectural lightning system, AudioVideo systems, Acoustic Ca nopies and Orchestra shells, Orchestra Pits and Pit lifts, Special show related systems for purpose-built facilities, Sight lines, Acoustics, Curtains, Changing rooms, Makeup rooms, Toilet rooms, General storage, Production and Pre Production areas, Receiving areas, Ceiling configuration etc.; Audience Environment: Ceiling configuration and floor plans, Seatingand Seat Spacing plans including sightlines to the stage, Acousti cal canopies; Lobby lay out, Box office, Toilet rooms, Ticket Sales Areas,Rest rooms, Managers office, , Exit requirements, Shop spaces etc	L1, L2	5
Module 4: Visualization of Scenic Design Visual Creation: Principles of layout for creating effective visual signage and explore the unique problems, technique, theory, and approachesof signage in film, theatre & other forms of mediated exhibition; Introduction to the design applications for building signage; VisualPresentation: Setting the Mood Sketches & Renderings,	L1, L2	10

Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation

IND2614	PUBLIC ART	L	T	S	P	C
Version	Date of Approval:	2	0	2	0	3
Pre- requisites/ Exposure						
Co-requisites						

Catalog Description

On the successful completion of the course student will be able to understand the concept of public art. To inspire different locations, to enhance the design and function of the public realm,to enhance the appearance, Character and value of buildings. To support professional art practice, to provide a level of guidance to artwork design.

Course Objectives

- This course approaches public art as an important part of an ongoing dialogue about cultural values, commerce, politics, and public life.
- This course aims to enhance the designing and artistic abilities towards Public Art either Indoor or outdoor.

Course Outcomes

On completion of this course, the students will be able to

CO1: Introduction to Public Art
CO2: Public Art Strategy & Principles
CO3: Developing a Concept for Public Art
CO4: Case Study: Public Art in India.

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Introduction to Public Art The Concept Of Public Art: Definition, The Social Dimension, Types of Public Art, Stand Alone, Applied, Integrated, Industrial, Heritage/ Memorial, Interactive, Multimedia Temporary, Ephemeral, Indigenous Art, Community Art; The Role and Benefits of Public Art; Purpose of Public Art: Functional, Decorative, Iconic Integrated, Site specific,Interpretive, Commemorative, Temporary; Locations & Sites For Public Art. Evolution of Public Art: Renaissance Public Art (c.1400-1600), Baroque Public Art (c.1600-1700), Public Art 1700-1900, Public Art During the 20th Century: Socialist Realism, Degenerate Art, Fresco painting, Land Art, Skyscraper Architecture, Graffiti, Contemporary Public Art, Environmental public art.	L1, L2	8
Module 2: Public Art Strategy & Principles Strategy Objectives: To inspire different locations, To enhance the Design and function of the public realm, To enhance the appearance, Character and value of buildings, To support professional art practice , To provide a level of guidance to artwork design, To provide direction on the appropriateness, To guide the acquisition and location for artworks, Principle Objectives: Place Making, Site Specific, Scale, Universal Access,	L1, L2	5

`

Attractors, Interaction, Management; Key Values of Public Art: Social, Environmental, Economic and Aesthetic vales; Public Art Project Types: Artist Made Building Parts, Integrated Artworks, Design Teams.		
Module 3: Developing a Concept for Public Art Concept Development: Research-Developing a Theme, Public Art Stakeholders; Conceptual Design Report: Artist Statement, Vision, Description of concept & artwork, Alignment of concept, Project goals, Location of proposed artwork, Placement plan, Suitability, Design benefits includes safety, structural integrity and accessibilityDimensions including an explanation of suitability of scale, Types & form of materials, Durability and performance, Anticipated maintenance, Life-cycle cost. Proposed fabrication, Timelines, Budget, Implementation schedule; Visual Presentation of Concept: Renderings, Boards, Computer generated 3D visualization, Marquette and models.	L1, L2	5
Module 4: Case Study: Public Art in India Make a list of famous public arts in India. Collect the images and brief of each one of them. Choose any appropriate three examples. Analyze its design and study what type of contribution that given in the terms of Social, Environmental, Economic and Aesthetic.	L1, L2	10

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2615	PUBLIC SPACE DESIGN	L	T	S	P	C
Version 1.1	Date of Approval:	3	0	0	0	3
Pre- requisites/ Exposure						
Co-requisites						

Catalog Description

On the successful completion of the course students will be able to analyze interior spaces with respect to their function and provide design consultancy for entertainment and educational interior spaces.

Course Objectives

This course aims to impart knowledge to students on Study of interior design withreference to the context of the building typology and its environs.

Course Outcomes

On completion of this course, the students will be able to

CO1: Entertainment Spaces
CO2: Educational Spaces
CO3: Sporting Spaces
CO4: Commercial Spaces

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Entertainment Spaces Study of interiors for entertainment buildings such as clubs, multiplexAnd Amusement parks schemes for video games parlor, food court areas and exclusive indoor game areas of clubs	L1,L2	5
Module 2: Educational Spaces Study of interiors for class rooms, seminar halls and AV halls schemesfor library, smart class rooms and discussion areas	L1,L2	10
Module 3: Sporting Spaces Study of interior requirements foe gymnasium, indoor stadium andAquatic complex schemes for interiors of stadium with focus on Lighting requirements and visibility	L1,L2	5
Module 4: Commercial Spaces Study of interiors in saloons, pubs, discotheque and banks, etc. -schemes for the same	L1,L2	10

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2616	INTERIOR DESIGN STUDIO – VI	L	T	S	P	C
Version	Date of Approval:	1	1	4	0	6
Pre-requisites/ Exposure	Design – V					
Co-requisites	Building Materials & Construction Technology - V					

Catalog Description
The aim of this course is to make students familiar with the Building Services such as Lighting, Electrical, Water Supply, Acoustics etc in the designed interiors scheme. Design-problem may focus but not limited to a multi-functional, service (advanced services) oriented buildings.

Design Exercise: – Retail Space Design for different type of merchandise (Electronics, Garments, Cosmetics, Groceries, Jewelries , Shoes, Automobiles etc.) and Retail type – Departmental, Single Brand franchises, Speciality stores, Off-price retailers, Catalogue showroom

Course Objectives
The objectives of this course are:
- To inculcate the importance of services in spatial planning
- To highlight on the importance of function intensive planning layouts.
- To explore computer aided presentation techniques involving 2D and 3D drawings, walk through and models as required.

Course Outcomes
On completion of this course, the students will be able to
CO1: Design a Project involving multiple space utilization like a multi-functional, service (advanced services) oriented building.
CO2: Build with precision block models, study models, site models.
CO3: Demonstrates interior services in the plans and sections.
CO4: Communicate through drawings or models.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction Design problem may be introduced, students may visit site for collecting context specific data for getting better understanding of real-life project details. The collected data may be analysed and presented for evaluation.	L1, L2,	10
MODULE 2: Development of Concept Flow diagram to explore relation of various spaces, bubble diagram for locating various zones on site, re-create for analysing spaces in all dimensions through block models and single line graphics and study models for choosing the right option.	L!, L2	10
MODULE 3: Design Development Integrate the knowledge gained from previous theory based subjects like Building services, Building materials and Construction Technology, Structure, etc., and apply to detail out their design proposal.	L1,L2,L3	20
MODULE 4: Final Design Proposal The final design proposal is prepared after conducting various informal and formal reviews at individual and at group level. The drawing and detail physical model	L1,L2,L3	20

`

explaining the approach and consideration of urban setting to achieve the requirements with various other restrictions may be submittals.		

***Bloom's Level:** L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2617	INTERIOR LANDSCAPE DESIGN	L	T	S	P	C
Version	Date of Approval:	1	0	2	0	2
Pre-requisites/ Exposure	Design-V					
Co-requisites	Design-VI					

Catalog Description

The aim of this course is to make the students understand the role of landscape architecture in the creation of better environments. This course shall have a direct application in the design studio of the same semester as well as in the Thesis. The course covers basic introduction to landscape architecture, landscape graphics, planting design. This course will help students to understand the concepts of landscape architecture and to study and analyze site in relation to landscape design and be able to design and detail various architectural and planning landscape projects.

Course Objectives

The objective of this course is

- To understand various types of Landscape and the role of natural and manmade landscape for Land Development.
- To provide different methods for site planning at regional and micro level.
- To understand landscape design as an allied field of architecture and planning.
- To understand process of landscape design for small and large areas.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explain the role and scope of Landscape architect.
CO2: Identify the development processes and cycles in the urban landscapes.
CO3: Conduct a landscape analysis and evaluate it with required functions.
CO4: Develop a site plan with landscape design and relate with environment and ecology.

Course Content:

Modules	Blooms level*	Number of hours
MODULE 1: Elements and History of Landscape Study of Landscape elements such as land, vegetation, water, earth & climate, Natural & manmade elements, etc. Principles of landscape design such as unity, simplicity, variety, balance, proportion, sequence, etc. Social and economic factors. Psychological considerations of spaces and enclosures. History of Landscape Architecture including natural & cultural factors of the place, development of landscape architecture through history in different parts of the world such as China, Japan, Europe, Italy, France, England, Persia, Egypt, Greece, Rome. Study of landscape architecture in Medieval period in India such as Mughal. Modern & Contemporary Landscape architecture. Cultural aspects of the landscape architecture with contextual understanding.	L1, L2	9
MODULE 2: Hardscapes - pergolas, garden furniture, fences, rocks, masonry, paving & surfacing, roads & parking lots, walks & plazas; Softscapes such as plantation, turfing, water features. Design criteria for landscape design such as visual, functional, micro-climatic, ecological and aesthetic. Basic horticultural idea about plants, plant selection, planting design and care of plants; Urban Landscape - Characteristics and components of open space patterns in towns and cities (traditional and contemporary)	L4, L5, L6	9

`

basic types: streets, squares, plazas, gardens, ghats and maidans, public parks at district, local and neighbourhood levels; park systems; landscape design related to land-use, circulation networks and activity; street furniture as a component of urban landscape.		
MODULE 3: Landscape Design and Services Macro and micro-climatic considerations in landscape architecture. Effect of climate on landscape and various components of landscape on the microclimate. Landscape Services & Sustainability: Introduction; Outdoors lighting, surface water drainage, irrigation, soil management techniques.	L1, L2	9
MODULE 4: Landscape Aspects of Site Planning Principles of understanding and evaluating and existing landscape; development as a response to constraints and opportunities offered by the site; the landscape concept and open space structure as a basic component of the site plan; The role of vegetation: environmental benefits, functional requirements, aesthetic considerations; typical situations and criteria for design with plants and selection of species; grading; in relation to existing contours, plinth levels, road alignment and storm water drainage; principles of cut and fill..	L4, L5, L6	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

IND2618	INTERIOR DESIGN PORTFOLIO DEVELOPMENT	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	2	0	2
Pre-requisites/ Exposure	Design V					
Co-requisites	Design VI					

Course description:
The Design Portfolio is not simply a collection of your work. Rather, it is a personal statement of creative ability and design thinking. The portfolio is a self-presentation tool that creatively communicates the students' design outlook and level of development through a variety of media and skill sets. The portfolio should include a selection of design works and at least one example of the development of design work in the area of interior design. The portfolio submits for consideration must clearly indicate students' potential for graduate study to the reviewers. Computer access is strongly recommended for this course, especially to visualization part.

Course Objective:
- The portfolio submission is a mandatory component of the graduation process for the B. Des (ID) program.
- This course is intensive visualization skill-based course that requires a lot of time and commitment.
- This course aims to develop the student's ability to communicate their ideas, thoughts and feelings about the field of interior design in a visual form.

Course Outcome:
CO1: To make the students understand portfolios and aesthetics of portfolios.
CO2: Identify the development process of a portfolio.
CO3: Render the portfolios made.
CO4: Send the portfolios to various offices for internships and jobs.

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Portfolio Preparation Things to consider: 1.Composition - Placement or arrangement of elements in a work 2. Drawing - Demonstration of line weights, mark-making, proportion and medium 3. Design - Overall unity achieved by combining elements of art and principles of design. 4. Value - Relative darkness or lightness of a color 5. Spatial perception - Understanding of the spatial relationships of objects, and foreground, middle and background 6. Technique - Skillfulness in the use of fundamental methods and media 7. Color perception - General sensitivity to color and sophistication in its application 8. Originality - Capacity to think independently and transform the predictable; the quality of being new and original 9. Conceptual awareness - Expression of a clear idea, effective use of materials & processes to strengthen the concept 10. Aesthetic awareness - Guiding principle in matters of artistic beauty and taste.	L1, L2	
Module 2: Portfolio Organization:	L4, L5,	

`

Portfolio Title Page This is the starting page of an interior design portfolio contains a brief profile of the student that includes: Name & Photograph; Registration Number; Program Name, Institution Name; Contact Address; Date of Submission; Declaration of ownership, etc. 2. Table of Contents 3. Bonafide Certificate cum Portfolio Evaluation (From Faculty Guide & Internal and External Examiner) 4. Portfolio Work Contents All the works included in the portfolio should be with the prior approval from the concerned faculty only. The organization of portfolio work can be segmented into 3 Parts. Part-1 : Project (Standalone projects - that is presented from concept to completion) This is the first part, which is integrated to dissertation project. The students have to convert the research findings into various Interior design ideas and concepts as part of the application process. These design ideas and concepts need to visually narrate and demonstrates as student's creative work and process in the form of a portfolio. This part must include: - Highlight of research: Title, Scope and significance of study, Objective of study, Findings within one page. - Design work Boards: Statement of design work (Design Brief), Mood board and Story board, Architectural Floor Plan, Finish Schedule and Color Legend, Finish Floor Plan, Elevations, Sections, and Details, Miscellaneous Drawings, Furniture Floor Plan, Installation Plans, Furnishings Specifications, Furnishings Cost Estimates, Furnishings Order Form, Specification sheets, Cost sheets etc.	L6	
Module 3: **Part-2 : Graphics (Projects builds on another**) The second part is mainly for to highlight what the students learned from the overall graduation studies. The students have to cover the major subject modules from the past semesters and visualize. It is not necessary to rework the entire modules. They can include the best works from their past assignment collections. But it is compulsory to consider each major area what they learned. Those who are lacking the sufficient collection of work, they may need to reproduce. The collection has to be presented as follows: • Design Skills: The design specialties most desirable to show as the following order of preferences: Office/Corporate; Residential/kitchen & Bath; Hospitality Restaurant; Health care; Commercial Spaces and Interior design specializations. All technical design skills that can be applied in a variety of building environments as above include: - Freehand drawing of an interior space to include an architectural element (2D) - Freehand drawing of an interior space to include an architectural element (3D) - Freehand drawing of a collection of items / furniture. (2D) - Freehand drawing of a collection of items / furniture. (3D) - Design work including pieces that student designed at class or on your own. - Interior visualizations by computer generated- 3D S Max, Sketch up, etc. - Photographs of 3D Objects, Models, Prototypes etc. that student designed and created. - Architectural drafting by hand. - Architectural drafting by computer generated- Auto CAD. - Any other work student feels may support their application to interior design includes their specializations. • Art Skills All art skills that can be applied in a variety of medias include: - Freehand drawings. - Artwork demonstrating use of colour by rendering with different colour media. - 2D and 3D Drawings, Sketches, Posters, Graphics, Mural etc. (Manual) - 2D and 3D Drawings, Sketches, Posters, Graphics, Mural etc. (Computer generated) - Posters that explaining Typography and Calligraphy skills. - Mood boards or Theme boards, Story boards that explaining Collage and Photomontage skills. - Theme based Digital Photographs that explaining Photographic skill - Photographs of Craft work that explaining Craft skill.	L1, L2	
Module 4: Written Content The third part is to demonstrate students writing style and quality. The good hand written essay will be encouraged and gives the chance of more weightage. A 250 – 500 word essay discussing student's perspective of the Interior Design industry and why they are interested in Interior Design is essential. IV. Portfolio Evaluation: Strong presentation shows work in its best light and indicates students' ability to communicate	L4, L5, L6	

`

in an effective manner. The following criteria use to assess portfolio: - Problem Solving & Creative Skills - Drawing & Visual Skills - Digital Literacy & Computer Skills - Communication Skills - Development of ideas - evidence of how you think - An interest in contemporary interior design and the built environment. - Experimental approach in your 3D work to handling materials in unusual combinations. - Spatial awareness and an ability to think about interior design built environment. Procedure for evaluation: - Submission of priory approved portfolio hard copy. - Make a presentation of their portfolio work (soft copy) in front of the examiners. - Viva-voce - The Portfolios will be reviewed by a jury consisting of external and internal examiner to be appointed by the Department / University. - The jury will evaluate the soft copy presentation as well as a hard copy of portfolio

IND2619	BUILDING SERVICES – IV	L	T	S	P	C
Version 1.1	Date of Approval:	2	0	0	0	2
Pre- requisites/ Exposure	Materials And Construction Technology –IV, Building Services-II					
Co-requisites	Design – V					

Catalog Description

The aim of this course is to give architect an overview and introduction to escalators, lifts, mechanized parking. This course also covers about security surveillance systems of building using cameras. The course covers Elevators, lift, escalators, mechanized parking system, Mechanical ventilation system and security surveillance model.

Course Objectives

The objective of this course is

- To discuss the working of escalators and lifts including location and criteria for their design.
- To develop an understanding of the advanced building services and their application in the designproposals of buildings of slight complex nature such as multistoried.
- To understand the principles and techniques related to mechanized parking and mechanized ventilation.

Course Outcomes

On completion of this course, the students will be able to

CO1: Comprehend the various modes of vertical circulation through live examples.
CO2: Develop understanding for techniques and systems for Security and surveillance.
CO3: Apply principles of mechanized parking.
CO4: Discuss the importance of ventilation systems in buildings.

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Lifts and Escalators Basic Principles of Elevators working, definitions, NBC‟s recommendations, location and service, Method of working, various shapes and sizes available, sketches – plans, sections, elevations of different types of lifts including construction and installation details. Basic Principles of Escalator working, definitions, NBC‟s recommendations, location and service, Method of working, various shapes and sizes available, sketches – plans, sections, elevations of different types of escalators including construction and installation details.	L1, L2,L3, L4	8
Module 2: Security and Surveillance Perimeter Protection - Barriers, Doors, Gates, Turnstiles and Fences. Intrusion Detection Sensors and Systems - Outdoor & Indoor. Introduction to Access	L1, L2,L3, L4	8
Module 3: Mechanical Ventilation Standard requirements of ventilation for different conditions of living and works. Conditions for comfort. Control of quality, quantity, temperature and humidity of air	L1, L2, L3, L4	4
Module 4: Comfort Conditions for comfort. Control of quality, quantity, temperature and humidity	L1, L2, L3, L4	4

Syllabus – Seventh Semester

IND2737	INTERIOR THESIS PROJECT	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	0	0	15
Pre-requisites/ Exposure	Design – VI					
Co-requisites	Building Materials & Construction Technology - V					

Catalog Description

The aim of this course is to provide an opportunity to the students to handle a complete design project. Project Thesis is the final stage of learning Interior Design. With the help of a thesis project, students are expected to demonstrate the understanding of a systematic design process which includes identification of project requirements, site study and analysis, case studies, programming, schematic design and Design Development.

Course Objectives:

The objective of this course is

- To prepare a student to independently handle and present all aspects of an interior design, from its evolution to final solution in totality.
- To understand the importance of the evolutionary stages of a design process and various techniques required for a successful presentation of an interior design.
- To develop in students the ability to handle specific aspects / thrust area of design relevant to the topic.

Course Outcomes

On completion of this course, the students will be able to

CO1: Design a Thesis project responsive to the contextual and program requirements.

CO2: Evaluate data and information gathered from primary and secondary data collection

CO3: Combine the systematic methodology from various stages of study and analysis in design process towards culmination of an informed design.

CO4: Demonstrate the ideas clearly using detailed physical model.

IND2702	DESIGN RESEARCH METHODS AND PRESENTATION TECHNIQUES	L	T	S	P	C
Version	Date of Approval:	2	1	0	0	3
Pre-requisites/ Exposure	Knowledge of Design and construction					
Co-requisites						

Catalog Description

On the successful completion of the course students will be able to distinguish between various types of research, come up with an in-depth investigation into any chosen area of interest, design research methodology as per the requirement of the project, apply the knowledge of design research to write an original document in the form of report, thesis etc., analyze data and inferences to establish underlying principles and apply the knowledge of referencing for any original document.

Course Objectives

The objective of this course is to:

- Develop and initiate research thinking and dissertation work.
- Impart knowledge about the collection of data, its analysis and interpretation in research.
- Introduce adequate architectural design research methods for the realization of dissertation concept.
- Develop knowledge about the various phases of design and research presentation techniques.

Course Outcomes

On completion of this course, the students will be able to:

CO1: Distinguish between various types of research.
CO2: Come up with an in-depth investigation into any chosen area of interest.
CO3: Design research methodology as per the requirement of the project.
CO4: Apply the knowledge of design research to write an original document in the form of report, thesis etc.

Course Content:

Modules	Blooms level*	Numb er of hours
Module 1: Research & Research Design Introduction, Definition, Need, Aims, Importance, Scope, Classifications, Types, Characteristics, and Research Process. Meaning, Need, Types, Factors Affecting, Basic Purpose, and Principles	L1, L2, L4	3
Module 2: Data Collection, Analysis and Interpretation Meaning, Need, Main Terminologies Used In Data Collection Population, Sample, Parameter, Variables, Etc., Types Of Data, Methods, Sources Of Various Types ofData, Methods Of Data Collection: Observation Method, Interview Method, Data Collection Through Questionnaires, Collection Of Data Through Schedules, Case Study. Meaning, Need, Classification; *Only define and understand the Meani ng of:* Tabulation, Array, Range, Frequency Distribution, Presentation of Data Graphic, Histogram, Polygon, Ogive, Measurement of central tendency- Mean, Mode, Median, Dispersion / Skewness, Correlation and Regression Analysis of	L1, L2, L4	3

`

two variables, Characteristics, Types, Values of , Formulae for calculation etc. Report Significance, Steps, Types, Findings, Suggestions, Conclusion. Writing.		
Module 3: Research Procedures Recognize philosophical implications; Formalize research: Identifying and defining the problem Questions need to be documented in relation to such issues in interior design as: time, cost, safety, materials, processes, function, appearance, and ergo nomics, etc.; Conduct literature reviews; Select appropriate research methodology; Understanding of research design parameters; Procedures to collect, analyze, interpret the data; Present information through a report.	L1, L2, L4	5
Module 3: Design Phases Research and produce Design Specifications; Sketch ideas and concepts; Develop detailed design; Produce a digital design presentation file for the final design; Make an oral presentation on their design.	L1, L2, L3, L4, L6	5
Module 4: Research Presentation Techniques: Interrelated Components Research Report Presentation: Dissertation components, Writing styles appropriate to research design, style manuals and ethical considerations. Design Presentation: Design Journal, Digital Design Presentation. Oral Presentation	L1, L2, L3, L4, L6	5

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

IND2703	PROFESSIONAL PRACTICE	L	T	S	P	C
Version	Date of Approval:	2	0	0	0	2
Pre-requisites/ Exposure	NA					
Co-requisites						

Catalog Description

This course objective to provide the foundation, knowledge and skills needed to professional practice. It is designed to build understanding of the complex interactions and uncertainties of professional practice. It provides students with the essential knowledge components of role of COA, IIA, and Uttar Pradesh architect association, Architects Act 1972, Tendering & Contract and Valuation. It also develops an appreciation of the skills and tasks inherent in development Conditions of engagement of Interior Designer – Duties, Responsibilities, Liabilities of the profession, scale of charges, mode of payment etc. Clauses governing conduct of professional practice.

Course Objectives

The objective of this course are

- To acquaint the students with the responsibility, scale of charges and Architect's conduct in Architectural practice.
- To understand the office and administration of an Architect's office, Tenders and contracts.

Course Outcomes

On completion of this course, the students will be able to

CO1: Gain a comprehensive understanding of the Professional Practice in India.

CO2: Describe the phases of professional practice, the roles of professional conduct, all the work related to scales of charges.

CO3: Identify and define the legal provisions with respect to tenders and contract.

CO4: Generalize the entrepreneurship issues commonly faced by architectural firms in Indian Construction Industry.

`

Course Content:

Modules	Blooms level*	Number of hours
Module 1: Role of Professional Bodies- Familiarization with different Professional Bodies directly and in-directly related to architectureprofession such as The Indian Institute of Interior Designers (IIID), The Indian Institute of Architects (IIA), The Council of Architecture (COA),etc. IIIDElections, Functions and formation of the IIID Council, importance, professional and trade practices and ethics.	L1, L2	6
Module 2: Code of Professional Conduct and scale of professional charges As laid down by the COA and modified from time to time. Procedures to be followed by an architect for the safe running of the Practice. Awareness about Interior Design Competitions andthe Procedure lay down by the IIID. Do's and Don'ts for Interior Competitions.	L1, L2, L3	6
Module 3: Tendering & Contract for Interior Design of Buildings Types, details of a tender document, procedure to be followed for calling tenders, tender analysis, election of the contractor and award of the work. Important terms such as EMD,Security Deposit, Defect Liability, Insurance etc. Types of the Contracts, legality of the Contract, important clauses of the Contract, role of theowner, architect and the contractor in fulfilment of the contract.	L1, L3,L4	6
Module 4: Interiors Office & Office Management Size of the office, location, infrastructure requirement, staff requirement etc. Procurement of theworks. Important activities in a professional office. Role & duties of Interior designer as an employer or employee. Introduction to Record Management, Principles of Record Keeping & Filing, Different types of filing systems, indexing, Safety and Security	L1, L3,L4	6

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

Syllabus – Eighth Semester

IND2837	PROFESSIONAL TRAINING	L	T	S	P	C
Version 1.1	Date of Approval:	0	0	0	0	16
Pre- requisites/ Exposure	NA					
Co-requisites	NA					

Catalog Description

This is an industrial training session, which provides the opportunity to learn and workwithin a professional environment with practicing interior designers. The basic objective of training is to provide firsthand practical exposure of the professional functioning of Interior Design industry and to acquaint students with the culture of corporate.

Course Objective

- The training will also provide an opportunity to the students to apply their theoretical understanding while working on the concerned project in the industry. Thus, this training is an attempt to bridge the gap between theory and practice.
- This will also enhance the students‟ intellectual ability and attributes related to data handling, decision making, report writing, oral presentation and imbibing an interdisciplinary approach. Students can be undertaken their practical training in India or abroad.

Course Outcome:

On completion of this course, the students will be able to work on:

- **CO1:** General Office Procedures: Written and verbal communication, preparing purchaseand work orders, addenda/bulletin preparation.
- **CO2:** Materials Library: Filing catalogs and samples, updating pricing lists, locating product/service resources, interacting with vendors and reps.
- **CO3:** Programming: Research, site measurements, code review.
- **CO4:** Design Development: furniture/finish specs, space planning.

`

Course Content:

Modules	Blooms level*	Number of hours
Session I: Training Every student of the undergraduate courses will be required to undergo apractical training in a interior design organization approved by the Institute for Minimum of „90 calendar days" The candidates shall be required to undergo training in the various areas of the organization concerned. The organization may assign a specific project to the candidate, which will be completed by him / her during the period of training. The work done by the candidate during the training period shall be submitted in the form of a report as per the guidelines provided by the Department. **Attitude:** A member of the faculty will supervise the candidates during the traialong with a supervisor from the industry. Students need to aware of work environment and constantly look foopportunities to learn more about interior design. An internship is a privilege the firm is not receiving payment for thes they spend to train the student. It is student responsibility to provide value to them (not necessarily tother way around). Students need to take responsibility for making training as informatias can. Students need to document what they observed, ask lots of questionand show initiative. Training and work should be creative, exciting, noteworthy anddetailed. **Progress Report:** Students have to compulsorily submit a summary report of their progressin every two week undersigned by the industrial supervisor. **Attendance:** Minimum of "90 calendar days"of training is compulsory for students"full time trainee". Daily attendance is compulsory and to be marked and duly checked and signed by the industrial and faculty supervisor. Those who are failure to complete the training with minimum of 90 d will not be considered for final examination **The student will be required to repeat the training when:** The report from the employer is not satisfactory. The attendance in the employer office is less than 70% of the numbdays required for training.	L1,L3L4	NTCC
Module II: Training Report Evaluation and Presentation	L1,L3 L4	NTCC

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4: Analysis; L5: Synthesis, L6: Evaluation*

Modes of Evaluation: Quiz/Assignment/ Seminar/Written Examination Evaluation Method for Training Report

Chapter Scheme for the training report		Marks Distribution
Overall Report Format/Layout		05 Marks
Chapter I	Introduction/ Learning Outcome	20 Marks
Chapter II	Detail of Working Experience	30 Marks
Chapter III	Conclusion and Recommendations	15 Marks
Total		70 Marks

Report Format

The report has to be written in font Times New Roman, 12 points, 1.5 lines spacing, Print / Type on both sides of the paper, Spiral Bound. The report should comprise of a maximum of 70 pages and has to be submitted in two copies.

Evaluation and Presentation

- Submission of training report
- Brief oral presentation with power point about training.
- Evaluation by a jury consisting of external and an internal examiner to be appointed by the Department/university.
- Failure to submit the Training Report or failure to appear at the Presentation/Viva-Voce
- Examination will be treated as "Absent" in the Final Examination.

	PLANNING TECHNIQUES AND COMPUTER APPLICATIONS (PLN4103)	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Techniques of Planning I & II (B.Plan.)					
Co-requisites	Computer Aided Design (CAD) in Planning(B.Plan.)					

Catalog Description

The aim of this course is to introduce and be familiar with techniques used for planning at various stages from preliminary to advanced. Students will learn appropriate data mining for their studio exercises, pre-preparation for planning field visits and selecting analysis techniques. Appropriate Software applications in CAD and GIS are also part of the course. They will be able to apply excel, CAD and GIS in their planning studio. At the end of the course student should be able to use all the learnt techniques in respective planning studio works.

Course Objectives

The objective of this course is

- To prepare students for planning studio exercise by providing them significant base of planning techniques.
- To equip students with key skill set for conducting filed visits, data collection and analysis.

Course Outcomes

On completion of this course, the students will be able to

CO1: Explore and use various planning information systems available.
CO2: Prepare base maps on scales for their studio exercise and to do effective pre-field visit planning.
CO3: Apply excel and CAD techniques in planning studios.
CO4: Perform basic analysis and map preparations in GIS.

Modules	Blooms level*	Number of hours
MODULE 1: Information Systems for Planning and Literature Review Introduction to Basic Terminologies used in Planning; Definition and components of Information System in Planning; Data warehousing and Data mining for Planning; various data sources like, National Urban Information System – Bhuvan, Natural Resource Data Management System, National Sample Survey (NSSO), Directorate of Economics and Statistics, Census of India, National Family Health Survey (NRHS), Central Pollution Control Boards reports, Indian Metrology Department, World Bank Open Data; Introduction and utilisation of spatial standards-URDPFI; Components and Techniques of literature review; Finding useful insights from the literature review; Exercises on inscribing and presenting reviewed literature	L1, L2 L3	9

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Base map Preparation, Scales, and Survey Techniques Base map Preparation: Representation of Spatial Data; Choice of Appropriate Scales: Graphical, Linear and Areal Scales; Contents of Base Maps at Various Scales; Maps as a representation of reality, Elements of Maps; Choice of appropriate scales for region and settlement level plans, town development plans, zonal development plans, layout plans, Setting of Goals and Objectives; Methodologies for Preparation of Urban and Regional Development Plans, Data requirements for urban and regional planning; Sources of data; methods of data collection, Validity and reliability of data, Questionnaire design, measurement scales and their applications, sampling techniques, types of surveys; Techniques of conducting surveys for land use; Techniques for conducting regional surveys. Plan Implementation Techniques; Selecting appropriate Indicators; Preparation of Checklist for data collection; Preparation of good Questionnaire; Data coding and methods for data analysis.	L1, L2 L3	9
MODULE 3: Computer Applications in Planning Computer Applications for Data Collection and Analysis: Tools of Analysing Different Types of Data; Use of Excel Software for Analysing Data;Tabulation of data, graphical presentation of data; Preparing pie diagrams, histograms, bar charts, normal, colour, black and white presentation techniques; Basic discipline of presenting illustrations; Presentation of spatial data, analysis and proposals. Applications of Features of Excel- Basic and Selected Advanced Features; CAD Applications for Base Map preparation: Applications of CAD tools- drawing, editing, modifying, layer management etc.; Scaling Drawings and Images; Plotting and Printing technicalities.	L1, L2 L3	9
MODULE 4: Introduction to Geoinformatics Image Interpretation – Qualitative and Quantitative Elements; Resolutions – Spatial, Temporal, Spectral, Radiometric; Geo-Rectification – Coordinate System, Selection of Ground Control Points (GCPs), Geo-Referencing and Map Projections; Geometric Distortions, Spatial Data Presentation Techniques: Layout Preparation – Grids, Legend, Symbology; Printing – Sheet, Size, Scale.	L1, L2 L3	9

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

	INFRASTRUCTURE PLANNING AND MANAGEMENT (PLN4104)	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Infrastructure Planning, Development and Management (B.Plan)					
Co-requisites	-					

Catalog Description

The course would include three sub-components of infrastructure and utility Planning i.e. Physical Infrastructure, Social Infrastructure and Transportation. The aim of this course is on principles of design of utilities and services in urban and regional context and familiarising with Indian standards. The course will focus on acquainting students to assess infrastructure planning techniques and their utilisation in planning studios. The objective of Transportation Planning module is to provide basic information on transportation issues. Students will be familiarized with (i) geometric design of road networks and (ii) traffic characteristics. Techniques of data collection and analysis would be taught as part of this course.

Course Objectives

The objective of this course is

- To familiar with infrastructure and its sub-sector Planning.
- To utilize the knowledge in physical planning studios.

Course Outcomes

On completion of this course, the students will be able to

CO1: Comprehend concept of infrastructure planning and its relevance in physical planning.
CO2: Identify and project the demand and spatial need of physical infrastructure
CO3: Assess the need for social infrastructure for sustainable and inclusive planning.
CO4: Review prevalent policies, projects and missions pertaining to various infrastructure services.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Infrastructure Planning Importance of Infrastructure, objectives of the utilities, services planning and implications on public health and environment; Economic-introduction to policies and programmes in infrastructure planning; issues and concerns of maintaining the utilities and services, need and importance of service level benchmarks of water supply, sanitation, sewage, solid waste and transportation; Impact of technology on infrastructure, Green infrastructure and its significance. Manesar Gurgaon-122413

MODULE 2: Physical Infrastructure Role of physical planner in planning of utilities and services; water supply distribution system-Water supply systems, networks, mapping, sources and water requirement for various land uses; Factors affecting water demand; Storage facilities and distribution systems; Innovative Methods and successful urban water supply system practices; Water programmes and policies; Storm water drainage system- Strom water drainage networks, and network mapping; Estimations of sewer generation and network requirements; sewerage system- General considerations and principle of sanitation and sewerage systems; Sewage disposal and treatment methods; Open defecation; Innovative approaches of sewage disposal in urban areas and low cost appropriate technologies for sanitation; solid waste management- Classification and Characteristics of Solid Wastes; Methods for waste Collection, Storage, transportation and disposal; Processing and Treatment of Solid Wastes; Land Filling methods of Solid Waste Management; electricity distribution system.	L1, L2 L3	9
MODULE 3: Social Infrastructure Types of social infrastructure; Health care-essential service, availability, access and utilisation, Planning norms and space standards, public and private institutions, policies, national Rural Healthcare Mission, Hierarchy of health care establishments, educational institutions, standards, policies, rights to education (RTE); Public and community spaces-recreational, safety and security – fire management. Amenities for urban and rural settlements; Significance of education and health infrastructure in planning; Locating education and health facilities; Understanding scalogram and other techniques	L1, L2 L3	9
MODULE 4: **Policies, Programmes and Projects** Understanding prevalent policies, projects and missions, for example, JnNURM, AMRUT, HRIDAY, Smart Cities Mission, etc.; Norms and standards for different types of infrastructure; Nature and content of infrastructure in development plans at different geographical levels; Making assessment of infrastructure requirements in plans.	L1, L2 L3	9

**Bloom's Level: L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation*

	HOUSING AND ENVIRONMENTAL PLANNING (PLN4105)	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Housing and Community Planning (B.Plan.)					
Co-requisites	Ecology, Environment and Resource Development and Management (B.Plan.)					

Catalog Description

The aim of this course to two-fold, i) Housing ii) Environment.

Housing: First segment is to impart knowledge and skills to create an efficient housing/neighborhood planning which gives equal access to housing for everyone. At the end of the course students will be able to identifies the gaps, problems in providing housing for all. They will be able to focus on various dimensions of housing sector and create efficient and sustainable residential structures and neighborhood designs.

Environment: Second Segment deals with environment and its planning which aims to initiate the students to a discreet understanding of the environment and its interactions with human settlements. All social, cultural and technological activities being carried by human beings have profound influence on the environment. This course will enable a thorough understanding and utilization of all these aspects.

Course Objectives

The objective of this course is

- To provide a basic understanding of Housing at the Neighborhood and City level and to create an ability to work on the Housing Sector in Town Planning System.
- To grasp the role of public and private sector as well as community participation in eco-tourism planning and development

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply varied housing concepts in neighbourhood and urban planning.

CO2: Analyse policy and governance framework with reference to housing sector.

CO3: Justify the relevance of ecology, ecosystem and environment in planning.

CO4:Utilise acquired knowledge to conceptualise and to create sustainable planning designs.

Modules	**Blooms level***	**Number of hours**

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 1: Concept of Housing with reference to Planning Significance of housing in economic and social development; Basic Terms in housing, Housing development process; Current Issues in Housing in urban and rural India: Public Health and Safety Related Issues in Housing, houselessness in India, old housing,Shift of Housing from Social Sector to Private Sector Participation Housing Design - Housing Typology, Housing Layouts, Housing Density, Community Facilities, Public and Private Sector Housing Development, Social Aspects of Housing, Built Environment and Human Behaviour, Housing Norms and Standards Housing for the Poor-Issues in Slums and Squatter Settlements; Government Initiatives for Providing Housing, Housing Demand- Housing Need Assessment, Estimating and Forecasting Housing Requirements (Qualitatively and Quantitatively); Understanding Current Methods of Housing Demand Assessment,	L1, L2 L3	9
MODULE 2: Housing Policies and Institutional Framework Understanding Five Year Plans with respect to Housing Policy, National Housing Policy- Review, Policy Framework for Urban and Rural Housing, Comparative Policy Analysis; Rental Housing in India: An Overview, Household Affordability and Concept and performance of Affordable Housing in India, Affordable Housing Policy 2009, Affordable Housing in Public Private Participation, Emerging thoughts. Case Studies of Neighbourhood Planning in Indian and Global Context.Current Practices and Upcoming Initiatives; Role of Informal Sector in Housing Stock, Economy, Commercial Activities, Etc.; Implications in Physical Planning, Informal Sector Housing and Basic Needs - Lack of Essential Infrastructure; Poor Condition of Existing Services; Identification of Basic Needs; Provision for Various Target Groups; Standards for Basic Needs; Investment for Housing; Essential Components; Ownership and Tenure Security; Service Delivery - Gaps in Existing Institutional Systems of Delivery; Sustainable Development Goals with reference to Housing for All.	L1, L2 L3	9
MODULE 3: Environmental Components and Resources Environmental resources and ecosystem services; Fundamentals of Ecosystem-Its Structure and Function; Consumption, conservation and recycling of resources; Man, and Environment interrelations; Changing Perspectives in Man-Environment Relationship with Focus on Issues of Population, Urbanization, Resource Depletion and Pollution; Concept of Ecology; Urban ecosystem approach, evolution and significance; Introduction to quantitative ecology, Identification of ecological parameters for planning at different levels, Site planning, Settlement planning, Regional planning. Data needs, formats for data collection Types of analysis required to evolve ecological parameters; Environmental impact assessment, Methods and their appraisal. preparation and analysis of resource inventories and resource matrices;Environmental Degradation (Environmental Concerns and Challenges) and Its Impact on Various Ecosystems.	L1, L2 L3	9

	PLANNING STUDIO-I (AREA PLANNING, VILLAGE DEVELOPMENT PLAN) (PLN4108)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning and Design Lab – V (Area Planning)					
Co-requisites	-					

Catalog Description

The planning studio is an introductory studio for giving basic idea related to urban and regional planning studios. It aims to bring students of diverse backgrounds to a common platform and develop the essential skills of planning amongst the students opting for different specializations of planning. The objective of the studio is to introduce the general concepts associated with physical planning and develop the skills of data collection, data analysis, spatial representation, documentation as well as written and verbal communication. Students will be able to apply the knowledge gained through theoretical subjects in their studio planning.

Course Objectives

The objective of this course is

- To relate theoretical knowledge of planning with planning practices.
- To conceptualize and prepare development plan for the given levels.

Course Outcomes

On completion of this course, the students will be able to

CO1: Preparation of Area Plan/Zonal Plan in urban context.

CO2: Preparation of Village Development Plan.

Prof. (Dr.) Anil Kumar

Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Modules	Blooms level*	Number of hours
MODULE 1: Area Planning (Urban Context) The assignment would identify different urban zones based on land use characteristics and could also include predefined 'zones' for zonal plans. The objective of this exercise would be to learn various methods of surveying to collect different types of data and represent and interpret them to give meaningful observations on the planning and development of the area. Thrust of the exercise would be on: • Understanding the zone in the context of the city. • Mapping of Regional Networks and Linkages • Preparation of Base Map of the area through primary surveys and updating secondary data • Socio-economic profiling of the area through surveys • Physical and Social infrastructure mapping • Gap Analysis and issue identification • Formulation of broad outlines of Intervention Strategies and Development Blueprint.	L4, L5 L6	60
MODULE 2: Rural Planning The main goal of the assignment is to expose students to the life and living in rural area as it is different from urban areas. This would help in conceptualising the integration of urban and rural areas for regional planning. Students will undertake study of a particular village in groups and conduct a primary survey on demographic profile, household income level, socio-cultural practices, etc. Information about development programmes shall be collected and resource mapping will be done. This exercise will aim at improving the understanding about the requirements of different categories of rural population. Conducting the primary survey will provide exposure to research methodology, techniques of data collection, data processing and analysis. Thrust of the exercise would be on: • Understanding the socio-economic aspects of the rural settlement • Importance of location, spatial and economic linkages of the village. • Explaining the social and physical infrastructure of the village. • Understanding the availability and usage of local resources. • Exposure to government programmes and institutional mechanism working for rural • planning and development • Identifying the present problems and future possibilities in the village. • Proposing a strategy of improvement in the condition and development of the villages.	L4, L5 L6	60

	ECO-TOURISM (PLN4111)	L	T	S	P	C
Version 1.1		1	0	0	2	2
Pre-requisites/Exposure	Disaster Risk Management and Climate Change Adaptation					
Co-requisites	Planning and Design Lab V					

Catalog Description
The aim of this course is to offer the principles of planning for eco-tourism in the context of sustainable tourism development. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course is getting the insights of relationships between tourism and environment, tourism and urban development, tourism and economic development. In this course, students will be able to grasp planning requirements for developing sustainable eco-tourism hubs and circuits. They will be able to incorporate community needs and sustainable eco-tourism requirements in planning process. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

Course Objectives
The objectives of this course are
- To apply planning strategies and tools with reference to sustainable tourism development.
- To grasp the role of public and private sector as well as community participation in eco-tourism planning and development

Course Outcomes
On completion of this course, the students will be able to
CO1: Apply concept of eco-tourism for sustainable tourism development.
CO2: Identify and plan eco-tourism hubs and circuits.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction and Planning for Eco-Tourism Definitions, scope, nature, key determinants, characteristics; problems and prospects of eco-tourism; eco-tourism hubs in India; impacts of eco-tourism in developed and developing regions; relationship between tourism and urban development, relationship between tourism and economic development, relationship between tourism and environment; concept of carrying capacity and its significance in eco-tourism. Circuit identification and destination planning; assessment of infrastructure requirement for eco-tourism planning; analysing tourism impacts in transforming local livelihood and lifestyle; role of Government institutions and agencies in eco-tourism development. 	TRANSPORTATION PLANNING AND MANAGEMENT (PLN4211)	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Traffic and Transportation Planning – I & II(B.Plan.)					
Co-requisites	Planning and Design Lab – II& II					

Catalog Description

The aim of this course is to introduce to the students of planning with the integration of transportation planning and its interface of land use planning. Another objective is to ensure that students have a sound understanding of the key issues affecting the planning, management and financing of public transport in developed and developing countries. At the end of the course, students will be able to analyse on transport related plans and policies.

Course Objectives

The objective of this course is

- To equip students with an integration of transportation planning and its interface of land use planning.
- To prepare students to analyze the key issues affecting the planning, management and financing of public transport.

Course Outcomes

On completion of this course, the students will be able to

CO1: Define the concept of Land use-transport integration and sustainable transport planning and its relevance in Indian Context

CO2: Apply transport planning process while preparing transport plans.

CO3: Calculate External Cost of Urban Transportation and plan for urban and regional freight

CO4: Utilize transport planning software and financing of TOD Projects.

MODULE 1: Land use- transport Integration and Sustainable Transport Planning Introduction to transport and travel; Understanding travel from the mobility, economic, social-psychologist, time/space perspective; Introduction to four stage modelling; land use and transportation integration- definitions, land use transport cycle, importance of accessibility; Factors affecting and tools for land use-transport integration; Key elements of integration; Integrating land use and transport in the planning process; traffic generation rates of different land use; Land development impact on traffic congestion on road segments, intersections and parking, impact on public transportation, pedestrian traffic and safety, Demand and Supply of Transport; Congestion pricing, transport Pricing, Basic transport economic Model Role of NHAI in regional transport.Understanding Sustainable Development and Sustainable Transport; Environment and Social Progress; Indicators of Progress, Development Control and Travel Planning.	L1, L2 L3	9
MODULE 2: Transportation Planning Process Area Delineation, Zoning (TAZ); Four Stage Planning Process: Trip Generation, Trip Distribution, Trip Assignment and Modal Split; Principles of transport infrastructure planning and design of roads and intersections, street infrastructure elements; Parking facilities; and Principles of traffic management, Traffic Management- Signal design; Phasing and Time cycles; Principles of one-way system design; Pedestrianization and non-motorized transportation- Issues, policies and case studies; Towards more inclusive cities; Comprehensive Mobility Plan.	L1, L2 L3	9
MODULE 3: External Cost of Urban Transportation and Freight Transport Introduction to External Cost of Urban Transportation: Issues, Level of Service and Transport Pricing, Congestion Pricing, Policy Issues, Emission Standards and Energy Policy; Transport planning policies of central and state governments; National Urban Transport Policy 2006; Pricing and Revenue in Transport- Pricing; Revenue and Forecasting; Willingness to Pay. Introduction to Freight Transport- differences from passenger transport; location choice of transport hubs in relation to regional distribution linkages, Regional Transport Issues: Intercity Connectivity; Urban –Rural Linkages and Road Hierarchy; Road and Rail as Competing/Complementary Modes; Highway Standards in Indian Context.	L1, L2 L3	9
MODULE 4: Software Applications and Projects Software Applications: E.G. Cube 6- Network Coding, Creation of Models, Data Base and Scenarios in Cube Base, Cube Voyager Modelling Functions; Urban Land Use &Transportation Planning Applications. Transit Oriented Development- Definition, concepts and key components; Principles of TOD, planning norms and standards of TOD, pre-requisites of TOD, financing of TOD projects, role of stakeholders.	L1, L2 L3, L4	9

	DEMOGRAPHY AND QUANTITATIVE ANALYSIS (PLN4212)	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Planning Studio IInd and IIIrdSem.					
Co-requisites	Statistical Data Analysis Software (Elective)					

Catalog Description

The course consists of two parts of Demography and Statistics, dealing with each independently and as well as connecting the applications of statistics to demography.

Demography: The aim of the section on Demography is to provide the students with an understanding of basic concepts on demography. This course would make the students aware of the importance of population geography in economic development, the various theories that explain the growth of population in a country and demographic techniques applied. The course aims to help students identify appropriate sources of data, perform basic demographic analyses using various techniques and ensure their comparability across populations. The student will also be able to produce population projections and interpret the information gathered by the different demographic methods.

Quantitative Methods: The emphasis of the section on Statistics shall be on conceptual underpinnings of statistics with a focus on defining different statistical tools indispensable for urban planning. In view of the course according more emphasis on inferential statistics than descriptive statistics, the objective of the course will be to introduce the most useful and commonly employed statistical tools and discuss the conditions under which use of those tools is appropriate. The course has been so designed as to train the students interpret the results of an analysis to provide insight into the answer to the problem at hand. Use of SPSS is also included in the program, but will be taught separately as an elective subject in second semester itself.

Course Objectives

The objective of this course is

- To overview concepts of demography and its relation as well as utilization in planning.
- To demonstrate various methods for quantitative/demographic data analysis.

Course Outcomes

On completion of this course, the students will be able to

CO1: Acquire knowledge on demographic parameters used in planning.

CO2: Appreciate demographic theories, trends and impacts of migration as well as project population.

CO3: Use statistical methods of data analysis which are utilised in planning.

CO4: Apply statistical sampling techniques and advanced data analysis methods.

Module	Blooms level*	Number of hours

Prof. (Dr.) Anil Kumar

Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Module 1: Demography and Planning Distribution and Density of Population - Measures of Population Distribution and Concentration; Factors Affecting Population Distribution and Density; World Population Distribution; Density Distribution in India Population Change - Fertility and Its Measures; Mortality and Its Measures; Mobility; Factors Affecting Population Change; Determinants of Fertility and Mortality.	L1, L2, L3	9
Module 2: Demographic Theories, Migration, Population Composition and Projections Demographic Transition Theory; Some Population Theories (Overview only); Migration - Types of Migration; Determinants of Migration; Migration Models; Population Composition - Age and Sex Composition and Its Determinants; Age Pyramids; Working Force and Its Determinants; Composition of Work Force and Occupational Composition; Population Projections – Assumptions, Methods, Techniques.	L1, L2, L3	9
Module 3: Quantitative Methods-I Measures of Central Tendency and Dispersion - Arithmetic Mean; Weighted Mean; Geometric and Harmonic Mean; Median and Mode; Variance and Standard Deviation; Time Series and Forecasting - Trend Analysis - Cyclical Variation, Seasonal Variation, Irregular Variation; Various Methods in Time Series Analysis – Moving Average, Ratio to Trend, Link Relative and Residual; Factor Analysis - Principal Component Analysis	L1, L2, L3	9
Module 4: Quantitative Methods-II Probability Distribution and Sampling Distribution - Use of Expected Value in Decision Making; Binomial, Poisson and Normal Distribution (only application); Determination of Sample Size and Types of Sampling; Sampling Distribution (concept only); Design of Experiments (concept only); Correlation and Regression - Two Variable versus Multiple Linear Regression; Simple and Multiple Correlation; Estimation of Parameters – The Method of Ordinary Least Squares; Hypothesis Testing, Goodness of Fit; Applications of Features of Excel for statistical analysis.	L1, L2, L3	9

	PLANNING STUDIO-II – URBAN PLANNING (PLN4206)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning Studio I					
Co-requisites	-					

Catalog Description

The studio is designed to expose the students to issues of urban planning and equip them with knowledge and techniques to enable them to analyse urban situations and develop logical decision making processes to address the complex overlays of conceptualisation, implementation and finance. The studio is designed to study one particular urban area and analyse its issues and develop spatial plans with thrust on critical sectors. It focuses on the preparation of integrated development plan for a selected urban area analysing all aspects of physical planning including socio-economic factors and physical infrastructure and also formulation of methods of implementation and projectisation. The course deliverables would be designed based on specific projects undertaken, keeping in mind the overall objective of the course.

Course Objectives

The objective of this course is

- To relate theoretical knowledge of planning with urban planning practices.
- To conceptualize and prepare an urban development plan for the given study area.

Course Outcomes

On completion of this course, the students will be able to

CO1: Applying learnt planning concepts for the conceptualization and designing of an urban plan.

CO2: Present and document meaningful inferences and strategies/proposals for sustainable urban development.

Modules	Blooms level*	Number of hours
MODULE 1: Pre-Field visit Stage Identification of an urban area; Identification and Formulation of Planning Objectives for the project; Field Visit and Survey of the study area. Data collection through primary and secondary surveys.	L3, L4 L5	40
MODULE 2: Post-Field visit Stage Analyses and presentation of data and information; Review of Planning Objectives post data analysis; Redefining objectives; Planning for urban area and its region (structure plan / development plan) with emphasis on: Land use, transportation networks and Infrastructure networks; Preparation of Detailed Project Report (case specific); Identification and Detailing of Action Area, Local Area plans or Project Plans (case specific); Plan Implementation strategies: Stake holder participation, project funding options; Implementation strategies including urban governance and management issue.	L3, L4 L5	80

L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Essential Elements/Deliverables:

- Defining characteristics of identified areas
- Case study and literature review of planning concepts and norms for the selected area/special area
- Formulation of Aim, Objectives and Methodology
- Selection of site and collection data (field trip of 1-week duration)
- Data analysis and presentation
- Outline framework of development – sectoral and spatial
- Implementation framework – capital investment and funding methods
- Governance and management aspects.

	SPECIAL AREA PLANNING (PLN4213)	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Introduction to Regional Planning					
Co-requisites	Metropolitan Planning, Development and Management					

Catalog Description

The aim of this course is to introduce the students to various Special Areas with their specific planning needs and priorities and the implication on development in these areas. The courses will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The focus of the course will be on studying the need and process required for special area planning. This course will provide the students hands-on experience Special area that required a different planning process in a built environment. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To familiarize students with planning process required for special areain Indian context.
- To develop interdisciplinary understanding and sensitivities of future planners.

Course Outcomes

On completion of this course, the students will be able to

CO1: Appreciate the need, planning process and legislation required for special area planning

CO2: Prepare the detail report and presentation on a given project related to Special area planning.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to SAP and its Management Special Areas under consideration would include Formal and Functional Regions (Hill Areas, Coastal Areas, Desert Areas, Special Economic Zones, Port City, Aerotropolis, Medi-City, Knowledge City, TOD etc.)., Types of special areas and their defining characteristics, Legislations and norms for Special Area Development in the Indian context, Capital investment and funding methods, public private partnerships in development process, Governance and Management aspects, Case Studies of various typologies of Special Area Development Plans in Indian and international context. 	BIG DATA AND DATA ANALYSIS (PLN4216)	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	2	0	2
Pre-requisites/Exposure	Demography and Quantitative Analysis					
Co-requisites	Planning and Design Lab -V &VI					

Catalog Description

This course provides a basic introduction to big data and linking it with urban and regional planning, development, management, and policy making. The objective of the course is to familiarize students with big data analysis as a tool for making maps. The course also provides a basic introduction about the process of data acquisition and analytics associated with urban areas. Through this course students will explore big data in the context of smart cities and regions with the help of real-world examples. This incorporates practical exercises to familiarize students with the format of big data. It also provides a first hands-on experience to the students in handling and analysing large, complex data structures.

Course Objectives

The objectives of this course are

- As technologies are getting embedded in the built environments, in this context, the major objective of this course is to understand the role and application of big data in urban and regional planning
- To provides hands-on experience in handling and analyzing large data sets.

Course Outcomes

On completion of this course, the students will be able to

CO1: Understand the utility of big data in Planning and identify tools for making maps.

CO2: Understand the software for handling large data sets and explore big datain the context of Smart cities.

MODULE 1: Big data, data acquisitions, analytics and Mapping the City Defining big data and what makes it 'big'; Emergence of data science and big data; its importance and utility in planning; Characteristics of big data; Links between big data, urban and regional planning, development, management and policy making. Different tools for making maps with big data; Map online programs and open spatial data and its uses; Geographic information systems software for mapping; and Identification of winners and losers in the big data system. Understanding open data platforms; Generators of big data; Handling large datasets, cloud database system; Cleaning data, SQL, introduction to R or other software for urban data analysis. Explore big data in the context of smart cities; Learning use of real-time data collection and use; Interactive data visualization in the context of smart cities and regions.	L1, L2, L3	12
MODULE 2: Project Work Selection and understanding of case study; Formulation of Aim and Objectives, Collection of data through primary and secondary sources; Conducting survey; Database development using relevant and advance software; Qualitative and quantitative data analysis; Report writing and presentations.	L4, L5, L6	24

	RESEARCH METHODOLOGY AND THESIS PLANNING (PLN4310)	L	T	P	S	C
Version 1.1	Date of Approval:	1	0	0	2	2
Pre-requisites/Exposure	Technical Report Writing and Research Methodology (B.Plan.)					
Co-requisites	Planning Thesis					

Catalog Description

The aim of this course is to introduce students to literature review, research processes, techniques and colloquial arguments, so as to help them finalise a topic for their thesis in the subsequent semester. Two seminars would be conducted in the course of the semester to initiate the process of literature review related to student areas of interest culminating in selection of an appropriate thesis topic. Students will also be taught reference management software-Mendeley as a part of this course.

Course Objectives

The objective of this course is

- To equip students with good research qualities and ethics.
- To prepare students to plan their thesis in an effective manner well in advance.

Course Outcomes

On completion of this course, the students will be able to
CO1: Absorb basic qualities and requirement of a good research.
CO2: Use research communication Techniques.
CO3: Develop their thesis with a good research design.
CO4: Present two seminars based on the proposed research conceptual plan.

Modules	Blooms level*	Number of hours
MODULE 1: Introduction to Research and Research Ethics Definition of Research, types, Basics of academic and applied research; Different Approaches to research; Elements of research: epistemology, theoretical perspective, methods, methodology; Justification of Choice and use of Methods and Methodology; Paradigms in Research. Knowledge on act of plagiarism; Prior permission and intimation form the source; Time management in research; Conduct of interview, asking right question, confidentiality, elimination of researcher biases; Role and Responsibility of Researcher. What is an argument, argument structure and identification, validity and strength of arguments?	L1, L2 L3	6

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

MODULE 2: Research Communication Research vocabulary, Reading- notes taking, material organisation, indexing; Technical Writing- Content synthesising, paraphrasing, citation and referencing; APA referencing system, Use of Mendeley in Reference Management; Academic writing-Research Proposal, Synopsis, Abstract writing, Report Writing and mapping, Writing style - introductory, developmental, transitional and concluding paragraphs, linguistic unity, coherence and cohesion, descriptive, narrative, expository and argumentative writing, Proofreading and editing; Presentation: effective content structuring, oral communication, voice modulation, body language, audio-visual aids, handouts.	L1, L2 L3	6
MODULE 3: Developing Thesis • Identification of topic of interest having relevance to planning profession, integration and application of the learnt research processes to the pre-thesis work • Book reviews and journal article compilation to establish the body of work existing in the selected area of work. Preliminary literature review for identification of research gaps. detail literature reviews to understand the current state of knowledge around a particular topic. • Collection of data and opinions by the stakeholders, decision makers, urban managers, advocates, technocrats, user groups, etc. on the topic selected. • Based on the literature review and inputs from the colloquial arguments, the topics shall be finalised for thesis in the subsequent semester. • Selection of study area, identification of extent and spread of intervention; collection of data for preparation of base map. • Development of research objectives, research methods relevant for individual topicand work methodology. Identification of data sources. • Data collection and analysis: sample determination, data tabulation (coding, de-coding, etc.), quantitative and qualitative data analysis. Appropriate and relevant data analysis methods would need to be studied by individual students based on thesis topic and research area.	L3, L4 L5	12
MODULE 4: Professional Practice Finalisation of topic; formulation of problem statement, literature review, working hypothesis, research brief, research methodology, sample determination, data collection and analysis, report structuring. The student will be required to make two seminar presentations and submit a report at the end of the semester which will qualify as the literature review and research methodology component of his/her thesis in the forthcoming semester.	L3, L4 L5	12

	PLANNING STUDIO-III – REGIONAL PLANNING (PLN4307)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	8	10
Pre-requisites/Exposure	Planning Studio I& II					
Co-requisites	-					

Catalog Description

The course aims to understand the theoretical basis for various concepts and analytical tools of Regional Planning and learn the practice of regional planning in the Indian context. Elements of settlement system in the regional context are also incorporated in this course. The course provides an in-depth understanding of the issues of regional development, regional disparity and the need for balanced regional development in the context of globalization and rapid economic transformations in the country. Regional policies and sectoral policies are also discussed. Metropolitan regions, districts as planning regions and rural planning issues are discussed in the wider spectrum of holistic regional planning and development. Students will be able to apply the knowledge gained through theoretical subjects in their studio planning.

Course Objectives

The objective of this course is

- To relate theoretical knowledge of planning with regional planning practices.
- To conceptualize and prepare regional development plan for the given study area.

Course Outcomes

On completion of this course, the students will be able to

CO1: Applying learnt planning concepts for the conceptualization and designing of a regional plan.

CO2: Present and document meaningful inferences and strategies/proposals for sustainable regional development.

Modules	**Blooms level***	**Number of hours**

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram

Manesar Gurgaon-122413

MODULE 1: Concept of Regional Planning • Concept of Region: Region Types and Regionalization; Concept of Regional Planning: Nature, Objectives, Levels and Aims • Elements of Settlement System: Function, Spacing, Linkage, Settlement Pattern and Factors Responsible Thereof; Potentials and Centrality of Settlements • Regional Inequalities – Growth, Density and Spatial Inequalities of Population Distribution, Spatial Patterns and Characteristics of Occupational Types; Regional Planning Policies and Its Relevance • Introduction to Economic and Regional Growth Processes: Some Approaches of Rostow, Hirschman, Myrdal, Friedman, Haggerstand; Concept of Growth Centres, Growth Pole, Service Centre and Agro-Politan District and their Application in India • Regional Development Strategies: Centralized and Decentralized; Regional Planning Process: Location of New Regional Economic Activities; Tools and Techniques of Regional Analysis • Metropolitan Regions: Concept of Degree of Primacy, Area of Influence, Service Area; City Regions and Delineation Techniques; Centralization and Decentralization Processes • Concepts of Ring and Satellite Towns, Counter-Magnets; Forms and Concepts for Metropolitan Planning and Development	L2, L3 L4	40
MODULE 2: Governance Mechanism and Implementation • District Planning Process: Identification of Plan Objectives; Collection, Classification and Analysis of Data; Norms and Standards for District Planning; Components of District Planning in the Context of 73rd CAA, 1992, Planning Process Under District Planning. • Committee, Metropolitan Planning Committee; Plan Implementation: Five Year Plans and Rural Development; Planning Process, Policies and Programmes at National, State, Regional and District Levels; Planning, Development, Implementing and Monitoring Organizations and Agencies: National and State. • Concepts of Rural Area and Rural Development; Scope of Rural Development; Causes of Rural Backwardness; Historical Evolution of Rural Development and Rural Settlement Pattern in Indian Context; Economic Issues of Rural Development - Differentiating Economic Growth and Economic Development; Rural Jobs and Income Sources; Rural Economic Policy. • Infrastructure and Plan Implementation; Tools and Constraints in the Implementation of Plans in Terms of Administration; Schemes, Programmes, Policies for development of regions, districts, villages and cities; Selected Case Studies in Indian Context.	L2, L3 L4	80

**Bloom's Level:*
L1-Knowledge; L2-Comprehension; L3-Application; L4:Analysis; L5:Synthesis, L6:Evaluation

Essential Elements/Deliverables:

- Defining characteristics of identified areas
- Case study and literature review of planning concepts and norms for the selected area/special area
- Formulation of Aim, Objectives and Methodology
- Selection of site and collection data (field trip of 1 week duration)
    - Data analysis and presentation
    - Outline framework of development – sectoral and spatial

	SMART CITIES AND ADVANCED TECHNOLOGIES FOR EMERGING PLANNING ISSUES (PLN4312)	L	T	P	S	C
Version 1.1		1	0	2	0	2
Pre-requisites/Exposure	Development, Management and Finance, Infrastructure Planning					
Co-requisites	Public Policy in Planning, Urban Finance					

Catalog Description

The aim of this course is to introduce the students to smart cities concepts and solutions with their specific planning needs and priorities and the implication on development in these areas. Besides, this course also offers opportunities in specialized or advance learning in emerging spatial planning issues and planners need to give special attention to them while preparing the plans. The course will generally be conducted in the seminar/studio mode to encourage research, exploration and skill developments. The course will provide the students hands-on experience of infrastructural, environmental problems emerging in a city. The course contents to be followed will be developed by course teachers based on the resources at hand and opportunities for interdisciplinary learning. The course would be conducted through literature survey, case studies, site visits, community surveys and hands on experimentations. During the course the students will be working on live projects in groups which are preferably interdisciplinary.

Course Objectives

The objective of this course is

- To grasp Smart city concept as well as understanding emerging challenges in a city/region and finding out ways to resolve them.
- To develop interdisciplinary understanding and sensitivities of future planners.

Course Outcomes

On completion of this course, the students will be able to

CO1: Apply smart city planning as well as critically analyze immerging multifaceted planning issues and technology-based solution to address them.

CO2: Prepare the detail report and presentation on a given project with an emphasis on smart solutions in order to achieve the goal of sustainable development.

	SUSTAINABLE CITIES AND REGIONS (PLN4315)	L	T	S	P	C
Version 1.1		1	0	0	2	2
Pre-requisites/Exposure	Regional Planning and Development, Planning History and Theory					
Co-requisites	Infrastructure Planning					

Catalog Description

The primary purpose of this subject is to understand that complex relationships exist between cities and the regions and natural environments on which they rely. This course focuses on how to examines such relationships and how they impact upon urban, suburban, rural and regional dweller at different scales in the 21st century. Students will learn about the major challenges currently faced by urban areas around the world – including poverty, unemployment, poor housing infrastructure, and constraints on productivity – and the extraordinary potential of these areas to enable change in the future.

Course Objectives

The objectives of this course are

- To understand urban sustainability, measures of sustainability, and elements and intersectionality of Sustainable Development Goals.
- To focuses on effective governance in order to ensure sustainability of a city and a region.

Course Outcomes

On completion of this course, the students will be able to

CO1: Identify the measures of urban sustainability

CO2: Demonstrate knowledge and skills to plan for sustainable development of a city ora region.

	PLANNING LEGISLATION AND PROFESSIONAL PRACTICE (PLN4403)	L	T	P	S	C
Version 1.1	Date of Approval:	2	1	0	0	2
Pre-requisites/Exposure	Planning Legislation (B.Plan)					
Co-requisites	Planning Practice I & II, Human Values in Planning (B.Plan)					

Catalog Description

The aim of this course is to introduce the significance of planning laws, legislations, acts, regulations and professional practices in planning. As students are passing out after this semester, therefore, the relevance of this subject becomes very crucial at this stage. At the end of the course student will be able to utilise the learnt skills of planning legislations and professional practice in their career.

Course Objectives

The objective of this course is

1. To prepare students to deal with legal dimensions of planning.
2. To equip students with professional planning ethics to transform them into committed and responsible future planner.

Course Outcomes

On completion of this course, the students will be able to

CO1: Grasp basic legal terminologies for enhanced understanding of legislation.

CO2: Comprehend land related legislations as well as getting an enriched knowledge of Urban and Regional planning Acts.

CO3: Analyze environmental planning regulations and laws.

CO4: Absorb professional planning ethics/values and transforming into a professional planner.

Modules	Blooms level*	Number of hours
MODULE 1: Basic Terminologies and Legislation The meaning, significance and objectives of planning legislation; Evolution of planning legislation and overview; Concept of Law; Sources of law; meaning of the term of law, legislation, ordinance, bill act, regulations and bye-laws; doctrine of separation of powers; judiciary, legislature and executive-rule of law, Judicial precedents; PIL; significance of law and its relationship to urban planning; Indian Constitution. 	PLANNING THESIS (PLN4437)	L	T	P	S	C
Version 1.1	Date of Approval:	2	0	0	16	18
Pre-requisites/Exposure	Planning Studio I, II & III					
Co-requisites	All Theory and Elective Subjects					

Catalog Description

The aim of thesis is to develop independent critical thinking and design/research abilities and apply the knowledge gained, skills developed and professionalism inculcated over the last three semesters in an exercise of own interest and significant complexity. The thesis project is to be undertaken independently by each student on a topic of his/her choice related to urban and regional planning, selected and approved by the faculty during the previous semester as part of course requirements of the subject seminar. The students' needs to present and defend their thesis research work in periodic juries conducted by the department as well as in the external jury appointed by the University/School. They are also expected to write a thesis report with the constant guidance of respective guides. Students will submit the same before external jury in a hard bound prescribed format, given by the department.

Course Objectives

The objective of this course is

- To utilize acquired knowledge in planning and reviewed literature for conceptualizing and pursuing good research.
- To provide viable solutions to the undertaken research problem and document the entire work.

Course Outcomes

On completion of this course, the students will be able to

CO1: Conceptualise a rationale research problem and creating a good research Design.

CO2: Drawing meaningful insights as well as communicate and document practical ideas to solve the selected problem.

Module	Blooms level*	Number of hours
Module 1: Research Problem and Research Design • Conceptualization of Research problem for Thesis work. • Background and Need of the study area. • Rigorous Literaturereview • Formulation of Aim and objectives. • Writing objective based Research Questions. • Constructing Research Methodology. • Designing Analytical Framework. • Sampling and Sample selection. Preparations of Check list and Questionnaire. • Methods of data collection.	L3, L4, L5	26

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

DISASTER MANAGEMENT AND SUSTAINABLE BUILT ENVIRONMENT

Syllabus - Semester First

INTRODUCTION TO DISASTER MANAGEMENT

Course Code: DSM2151 **Credit Units: 03**

Course Overview

The aim of the course is to provide broad understanding about the disasters and its management systems. The course will familiarize the students with concepts and approaches pertaining to disaster management and its relationship with development. The course will provide the understanding on how to assess disaster risk. Student will also learn about the government interventions in the field of Disaster Management.

Course Contents:

Module-I: Introduction to Disasters

Concepts, and definitions (Disaster, Hazard, Vulnerability, Resilience, Risks) Disasters: Classification, Causes, Impacts- Differential impacts-in terms of caste, class, gender, age, location, disability. Global trends in disasters urban disasters, pandemics, complex emergencies, Climate change.

Module-II: Approaches to Disaster Management

Disaster cycle- its analysis, Phases, Culture of safety, prevention, mitigation and preparedness, community based disaster risk reduction, Structural- nonstructural measures, roles and responsibilities of community, Panchayati Raj Institutions/ Urban Local Bodies, States, Centre, and other stake-holders.

Module-III: Inter-relationship between Disasters & Development

Factors affecting vulnerabilities, differential impacts, impact of development projects such as dams, embankments, changes in Land-use etc., climate change adaptation, relevance of indigenous knowledge, appropriate technology and local resources.

Module-IV: Disaster Risk Management in India

Hazard and Vulnerability profile of India; Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, DM Act and Policy, Other related policies, plans, programmes and legislation)

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

Learning Outcomes

At the end of the course, the students will be able to

- Understand the concept of disaster management and measures to be taken at different stages of disaster management.
- Train on various aspects of disaster management.
- Appreciate the impact of development in the context of disaster management.
- Recognize the scenario of disaster management at various levels such as global, national and regional level.
- Learn vulnerability reduction strategies

Learning Methods

Videos and quizzes through the on-line Learning Management System (LMS); Classroom learning through an experienced Facilitator/Faculty on campus (Videos, In-class Activities, Outbound Activities); Assignments and Presentations.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Syllabus - Semester Second

RESILIENCE BUILDING FOR BUILT ENVIRONMENT

Course Code: DSM2251 **Credit Units: 03**

Course Overview
The course is intended to provide various dimensions of disasters caused by nature and induced by human activities and their effects on built environment. The course will introduce different forms of disasters. The course will also help in providing the comprehensive knowledge on nature of disaster, characteristics, and how to mitigate the risk involved with such disasters through several case studies across India.

Course Contents

Module-I: Geological Disasters (earthquakes, landslides, avalanches)
Mechanism, patterns, destruction style, effect on built environment, strategies for mitigation, retrofitting, damage prevention, case studies.

Module-II: Hydrological Disasters (Floods, Cyclones and Tsunamis)
Mechanism, patterns, destruction style, effect on built environment, strategies for mitigation, retrofitting, damage prevention, case studies.

Module-III: Manmade Disasters (CBRN-Chemical, Biological, Radiological and Nuclear)
Mechanism, patterns, destruction style, effect on built environment, strategies for mitigation, retrofitting, damage prevention, case studies.

Module-IV: Other disasters (Fires, accidents, pandemics)
Mechanism, patterns, destruction style, effect on built environment, strategies for mitigation, retrofitting, damage prevention, case studies.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA -** Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Learning Outcomes
At the end of the course, the students will be able to:

- Develop an in-depth understanding on nature and characteristics of nature and manmade disaster.
- Learn about the challenges and risks occurred during disasters with the help of case studies.
- Formulate mitigation strategies for risk reduction and damage prevention.

Learning Methods
Videos and quizzes through the on-line Learning Management System (LMS); Classroom learning through an experienced Facilitator/Faculty on campus (Videos, In-class Activities, Outbound Activities); Assignments and Presentations.

Syllabus - Semester Third

EMERGENCY MANAGEMENT

Course Code: DSM2351 **Credit Units: 03**

Course Overview

The course will train the students about how to respond to a disaster in a city or a village so as to restore normalcy at the earliest. The course will provide necessary skills for search, rescue and evacuation operations. This course will also focus on significance of relief distribution and emergency medical facilities during disaster emergencies.

Course Contents

Module-I: Understanding Emergency Management

Types of activities and assistance during disaster emergencies; stakeholders; coordination with multiple agencies; time management and planning; maintenance of law and order; maintenance of records; Emergency communication.

Module-II: Search and Rescue (SAR)Operations

Significance of SAR; Need for SAR; Techniques for SAR; Organizations trained for SAR; Community Training.

Module-III: Relief Distribution

Significance of Relief Distribution; Need for Relief Distribution; Setting up temporary relief distribution camps, Techniques for Relief Distribution; Organizations trained for Relief Distribution; Community Training

Module-IV: Emergency Medical Care

Need for emergency medical care; Planning for medical care; Requirements of temporary medical camps; training of manpower; maintenance of records.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Learning Outcomes

At the end of this course, the students will be able to:

- Understand the role of multiple agencies, time management, communication during disaster emergencies.
- Practice to respond to a disaster so as to reestablish normalcy at the earliest.
- Acquire the skills and knowledge related to search, rescue and evacuation operations through project work.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- Learn the importance of relief distribution and medical care as a part of emergency management.

Learning Methods

Videos and quizzes through the on-line Learning Management System (LMS); Classroom learning through an experienced Facilitator/Faculty on campus (Videos, In-class Activities, Outbound Activities); Assignments and Presentations.

Syllabus - Semester Fourth

REHABILITATION RECONSTRUCTION AND RECOVERY

Course Code: DSM2451 **Credit Units: 03**

Course Overview

The course will provide an outline on the need and importance of disaster recovery and its planning. The course will familiarize the students about numerous techniques and guidelines for reconstructions after disasters. This course will provide the learning on aspects pertaining to livelihood restoration during rehabilitation process. Student will get to know about BBB (Build Back Better) strategy which is crucial for future disasters and concept of resilient recovery through this course.

Course Contents

Module-I: Damage Assessment for Recovery

Damage Assessment- Post Disaster Damage assessment; estimated damage assessment; Nature and damage to houses and infrastructure due to different disasters; Need and importance of disaster recovery; Planning for disaster recovery.

Module-II: Reconstructions after Disasters

Significance of reconstruction; Guidelines for Disaster resistant constructions; traditional techniques; Speedy Reconstructions- Essential services, social infrastructures, Immediate shelters/camps, Contingency plans for reconstructions.

Module-III: Socio-economic Rehabilitation

Livelihood restoration; Development towards creation of long-term job opportunities and livelihood options; Various initiatives and policies for socio-economic rehabilitation; Case studies.

Module-IV: Building Back Better (BBB)

Origin of BBB strategy; BBB and preparedness for future disasters; Concepts for resilient recovery; roles and relationships of multilateral agencies like UN, World Bank etc in recovery process; Government's role in BBB; Stimulation of local economies.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Learning Outcomes

At the end of the course, the students will be able to:

- Prepare a damage assessment framework for managing disaster recovery.
- Review guidelines for disaster resistant constructions and contingency plans for reconstructions.
- Formulate their own strategies related to creation of long-term employment

Prof. (Dr.) Anil Kumar
Deputy Dean Academics

Syllabus - Semester Fifth

CLIMATE CHANGE ADAPTATIONS AND SUSTAINABLE DEVELOPMENT

Course Code: DSM2551 **Credit Units: 03**

Course Overview

This course focuses on creating safe and sustainable built environment for disaster prone settlements. The course will provide an overview of climate change issue and its interrelationship between climate change adaptation and development. Student will be able to learn about the principles of sustainability while providing solutions to the environmental problems of cities such as pollution, degradation of natural resources and various critical issues.

Course Contents:

Module-I: Climate Change

Origin and evolution of the earth's atmosphere; Overview of key concepts – weather and climate; Climatic classification; Climatic variability - temperature, rainfall, wind speed & direction; Effect of various anthropogenic activities on earth's atmosphere.

Module-II: Climate Change Adaptation and Mitigation

Linkage between climate change adaptation and development; International adaptation initiatives and programs; Definitions of mitigation and overview of emissions levels and mitigation targets per country; Climate vulnerability; Exposure sensitivity and adaptive capacity of society; Role of forests and trees outside forests in climate change resilience and adaptation.

Module-III: Introduction to sustainable development of regions

Scope & definitions; Goals; Principles of sustainable development; Environment ethics; Quality of life, Sustainable building designs and practices; Sustainable infrastructure- water supply, solid waste management, transportation; Green buildings and rating systems; Vernacular architecture and sustainability

Module-IV: Sustainable Development and International Contribution

Environmental movements; Global policies for sustainable development – world summits; Conventions and agreements.

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA** - Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Learning Outcomes

At the end of the course, the students will be able to:

- Identify key drivers that contribute for enhancing the problem of climate change.
- Understanding for providing sustainable solutions for the emerging challenges

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar

Syllabus - Semester Sixth

GEOINFORMATICS IN DISASTER MANAGEMENT

Course Code: DSM2651 **Credit Units: 03**

Course Overview

The aim of the course is to study the concept of Remote Sensing, Geographical Information System and its applications in the field of Disaster Management. These tools and techniques will assist the students in preparing the spatial database and mapping of the affected area. This course will provide an opportunity to the students for handling various components of spatial modeling digital elevation models, overlay functions etc in the Geographical Information System.

Course Contents:

Module-I:Fundamentals of Remote Sensing

Concept, types and applications of remote sensing (RS); Types of required spatial data; raster and vector data structures; Types of Resolutions; Elements of Image Interpretation, practical exercise on Image Interpretation.

Module-II: Fundamentals of Geographic Information Systems

Definition, concept, significance, components of spatial data base: Types and representations; Applications of GIS in disaster management; Spatial data creation and checking - base maps and thematic maps; Geo-referencing

Module-III: Practical Exercises

Spatial interpretation in GIS; Software Demonstration; Geo-referencing, digitization and geo-database generation; Creating and editing vector data; Attribute data management; Linking of non-spatial data with spatial data, Use of Web GIS; Base map preparation.

Module-IV: Spatial Modelling and Thematic Mapping in GIS

Analysis in GIS: Query and retrieval, buffer and proximity analysis, spatio-temporal analysis, contour generation and Digital Elevation Modelling (DEM)

Examination Scheme:

Components	CT	HA	C	V	A	EE
Weightage (%)	10	5	5	5	5	70

(C - Case Discussion/ Presentation; **HA -** Home Assignment; **V** - Viva; **CT**- Class Test; **A** - Attendance; **EE** - End Semester Examination)

Learning Outcomes

At the end of the course, the students will be able to:

- Familiarize with the concept of Remote sensing and its applications required for image interpretation.

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

- Learn Geographical Information System software for creating spatial database on disasters affected area.
- Linking the non-spatial data with spatial data through practical exercises.
- Conduct spatio-temporal analysis in GIS and develop a GIS based decision support for disaster risk reduction.

Learning Methods

Videos and quizzes through the on-line Learning Management System (LMS); Classroom learning through an experienced Facilitator/Faculty on campus (Videos, In-class Activities, Outbound Activities); Assignments and Presentations.

PRINCIPLES & ELEMENTS OF DESIGN

Course Code: DIND2151 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this subject is to familiarize students with visual grammar, elements of design and methods of visual composition with various mediums and color. In addition to the earlier, the intention of space design activity will be limited to the level of visual composition of interior/architectural spaces considering the principles of design and colour theory.

COURSE OBJECTIVES

The objective of this course is:

- To understand the application of visual grammar in the domain of Visual design
- To create compositions with various 2D and 3D media with various mediums.
- To develop the ability to apply colour theory in interior and architectural spaces
- To develop the ability to visualize 3D spaces and creating them with the help of various materials.

COURSE CONTENT:

Module 1: Study and Application of Elements of Design

Basic Composition, Elements of design in basic composition, Point, Line, Shape, Texture etc. and its impact on the interior. Application of elements of design, Positive and Negative spaces, Additive and Subtractive spaces

Module 2: Study and Application of Principles of Design

Basic principles such as balance, emphasis, proportion, movement, rhythm, pattern, harmony, unity, focus, hierarchy, scale, order etc. Identifying principles of design in nature and interior /architecture. Application of principles of design in creating interior & architectural spaces.

Module 3: Colour Theory

Understanding colour –Colour perception key elements – (1) Light, (2) Substance, (3) Human vision and responses, Fundamental categories of colour; The color making attributes - Hue, Value, and Saturation. Dimensions of color, Color psychology and management in interiors.

Module 4: Project

3d compositions on elements and principles of design. Revamping a space using colour theory and application of elements and principles of design.

Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

ANTHROPOMETRY & FURNITURE DESIGN

Course Code: DIND2251 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this subject is to make the students understand the importance of anthropometry while designing furniture or space. The subject allows the students to get a clear understanding of how to calculate the spatial requirements and other factors when designing a furniture and interior space. The design activity will be limited to furniture design as well as a room design based on anthropometric measurements.

COURSE OBJECTIVES

The objective of this course is:

- To understand the scale & proportions and its comparisons
- To understand the application of anthropometry in spatial design
- To learn about various furniture materials
- To study about furniture designs and designers throughout the decades

COURSE CONTENT:

Module 1: Anthropometry & Scale

Introduction to static and functional anthropometry, various human postures, and related anthropometrics. Introduction to various scales and conversions. Anthropometrical study of various spaces, Application of Anthropometrics.

Module 2: Furniture Design & Ergonomics

Evolution and benefits of ergonomics; Principles of ergonomics. Application of ergonomics and design of ergonomic furniture.

Module 3: Measured drawing

Introduction to fundamentals of measured drawing, line value, lettering, drawing representation, format for presentation methods and technique of measuring buildings and their details. Measured drawing of simple objects like furniture, detailing in terms of construction, ornamentation, measured drawing of building components like column, door, window, etc.

Module 4: Project

Analyse the user needs, Distribution of the human activity spaces, calculating the spatial requirements based on the anthropometry. Detail planning and design of a interior space (single cell) considering human needs and human anthropometric data with a theme.

Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

VERNACULAR ART AND DESIGNS

Course Code: DIND2351 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this subject is to make the students understand the various aspects that are considered in a vernacular design. The subject also focuses on various arts and crafts practiced in India, the process of making and application. The subject gives the students a holistic understanding about the local materials and techniques used in interior designing.

COURSE OBJECTIVES

The objective of this course is:

- To understand vernacularity in art and design
- To study sustainable materials and design
- To incorporate vernacular materials and techniques into modern day designs
- To study traditional Indian art and crafts

COURSE CONTENT:

Module 1: Vernacular Arts & Crafts

Introduction to various arts and crafts movements in history and its impact. Studying various Indian arts and crafts like madhubani, warli, Jaipur blue pottery, kalamkari, pattachitra painting, gond arts, cheriyal scrolls, phad paintings, chikankari, phulkari etc.

Module 2: Introduction to Vernacular Designs

Understanding the definition of vernacular term, importance and factors influencing vernacular design, case studies of vernacular designs

Module 3: Vernacular Materials

Introduction to vernacular materials, market survey, Properties of various vernacular materials , making and application process of vernacular materials in the interior spaces.

Module 4: Project

Analysing the users and area requirements and site context, Vernacular design of an interior space based on a theme, spatial and furniture alignment of the interior spaces based on the needs and context.

Examination Scheme:

Components	P/S/V	CT	A	C	EE
Weightage (%)	10	10	5	5	70

COMPUTER APPLICATIONS-I

Course Code: DIND2451 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this course is to understand the AutoCAD software and their applications Interior Design. In order to enable students to use computer systems and software, teaching necessary digital skills is an important aspect of the course. This course will help students to prepare presentation drawings, generating 2D drawings in a short time.

COURSE OBJECTIVES

The objective of this course is:

- To develop theoretical understanding of AutoCAD and its relevance in Interior Design.
- To practice various commands of the Autocad.
- To be able to draft relevant drawings
- To be able to present drawings in proper scale and formats

COURSE CONTENT:

Module 1: Introduction AutoCAD

Introduction to Auto Cad, User Interface, and basic commands, 2D drawing commands on Drafting, Editing and modification work

Module 2: Drafting

Introduce students to the drafting skills and minimize errors in the presentation skills, students should practice various AutoCAD commands, the student should be able to draft plans, sections and elevations of the design.

Module 3: Design Development

Area requirements, Relation to various functional aspects of the design problem. Use of bubble diagram, flow diagrams, zoning of site, etc. conceptual design.

Module 4: Project Presentation

The student should present the final drafted design in proper scale, layout and format. The drawings may include Site plan, Floor plans, sections and elevations with furniture layouts.

Examination Scheme:

INTERIOR DESIGN SERVICES

Course Code: DIND2551 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this subject is to give students an overview and introduction to water supply and sanitation, lighting and their co-ordination with other services and interior designs. Interior design services are the systems installed in buildings to make them comfortable, functional, efficient and safe. The course covers Water Supply and Sanitation system design in the buildings.

COURSE OBJECTIVES

The objective of this course is:

- To understand the need for and importance of building services.
- To understand the water supply system
- To understand the importance of sanitation and sewerage system.
- To develop perception regarding the various norms and standards for Electrical Systems and Lighting

COURSE CONTENT:

Module 1: Water Supply

Introduction to water supply; purification and treatment of water; need to protect water; requirements of water supply for different building types- storage, distribution; Water supply systems; Distribution networks; Plumbing networks in buildings; fixtures and fittings for efficient water supply

Module 2: Drainage & Sanitation

Concept, design and detailing of drainage systems in buildings; Building/ Site planning for drainage systems; Rainfall, Storm water drains, gullies, open drains; Purpose and principles, collection and conveyance of waste matter. Garbage types, collection and disposal- Purpose and methods (Incinerator, Dry disposal etc.). Garbage disposal in multi-story buildings.

Module 3: Electrical Services

Introduction to electrical engineering services for buildings; Sources of electrical energy supplied to buildings; Introduction to basic photometric concept: Light its behaviour and properties; Instruments for measurement lux meters, field of vision, visual task, visual comfort and glare: objectives of lighting design in interior design; fixtures and fittings for lighting designs; HVAC system designs in small and complex buildings.

Module 4: Environmental Impact Assessment

Environment; Environmental Impacts; Environmental Impact Analysis; Environmental Impact Assessment and Environmental Impact Statement; EIA- As An Integral Part of The design Process; Definition and scope, Goals and need of EM, EM Tools.

Environmental attributes: Air; Water; Noise; Land /and Soil; Socioeconomic; Cultural & Biological.

COMPUTER APPLICATIONS-II

Course Code: DIND2501 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this subject is to introduce techniques for further refinement of computer-generated graphics covered in the previous semester. In addition to that, this course also trains students for developing photorealistic Modelling using popular software in the field of interior designing. Advanced technologies and concepts using computers as an essential tool are also introduced such as Building Information Modeling. This course equips students with soft skills which increase their productivity and expression in design related subjects.

COURSE OBJECTIVES

The objective of this course is:

- To introduce and make students learn about graphic presentation tools
- To introduce Sketch up as 3D drafting software.
- To introduce Revit as 3D drafting software and its allied rendering plugins.

COURSE CONTENT:

Module 1: Introduction to SketchUp (3-D) Software

Introduce to the Sketch up 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Introduce to 3D drawing concepts. Students learn the ability to Model, Editing and modification work to be done in the graphic presentation.

Module 2: Introduction to Revit (3-D) Software

Introduce to the Revit 3D software for the graphic design, building planning. Explain the various ways to deal with the graphic drawings. Students learn the ability to Building Information Modeling.

Module 3: Introduction to Rendering Plugins

Introduce to the Lumion and Twilight Render software for the Rendering.

Module 4: Workshop

Practice on the various Revit and Sketch Up commands through software User Interface. Conduct 3D Skills Workshop to train the students. Introduce to the Modelling skills and minimize errors in the presentation skills.

Examination Scheme:

RESEARCH IN INTERIOR DESIGN

Course Code: DIND2651 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this course is to prepare students for writing a paper based on secondary research and literature review and its oral and visual presentation. Students would be able to identify and go in depth into specific and appropriate aspects relating to the discipline of interior design and discuss how it is reflected in the realm of design.

COURSE OBJECTIVES

The objective of this course is:

- Introduce research work to the students.
- To identify a specific aspect relating to the discipline of architecture.
- To make them aware of the constitutes of plagiarism.

COURSE CONTENT:

Module 1: Foundations of Research

Meaning, Objectives, Motivation, Utility of research. – Understanding the language of research – Concept, Construct, Definition, Variable. Research Process.

Module 2: Problem Identification & Formulation

Research Question – Investigation Question – Measurement Issues – Hypothesis – Qualities of a good Hypothesis –Null Hypothesis & Alternative Hypothesis. Hypothesis Testing – Logic & Importance.

Module 3: Data Collection & Analysis

Types of surveys in details for various types of research. Concepts of Statistical Population, Sample, Sampling Frame, Sampling Error, Sample Size, Non-Response. Characteristics of a good sample. Probability Sample – Simple Random Sample, Systematic Sample, Stratified Random Sample & Multi-stage sampling. Determining size of the sample – Practical considerations in sampling and sample size. Univariate analysis (frequency tables, bar charts, pie charts, percentages).

Module 4: Interpretation of Data and Paper Writing

Layout of a Research Paper, Journals in interior design, When and where to publish. Ethical issues related to publishing, Plagiarism and Self-Plagiarism

Examination Scheme:

INTERIOR DESIGN PROJECT

Course Code: DIND2601 **Credit Units: 04**

COURSE DESCRIPTION

The aim of this course is to provide an opportunity to the students to handle a complete interior design project. Project Thesis is the final stage of learning Interior Design. With the help of a thesis project, students are expected to demonstrate the understanding of a systematic design process which includes identification of project requirements, site study and analysis, case studies, programming, schematic design and Interior Design Development. It provides the students with an opportunity to culminate all the semesters of interior design education by demonstrating the body of knowledge and skills gained during their education and the professional training.

COURSE OBJECTIVES

The objective of this course is:

- To prepare a student to independently handle and present all aspects of an interior design, from its evolution to final solution in totality.
- To understand the importance of the evolutionary stages of a design process and various techniques required for a successful presentation of an interior design.
- To develop in students the ability to handle specific aspects / thrust area of design relevant to the topic.

COURSE CONTENT:

Module 1: Introduction

Introduction to the project design The project research should include the followings:

- Aim, Objectives, Need, Scope, Methodology & Limitations
- Case studies & Analysis
- Data Collection & Analysis
- Concept of your design
- Concept and Planning of your Design.

Module 2: Concept Development and Designing

Extensive research specific to project through the primary and secondary data collection. Conduct the case studies with extensive study and analyses to get a clear picture of the existing project. Detailed site study is to be conducted. Development of concept at various stages and levels with conceptual model and 3-D sketches to be studied. Design to be developed through a series of appraisals and open discussions. Designing for workability, efficiency, aesthetic quality, economic value, environmental impact and inclusivity.

Module 3: Detailed Specifications

All the necessary specifications to be detailed and studied to get a clear picture of the project.

Module 4: Presentation

Complete project development and analysis report to be compiled containing all the details of the project. Presentation in terms of 3-D drawings and/or Model to be submitted. Mode of presentation may be mutually devised by co-coordinators and student that may be project specific.

INTELLIGENT INTERIORS

Course Code: DIND2602 **Credit Units: 04**

COURSE DESCRIPTION

Technology is becoming inherent part of modern life and has invaded every aspect of our life including the building interiors. Intelligent interiors are one of the most important parts of the modern buildings and objectives of the course is to make students aware of the use of technology in interiors.

COURSE OBJECTIVES

The objective of this course is:

- To familiarize what Smart buildings are and its importance in today's life.
- To understand the various components and materials related to Smart buildings.
- To be able to keep up with the current and future trends and challenges faced in the development of Smart building services.

COURSE CONTENT

Module 1: Introduction

Overview of intelligent interiors and use of electronics & IT equipment for creating interesting interiors. Use of technology to maximize the performance of fire alarms and security systems while at the same time minimizing costs. Incorporation of safety equipment such as CCTV etc aesthetically in the interiors.

Module 2: Workplace Automation

Intelligence with respect to workplace automation in an intelligent interior consists of the use of high – tech office automation systems to render the operation of a company more efficient.

Module 3: Automation of Interiors

Remote control in interiors, Managing and monitoring building efficiency from distance. Managing Security, HVAC etc from distance.

Module 4: **Intelligent Use of Energy**

Computerized system to minimize energy use in interiors; control light, airflow, air-conditioning, outdoor light entering the building heating and minimizing the energy consumption using technology.

Examination Scheme:

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
1991	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2614	Computer Vision Lab	2023
1992	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2701	Cloud Computing	2023
1993	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2702	Cloud Computing Lab	2023
1994	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2703	Blockchain Technology	2023
1995	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2704	Blockchain Technology Lab	2023
1996	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2705	Mobile Computing	2023
1997	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2706	Multimedia	2023
1998	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2739	Basics of Research Methodology, Ethics and Research Communication	2023
1999	131508	Bachelor of Computer Application (Honors/ Honors with Research)	NIFT2737	SIP/Internship/ Project/ Dissertation/Field Visit	2023
2000	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2801	Data Science	2023
2001	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2802	Data Science Lab	2023
2002	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2803	Machine Learning	2023
2003	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2804	Machine Learning Lab	2023
2004	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2805	Cyber Security	2023
2005	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2806	Software Defined Networking	2023
2006	131508	Bachelor of Computer Application (Honors/ Honors with Research)	NIFT2837	SIP/Internship/ Project/ Dissertation/Field Visit	2023
2007	131508	Bachelor of Computer Application (Honors/ Honors with Research)	DIFT2839	Data Analysis & Visualisation using Software	2023
2008	131450	Master of Computer Application	IFT4101	Data Communication and Computer Networks	2023
2009	131450	Master of Computer Application	IFT4102	Design and Analysis of Algorithm	2023
2010	131450	Master of Computer Application	IFT4103	Software Engineering	2023
2011	131450	Master of Computer Application	IFT4104	Computer Graphics and Multimedia Systems	2023
2012	131450	Master of Computer Application	IFT4105	Data Communication and Computer Networks Lab	2023
2013	131450	Master of Computer Application	IFT4106	Design and Analysis of Algorithm Lab	2023

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
2048	131038	Master of Science (Renewable Energy) Part-Time	RWP4202	Fabrication of Solar Cells: Material & Designing Aspects	2023
2049	131038	Master of Science (Renewable Energy) Part-Time	RWP4205	Solar Photovoltaic & Thermal Lab	2023
2050	131038	Master of Science (Renewable Energy) Part-Time	RWP4206	Risk Management in Renewable Energy Projects	2023
2051	131038	Master of Science (Renewable Energy) Part-Time	RWP4207	Wind Energy	2023
2052	131038	Master of Science (Renewable Energy) Part-Time	RWP4208	Fundamentals of Nuclear Power Generation-I	2023
2053	131038	Master of Science (Renewable Energy) Part-Time	RWP4301	Modelling and Simulation of Solar Thermal Systems	2023
2054	131038	Master of Science (Renewable Energy) Part-Time	RWP4303	Biomass	2023
2055	131038	Master of Science (Renewable Energy) Part-Time	RWP4335	Summer Internship Evaluation-I	2023
2056	131038	Master of Science (Renewable Energy) Part-Time	RWP4305	Designing of Solar Projects	2023
2057	131038	Master of Science (Renewable Energy) Part-Time	RWP4306	Large Scale Grid Integration of Renewable Energy Sources	2023
2058	131038	Master of Science (Renewable Energy) Part-Time	RWP4307	Wind Energy: Energy Conversion and Design of Turbines	2023
2059	131038	Master of Science (Renewable Energy) Part-Time	RWP4308	Fundamentals of Nuclear Power Generation-II	2023
2060	131038	Master of Science (Renewable Energy) Part-Time	RWP4407	Instrumental Techniques & Characterization	2023
2061	131038	Master of Science (Renewable Energy) Part-Time	RWP4408	Energy Storage	2023
2062	131038	Master of Science (Renewable Energy) Part-Time	RWP4404	Field Work-II/ Minor Project/ Seminar-II	2023
2063	131038	Master of Science (Renewable Energy) Part-Time	RWP4401	Financial Evaluation of Renewable Energy Systems	2023
2064	131038	Master of Science (Renewable Energy) Part-Time	RWP4405	Energy Access and Planning	2023
2065	131038	Master of Science (Renewable Energy) Part-Time	RWP4406	Thermoelectric Systems and Devices	2023
2066	131038	Master of Science (Renewable Energy) Part-Time	RWP4501	Solar and Wind Energy Meteorology	2023
2067	131038	Master of Science (Renewable Energy) Part-Time	RWP4505	Designing of Solar Rooftop PV System	2023
2068	131038	Master of Science (Renewable Energy) Part-Time	RWP4503	Solar Power Generation Lab	2023
2069	131038	Master of Science (Renewable Energy) Part-Time	RWP4535	Summer Internship Evaluation-II	2023

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
2514	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2803	Methods in Biology	2023
2515	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2804	Genetic Engineering	2023
2516	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2805	Genetics Engineering Lab	2023
2517	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2806	Molecular Diagnostics	2023
2518	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2807	Environmental Biotechnology	2023
2519	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	NBTH2837	SIP/Internship/ Project/ Dissertation/Field Visit	2023
2520	131551	Bachelor of Science (Honors/ Honors with Research) in Biotechnology	DBTH2839	Data Analysis & Visualisation using Software	2023
2521	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2101	Plant Diversity	2023
2522	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2102	Plant Diversity Lab	2023
2523	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2103	Animal Diversity	2023
2524	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2104	Animal Diversity Lab	2023
2525	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2201	Plant Anatomy & Physiology	2023
2526	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2202	Plant Anatomy & Physiology Lab	2023
2527	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2203	Animal Anatomy & Physiology	2023
2528	131791	Bachelor of Science (Honors/ Honors with Research) in Biological Science	DBLS2204	Animal Anatomy & Physiology Lab	2023

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
2697	13002	Master of Science (Biotechnology)	BTH4338	Seminar	2023
2698	13002	Master of Science (Biotechnology)	BTH4335	Summer Internship Evaluation	2023
2699	13002	Master of Science (Biotechnology)	BTH4314	Nanobiotechnology	2023
2700	13002	Master of Science (Biotechnology)	BTH4319	Advances in Plant Genomics	2023
2701	13002	Master of Science (Biotechnology)	BTH4325	Microbial Technology	2023
2702	13002	Master of Science (Biotechnology)	BTH4326	Protein Engineering	2023
2703	13002	Master of Science (Biotechnology)	BTH4327	Vaccines	2023
2704	13002	Master of Science (Biotechnology)	BTH4328	Cancer Biology	2023
2705	13002	Master of Science (Biotechnology)	BTH4437	Dissertation	2023
2706	13107	Master of Technology (Biotechnology)	BTE4101	Biochemistry & Metabolic Regulation	2023
2707	13107	Master of Technology (Biotechnology)	BTE4102	Genetics & Molecular Biology	2023
2708	13107	Master of Technology (Biotechnology)	BTE4103	Instrumentation & Research Methodology	2023
2709	13107	Master of Technology (Biotechnology)	BTE4104	Microbial Technology	2023
2710	13107	Master of Technology (Biotechnology)	BTE4105	Biostatistics	2023
2711	13107	Master of Technology (Biotechnology)	BTE4106	Biochemistry & Metabolic Regulation Lab	2023
2712	13107	Master of Technology (Biotechnology)	BTE4107	Genetics & Molecular Biology Lab	2023
2713	13107	Master of Technology (Biotechnology)	BTE4108	Microbial Technology Lab	2023
2714	13107	Master of Technology (Biotechnology)	BTE4111	Animal Biotechnology	2023
2715	13107	Master of Technology (Biotechnology)	BTE4112	Plant Cell, Tissue & Organ Culture	2023
2716	13107	Master of Technology (Biotechnology)	BTE4113	Animal Biotechnology Lab	2023
2717	13107	Master of Technology (Biotechnology)	BTE4114	Plant Cell, Tissue & Organ Culture Lab	2023
2718	13107	Master of Technology (Biotechnology)	BTE4201	Recombinant DNA Technology	2023
2719	13107	Master of Technology (Biotechnology)	BTE4202	Bioinformatics & Computational Biology	2023
2720	13107	Master of Technology (Biotechnology)	BTE4203	Biochemical Engineering	2023
2721	13107	Master of Technology (Biotechnology)	BTE4204	Environmental Biotechnology	2023
2722	13107	Master of Technology (Biotechnology)	BTE4205	IPR & Bioethics	2023
2723	13107	Master of Technology (Biotechnology)	BTE4206	Molecular Cell Biology	2023

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
3813	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2251	Basic Clinical Biochemistry	2023
3814	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2201	Basic Haematology	2023
3815	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2351	Applied Haematology	2023
3816	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2301	Systemic Bacteriology	2023
3817	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	SMLT2301	Laboratory Management	2023
3818	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	NMLT2335	Community Engagement Services	2023
3819	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2451	Analytical Clinical Biochemistry	2023
3820	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2401	Immunohematology and Blood Transfusion	2023
3821	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	SMLT2401	Clinical Visit	2023
3822	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2551	Applied Histopathology	2023
3823	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2501	Immunology and Serology	2023
3824	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2502	Applied Clinical Biochemistry	2023
3825	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	NMLT2537	SIP/Internship/ Project/ Dissertation/Field Visit	2023
3826	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2651	Clinical Parasitology and Entomology	2023
3827	131609	Bachelor of Science (Honors/ Honors with Research) in Medical Lab Technology	DMLT2601	Clinical Cytopathology	2023

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
5461	Minor Discipline	Dietetitics & Applied Nutrition	DDAN2605	Nutrigenomics	2023
5462	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2151	Biochemistry	2023
5463	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2251	Cell Biology & Genetics	2023
5464	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2351	Human Developmental Biology	2023
5465	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2451	Stem Cell Technology Basics	2023
5466	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2551	Fundamentals of Immunology	2023
5467	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2552	Fundamentals of Immunology Lab	2023
5468	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2501	Cancer Biology & Cancer Therapeutics	2023
5469	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2651	Stem Cell & Regenerative Medicine	2023
5470	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2601	Genomics & Proteomics	2023
5471	Minor Discipline	Molecular Medicine and Stem Cell Technology	DSCT2602	Precision and Personalized Medicine	2023
5472	Minor Discipline	Medical Laboratory Technology	DMLT2151	Anatomy and Physiology	2023
5473	Minor Discipline	Medical Laboratory Technology	DMLT2251	Basic Clinical Biochemistry	2023
5474	Minor Discipline	Medical Laboratory Technology	DMLT2351	Applied Heamatology	2023
5475	Minor Discipline	Medical Laboratory Technology	DMLT2451	Analytical Clinical Biochemistry	2023
5476	Minor Discipline	Medical Laboratory Technology	DMLT2551	Applied Histopathology	2023
5477	Minor Discipline	Medical Laboratory Technology	DMLT2501	Immunology and Serology	2023
5478	Minor Discipline	Medical Laboratory Technology	DMLT2651	Clinical Parasitology and Entomology	2023
5479	Minor Discipline	Medical Laboratory Technology	DMLT2601	Clinical Cytopathology	2023
5480	Minor Discipline	Medical Laboratory Technology	DMLT2602	Immunopathology and Molecular Biology	2023
5481	Minor Discipline	Hospital Administration	DMHA2151	Introduction to Hospital Management	2023
5482	Minor Discipline	Hospital Administration	DMHA2251	Essentials of Healthcare System	2023

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
Amity University Haryana
Manesar, Gurugram
Haryana-122413

Registrar
Amity University Haryana
Manesar Gurgaon-122413

List of courses 2023-24

Sl. No.	Programme Code	Name of Programme	Course Code	Course Name	Year
5483	Minor Discipline	Hospital Administration	DMHA2351	Basic Epidemiology	2023
5484	Minor Discipline	Hospital Administration	DMHA2451	Introduction to Healthcare Economics	2023
5485	Minor Discipline	Hospital Administration	DMHA2551	Basics of Quality Management	2023
5486	Minor Discipline	Hospital Administration	DMHA2501	Introduction to Medical & Health Laws	2023
5487	Minor Discipline	Hospital Administration	DMHA2651	Basics of Hospital Management Information System	2023
5488	Minor Discipline	Hospital Administration	DMHA2601	Introduction to Health Insurance and Medical Tourism	2023
5489	Minor Discipline	Hospital Administration	DMHA2602	Basics of Disaster Management	2023
5490	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2151	Introduction to Disaster Management	2023
5491	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2251	Resilience Building for Built Environment	2023
5492	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2351	Emergency Management	2023
5493	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2451	Rehabilitation Reconstruction and Recovery	2023
5494	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2551	Climate Change Adaptations and Sustainable Development	2023
5495	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2501	Geoinformatics in Disaster Management	2023
5496	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2651	Urban Disasters	2023
5497	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2601	Advanced Technologies for Disaster Management	2023
5498	Minor Discipline	Disaster Management & Sustainable Built Environment	DDSM2602	Institutional Framework for Disaster Management	2023
5499	Minor Discipline	Interior Design	DIND2151	Principles & Elements of Design	2023
5500	Minor Discipline	Interior Design	DIND2251	Anthropometry & Furniture Design	2023
5501	Minor Discipline	Interior Design	DIND2351	Vernacular Art and Designs	2023
5502	Minor Discipline	Interior Design	DIND2451	Computer Applications-I	2023
5503	Minor Discipline	Interior Design	DIND2551	Interior Design Services	2023
5504	Minor Discipline	Interior Design	DIND2501	Computer Applications-II	2023

Prof. (Dr.) Anil Kumar
Deputy Dean Academics
