1- BACKGROUND

"KSCF" and "Amity Universities" are referred to collectively as "parties" or individual as "Party." Both KSCF and Amity Universities share interest in Research and Academics.

The two parties have identified that a stronger relationship between them is mutually beneficial and wish to establish a more formal relationship with each other.

WHEREAS, Amity University is a leading educational group of India where 1,50,000 students are pursuing various courses across 1,000 acres of high tech campuses with more than 5,000 faculty members. Amity Universities are among the many reputed educational and research institutions sponsored by **Ritnand Balved Educational Foundation** (henceforth, RBEF), the umbrella body for all Amity institutions, including Amity group of universities. Amity University has been included prominently in the NIRF and NAAC rankings. The Amity Science Technology & Innovation Foundation (ASTIF) was established under RBEF, encompassing all Amity universities with an aim of helping India become a global leader in the field of Science and Technology. ASTIF undertakes basic, strategic, applied and adaptive research in various disciplines of applied and social science, including Agriculture & Food Science and Technology in cutting edge areas of Science and Technology.

WHEREAS, KSCF envisions a world where every child is free, safe, healthy and educated. The Foundation under the aegis of its Founder and Chairperson, Kailash Satyarthi works globally to uphold the rights of all children and ending violence against them. The Foundation has been at the vanguard of policy advocacy interventions with law makers, both in India as well as globally.

These endeavors have resulted in several path breaking national and international laws against child sexual abuse, trafficking of children for forced labour and for promoting universal rights of children ensuring their freedom, safety, health and education.

The Foundation also plays an active role in engaging with the law enforcement agencies and aids them with training, sensitization and capacity-building for effective implementation of both national as well as international laws related to children. It also works actively towards building the capacity of other stakeholders like corporates, grassroots organizations/ civil society in order to help them unleash their true potential for contributing towards a child-friendly world.
Recognizing the youth as one of the major and most important prime-movers of positive social transformation in the world, the Foundation effectively engages with this cohort for further protecting the rights of all children.

KSCF also serves as a global platform to recommend best practices towards implementation of child related laws, charting out policy/regulatory frameworks with the help of various State actors, conducting research providing evidence for further shaping up the policy landscape in the best interest of children and bridging the trust deficit between various stakeholders, so that everybody contributes towards building a child-friendly world.

WHEREAS both parties realize that the children in the world face seemingly insurmountable problems, beginning from parental neglect to violence in school or at home, or exploitation as cheap labor options in different sectors, or being used as pawns in armed conflict situations, or being subjected to sexual exploitation and assaults of different kinds as well as becoming victims of cybercrimes. All such situations result in a stilted childhood where these innocent lives face untold sufferings and miseries. Thus, the need for creating a greater awareness for Child Rights and Child Protection and a more effective implementation of the laws related to children cannot be over-emphasized.

2- COMMENCEMENT

2.1. **This memorandum of Understanding (MoU)** shall be effective from the date of signing and shall continue for a period of Five Years, unless terminated earlier by one of the parties with a legal notice of three months.

(v) Internationalization at Home & Global Esteem.

3.2. It is desired to create this MoU with KSCF under the strategies (iii) and (iv). It is hoped that the projects and programmes to be undertaken jointly by the Parties would also result in filling the Research Gaps as mentioned in (ii) above, about which Hon'ble–Nobel Laureate Shri Kailash Satyarthi has reminded the academic community on several occasions.

3.3. Through this collaboration between KSCF and Amity Group of Universities, it is proposed to set up a ***Kailash Satyarthi Centre for Child Rights*** **[KS-CCR]** within the fold of **Amity University Haryana** that would envision to work towards securing a free, safe and educated childhood for all our young citizens in India and create a moral force to stand by the abused children and protect their rights to a dignified childhood. **The academic and social outreach programmes under this MoU would, however, be followed by all other Amity Universities.**

Memorandum of Understanding (MoU) for Shodhganga/Shodhgangotri

(A Repository of Theses and Dissertations submitted to the Universities in India)

This Memorandum of Understanding (MoU) is made and entered into on 5 (Day) 05 (Month) 2019 (Year) between the INFLIBNET Centre, an IUC of University Grants Commission located at Gandhinagar, hereinafter referred to as "INFLIBNET" and Amity University Haryana (University / ~~Deemed University~~ / Inter-University Centre), here in after referred to as the '**University**'.

WHEREAS, INFLIBNET Centre, an Inter-university Centre of the University Grants Commission, as its mandate, promotes open access to scholarly content generated in universities. The Centre has computers, network, software infrastructure and technical know-how required for hosting electronic versions of theses and dissertations in open access with interface to search, retrieve and access these content.

WHEREAS Amity University Haryana (University / ~~Deemed University~~ / Inter University Centre) has agreed to take part in the process of digitisation of old theses and dissertations (not available in computerized machine-readable format) and building-up of digital repository and to promote, share and host its ETD in 'Shodhganga: A reservoir of Indian theses submitted to the Universities in India' and other universities in open access. 'Shodhganga' is a name coined by INFLIBNET Centre for refering to the respository of Indian Electronic Theses and Dissertations. The word "Shodh" originates from Sanskrit and stands for research and discovery. The 'Ganga' is the holiest, longest and largest river in Indian subcontinent which has held heart of its people captive and drawn millions of people to its banks since the dawn of history. The Ganga is the symbol of India's age-long culture and civilization, ever changing, ever flowing, ever loved and revered by its people. "Shodhganga", a repository of theses and dissertations submitted to Indian universities, is expected to keep growing to a formidable size as more and more researchers from India submit their research works to this ever growing reservoir. Under the initiative called "ShodhGangotri", research scholars / research supervisors in universities are requested to deposit electronic version of approved synopsis submitted by research scholars to the universities for registering themselves for the Ph.D programme.

This Memorandum of Understanding (MoU) defines responsibilities, liabilities and commitments of the institutions involved to ensure proper system implementation, to meet the objectives pertaining to submission and access to Electronic Theses and Dissertations as envisaged by the UGC vide its Notification (Minimum Standards & Procedure for Award of M.Phil/Ph.D Degree), Regulation, 2009 dated 1st June, 2009.

NOW, THEREFORE, in consideration of the mutual agreements herein contained, INFLIBNET and the University agree to the following terms and conditions:

I. **INFLIBNET Centre**

---

1. PURPOSE OF COOPERATION

The scientific goals of the National Aeronautics and Space Administration (NASA) include a more detailed understanding of global atmospheric change phenomena, with a particular emphasis on climate research and the assessment of air quality. To these ends, NASA has established a global network of Sun photometers, and the Aerosol Robotic Network (AERONET) in cooperation with a wide range of international partner agencies and institutions. Sun photometers are used to measure water vapor and aerosol optical properties. Under the proposed agreement, NASA and Amity University Haryana (AUH) (hereinafter referred to individually as "Party" or jointly as the "Parties") will establish one or more Sun photometers at mutually agreed sites. The inclusion of these stations within the global AERONET will improve the understanding of the properties and concentration of aerosols and clouds, and their impact on both global and regional scales. Another objective of this cooperation is to encourage scientists from both NASA and AUH to develop research programs using data collected by AUH along with data available from the global AERONET database located at NASA's Goddard Space Flight Center in Greenbelt, Maryland.

Dear Prof Yadav,

Greetings from University of Bengkulu (UNIB)!

On behalf of University of Bengkulu, we would like to send our highly appreciation for Amity University Haryana (AUH) for the willingness to build collaborations between AUH and UNIB.

University of Bengkulu is located in Sumatra, Indonesia and it was established in 1982. It now has 8 faculties (Agriculture, Engineering, Mathematics and Natural Sciences, Medicines and Health Sciences, Law, Political and Social Sciences, Economic and Business, and Education). Currently, there are more than 15000 undergraduate students, 2000 master students and more than 100 PhD students which are currently studying at UNIB.

As part of efforts to improve international exposure of our university, we are building collaborations with many universities in many parts of the world. Collaborations with many institutions will allow us to learn more in managing our university and linking up with resources available around the world for education. Then, we can work together in overcoming challenges for education in globalization era. So far, major collaborations with universities outside Indonesia that we have done include student and staff exchanges and research collaborations.

Therefore, we hope that the signing of this Memorandum of Understanding (MoU) will become a foundation for further collaborations between Amity University Haryana and University of Bengkulu, especially between Amity School of Applied Sciences, AUH and Faculty of Mathematics and Natural Sciences, UNIB. Attached is the MoU document that has been signed by UNB's side. We would like to ask you to process the MoU at AUH for signing and please send one copy back to us.

We appreciate your support and understanding.

Sincerely yours,
