**Organised interaction with DSP Crime for awareness on social issues on 4.3.2017**

Dr. Rachana Kathal, Program Officer, NSS & RRC, AUMP

Program Outcome: Honourable Guest interacted informally with the volunteers and made them aware about the functioning of Police, welfare activities of police, crime in the society, hidden challenges for the police and the public responsibilities. He emphasized that Police are one of the most ubiquitous organisations of the society. The policemen, therefore, happen to be the most visible representatives of the government. In an hour of need, danger, crisis and difficulty, when a citizen does not know, what to do and whom to approach, the police station and a policeman happen to be the most appropriate and approachable unit and person for him. The police are expected to be the most accessible, interactive, and dynamic organisation of any society. Their roles, functions and duties in the society are natural to be varied, and multifarious on the one hand; and complicated, knotty, and complex on the other. Broadly speaking the twin roles, which the police are expected to play in a society are maintenance of law and

# Fund Raising activity for Visually Challenged Girls
# 5-10 March, 2017

A fund raising activity for visually challenged girls was organized by NSS AUMP. The AUMP affirms its commitment to empower visually challenged girls become self-reliant by providing comprehensive rehabilitation, education and employment opportunities. AUMP makes efforts to help visually challenged girls to gain self-employment by fund raising activity for such trades as Petty Shops, and other small-scale businesses.

India is home to world's largest visually impaired population housing over 50 lakh people. Our country also tops the chart for the largest population of corneal blind in the world. We are a long way from ensuring an inclusive society for our visually challenged citizens because of taboos that exist around organ donation, leading to corrective surgeries still being a far-fetched reality. However, a few individuals, organisations, NGOs, and voluntary groups are leading the way in setting exemplary standards of inclusion.

The fund raising activity was held on 5 to 10 march, 2017. This activity was regularly conducted for 4 days in AUMP campus and different places of Gwalior. In this activity, 10 teachers and 200 students participated. NSS AUMP is extremely thankful to all those who have supported this activity and have sympathies for visually challenged girls to stand their own feet.

Chairman, NSS, Major Gen. Dr. S. C. Jain,VSM**, Director, Amity School of Engineering & Technology, Dr. Rachana Kathal, PO, NSS AUMP and other faculty members appreciate the volunteers efforts and contribution to complete this task.

# Organized Social Activity Project with Cashless Economy communication to the society in markets, Slums

NSS- AUMP was organized Social activity Project with Cashless Economy communication to the society in markets, Slums.

The programme aim was to aware the people about the cashless economy communication and instill the information regarding without using cash they can do any purchasing.

Reducing Indian economy's dependence on cash is desirable for a variety of reasons. India has one of the highest cash to gross domestic product ratios in the word, and lubricating economic activity with paper has costs. According to a 2014 study by Tufts University, The Cost Of Cash In India, cash operations cost the Reserve Bank of India (RBI) and commercial banks about Rs21,000 crore annually. Also, a shift away from cash will make it more difficult for tax evaders to hide their income, a substantial benefit in a country that is fiscally constrained.

Governments across the world have stepped up their fight against cash. Cash is being increasingly viewed as a curse that mankind needs to rid itself of. The goal is to move towards a cashless economy. The closer an economy is towards this goal, the more successful it is considered to be. However, the concept of cashless economy is not understood by many. It is still the prerogative a few economists and academicians.

Social activity Project with Cashless Economy communication to the society in markets, Slums was held on 4 to 5 march, 2017. In this activity, 10 teachers and 68 students participated. NSS AUMP is extremely thankful to all those who have supported this activity. Chairman, NSS, Major Gen. Dr. S. C. # "HELP KERALA"

**A Report on Kerala Relief initiative taken by Amity Institute of Behavioural and Allied Sciences**

The Kerala flood in India has been making devastating headlines around the world. Kerala had witnessed the worst flooding in 100 years. Over 2,086 mm of rainfall has hit this region in the space of two weeks. So far over 360 lives have been lost and over 5000 relief camps have accommodated over 1.2 million people. The rain impacted hundreds of villages, causing extensive damage and displacement in Kerala. Rescue operations are still continued to date.

For helping the people accommodated in the rescue camps and restore their life back to normal, students of Amity Institute of Behavioural and Allied Sciences, Amity University Madhya Pradesh, had taken the initiative to help under Social Activity Project (SAP Programmne) and joined their hands together . The students had planned the campaign with the help of hon'bleVice-Chancellor Lt. Gen.V.K. Sharma. AVSM (Retd.), Pro Vice-Chancellor Prof. Dr. M.P. Kaushik, Officiating Head of Institute Dr. Deepa Pandey and all the students and faculty members of the department. At the university level, a huge campaign was run for contributions from the university students and staff. As the students and faculties were in contact with the Wayanad collectrate office Kerala for their requirements.So, this way as per their requirement every member of AU MP contributed in the form of daily needs items. Some of people have contributed by cash deposits.The collected money was used to buy the items desired by the Flood Relief Camp.By this campaign people from outside of the AU MP also contributed like general storekeepers, who provided some free goods during the purchases for Kerala relief. As it was decided that instead of sending money, the daily needs item will more helpful for them. The items we have sent were like clothes, medicines, sanita

soaps, shampoos ,detergents, ORS, packed food, candles and disposables. Also items which were necessary for rehabilitating the life of Kerala's children i.e. stationary were sent, which were included a set of 50 new school bags, Tiffin's, notebooks, pencils, erasers, and sharpeners.

Finally, 30 boxes were made ready by the students. They were properly packed and sent to the Gwalior Railway station so that the same can be sent to "The relief centres in Waynad. As a circular published by the government were, the if the any of material send from the particular district under the approval of District Magistrate to the district Magistrate of any of the city in Kerala would be sent for free of courier charges. Therefore students have themselves approached the District Magistrate of Gwalior to get the approval under the specified guidelines. With the approval of D.M Gwalior, the boxes were finally sent to The Relief centres of District Collect-orate, Waynad.

**The Team is grateful to all the contributions and support that was made for helping to the flood victims to who have lost all most everything in this disaster.**

Water is the elixir of life. It sustains the growth and development of various organisms. Without it, life on Earth would have been impossible. If we continue to exploit our water resources, then a time will come when we will face a major global water scarcity and water wars will follow it. Rajendra Singh of Alwar district of Rajasthan understood it very well. His attempts at water management and conservation are a testimony to this fact. He won the Magsaysay Award in 2001 and Stockholm Water Prize in 2015 for his water conservation activities. He bagged the title of 'Waterman of India' for his inspirational efforts. To sensitize the students about the importance of rain water a virtual video lecture of the Waterman of India was conducted on MS Teams. The students along with the faculty took active participation in understanding the need to save rain water.
