5. Any Other

This workshop focused specially in two sectors, first is telling about importance and relevance of energy efficiency for achieving green building and second is about electronics goods and accessories for optimum or maximise use of electrical energy. In this workshop all the component and portions of building which are indirectly or directly impact on energy consumption has discussed in detail like planning, orientation of space, location of opening, and material of outer fabric of building etc. Similarly, discussion was on the how we can replace older equipment to new more energy efficient goods and simultaneously if we constructing new building, choosing right equipment. As an Architect we are designer of building and we also provide solution for all the system required for running and maintain the building. So, this workshop is helpful for providing knowledge for explaining new items, equipment which are recently launched in market and helpful in energy efficient design.
