Title:	Workshop on Cosmetic Formulation and Entrepreneurship
Audience: (Composition; such as Students, Faculty along with their Department, Program etc.)	Students
Number of Participants:	30
Brief Description: (A Paragraph)	The workshop intended to provide a comprehensive survey of fundamental processes viz. formulations, analysis, production, packaging to the cosmetic industry. The course emphasized on the current trends in the selection of cosmetic raw materials;and how their properties could be utilized in the formulation of stable functional systems. Workshop provided a better understanding of ingredients to the performance of finished product formulations as well as

green formulations. Emphasis had been given on recognizing and dealing with problem areas associated with preparation of various types of cosmetic products, their packaging and storing. Quality control, safety considerations, ICH guideline and other pertinent matters which can influence ingredient selection were discussed. Marketing and promotion of cosmetics were discussed.
