Outcome of the Event with Time Line (Proposed/Achieved)

1. Outcome related to Academia Connect

From the academic point of view Enterprise Resource Planning is a system that saves lots of time and minimizes the frequency of errors. With this comes out the best results which are quite helpful for running schools, colleges and universities. Important Modules for colleges are fee management, examination, HR, hostel, inventory and many more. And most importantly students can get jobs in companies based on ERP systems.

2. Outcome related to Industry Connect

ERP is the current trend of industry. ERP software can improve productivity, increase efficiencies, decrease costs and streamline processes. So students are benefitted from the talk as they get to know why business cannot flourish without ERP.

3. Outcome related to Students Learning &Grooming

ERP system is effective for the students as they can relate the day to day activities with ERP They can learn the techniques using different software such as SAP, Taleo in Barclays is the live example of ERP in business. Through the lecture the students will be able to differentiate between the traditional way and ERP system.

4. Outcome related to Society outreach

In Education system ERP software plays a vital role. ERP lifecycle implementation is taught to students at graduation level. Students can have their own ERP systems and they can vend those software's to clients.

Glimpses of the event
