

Carl Zeiss, Saidabad, New Delhi visit report

17th November 2018

The visit to the Carl Zeiss from Amity University Haryana took place with 22 students of Masters of Optometry (2017-19) and 1 assistant professor, Mr. PK Atherya, from the department of Optometry and Vision Science and Ms Ruby of our CRC department.

Diwan Sing Negi, the regional business head along with Ms Ruchika and Ms Nikita, product manager at Carl Zeiss, welcomed us.

Along with the tea, the session ran with a brief description about the Carl Zeiss from Ms Ruchika and Ms Nikita. We were well informed about the products of the Carl Zeiss and specifically the optometry related products like various lenses were discussed in details. The session was really interactive and taught us all about the reasons of prescribing the various features of the lenses and also why to choose Zeiss.

The Lab visit was made in 2 batches and the whole processing of finished lenses were shown to us and our doubts were cleared too. Seeing the processing from that near was really something great.

After the marvellous lunch from Haldirams, sponsored by Carl Zeiss we had a small session in which we were made to understand the importance of the use of lay man terms in dispensing through a mind game and also we were shown a 400nm UV tester, which is rarely available in opticals to test the UV protection quality in lenses.

On the placement prospective the interested students were called for the group discussion as their first round.

With a cup of coffee and warm thanks from all of us the session was closed with lots of new knowledge in the minds.
